(iii) Liquidation of unliquidated claims at a value other than their estimated value;

(iv) Recovery of property; and

(v) Deficits generated by the continued operation of accounts after the primary liquidation date which cannot be fully adjusted under paragraph (d) of this section.

(d) *Adjustments to funded balance for operations subsequent to the primary liquidation date.* If accounts of a customer contain commodity contracts which remain open subsequent to the primary liquidation date, the funded balance for each class must be adjusted until liquidation or transfer of all such open commodity contracts of that customer of the same class, as follows:

(1) Unrealized and realized gains and any receipts of margin with respect thereto must be added to the funded balance;

(2) Unrealized and realized losses, and the normal costs attributable to the payment of commissions, brokerage, interest, taxes, storage, transaction fees and other costs and charges lawfully incurred with respect to the maintenance or liquidation of such open commodity contracts, and any distributions must be subtracted from the funded balance; and

(3) Subject to claims against the trustee for failure to liquidate, any deficit which is not recovered from the customer on whose behalf it is incurred must be charged against the funded balance of each account which remained open on the date the deficit occurred in the same proportion as the funded balance of each account bears to all the funded balances of all accounts which remained open on that date.

(e) *Valuation.* In computing net equity, commodity contracts and other property held by or for a commodity broker must be valued as provided in this paragraph (e): *Provided, however,* That if identical commodity contracts, securities, or other property are liquidated on the same date, but cannot be liquidated at the same price, the trustee may use the weighted average of the liquidation prices in computing the net equity of each customer holding such contracts, securities or property.

(1) *Exchange-traded contracts.* The value of an open commodity contract which is traded on a board of trade shall be equal to the settlement price as of the close of business on the board of trade upon which it is traded: *Provided,* That if such contract is transferred its value shall be determined at the time of its transfer: and *Provided further,* That if such contract is liquidated, its value shall be equal to the net proceeds of liquidation.

(2) *Principal contracts.* The valuation date of principal contracts which are not transferred shall be the date of the order for relief unless there is specific property which constitutes cover by the principal for the principal contract in which case it shall be the date of liquidation of the cover. For purposes of valuing contracts for which there is no established secondary market:

(i) *Cash price series approved by Commission.* The market value of the physical commodity which is the subject of a principal contract shall be computed using a cash price series approved by the Commission for use by the dealer option grantor, in the case of dealer options, and by the leverage transaction merchant, in the case of leverage contracts.

(ii) *No cash price series approved by Commission.* If no applicable cash price series has been submitted to the Commission, or if such a cash price series has been submitted, but has not been approved by the Commission, the market value of the physical commodity which is the subject of a principal contract shall be equal to the lesser of:

(A) The market value of the physical commodity as of the close of business on the local cash market most proximate to the debtor's principal place of business; or

(B) The spot month settlement price on a contract market which trades contracts in that physical commodity most proximate to the debtor's principal place of business: *Provided,* That where there is more than one local market as described in paragraphs (e)(2)(ii) (A) or (B) of this section, the trustee should use the most active market.

(iii) *Special rule for valuing dealer options.* A dealer option which is in-the-money will be deemed to have been exercised for purposes of determining its value which shall be equal to the greater of:

(A) The in-the-money amount; or

(B) The premium paid for such option divided by the number of days contained in the option period and multiplied by the number of days remaining in such period on the liquidation date: *Provided,* That in the trustee's sole discretion, the trustee may reduce such value to an amount which does not exceed the average of the premiums recently paid for similar options granted by the same grantor. Any time value not reflected in this computation claimed by a customer must be treated as a general creditor's claim.

(iv) *Special rule for valuing leverage contracts.* Notwithstanding paragraphs (e)(2) (i) and (ii) of this section, if the records of the debtor are not sufficient to substantiate customer claims for profits and to identify the owners of contracts with losses, the liquidation value of a leverage contract shall be deemed to be an amount equal to the total deposit made by a customer in respect to such contract.

(3) *Bucketed contracts.* The value of a commodity contract which has not been established in fact shall be deemed to be equal to the value of the total deposit made by a customer in respect to such contract.

(4) *Securities.* The value of a listed security shall be equal to the closing price for such security on the exchange upon which it is traded. The value of over-the-counter securities traded pursuant to the National Association of Securities Dealers Automated Quotation system shall be equal, in the case of a long position, to the closing bid price and, in the case of a short position, to the closing asking price. The value of all other over-the-counter securities shall be equal in the case of a long position, to the average of the bid prices for long positions, and in the case of a short

position, to the average of the asking prices for the short positions. If liquidated prior to the primary liquidation date, the value of such security shall be equal to the net proceeds of its liquidation. Securities which are not publicly traded shall be valued by the trustee subject to approval of the court, using such professional assistance as the trustee deems necessary in its sole discretion under the circumstances.

(5) *Property.* Cash commodities held in inventory, as collateral or otherwise, shall be valued at their fair market value. Subject to the other provisions of this paragraph (e), all other property shall be valued by the trustee subject to approval by the court, using such professional assistance as the trustee deems necessary in its sole discretion under the circumstances: *Provided, however,* That if such property is sold, its value for purposes of the calculations required by this part shall be the net proceeds of such sale: *Provided further,* That the sale is made in compliance with all applicable statutes, rules and orders of any court or governmental entity with jurisdiction thereover .

§ 190.08 Allocation of property and allowance of claims.

The property of the debtor's estate must be allocated among account classes and between customer classes as provided in this section. The property so allocated will constitute a separate estate of the customer class and the account class to which it is allocated, and will be designated by reference to such customer class and account class.

(a) *Scope of customer property.* (1) Customer property includes the following:

(i) All cash, securities, or other property or the proceeds of such cash, securities or other property received, acquired, or held by or for the account of the debtor, from or for the account of a customer, including a non-public customer, which is:

(A) Property received, acquired or held to margin, guarantee, secure, purchase or sell a commodity contract;

(B) Open commodity contracts;

(C) Warehouse receipts, bills of lading, or other documents of title or property held or acquired by the debtor to fulfill a commodity contract;

(D) Profits or contractual rights accruing to a customer as the result of a commodity contract;

(E) The full proceeds of a letter of credit if such letter of credit was received, acquired or held to margin, guarantee, secure, purchase or sell a commodity contract;

(F) Property hypothecated under § 1.30 of this chapter to the extent that the value of such property exceeds the proceeds of any loan of margin made with respect thereto, and

(ii) All cash, securities, or other property which:

(A) Is segregated on the filing date;

(B) Is a security owned by the debtor to the extent there are customer claims for securities of the same class and series of an issuer;

(C) Is specifically identifiable to a customer;

(D) Is property of a type described in paragraph (a)(1)(i)(A) of this section which has been withdrawn and subsequently is recovered by the avoidance powers of the trustee;

(E) Represents recovery of any debit balance, margin deficit, or other claim of the debtor against a customer account;

(F) Was unlawfully converted but is part of the debtor's estate;

(G) Is property of the debtor that any applicable law, rule, regulation, or order requires to be set aside for the benefit of customers, unless including such property in the customer estate would not significantly increase the customer estate;

(H) Is property of the debtor's estate recovered by the Commission in any proceeding brought against the principals, agents, or employees of the debtor;

(I) Is proceeds from the investment of customer property by the trustee pending final distribution; or

(J) Is cash, securities or other property of the debtor's estate, including the debtor's trading or operating accounts and commodities of the debtor held in inventory, but only to the extent that the property enumerated in paragraphs (a)(1)(i)(E) and (a)(1)(ii)(A) through (a)(1)(ii)(H) of this section is insufficient to satisfy in full all claims of public customers.

(2) Customer property will not include:

(i) Claims against the debtor for damages for any wrongdoing of the debtor, including claims for misrepresentation or fraud, or for any violation of the Act or of the regulations thereunder;

(ii) Other claims for property which are not based upon property received, acquired or held by or for the account of the debtor, from or for the account of the customer;

(iii) Forward contracts;

(iv) Property delivered to or from a customer to or by another customer to fulfill a commodity contract held for or on behalf of either customer by the debtor if such delivery is effected pursuant to § 190.05 by a commodity broker other than the debtor;

(v) Property deposited by a customer with a commodity broker after the entry of an order for relief which is not necessary to meet the maintenance margin requirements applicable to the accounts of such customer; and

(vi) Property hypothecated pursuant to § 1.30 to the extent of the loan of margin with respect thereto.

(b) *Allocation of property between customer classes.* No portion of the customer estate may be allocated to pay non-public customer claims until all public customer claims have been satisfied in full. Any property segregated on behalf of non-public customers must be treated initially as part of the public customer estate and allocated under paragraph (c)(2) of this section.

(c) *Allocation of property among account classes.*—(1) *Segregated property.* Subject to paragraph (b) of this section, property held by or for the account of a customer, which is segregated on behalf of a specific account class, or readily traceable on the filing date to customers of such account class, must be allocated to the customer estate of the account class for which it is segregated or to which it is readily traceable.

(2) *All other property.* Money, securities and property received from or for the account of customers on behalf of any account class which is received on behalf of the customer estate and which cannot be allocated in accordance with paragraph (c)(1) of this section, must be allocated as of the primary liquidation date in the following order:

(i) To the estate of the account class for which, after the allocation required in paragraph (c)(1) of this section, the percentage of each public customer net equity claim which is funded is the lowest, until the funded percentage of net equity claims of such class equals the percentage of each public customer's net equity claim which is funded for the account class with the next lowest percentage of the funded claims; and then

(ii) To the estate of the two account classes referred to in paragraph (c)(2)(i) of this section so that the percentage of the net equity claims which are funded for each class remains equal until the percentage of each public customer net equity claim which is funded equals the percentage of each public customer net equity claim which is funded for the account class with the next lowest percentage of funded claims, and so forth, until the percentage of each public customer net equity claim which is funded is equal for all classes of accounts; and then,

(iii) Among account classes in the same proportion as the public customer net equity claims for each such account class bears to the total of public customer net equity claims of all account classes until the public customer claims of each account class are paid in full; and, thereafter,

(iv) To the non-public customer estate for each account class in the same order as is prescribed in paragraphs (c)(2) (i) to (iii) of this section for the allocation of the customer estate among account classes.

(d) *Distribution of customer property.*—(1) *Return or transfer of specifically identifiable property other than a commodity contract.* Specifically identifiable property other than an open commodity contract not required to be liquidated under § 190.02(f)(2) may be returned or transferred on behalf of the customer to which it is identified:

(i) If it is margining an open commodity contract, only if cash is first deposited with the trustee in an amount equal to the greater of the full fair market value of such property on the return date or the balance due on the return date on any loan by the debtor to the customer for which such property constitutes security; or

(ii) If it is not so margining an open contract, at the option of the customer, either pursuant to the terms of subparagraph (i) of this paragraph, or pursuant to the following terms: such customer first deposits cash with the trustee in an amount equal to the amount by which the greater of the value of the specifically identifiable property to be transferred or returned on the date of such transfer or return or the balance due on the return date on any loan by the debtor to the customer for which such property constitutes security, together with any other disbursements made, or to be made, to such customer, plus a reasonable reserve in the trustee's sole discretion, exceeds the estimated aggregate of the funded balances for each class of account of such customer less the value on the date of its transfer or return of any property transferred or returned prior to the primary liquidation date with respect to the customer's net equity claim for such account; *Provided,* That adequate security for the nonrecovery of any overpayments by the trustee is provided to the debtor's estate by the customer.

(2) *Transfers of specifically identifiable commodity contracts under Section 766 of the Bankruptcy Code.* Any specifically identifiable commodity contract which is not required to be liquidated under § 190.02(f)(1) or § 190.03(b), and which is not otherwise liquidated, may be transferred on behalf of a customer: *Provided,* That such customer must first deposit cash with the trustee in an amount equal to the amount by which the equity to be transferred to margin such contract together with any other transfers or returns of specifically identifiable property or disbursements made, or to be made, to such customer, plus a reasonable reserve in the trustee's sole discretion, exceeds the estimated aggregate of the funded balances for each class of account of such customer less the value on the date of its transfer or return of any property transferred or returned prior to the primary liquidation date with the respect to the customer's net equity claim for such account: and, *Provided further,* That adequate security for the nonrecovery of any overpayments by the trustee is provided to the debtor's estate by the customer.

(3) *Distribution in kind of specifically identifiable securities.* If any securities of a customer would have been specifically identifiable under § 190.01(kk)(6) if that customer had had no open commodity contracts, the customer may request that the trustee purchase or otherwise obtain the largest whole number of like-kind securities, with a fair market value (inclusive of transaction costs) which does not exceed that portion of such customer's allowed net equity claim that constitutes a claim for securities, if like-kind securities can be purchased in a fair and orderly manner.

(4) *Proof of customer claim.* No distribution shall be made pursuant to paragraphs (d)(1) and (d)(3) of this section prior to receipt of a completed proof of customer claim as described in § 190.02(d).

(5) *No differential distributions.* No further disbursements may be made to customers for whom transfers have been made pursuant to § 190.06 and paragraph (d)(2) of this section, until a percentage of each net equity claim equivalent to the percentage distributed to such customers is distributed to all public customers. Partial distributions, other than the transfers referred to in § 190.06 and paragraph (d)(2) of this section, made prior to the final net equity determination date must be made pursuant to a preliminary plan of distribution approved by the court, upon notice to the parties and to all customers, which plan requires adequate security to the debtor's estate for the nonrecovery of any overpayments by the trustee and distributes an equal percentage of net equity to all public customers.

(6) *Margin Payments.* The trustee may make margin payments on behalf of any account which do not exceed the funded balance of that account.

§ 190.09 Member property.

(a) *"Member property".* "Member property" means, in connection with a clearing organization bankruptcy, the property which may be used to pay that portion of the net equity claim of a member which is based on its house account.

(b) *Scope of member property.* Member property shall include all money, securities and property received, acquired, or held by a clearing organization to margin, guarantee or secure the proprietary account, as defined in § 1.3(y) of this chapter, of a clearing member: *Provided, however,* That any guaranty deposit or similar payment or deposit made by such member and any capital stock, or membership of such member in the clearing organization shall also be included in member property after payment in full of that portion of the net equity claim of the member based on its customer account and of any obligations due the clearing organization which may be paid therefrom in accordance with the by-laws or rules of the clearing organization, including obligations due from the clearing organization to customers or other members.

§ 190.10 General.

(a) *Notices.* Unless instructed otherwise, all mandatory or discretionary notices to be given to the Commission under this Part shall be directed to the Washington, D.C. headquarters of the Commission (2033 K Street, NW., Washington, D.C. 20581) and addressed to the Secretariat, for the attention of the Director of the Division of Trading and Markets. All such notices shall be in writing and shall be given by telegram or other similarly rapid means of communication. For purposes of this Part, notice to the Commission shall be deemed to be given only upon actual receipt.

(b) *Request for exemption from time limit.* (1) A trustee or any other person charged with the management of a commodity broker which has filed a petition in bankruptcy, or against which such a petition has been filed, may for good cause shown request from the Commission an exemption from, or extension of, any time limit prescribed by this Part 190: *Provided,* That no such exemption or extension will be granted for any time period established by the Bankruptcy Code, as amended, 11 U.S.C. 101 *et seq.*

(2) Such a request shall be made *ex parte* and by any means of

communication, written or oral: *Provided,* That an oral request shall be confirmed in writing within one business day and such confirmation shall contain all the information required by paragraph (b)(3) of this section. Any such request shall be directed to the person as provided in paragarph (a) of this section, and at the address provided therein.

(3) Such a request shall state the particular provision of the Part 190 rules with respect to which the exemption or extension is sought, the reason for the requested exemption or extension, the amount of time sought if the request is for an extension, and the reason why such exemption or extension would not be contrary to the purposes of the Bankruptcy Code and the Commission's Part 190 regulations promulgated thereunder.

(4) The Director of the Division of Trading and Markets, or such members of the Commission's staff acting under his direction as he may designate, on the basis of the information provided in any such request, shall determine, in his sole discretion, whether to grant, deny or otherwise respond to a request, and shall communicate that determination by the most appropriate means to the person making the request and to the bankruptcy court with jurisdiction over the case.

(c) *Disclosure statement for non-cash margin.* (1) No commodity broker may accept property other than cash from or for the account of a customer to margin, guarantee, or secure a commodity contract unless:

(i) The commodity broker first furnishes the customer with a separate written document which contains only the statement set forth in paragraph (c)(2) of this section in bold-faced print in at least ten point type; and

(ii) The commodity broker receives an acknowledgment, signed and dated by the customer, that it has received and understood the statement, which acknowledgment must be retained by the commodity broker for the greater of the period required in § 1.31 of this chapter or until the customer who executes such acknowledgment terminates or closes its account.

(2) The disclosure statement required by paragraph (c)(1) of this section is as follows:

This statement is furnished to you because Rule 190.10(c) of the Commodity Futures Trading Commission requires it:

1. YOU SHOULD KNOW THAT IN THE UNLIKELY EVENT OF THIS COMPANY'S BANKRUPTCY, PROPERTY, INCLUDING PROPERTY SPECIFICALLY TRACEABLE TO YOU, WILL BE RETURNED, TRANSFERRED OR DISTRIBUTED TO YOU, OR ON YOUR BEHALF, ONLY TO THE EXTENT OF YOUR PRO RATA SHARE OF ALL PROPERTY AVAILABLE FOR DISTRIBUTION TO CUSTOMERS.

2. NOTICE CONCERNING THE TERMS FOR THE RETURN OF SPECIFICALLY IDENTIFIABLE PROPERTY WILL BE BY PUBLICATION IN A NEWSPAPER OF GENERAL CIRCULATION.

3. THE COMMISSION'S REGULATIONS CONCERNING BANKRUPTCIES OF COMMODITY BROKERS CAN BE FOUND AT 17 CODE OF FEDERAL REGULATIONS PART 190.

(3) The statement contained in paragraph (c)(2) of this section need be furnished only once to each customer to whom it is required to be furnished by this section.

(d) *Delegation of authority to the Director of the Division of Trading and Markets.* (1) Until such time as the Commission orders otherwise, the Commission hereby delegates to the Director of the Division of Trading and Markets, and to such members of the Commission's staff acting under his direction as he may designate, all the functions of the Commission set forth in this part except the authority to approve or disapprove a withdrawal or settlement of a commodity account by a public customer pursuant to § 190.06(g)(3).

(2) The Director of the Division of Trading and Markets may submit to the Commission for its consideration any matter which has been delegated to him pursuant to paragraph (d)(1) of this section.

(3) Nothing in this section shall prohibit the Commission, at its election, from exercising its authority delegated to the Director of the Division of Trading and Markets under paragraph (d)(1) of this section.

(e) *Forward contracts.* For purposes of this part, an entity for or with whom the debtor deals who holds a claim against the debtor solely on account of a forward contract will not be deemed to be a customer.

(f) *Notice of court papers pertaining to the operation of the estate.* The trustee shall promptly provide the Commission with copies of any complaint, motion, or petition filed in a commodity broker bankruptcy which concerns the disposition of customer property. Court papers shall be directed to the Washington, D.C. headquarters of the Commission addressed as provided in paragraph (a) of this section.

(g) *Other.* The Bankruptcy Code will not be construed by the Commission to prohibit a commodity broker from doing business as any combination of the following: futures commission merchant, commodity option dealer, foreign futures commission merchant or leverage transaction merchant, nor will the Commission construe the Bankruptcy Code to permit any operation, trade or business, or any combination of the foregoing, otherwise prohibited by the Act or by any rule, regulation or order of the Commission thereunder.

Bankruptcy Appendix 1—Operation of the Debtor's Estate—Schedule of Trustee's Duties

For the convenience of a prospective trustee, the Commission has constructed an approximate schedule of important duties which the trustee should perform during the early stages of a commodity broker bankruptcy proceeding. The schedule includes duties required by this Part, subchapter IV of Chapter 7 of the Bankruptcy Code as well as certain practical suggestions, but it is only intended to highlight the more significant duties and is not an exhaustive description of all the trustee's responsibilities. It also assumes that the commodity broker being liquidated is an FCM. Moreover, it is important to note that the operating facts in a particular bankruptcy proceeding may vary the schedule or obviate the need for any of the partiular activities.

All Cases

Date of Order for Relief

1. Assure that the commodity broker has notified the Commission and its designated self-regulatory organization ("DSRO") that a petition or order for relief has been filed (§ 190.02(a)(1)).

2. Attempt to estimate short-fall in customer segregated funds.

a. If there is a substantial short-fall of customer segregated funds, the trustee should:

i. Contact the DSRO and attempt to effectuate a transfer under Section 764(b) of the Code (hereinafter "bulk transfer"); notify the Commission for assistance (§§ 190.02(a)(2) and (e)(1), § 190.06(b)(2), (e), (f)(3), (g)(2), and (h)) but recognize that a bulk transfer is highly unlikely.

ii. If a bulk transfer cannot be effectuated, liquidate all customer commodity contracts, except dealer options and specifically identifiable commodity contracts which are bona fide hedging positions (as defined in § 190.01(kk)(2)) with instructions not to be liquidated. (*See* §§ 190.02(f) and 190.06(d)(1)). (In this connection, depending upon the size of the debtor and other complications of liquidation, the trustee should be aware of special liquidation rules, and in particular the availability under certain circumstances of book-entry liquidation (§ 190.04(d)(1)(ii)).

b. If there is a small short-fall of customer segregrated funds, negotiate with the DSRO to effect a bulk transfer; notify the Commission (§§ 190.02(a)(2) and (e)(1), 190.06(b)(2), (e), (f)(3), (g)(2), and (h)).

3. Whether or not a transfer has occurred, liquidate or offset open commodity contracts not eligible for transfer (*i.e.*, deficit accounts, accounts with no open positions) (§ 190.06(e)(1)).

4. Offset all futures contracts which would otherwise remain open beyond the last day of trading or first day on which notice of intent

to deliver may be tendered; offset long options on a physical commodity which cannot be settled in cash, have value and would be automatically exercised or would remain open beyond the last day of exercise; and offset all short options on a physical commodity which cannot be settled in cash (§ 190.02(f)(1)).

5. Compute estimated funded balance for each customer commodity account containing open commodity contracts (§ 190.04(b)) (daily thereafter).

6. Make margin calls if necessary (§ 190.02(g)(1)) (daily thereafter).

7. Liquidate or offset any open commodity account for which a customer has failed to meet a margin call (§ 190.02(f)(1)) (daily thereafter).

8. Commence liquidation or offset of specifically identifiable property described in § 190.02(f)(2)(i) (property which has lost 10% or more of value) (and as appropriate thereafter).

9. Commence liquidation or offset of property described in § 190.02(f)(3) ("all other property").

10. Be aware of any contracts in delivery position and rules pertaining to such contracts (§ 190.05).

First Business Day After the Entry of an Order for Relief

1. If a bulk transfer occurred on the date of entry of the order for relief:

a. Liquidate any remaining open commodity contracts, except any dealer option or specifically identifiable commodity contract [hedge] (*See* § 190.01(kk)(2) and § 190.02(f)(1)), and not otherwise transferred in the bulk transfer.

b. Primary liquidation date for transferred or liquidated commodity contracts (§ 190.01(ff)).

2. If no bulk transfer has yet been effected, continue attempt to negotiate bulk transfer of open commodity positions and dealer options (§ 190.02(c)(1)).

3. Provide the clearing house or carrying broker with assurances to prevent liquidation of open accounts available for transfer at the customer's instruction or liquidate all open contracts except those available for transfer at a customer's instruction and dealer options.

Second Business Day After the Entry of an Order for Relief

If no bulk transfer has yet been effected, request directly customer instructions regarding transfer of open commodity contracts and publish notice for customer instructions regarding the return of specifically identifiable property other than commodity contracts (§§ 190.02(b) (1) and (2)).

Third Business Day After the Entry of an Order for Relief

1. Last day on which to notify the Commission with regard to whether a bulk transfer in accordance with Section 764(b) of the Bankruptcy Code will take place (§ 190.02(a)(2) and § 190.08(e)).

2. Second publication date for customer instructions (§ 190.02(b)(1)) (publication is to be made on two consecutive days, whether or not the second day is a business day).

Fourth Business Day After the Entry of an Order for Relief

If not previously concluded, conclude transfers under § 190.06(e) and (f). *(See* § 190.02(e)(1) and § 190.06(g)(2)(i)(A)).

Fifth Business Day After the Entry of an Order for Relief

Last day for customers to instruct the trustee concerning open commodity contracts (§ 190.02(b)(2)).

Sixth Business Day After the Entry of an Order for Relief

Commence liquidation of open commodity contracts for which no customer instructions have been received (§ 190.02(b)(2)).

Seventh Business Day After the Entry of an Order for Relief

1. Customer instructions due to trustee concerning specifically indentifiable property (§ 190.02(b)(1)).

2. Primary liquidation date (§ 190.01(ff)) (assuming no bulk transfers and liquidation effected for all open commodity contracts for which no customer instructions were received by the close of business on the sixth business day).

3. Establishment of transfer accounts (§ 190.03(a)(1)) (assuming this is the primary liquidation date); mark such accounts to market (§ 190.03(a)(2) (daily thereafter until closed).

Eighth Business Day After the Entry of an Order for Relief

Commence liquidation of specifically identifiable property for which no customer intructions have been received (§ 190.02(b)(1)).

Ninth Business Day After the Entry of an Order for Relief

Complete liquidation to the extent reasonably possible of specifically identifiable property which has yet to be liquidated and for which no customer instructions have been received (§ 190.03(c)).

Tenth Business Day After the Entry of an Order for Relief

1. Liquidate or offset all remaining open commodity contracts (§ 190.02(b)(2)).

2. Transfer all open dealer option contracts which have not previously been transferred (§190.06(f)(3)(i)).

Eleventh Business Day After the Entry of an Order for Relief

If not done previously, notify customers of bankruptcy and request customer proof of claim (§ 190.02(b)(4)).

Thirteenth Business Day After the Entry of an Order for Relief

Commence liquidation of specifically identifiable property for which no arrangements for return have been made in accordance with customer instructions (§§ 190.02(b)(1), 190.03(c)).

Separate Procedures for Involuntary Petitions for Bankruptcy

1. Within one business day after notice of receipt of filing of the petition in bankruptcy, the trustee should assure that proper notification has been given to the Commission and the commodity broker's designated self-regulatory organization (§ 190.02(a)(1)); margin calls should be issued if necessary (§ 190.02(g)(2)).

2. On or before the fourth business day after the filing of a petition in bankruptcy, the trustee should use his best efforts to effect a transfer in accordance with §§ 190.06 (e) and (f) of all open commodity contracts and equity held for or on behalf of customers of the commodity broker (§ 190.02(e)(2)) unless the debtor can provide certain assurances to the trustee.

Bankruptcy Appendix Form 2—Request for Instructions Concerning Non-Cash Property Deposited With (Commodity Broker)

Please take notice: On (date), a petition in bankruptcy was filed by [against] (commodity broker). Those commodity customers of (commodity broker) who deposited certain kinds of non-cash property (see below) with (commodity broker) may instruct the trustee of the estate to return their property to them as provided below.

As no customer may obtain more than his proportionate share of the property available to satisfy customer claims, if you instruct the trustee to return your property to you, you will be required to pay the estate, as a condition to the return of your property, an amount determined by the trustee. If your property is not margining an open contract, this amount will approximate the difference between the market value of your property and your pro rata share of the estate, as estimated by the trustee, If your property is margining an open contract, this amount will be approximately the full fair market value of the property on the date of its return.

Kinds of Property To Which This Notice Applies

1. Any security deposited as margin which, as of (date petition was filed), was securing an open commodity contract and is:
—registered in your name,
—not transferable by delivery, and
—not a short-term obligation.

2. Any fully-paid, non-exempt security held for your account in which there were no open contracts as of (date petition was filed). (Rather than the return, at this time, of the specific securities you deposited with (commodity broker), you may instead request now, or at any later time, that the trustee purchase "like-kind" securities of a fair market value which does not exceed your proportionate share of the estate).

3. Any warehouse receipt, bill of lading or other document of title deposited as margin which, as of (date petition was filed), was securing an open commodity contract and:—can be identified in (commodity broker)'s records as being held for your account, and—is neither in bearer form nor otherwise transferable by delivery.

4. Any warehouse receipt bill of lading or other document of title, or any commodity received, acquired or held by (commodity broker) to make or take delivery or exercise from or for your account and which:—can be identified in (commodity broker)'s records as recieved from or for your account as held

specifically for the purpose of delivery or exercise.

5. Any cash or other property deposited to make or take delivery on a futures or options contract may be eligible to be returned. The trustee should be contacted directly for further information if you have deposited such property with (commodity broker) and desire its return.

Instructions must be received by (close of business on 4th business day after 2d publication date) or the trustee will liquidate your property. (If you own such property but fail to provide the trustee with instructions, you will still have a claim against (commodity broker) but you will not be able to have your specific property returned to you).

Note.—Prior to receipt of your instructions, circumstances may require the trustee to liquidate your property, or transfer your property to another broker if it is margining open contracts. If your property is transferred and your instructions were received within the required time, your instructions will be forwarded to the new broker.

Instructions should be directed to: (Trustee's name, address, telephone and/or telex number).

Even if you request the return of your property, you must also pay the trustee the amount he specifies and provide the trustee with proof of your claim before (close of business on the 10th business day after 2d publication date) or your property will be liquidated. (Upon receipt of customer instructions to return property, the trustee will mail the sender a form which describes the information he must provide to substantiate his claim).

Note.—The trustee is required to liquidate your property despite the timely receipt of your instructions, money, and proof of claim if, for any reason, your property cannot be returned by (close of business on the 10th business day after 2d publication date).

Bankruptcy Appendix Form 3—Request For Instructions Concerning Transfer of Your Hedge Contracts Held by (Commodity Broker)

United States Bankruptcy Court —— District of ——In re ——, Debtor, No. ——.

Please take notice: On (date), a petition in bankruptcy was filed by [against] (commodity broker).

You indicated when your hedge account was opened that the contracts (futures and/or options) in your hedge account should not be liquidated automatically in the event of the bankruptcy of (commodity broker), and that you wished to provide instructions at this time concerning their disposition.

Instructions to transfer your positions and a cash deposit (as described below) must be received by the trustee by (close of business on 5th business day after entry of order for relief) or your positions will be liquidated.

If you request the transfer of your contracts, prior to their transfer, you must pay the trustee in cash an amount determined by the trustee which will approximate the difference between the value of the equity margining your positions and your pro rata share of the estate plus an amount constituting security for the nonrecovery of any overpayments. In your instructions, you should specify the broker to which you wish your contracts transferred.

Be further advised that prior to receipt of your instructions, circumstances may, in any event, require the trustee to liquidate or transfer your contracts. If your contracts are so transferred and your instructions are received, your instructions will be forwarded to the new broker.

Note also that the trustee is required to liquidate your positions despite the timely receipt of your instructions and money if, for any reason, you have not made arrangements to transfer and/or your contracts are not transferred by (10 business days after entry of order for relief).

Instructions should be sent to: (Trustee's or designee's name, address, telephone and/or telex number). [Instructions may also be provided by phone].

Bankruptcy Appendix Form 4—Proof of Claim

[Note to trustee: As indicated in § 190.02(d), this form is provided as a guide to the trustee and should be modified as necessary depending upon the information which the trustee needs at the time a proof of claim is requested and the time provided for a response.]

Proof of Claim

United States Bankruptcy Court —— District of —— in re ——, Debtor, No. ——.

Return this form by —— or your claim will be barred (unless extended, for good cause only).

I. [If claimant is an individual claiming for himself] The undersigned, who is the claimant herein, resides at ——.

[If claimant is a partnership claiming through a member] The undersigned, who resides at ——, is a member of ——, a partnership, composed of the undersigned and ——, of ——, and doing business at ——, and is duly authorized to make this proof of claim on behalf of the partnership.

[If claimant is a corporation claiming though a duly authorized officer] The undersigned, who resides at —— is the —— of ——, a corporation organized under the laws of —— and doing business at ——, and is duly authorized to make this proof of claim on behalf of the corporation.

[If claim is made by agent] The undersigned, who resides at ——, is the agent of ——, and is duly authorized to make this proof of claim on behalf of the claimant.

II. The debtor was, at the time of the filing of the petition initiating this case, and still is, indebted to this claimant for the total sum of $——.

III. List EACH account on behalf of which a claim is being made by number and name of account holder[s], and for EACH account, specify the following information:

a. Whether the account is a futures, foreign futures, leverage, option (if an option account, specify whether exchange-trade or dealer), or "delivery" account (a "delivery" account is one which contains only documents of title, commodities, cash or other property identified to the claimant and deposited for the purpose of making or taking delivery on a commodity underlying a commodity contract or for payment of the strike price upon exercise of an option).

b. The capacity in which the account is held, as follows (and if more than one is applicable, so state):

1. [The account is held in the name of the undersigned in his individual capacity];

2. [The account is held by the undersigned as guardian, custodian, or conservator for the benefit of a ward or a minor under the Uniform Gift to Minors Act];

3. [The account is held by the undersigned as executor or administrator of an estate];

4. [The account is held by the undersigned as trustee for the trust beneficiary];

5. [The account is held by the undersigned in the name of a corporation, partnership, or unincorporated association];

6. [The account is held as an omnibus customer account of the undersigned futures commission merchant];

7. [The account is held by the undersigned as part owner of a joint account];

8. [The account is held by the undersigned in the name of a plan which, on the date the petition in bankruptcy was filed, had in effect a registration statement in accordance with the requirements of § 1031 of the Employee Retirement Income Security Act of 1974 and the regulations thereunder]; or

9. [The account is held by the undersigned as agent or nominee for a principal or beneficial owner (and not described above in items 1–8 of this II, b)].

10. [The account is held in any other capacity not described above in items 1–9 of this II, b. Specify the capacity].

c. The equity, as of the date the petition in bankruptcy was filed, based on the commodity transactions in the account.

d. Whether the person[s] (including a general partnership, limited partnership, corporation, or other type of association) on whose behalf the account is held is one of the following persons OR whether one of the following persons, alone or jointly, owns 10% or more of the account:

1. [If the debtor is an individual—

A. Such individual;

B. Relative (as defined below in item 8 of this III,d) of the debtor or of a general partner of the debtor;

C. Partnership in which the debtor is a general partner;

D. General partner of the debtor; or

E. Corporation of which the debtor is a director, officer, or person in control];

2. [If the debtor is a partnership—

A. Such partnership;

B. General partner in the debtor;

C. Relative (as defined in item 8 of this III,d) of a general partner in, general partner of, or person in control of the debtor;

D. Partnership in which the debtor is a general partner;

E. General partner of the debtor; or

F. Person in control of the debtor];

3. [If the debtor is a limited partnership—

A. Such limited partnership;

B. A limited or special partner in such partnership whose duties include:

i. The management of the partnership business or any part thereof;

ii. The handling of the trades or customer funds of customers of such partnership;

iii. The keeping of records pertaining to the trades or customer funds of customers of such partnership; or

iv. The signing or co-signing of checks or drafts on behalf of such partnership];

4. [If the debtor is a corporation or association (except a debtor which is a futures commission merchant and is also a cooperative association of producers)—

A. Such corporation or association;

B. Director of the debtor;

C. Officer of the debtor;

D. Person in control of the debtor;

E. Partnership in which the debtor is a general partner;

F. General partner of the debtor;

G. Relative (as defined in item 8 of this III.d) of a general partner, director, officer, or person in control of the debtor;

H. An officer, director or owner of ten percent or more of the capital stock of such organization];

5. [If the debtor is a futures commission merchant which is a cooperative association of producers—

Shareholder or member of the debtor which is an officer, director or manager];

6. [An employee of such individual, partnership, limited partnership, corporation or association whose duties include:

A. The management of the business of such individual, partnership, limited partnership, corporation or association or any part thereof;

B. The handling of the trades or customer funds of customers of such individual, partnership, limited partnership, corporation or association;

C. The keeping of records pertaining to the trade or funds of customers of such individual, partnership, limited partnership, corporation or association; or

D. The signing or co-signing of checks or drafts on behalf of such individual, partnership, limited partnership, corporation or association];

7. [Managing agent of the debtor];

8. [A spouse or minor dependent living in the same household of ANY OF THE FOREGOING PERSONS, or any other relative, regardless of residency, (unless previously described in items 1–B, 2–C, or 4–G of this III.d) defined as an individual related by affinity or consanguinity within the third degree as determined by the common law, or individual in a step or adoptive relationship within such degree];

9. ["Affiliate" of the debtor, defined as:

A. Entity that directly or indirectly owns, controls, or holds with power to vote, 20 percent or more of the outstanding voting securities of the debtor, other than an entity that holds such securities—

i. In a fiduciary or agency capacity without sole discretionary power to vote such securities; or

ii. Solely to secure a debt, if such entity has not in fact exercised such power to vote;

B. Corporation 20 percent or more of whose outstanding voting securities are directly or indirectly owned, controlled, or held with power to vote, by the debtor, or by an entity that directly or indirectly owns, controls, or holds with power to vote, 20 percent or more of the outstanding voting securities of the debtor, other than an entity that holds such securities—

i. In a fiduciary or agency capacity without sole discretionary power to vote such securities; or

ii. Solely to secure a debt, if such entity has not in fact exercised such power to vote;

C. Person whose business is operated under a lease or operating agreement by the debtor, or person substantially all of whose property is operated under an operating agreement with the debtor;

D. Entity that otherwise, directly or indirectly, is controlled by or is under common control with the debtor];

E. Entity that operates the business or all or substantially all of the property of the debtor under a lease or operating agreement; or

F. Entity that otherwise, directly or indirectly, controls the debtor; or

10. [Any of the persons listed in items 1–7 above of this III.d if such person is associated with an affiliate (see item 9 above) of the debtor as if the affiliate were the debtor].

e. Whether the account is a discretionary account. (If it is, the name in which the "attorney in fact" is held).

f. If the account is a joint account, the amount of the claimant's percentage interest in the account. (Also specify whether participants in a joint account are claiming separately or jointly).

IV. Describe all claims against the debtor not based upon a commodity account of the claimant (*e.g.*, if landlord, for rent; if customer, for misrepresentation or fraud).

V. Describe all claims of the DEBTOR against the CLAIMANT not already included in the equity of a commodity account[s] of the claimant (see III.c above).

VI. Describe any deposits of money, securities or other property held by or for the debtor from or for the claimant, and indicate if any of this property was included in your answer to III.c above.

VII. Of the money, securities, or other property described in VI above, identify any which consists of the following:

a. With respect to property received, acquired, or held by or for the account of the debtor from or for the account of the claimant to margin, guarantee or secure an open commodity contract, the following:

1. Any security which as of the filing date is:

A. Held for the claimant's account;

B. Registered in the claimant's name;

C. Not transferable by delivery; and

D. Not a short term obligation; or

2. Any warehouse receipt, bill of lading or other document of title which as of the filing date:

A. Can be identified on the books and records of the debtor as held for the account of the claimant; and

B. Is not in bearer form and is not otherwise transferable by delivery.

b. With respect to open commodity contracts, and except as otherwise provided below in item g of this VII, any such contract which:

1. As of the date the petition in bankruptcy was filed, is identified on the books and records of the debtor as held for the account of the claimant;

2. Is a bona fide hedging position or transaction as defined in Rule 1.3(z) of the Commodity Futures Trading Commission ("CFTC") or is a commodity option transaction which has been determined by the exchange to be economically appropriate to the reduction of risks in the conduct and management of a commercial enterprise pursuant to rules which have been adopted in accordance with Rule 1.61(b) of the CFTC and approved by the CFTC; and

3. Is in an account designated in the accounting records of the debtor as a hedging account.

c. With respect to warehouse receipts, bills of lading or other documents of title, or physical commodities received, acquired, or held by or for the account of the debtor for the purpose of making or taking delivery or exercise from or for the claimant's account, any such document of title or commodity which as of the filing date can be identified on the books and records of the debtor as received from or for the account of the claimant specifically for the purpose of delivery or exercise.

d. Any cash or other property deposited prior to bankruptcy to pay for the taking of physical delivery on a long futures contract or for payment of the strike price upon exercise of a short put or a long call option contract on a physical commodity, which cannot be settled in cash, in excess of the amount necessary to margin such commodity contract prior to the notice date or exercise date which cash or other property is identified on the books and records of the debtor as received from or for the account of the claimant within three or less days of the notice date or three or less days of the exercise date specifically for the purpose of payment of the notice price upon taking delivery or the strike price upon exercise.

e. The cash price tendered for any property deposited prior to bankruptcy to make physical delivery on a short futures contract or for exercise of a long put or a short call option contract on a physical commodity, which cannot be settled in cash, to the extent it exceeds the amount necessary to margin such contract prior to the notice exercise date which property is identified on the books and records of the debtor as received from or for the account of the claimant within three or less days of the notice date or of the exercise date specifically for the purpose of a delivery or exercise.

f. Fully paid, non-exempt securities identified on the books and records of the debtor as held by the debtor for or on behalf of the commodity account of the claimant for which, according to such books and records as of the filing date, no open commodity contracts were held in the same capacity.

g. Open commodity contracts transferred to another futures commission merchant by the trustee.

VIII. Specify whether the claimant wishes to receive payment in kind, to the extent possible, for any claim for securities.

IX. Attach copies of any documents which support the information provided in this proof of claim, including but not limited to customer confirmations, account statements, and statements of purchase or sale.

This proof of claim must be filed with the trustee no later than ——, or your claim will

be barred unless an extension has been granted, available only for good cause.

Part V

Department of Housing and Urban Development

Office of Assistant Secretary for Community Planning and Development

Urban Development Action Grants; Revised Minimum Standards for Small Cities

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Community Planning and Development

[Docket No. N-83-1209]

Urban Development Action Grants; Revised Minimum Standards for Small Cities

AGENCY: Department of Housing and Urban Development.

ACTION: Notice.

SUMMARY: In accordance with 24 CFR 570.452(b)(1), the Department is providing Notice of the most current minimum standards of physical and economic distress for small cities for the Urban Development Action Grant program.

This notice revises the Notice published June 8, 1982 (47 FR 24820) because the five minimum standards of distress have now changed generally as a result of new data from the Bureau of the Census.

This Notice contains four lists: The first list identifies those cities which qualify as distressed communities based upon the new minimum standards; the second list identifies those cities which did not qualify when the June 1982 list was published but which do qualify now; the third list identifies those cities which were classified as distressed on the June 8, 1982 list, but which no longer qualify under the new minimum standards. The fourth list identifies those towns and townships which qualify as distressed communities based upon the new minimum standards.

EFFECTIVE DATE: This Notice replaces the June 8, 1982 Notice which listed the small cities which passed the previous minimum standards.

FOR FURTHER INFORMATION CONTACT: Frank Ridenour, Office of Action Grants, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410, Telephone: 202/755-6784. For information on the minimum distress standards of the data used to determine whether a community qualifies as distressed contact: Wendy Mellinger, Telephone 202/755-6042.

SUPPLEMENTARY INFORMATION: A Notice published by the Department on June 8, 1982 provided the minimum standards of physical and economic distress which were applicable up to the effective date of this Notice for small cities which met the standards published at that time.

Part I of this Notice now specifies the new minimum standards of physical and economic distress. Part II of this Notice contains a revised list of all the small cities which meet the new standards. Part III of this Notice lists those small cities which, based upon the new minimum standards, appear on the list in Part II but did not qualify when the June 1982 list was published. Part IV is a list of those cities which were classified as distressed on the June 1982 list but which no longer qualify under the new minimum standards. These cities listed in Part IV have a period of time, as specified in Part IV, during which they may submit Action Grant applications. Part V is a revised list of all towns and townships which meet the new standards.

The new minimum standards for poverty and per capita income are revised based on the 1980 Census. Previously, 1970 poverty data and 1977 per capita income data were used. The data for the other standards remain unchanged from last year except for small corrections mainly to the 1980 population to reflect boundary changes. The minimum distress thresholds for age of housing, population lag/decline, and job/lag decline have changed slightly to reflect small corrections and additions to the data.

This Notice is published pursuant to 24 CFR 570.452(b)(1).

I. A small city must pass three minimum standards of physical and economic distress, except, if the poverty is less than half the minimum standard, the city must pass four standards. The most current minimum standards of physical and economic distress are:

A. *Age of Housing.* At least 33.81 percent of the applicant's year-round housing units must have been constructed prior to 1940, based on U.S. Census data, in order to meet this minimum standard;

B. *Per Capita Income.* The net increase in per capita income for the period 1969–1979 must have been $4062 or less, based on U.S. Census data, in order to meet this minimum standard;

C. *Population Lag/Decline.* For the period 1970–1980 the percentage rate of population growth (based on corporate boundaries in 1970 and as of the 1980 Census) must have been 1.13 percent or less, based on U.S. Census data, in order to meet the minimum standard;

D. *Job/lag/Decline.* The rate of growth in retail and manufacturing employment for the period 1972–1977 must have increased by 6.84 percent or less, based on U.S. Census data, in order to meet this minimum standard. If data are nor available for both retail and manufacturing employment, the percentage used will be the median for either retail employment or manufacturing employment, based upon the median for those cities on which both sets of data are available. If neither data source is available, this standard will not be considered;

E. *Poverty.* The percentage of persons within the applicant's juridiction at or below the poverty level must be 11.99 percent or more, based on U.S. 1980 Census data, in order to meet this minimum standard.

II. The following small cities meet the current minimum standards of physical and economic distress appropriate to their class.

V. The following list contains the name of towns and townships which meet the minimum standards for physical and economic distress and which are in States where towns and townships may have powers comparable to the powers of municipalities. Each town and township is not listed with places in Section II because their eligibility as cities has not been determined under the criterion of 24 CFR 570.3(e), which requires that they (1) have powers and perform functions comparable to municipalities, (2) are closely settled and (3) have corporation agreements with all incorporated places within their boundaries. Requests for waivers of the closely settled requirement from towns and townships which meet all other requirements may be waived by the Secretary on a case by case basis.

Part VI

Department of the Interior

Fish and Wildlife Service

Peregrine Falcons in North America; Proposed Reclassification; Proposed Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Proposed Reclassification of the Peregrine Falcons in North America

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to reclassify from Endangered to Threatened the Arctic peregrine falcon (*Falco Peregrinus tundrius*). The Service finds that sufficient evidence has been gathered over the past several years warranting a proposal to make these changes. The Service also proposes to clarify the status of the American peregrine falcon (*Falco peregrinus anatum*) in some areas of its range. Any other free-flying peregrine falcon within the coterminous 48 States would also be protected from illegal take under Similarity of Appearance provisions proposed here. The Service requests comments and other information upon this proposed rule. These rules are proposed under the Endangered Species Act of 1973, as amended, and are based upon the completion of a status review required by the Act every 5 years.

DATE: Comments must be submitted on or before May 31, 1983.

ADDRESSES: Comments and other information should be mailed to the Director (OES), U.S. Fish and Wildlife Service, Washington, DC 20240. Comments and supporting documents are available to the public for inspection during normal business hours by appointment in Suite 500, 1000 N. Glebe Rd., Arlington, Virginia (phone 703–235–1975). Individuals submitting comments and other information should refer to this specific proposed rule in all correspondence.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, DC 20240 (703–235–2771).

SUPPLEMENTARY INFORMATION:

Background

The Service is required to conduct a status review of each species listed at 50 CFR 17.11 and 17.12 at least once every 5 years. This requirement stems from the amendments to Section 4 of the Endangered Species Act of 1973 signed into law on November 10, 1978. The rules at 50 CFR 424.20 implement this requirement of the amended Act. Subsequently, the Service published a Notice of Review for all species listed prior to 1975 in the **Federal Register** of May 21, 1979 (44 FR 29566–29577) that included the two subspecies of North American peregrine falcons—American and Arctic. This proposal is based upon data accumulated in the Service's Office of Endangered Species through June 1982.

The American peregrine falcon *(Falco peregrinus anatum)* and the Arctic peregrine falcon *(F. p. tundrius)* were added to the U.S. Department of the Interior's list of foreign Endangered species on June 2, 1970 (35 FR 8495) and to the native list on October 13, 1970 (35 FR 16047). The basis for adding two of the three North American subspecies to this list was the realization, in the late 1960's that DDT and its metabolites (hereafter referred to only as DDT) was having a direct negative impact on these falcons' survival: falcons no longer nested from Minnesota eastward to the Canadian Maritimes and south to Georgia, and those nesting in western Canada and United States and northward into the Arctic were heavily contaminated and likely to become extinct in the near future. Only the Peale's peregrine falcons *(F. p. pealei)* nesting from the Aleutian Islands east and south to Vancouver Island were found to be reproducing at near normal levels with only traces of DDT.

Materials and information recorded or otherwise preserved over the previous decades clearly showed the effects of this contamination immediately after World War II when DDT was first used extensively. Most of the falcons in eastern United States and southern Canada failed to produce young by the mid-1950's, although a few survived into the late 1960's. The total surviving population (excluding the Peale's peregrine falcons) was then estimated at no more than a few hundred pairs north of Mexico.

Following the 1960's came a period of intensive studies to develop possible management practices to save the remaining falcons and restore the extirpated populations. The Service estimates that about 10 million dollars were expended on peregrine falcons in North America during the 1970's by the U.S. and Canadian Federal governments, many States and Provinces, several conservation organizations, and countless private citizens and businesses. Associated with these recovery efforts were efforts by other environmental interests that resulted in the ban on most DDT uses in the United States in 1972.

Recent studies have focused on the breeding ecology of peregrines with specific investigations into organochlorine contamination levels of individual birds, their eggs, and prey species. Other studies have been aimed at finding the principal wintering grounds of these falcons (and their prey species) by banding. These and other studies have shown that DDT has been the main cause for decline of these falcons, although other causes have been known during this century. There have been only a few localized cases of habitat loss (i.e., nesting ledges) or chronic depredations for falconry purposes. Losses from accidents, shootings, and other similar causes do not appear to have significantly affected the whole population of peregrine falcons in North America. Only environmental contaminants have threatened their continued existence.

With the decline in DDT usage in North America the peregrine falcon populations of northern North America (e.g., Alaska, northern Canada, Greenland) are no longer threatened with extinction in the foreseeable future. The reproductive rate of these falcons has shown a gradual improvement in the Arctic over the past 5–6 years. Generally, rates in most sampled areas have gone from approximately 1.0 or less young produced per active pair to approximately 2.0 young per active pair. An apparent cline, increasing from west to east, has been observed: highest average productivity is usually observed in Greenland, the lowest in northern Alaska and northwestern Canada, with local variations (both lows and highs) seemingly the rule rather than the exception.

Although the use of DDT still continues where many of these birds apparently winter, the Service has recent samples showing less than 10% of the adult female falcons migrating into the Arctic each spring have levels of DDT contamination sufficient to reduce their natural reproductive potential. Based upon blood contaminant loads only, the other 90% should be capable of normal reproductive rates. The Service believes that the wintering and spring migration periods are when the female falcons obtain the bulk of the contamination that will affect their eggshell quality. That is, Arctic peregrine falcons return in May and almost immediately start nesting. Only the DDT acquired prior to egg formation can affect the eggs.

In mid-summer of 1981 eight nesting female American peregrine falcons were randomly selected and trapped in central Alaska by the Service. All showed some DDT contamination in their blood. Three had significant levels. Those three had a total of 11 young and one cracked egg in their nests. These samples were obtained while the females were hunting food for their

young. At this time the birds are under maximum stress and probably show their lowest body weights each year (highest would be expected on migration and a moderate weight would be expected in the winter) so measurement of any deposited or recently acquired DDT could be higher.

Previous nesting ground data on levels of contamination were based upon recovered unhatched eggs. Such eggs do not reflect the overall contamination level of the entire population, since they are not a random sample of all eggs being produced. There are some individual females that are very contaminated and rarely hatch a single egg each year.

Other biological data have been gathered for the western United States and Mexico. Some of these data indicate an increasing rate of productivity and recruitment. Particularly in Mexico and California, and possibly Arizona and New Mexico, populations are showing good productivity, although the number of pairs is still well below historic levels. Productivity in this region is now averaging about 1.8 young per nest attempt, while an average of 2.0 young per attempt has been recorded for Alaskan *anatum* in the past 4 years.

The productivity of the peregrine falcons from Oregon and Colorado east and north into central Canada is generally the lowest in North America and is probably not adequate to maintain that population at even the present very low numbers of pairs. From Colorado to southern Yukon Territory the natural productivity (some nests are augmented by biologists) averages about 1.0 young falcon produced per active attempt. Productivity from the few pairs thought or known to remain in eastern Canada below the tree line (northern Manitoba to Labrador) is largely unknown.

Another series of studies has concentrated upon migrating falcons, particularly along the Alantic and Gulf coasts. Comparisons based upon equal units of effort show there has been an increase in the numbers of falcons observed moving south each fall and north each spring over the past 5–6 years. For example, counts at Assateague Island, Maryland–Virginia, averaged 25 falcons per 100 hours of observation in the falls of 1970–1974. From 1975 to 1978 the average was 56 per 100 hours. From 1979 to 1981 the counting rates averaged 108 per 100 hours. The numbers of falcons counted in migration at this one site doubled each subsequent period.

The timing of this upward trend may be explained by facts concerning the age of maturation and probable peak productivity of female peregrine falcons. Normally, falcons start laying eggs in their third summer and probably average 3–4 more years of productivity. With the cessation of most DDT use in the U.S. in 1972, a few years would be needed for the falcon population to start to show any decrease in overall contamination levels. Productivity would be expected to start increasing as succeeding generations become less contaminated.

Based upon bandings and their recoveries, the Service estimates about 99% of the fall migrants on the Atlantic and Gulf of Mexico coasts originate in the Arctic and sub-Arctic regions from western Alaska to western Greenland. Reliable statistical estimates have been difficult to obtain, but the Service believes that a minimum of several thousand peregrine falcons are being produced each summer in the higher latitudes of North America (approximately north 60° N. Lat.). Estimates by some researchers have ranged to over 20,000 falcons being produced in some recent summers.

These estimates of the total production in northern North America are based upon a calculation known as the Lincoln Index. Several assumptions have to be made in order to utilize this method of estimating the production of young falcons each year. First, there are no significant differences in survivorship from July through October between banded and unbanded young. (That is, if 20 percent of the banded young die in that period, then the same percentage of unbanded yound die.) Second, the migration routes and behavior are the same for both banded and unbanded young. Third, the banded and unbanded migrant young are not trapped out of proportion to each other at various banding stations south of Canada. (That is, neither type is more easily trapped than the other, since neither have seen the trapping devices before.) Fourth, the numbers of young produced south of about 55° N. Latitude are very few and compose a small fraction of total production in North America (perhaps several hundred, at most). Fifth, the proportion of young falcons caught on their first migration that were already banded (i.e., Alaska, northern Canada, Greenland) to the total trapped is equal to the proportion of banded to unbanded young reaching 3–6 weeks of age in northern North America.

The Lincoln Index may be written as follows:

$$P = \frac{(n_1 + 1)\ (n_2 + 1)}{(R_2 + 1)} - 1$$

Where,

P = Total production estimate of young falcons reaching about 3–6 weeks of age in North America (north of 55° N. Lat., excluding Gulf of Alaska region) and Greenland

n_1 = Total yound wild peregrine falcons banded at about 3–6 weeks of age in above area

n_2 = Total falcons trapped south of Canada and east of 100° W. Long. in their first fall migration (September 15 to October 30)

R_2 = Number of falcons in n_2 which were banded as part of n_1

When more than one year is included, the *P* values can be averaged. The Service has compiled banding and trapping records for the period of 1976 through 1981. The most recent data may be slightly incomplete, since all records have not yet been completely entered into the banding files at the Bird Banding Laboratory, Laurel, Maryland. The few records that may be missing from this tabulation, will not dramatically change the estimate. We believe that all recaptures (R_2) have been reported by our cooperating banders by now. An increase in this last value would have a very measurable and negative effect upon the estimate.

Below is a tabulation of the data for the years 1976 through 1981 (P is rounded to nearest 50):

Year	n_1	n_2	R_2	P
1976	23	120	0	2,900
1977	88	216	1	9,700
1978	71	225	2	5,450
1979	148	434	2	21,850
1980	281	216	2	20,400
1981	314	257	3	21,100
Total	925	1461	10	

Using these data, the Lincoln Index equation yields an average of about 13,550 young falcons produced to near fledgling age in northern North America for the years 1976–1981, inclusive. Although several adjustments to these figures might be made, the Service simply wishes to indicate that there is a large number of *Falco peregrinus* being produced in this region in recent years: certainly more than several thousand and possibly as many as 22,000. The precise number is not germane beyond demonstrating that this bird is not now in danger of extinction.

Factors Affecting the Species

The Service proposes to reclassify the Arctic peregrine falcon (*Falco peregrinus tundrius*) from Endangered to Threatened. The Service's listing regulations (50 CFR Part 424) provide for a review of the five factors below when reclassifying (or listing or delisting) a species (§ 424.11):

(1) The present or threatened destruction, modification, or curtailment of its habitat or range;

(2) Utilization for commercial, sporting, scientific, or educational purposes at levels that detrimentally affect it;

(3) Disease or predation;

(4) Absence of regulatory mechanisms adequate to prevent the decline of a species or degradation of its habitat; and

(5) Other natural or manmade factors affecting its continued existence.

The Service has studied the relevant information available for *Falco peregrinus* in North America and summarizes this information for each of these five factors below:

(1) *Habitat.* Peregrine falcons prefer high cliffs or bluffs for nest sites. There are numerous records of pairs nesting in this century on manmade ledges (e.g., tall buildings, bridges, towers). The feeding requirements (small- to medium-sized birds) are general enough so that no specific prey species are needed by this falcon, only prey abundance. Prey species are usually common birds such as those frequently associated with water (e.g., marshes, lakes, rivers) such as colonial seabirds, smaller waterfowl, shorebirds (plovers, sandpipers, etc.), and small gulls. Other major groups include doves and pigeons, jays, flickers, and open ground-nesting songbirds (longspurs, sparrows, pipits, larks, etc.).

Losses of nest sites have not posed any overall problem to this falcon. Over the years a few sites have been lost directly or indirectly because of water, highway, energy, or other projects. Most of the abandoned nest sites still exist, and many are now occupied by other large birds (e.g., owls, hawks, ravens), which could possibly be evicted by any returning pair of peregrine falcons. Similarly, habitats for prey species have been altered to some degree in some areas. Most nest sites for the falcons still show an abundance of available prey, although the species composition may have changed. No significant losses of habitat have occurred within the range of the Arctic peregrine falcon.

(2) *Overutilization.* Presently, it is not legal in the United States to sell, buy, or barter peregrine falcons. Undocumented stories of high prices paid for some peregrine falcons in the past have misled many into thinking this species is an extrordinarily valuable commercial item in the world. The Service finds the world market value of peregrines has usually ranged from $150 to $2,500 per bird in the past decade, based usually upon degree of training, source of stock, and age and sex of the bird. This compares to the $5,000 to $20,000 paid for some other highly prized wildlife. Falconers in the Middle East (a group frequently mentioned to be needing peregrine falcons) generally prefer other species of large falcons for hunting purposes. Removal of young falcons from some specific nest sites has been of only local importance in the past in the possible reduction of peregrine falcon numbers.

Captive-produced peregrine falcons may meet much of the future demand for birds to be used in falconry when restoration efforts for extirpated and other populations have been largely satisfied. This will probably not be a major source for falconry purposes for some time, perhaps later in this decade. This rule will have no effect on the import or export for commercial purposes of peregrine falcons.

(3) *Disease or Predation.* Peregrine falcons suffer from natural diseases and predation as do most other forms of wildlife. No significant or serious disease or predation problems have been found in any populations of North American peregrine falcons, and no problems are anticipated.

(4) *Regulatory Mechanisms.* The present Federal falconry regulations (§§ 21.28 and 21.29) became effective January 1, 1978. These require the individual marking of captive raptors and have been shown to adequately provide for enforcement and possession of raptors for falconry. The Endangered Species Act of 1973, as amended, the regulations issued under the Migratory Bird Treaty Act, and the efforts of law enforcement agents have been effective in controlling the illegal take of falcons in the United States over the past decade. Similar protective measures are in effect in most of Canada. Such efforts are expected to continue at Federal and State levels.

All *Falco peregrinus* are covered under Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). The Service has previously rejected a petition to move the Arctic peregrine falcon to Appendix II (see 47 FR 7190–7192; February 17, 1982). These proposed rules would not affect any *Falco peregrinus* under CITES.

Critical Habitat (50 CFR 17.95) was designated in 1977 at several nesting sites in California for American peregrine falcons that were in areas of potential energy development. Such sites are protected under the Critical Habitat provisions of Section 7 of the Endangered Species Act. Other nest sites and significant migration or wintering habitats, which are not designated at 50 CFR 17.95(b) as Critical Habitat, may be indirectly protected from adverse Federal actions affecting the falcons under the "jeopardy" provision of Section 7 of the Act. This provision requires all Federal agencies to insure that any action that they authorize, fund, or carry out, is not likely to jeopardize the continued existence of a listed species. Thus, Section 7 prohibits Federal agencies from adversely affecting American or Arctic peregrine falcon habitat which is not designated as Critical Habitat, if such action was considered likely to jeopardize the continued existence of either listed peregrine falcon.

Some of the peregrine falcon habitats that have been frequent subjects of consultations between the Service and other Federal agencies are coastal wetlands along the coasts of the Atlantic Ocean and Gulf of Mexico. Such habitats are well recognized as areas which attract large numbers of migrant, and sometimes wintering, falcons every year. Such areas will continue to receive such protection so long as any Endangered or Threatened peregrine falcons are expected to be found there on a regular basis.

(5) *Other Factors:* The major factor affecting the continued existence of most of the troubled populations of peregrine falcons in the world today is the use of various persistent chemical compounds, principally DDT. North American *Falco peregrinus* not exposed to significant amounts of DDT are not showing reproductive failures that could affect the population's continued existence. At DDT concentrations above 15–20 ppm wet weight in eggs, reproductive failures have been documented in peregrines. Thus far, the Peale's peregrine falcons of the Gulf of Alaska have not shown a significant contamination level or impaired reproduction.

The peregrines of the British Isles, like the Peale's falcons, are nonmigratory (although some of their prey are migratory). The British falcons were substantially reduced by the 1960's because of high chemical contamination. With the elimination of the contamination source in the United Kingdom, old nest sites have been reoccupied, and this population of falcons has now returned to levels that approach or may even exceed all previous censuses, including pre-World War II. This last case clearly shows the dramatic effects of certain chemical compounds of *Falco peregrinus.*

Fewer than 10% of the several hundred adult female falcons trapped on the Texas Gulf Coast (a major concentration area in the spring and fall) have shown a significant level of

DDT contamination. In fact, there has been a tendency for these falcons to show even lower levels of contamination with each successive spring. The Service is uncertain if this is a significant change or only a sampling bias and/or a temporary trend noted over a few years. As indicated above, the numbers of falcons counted in the fall migrations has increased substantially following these recent samples of lower contamination levels taken in the spring.

Samples of eggs from the Arctic (and elsewhere) have been biased in the past by the fact that mostly unhatched or nonviable eggs were obtained. Addled falcon eggs would be expected to contain higher average levels of DDT and other compounds than randomly taken, freshly laid eggs. Because addled eggs are not a random sample, they would not reflect the true frequency and level of contamination in the population as a whole. The samples of blood from randomly trapped falcons provide a far more accurate index of overall contamination levels and frequency in these falcons. The Service concludes that while some female falcons (about 10%) are still significantly contaminated prior to egg laying, the remainder of the northern birds should be producing reasonable numbers of young falcons in recent summers. This latter analysis is based upon 430 blood samples from peregrines trapped in spring and fall migrations in the past 4 years.

This level of contamination still poses a problem to the falcon population, but it does not pose a major threat which clearly could cause the extinction of the falcon in the foreseeable future. Because the possibility of this level of DDT contamination continuing or even increasing remains, the Service will not consider the complete delisting of the Arctic peregrine falcon at this time.

The numbers of birds counted and banded each fall along the main migration routes indicate to the Service that a significant number of young peregrine falcons are, in fact, being produced in the northern part of North America. Both fall observations and bandings indicate that at least half, and probably three-quarters, are birds hatched that year.

A few banded birds have been recovered during the winter months from the populations south of the Arctic. Alberta peregrine falcons have been recovered during the winter in Central America south to northern Venezuela and Colombia. Birds originating from further south (the Rocky Mountains of the United States) may winter only as far south as Mexico or rarely to Costa Rica, while some may winter at lower elevations in the American Southwest. Oregon and Washington birds are thought to winter near their nesting territories or south along the Pacific Coast into California. California birds seem to be largely nonmigratory, although some of the pairs nesting in the higher mountains probably winter in nearby lowlands. Falcons from Arizona, New Mexico, western Texas, and north central Mexico have not been banded in substantial numbers and recoveries during the winter period are nonexistent.

North American peregrine falcons, and many other avian species with similar distribution, show a "leap-frog" wintering pattern where the more northern nesting populations winter the furthest south and the further south nesting birds tend to move less and less. The southernmost birds (particularly if nesting south of about 40° N. Lat.) become largely sedentary, although young and adults may wander some distance during the winter. Thus, adults peregrine falcons from the southern Rocky Mountains and into Mexico may either wander into the lowlands or even coastal areas (Gulfs of California and Mexico) or remain within a hundred miles of their nest sites. Immatures from these probably nonmigratory populations (i.e., those largely south of Oregon, Nevada, Utah, and Colorado) may wander hundreds of miles during their first year before returning to the general vicinity of their natal areas.

Precisely where the various populations of falcons obtain their DDT is unclear. Part of this problem is related to the seasonal distribution and identity of their principal prey species. The prey composition seems to vary with season, locale, and individual falcon preferences. All populations of North American peregrine falcons show varying levels of contamination, with the Peale's falcon showing the least.

Summary of Status

The various populations *Falco peregrinus* found nesting in North America (including Mexico and western Greenland) are presently classified as three subspecies: (1) *F.p. pealei* (coastal British Columbia north and west through the Aleutian Islands, intergrades with *F.p. anatum* in western Washington and inland in the coastal ranges of British Columbia and southern Alaska westward to the vicinity of Bristol Bay; largely non-migratory, but some birds wander most winters as far south as the California coast), (2) *F. p. tundrius* (nests in Arctic North America: lands draining into the Arctic Ocean and north of the treeline from the Bering Straits east to the west coast of Greenland; intergrades to varying degrees with *F. p. anatum* from the upper Yukon River Valley eastward through the taiga region of boreal America to the Ungava Peninsula; winter from southern U.S. south throughout all of Central and South America to central Chile and Argentina), and *F. p. anatum* (nests from central Alaska, central Yukon Territory, northern Alberta and Saskatchewan east to the Maritimes and south [excluding coastal areas north of Columbia River] throughtout western Canada and United States to Baja California, Sonora, and the highlands of central Mexico; intergrades in the zones of contact with the other two subspecies, as indicated above; no nesting reported from Oklahoma and central Texas southward into eastern Mexico and east to northwestern Georgia and north along the coastal plain to the Chesapeake Bay; populations nesting in Mississippi River, Great Lakes, and Atlantic drainages south of the St. Lawrence River have been extirpated [ca.1960]; winters from southern United States south to about central South America, mostly in Mexico and Central America; eastern and southwestern United States and Mexico populations largely nonmigratory with some individuals wandering a few hundred miles from nesting sites).

The subspecies *pealei* has been largely unaffected by either DDT or other contaminants. Peale's peregrine falcon has never been considered for listing under the Endangered Species Act (or previous legislation) by the Service. No future change in its present status is foreseen, and the Service does not intend to propose any change for this subspecies.

The American peregrine falcon *F. p. anatum* now numbers a few hundred pairs, mostly in California and Mexico. Perhaps 125 pairs are in Alaska (mostly Yukon River drainage). More than a dozen are known (and probably many more exist) in the Yukon Territory. Less than a dozen active pairs are known from Alberta and adjacent areas of western Canada. Possibly another few dozens are spread over the rest of central and eastern Canada. Less than 100 active, known pairs remain in the coterminous United States outside of California. California had 39 known pairs in 1981, while another dozen or more may be present. Along the west coast of Baja California and in the Gulf of California area are perhaps 75 pairs of peregrine falcons. The highlands of Mexico are also thought to have about 100 pairs, although only about 20 pairs are known. The total number of *anatum*

(Canada, Alaska and coterminous United States, and Mexico) is estimated at 500–550 pairs.

Productivity in the United States (excluding Alaska, California, Arizona, and possibly New Mexico) and Canada has been marginal. This productivity level is barely capable, and may not be in some areas, of at least maintaining the present low population level and threatens the continued existence of the American peregrine falcon in these areas. From California and Arizona south into Mexico the falcons appear to be maintaining themselves with little or no significant overall increases in population numbers. This subspecies would remain Endangered under this proposed rule.

Because of the broad zones of intergradation between *anatum* and each of the other two North American races, the distributional limits of *anatum* need to be more clearly defined to insure appropriate protective measures under the Endangered Species Act. Subspecies by their very nature interbreed where they meet. Only rarely can they be clearly separated in all (even 90 percent) cases by experts in that group of animals. (Scientists generally apply a subspecific name when at least 70 or 75 percent of one geographic sample can be separated from 98 percent of all others of that species. In the case of *Falco peregrinus* it is frequently impossible to identify individual falcons to the subspecific level: plumage characters and sizes broadly overlap in North America, particularly in the zones of intergraduation outlined above. The use of *anatum* and *tundrius* will be clarified under this proposal in the use of some geographical limits and their nomenclature. The Service still follows the concept of three subspecies of *Falco peregrinus* in North America as defined by most avian taxonomists.

From all the studies made over the past several decades the Service concludes that the arctic peregrine falcon (*F.p. trundrius*) is not now threatened with extinction throughout a significant portion of its range. Nevertheless, so long as DDT and other compounds which affect peregrine falcons are being used in large quantities in various localities in the Western Hemisphere *and* so long as a significant number (more than 5 percent) of the females show significant amounts (more than 15 ppm DDT wet weight in eggs or comparable values in other tissues) of contamination, these Arctic falcons are still threatened with becoming endangered.

The definitions of Endangered and Threatened species at § 424.02 of this title are stated as follows:

"Endangered species" means a species which is in danger of extinction throughout all or a significant portion of its range.

"Threatened species" means any species which is likely to become an Endangered species within the foreseeable future throughout all or a significant portion of its range.

The term "species" as used under the Act includes subspecies and populations of vertebrates and does not necessarily refer to the biological "species" used by the scientific community.

As indicated previously, the Service believes that for the past several summers many thousands of Arctic peregrine falcons (plus some *anatum* and intergrades from the taiga and boreal regions of North America) fly south through the United States to winter as far as Argentina and Chile. The vast majority of these fall migrants intercept the coastlines of the Atlantic Ocean and Gulf of Mexico. Lesser numbers of falcons pass down the Pacific Coast as well as along the Rocky Mountains. Birds are largely scattered over their migration routes until they reach the coasts where several dozens a day may be counted at the correct time and place.

Similarity of Appearance

Since the mid-1970's approximately 1000 peregrine falcons have been released to the wild in Canada and the United States in an effort to restore extirpated populations and bolster remnant populations. These captive-produced falcons have originated from a variety of wild stocks, including both New and Old World populations. Some of the released falcons have been produced from stocks presently classified as Endangered together with the unlisted stocks. The released birds are readily identified as peregrine falcons, but they are not readily identifiable as to subspecies or genetic background. Crosses between the various stocks are made both in the propagation facilities and later when the released birds breed in the wild.

Pursuant to the "Similarity of Appearance" provisions of Section 4(e) of the act, species (or subspecies or other groups of wildlife) which are not considered to be Endangered or Threatened may nevertheless be treated as such for the purpose of providing protection to a species that is biologically Endangered or Threatened. Under this Similarity of Appearance provision (implemented by § 17.50) the Service must find: (a) that the species so closely resembles in appearance an Endangered or Threatened species that enforcement personnel would have substantial difficulty in identifying listed from unlisted species; (b) that the effect of this substantial difficulty is an additional threat to the Endangered or Threatened species; and (c) that such treatment of an unlisted species will substantially facilitate the enforcement and further the purposes of the Act.

The released stocks of peregrine falcons are almost inseparable from wild birds by nearly any generally accepted means. Even with the band numbers (all are marked prior to release) the managers of the production facilities cannot always determine the genetic stock used to produce a particular individual. (Several semen donors are sometimes used to artifically inseminate the female). A few of these released falcons as well as wild birds have been found shot or trapped by unauthorized individuals in the past few years. The Service has found it difficult to prosecute an individual for the take of a released peregrine falcon under the Endangered Species Act because of the status of some of these subspecies used for stocking purposes. In other cases, falcons are claimed to be the unlisted Peale's peregrine falcon when, in fact, they could be either of the listed subspecies but misidentified. It is clear that these falcons had been shot, trapped, or otherwise taken without any forehand knowledge that these were, in fact, unlisted or listed stocks.

Therefore, the Service, in order to further the purposes of the Act, finds the following: (1) Enforcement personnel, as well as nearly all other persons, would be unable to routinely separate the presently listed stocks (i.e., American or Arctic peregrine falcons) from the unlisted stocks; (2) also, enforcement personnel would not always be able to separate the Endangered American peregrine falcon from the Threatened Arctic peregrine falcon, if the latter becomes so classified; and (3) that the illegal take of any peregrine falcons in areas where listed populations occur would be without regard for, or forehand knowledge of, the status of that particular individual falcon, and thus poses direct and indirect threats to the wild native birds.

The Service proposes to list all free-flying *Falco peregrinus*, not otherwise identifiable as a listed subspecies, to be Endangered under the Similarity of Appearance provision in the 48 coterminous States. As an example, Arctic peregrine falcons found in the 48 coterminous States, but not positively identifiable as such, would be treated as Endangered.

References

There have been many scientific papers, books, administrative reports, recovery plans, letters, petitions, and other documents used in the preparation of this proposed rule. Some of these documents have been prepared for future publication in appropriate scientific journals. Others are still part of ongoing research or management projects and constitute only interim reports of data gathered to date. Some of the documentation goes back several decades while some has been obtained as recently as last summer. The Service is unable to provide a brief list of these hundreds of sources within this Federal Register document. Persons interested in examining these materials may see and copy them as they see fit at the Service's Office of Endangered Species by appointment during normal business hours (703–235–1975).

Five-Year Review

This proposal is a direct result of more than two years of intensive data gathering by the Service for the five-year review required under Section 4 of the Act. This review of the status of a listed species must be conducted at least once every five years (50 CFR 424.20), starting November 10, 1978. The final review of the large numbers of documents submitted in response to the Notice of Review (44 FR 29566–29577) was made in late 1981. The Service wishes to express its gratitude to the hundreds of persons; organizations; Federal, Provincial, and State agencies; and the Canadian Wildlife Service who all have contributed data, suggestions, and other information towards this review over the past three years.

Effects of This Proposed Rule if Finalized

This rule, if made final, would change the status at 50 CFR 17.11 of the Falcons now listed under "Arctic peregrine falcon, *Falco peregrinus tundrius*" from Endangered to Threatened. These rules would formally recognize the relative security of this population from being no longer in danger of extinction throughout a significant portion of its range.

If finalized as proposed, these rules would clarify the status of the subspecies *anatum* and *tundrius* and use some geographic limits for the Endangered *Falco peregrinus anatum* as well. One of the areas with persistent problems as to the identification (*ergo*, status) of some falcons has been the Olympic Peninsula of Washington. A few pairs of falcons nest there, and other falcons are seen in migration or during the winter. The Service believes that most of the nesting birds and some of the non-nesting birds are only an extension of the endangered populations to the east and south. The nesting pairs in this area have been identified as *pealei* by some authorities and *anatum* by others. The Service follows the view that this is an Endangered population and for the purposes of the Act should be so classified. Therefore, under this rule all peregrine falcons found nesting in Washington, not just those east of the Olympic Peninsula, would be recognized as American peregrine falcons and, therefore, treated as Endangered for the purposes of the Act.

The rules, if finalized, would also treat all peregrine falcons found in the wild in the coterminous 48 States and not otherwise determined to be either *anatum* or *tundrius* as Endangered under the Similarity of Appearance provisions (§ 17.50). Anyone taking, attempting to take, or otherwise possessing a *Falco peregrinus* in an illegal manner would be subject to penalty under Section 11 of the Act. For example, a peregrine is shot by a person, but the bird is subsequently determined to be a released bird of uncertain genetic origin. That person would be subject to these Federal regulations as if he had taken an Endangered species. There would be no difference in penalties for the illegal take of an Endangered versus Threatened species.

The taking of all peregrine falcons within the jurisdiction of the United States is subject to the Migratory Bird Treaty Act (16 U.S.C. 703–711), as amended. However, the Migratory Bird Treaty Act provides less protection and penalties than does the Endangered Species Act.

Public Comments Solicited

The Director intends that the rules finally adopted will be as accurate and effective as possible in the conservation of the North American peregrine falcons, Endangered or Threatened. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, private interests, or any other interested party concerning any aspect of these proposals are hereby solicited. Comments from other affected countries and from all the States' (except Hawaii), Puerto Rico's and the Virgin Islands' conservation agencies are also being sought.

Specific information which is being requested includes, but is not limited to: (1) Biological or other relevant data concerning any threat (or lack thereof) to the peregrine falcons covered in this proposal; (2) information on environmental impacts that would result from the rule; and (3) possible alternatives to these proposed rules. The Service recommends that persons making a detailed review of this proposal also refer to other referenced sections and parts of 50 CFR.

National Environmental Policy Act

A draft Environmental Assessment has been prepared in conjunction with this proposed rule. This is on file in the Service's Office of Endangered Species (Mail: U.S. Fish and Wildlife Service (OES), Washington, DC 20240), 1000 N. Glebe Road, Arlington, VA. This document may be examined by appointment during regular business hours and copied, if desired, at no charge at this office. A determination will be made before the time of final rulemaking as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969 and 40 CFR Parts 1500–1508.

Primary Author

The primary author of this proposal is Jay M. Sheppard of the Service's Office of Endangered Species (703–235–1975, address above).

List of Subjects in 50 CFR Part 17

Endangered and threatened wildlife, Fish, Marine mammals, Plants (agriculture).

Proposed Regulatory Promulgation

PART 17—[AMENDED]

Accordingly, the Service proposes to amend Part 17 of Title 50 of the Code of Federal Regulations as follows:

1. The authority citation for Part 17 reads as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1241; and Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531, *et seq.*).

2. Amend the table at § 17.11(h) by revising the entries of the "Falcon, American peregrine" and "Falcon, Arctic peregrine" and adding the entry, Falcon, peregrine under "BIRDS" to read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules

FEDERAL REGISTER PAGES AND DATES, MARCH

6425-6802 1

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday

DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

TABLE OF EFFECTIVE DATES AND TIME PERIODS—MARCH 1983

This table is for determining dates in documents which give advance notice of compliance, impose time limits on public response, or announce meetings.

Agencies using this table in planning publication of their documents must allow sufficient time for printing production.

In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or a holiday, the next Federal business day is used. (see 1 CFR 18.17)

A new table will be published in the first issue of each month.

Dates of FR publication	15 days after publication	30 days after publication	45 days after publication	60 days after publication	90 days after publication
March 1	March 16	March 31	April 15	May 2	May 31

VOL 48 ISS 41 MR 1 1983 UMI

CFR CHECKLIST; 1982/83 ISSUANCES

This checklist, prepared by the Office of the Federal Register, is published in the first issue of each month. It is arranged in the order of CFR titles, and shows the revision date and price of the volumes of the Code of Federal Regulations issued to date for 1982/83. New units issued during the month are announced on the back cover of the daily **Federal Register** as they become available.

For a checklist of current CFR volumes comprising a complete CFR set, see the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $615 domestic, $153.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 42
Wednesday, March 2, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 399, Amdt. 1]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This action increases the quantity of California-Arizona lemons that may be shipped to the fresh market during the period February 20–26, 1983. Such action is needed to provide for orderly marketing of fresh lemons for the period specified due to the marketing situation confronting the lemon industry.

DATES: Effective for the period February 20–26, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manly, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910; 47 FR 50196), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on July 8, 1982. The committee met by telephone on February 23, 1983, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified weeks. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this amendment is based and the effective date necessary to effectuate the declared policy of the Act. This amendment relieves restrictions on the handling of lemons. It is necessary to effectuate the declared purposes of the Act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing Agreements and Orders, California, Arizona, Lemons.

PART 910—[AMENDED]

Section 910.699 Lemon Regulation 399 (48 FR 7153) is revised to read as follows:

§ 910.699 Lemon regulation 399.

The quanity of lemons grown in California and Arizona which may be handled during the period February 20, 1983 through February 26, 1983, is established at 250,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

Dated: February 25, 1983.

D. S. Kuryloski,
Deputy Director, Fruit and Vegetable Division Agricultural Marketing Service.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Services

9 CFR Part 97

[Docket No. 83-013]

Overtime Services Relating to Imports and Exports; Commuted Traveltime Allowances

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends administrative instructions prescribing commuted traveltime. This amendment establishes commuted traveltime periods as nearly as may be practicable to cover the time necessarily spent in reporting to and returning from the place at which an employee of Veterinary Services performs overtime or holiday duty when such travel is performed solely on account of overtime or holiday duty. Such establishment depends upon facts within the knowledge of the Animal and Plant Health Inspection Service.

EFFECTIVE DATE: March 2, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. J. L. Ellis, Executive Officer, Veterinary Services, APHIS, USDA, Federal Building, 6505 Belcrest Road, Room 857, Hyattsville, MD 20782, 301–436–8511.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This final action has been reviewed under Executive Order 12291, and has been determined to be exempt from those requirements. Nicholas E. Bedessem, Special Assistant to the Administrator, made this determination because commuted traveltime allowances are strictly a function of where the APHIS employee lives in relation to the place overtime or holiday duty is performed. As employees are transferred or change their residence or as the place of inspection changes, the number of hours of commuted traveltime allowed may change. This amendment

merely reflects such changes and serves to notify the public of the new allowed hours.

It is to the benefit of the public that these instructions be made effective at the earliest practicable date. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

List of Subjects in 9 CFR Part 97

Exports, Government employees, Imports, Livestock and livestock products, Poultry and poultry products, Transportation.

PART 97—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Therefore, pursuant to the authority conferred upon the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, by § 97.1 of the regulations concerning overtime services relating to imports and exports (9 CFR 97.1), administrative instructions 9 CFR 97.2 (1982 ed.), as amended May 28, 1982 (47 FR 23429–23431), and November 18, 1982 (47 FR 51855), prescribing the commuted traveltime that shall be included in each period of overtime or holiday duty are further amended by adding an entry for Minot, North Dakota, in appropriate alphabetical sequence to read as shown below:

§ 97.2 Administrative instructions prescribing commuted traveltime.

* * * * *

COMMUTED TRAVELTIME ALLOWANCES

(In hours)

Location covered	Served from Metropolitan area	
	Within	Outside
Add:		
North Dakota		
Minot	1	

(84 Stat. 501 (7 U.S.C. 2260))

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest and good cause is found for making this final rule effective less than 30 days after publication of this document in the Federal Register.

Done at Washington, D.C., this 24th day of February, 1983.

Norvan L. Mayer,

Acting Deputy Administrator, Veterinary Services.

[FR Doc. 83-5306 Filed 3-1-83; 8:45 am]

BILLING CODE 3410-34-M

Packers and Stockyards Administration

9 CFR Part 201

General Bonding Regulations

AGENCY: Packers and Stockyards Administration, USDA.

ACTION: Final rule.

SUMMARY: This document revises two of the general bonding regulations, 201.29 and 201.30. The revised bonding regulations require all dealers and market agencies buying on commission subject to the Packers and Stockyards Act to file a surety bond or bond equivalent. The minimum acceptable bond is $10,000.

A new regulation, 201.35, permits market agencies, dealers and packers to file irrevocable letters of credit and trust agreements in satisfaction of the bond requirement.

EFFECTIVE DATE: Sections 201.29 and 201.35 April 1, 1983. Section 201.30 effective July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Jack Brinckmeyer, Financial Protection Branch, telephone (202) 447–4366.

SUPPLEMENTARY INFORMATION: Proposed changes in regulations 201.29 and 201.30 relating to bonding of small volume dealers and market agencies were published initially in the Federal Register on February 1, 1982 (47 FR 4668). In light of the overwhelming public disapproval of the proposed bonding exemption for small volume buyers of livestock, as reflected in the comments received, regulation § 201.29 was modified and republished along with regulations §§ 201.30 and 201.35 on August 24, 1982 (47 FR 36852). Thirty comments were filed in response to the August notice, the majority of which endorsed all proposals announced therein. The comments filed concerning regulations §§ 201.29 and 201.30 in response to the February notice were evaluated in detail in the August publication and reviewed again in connection with the latest notice.

Requirement To File and Maintain Bond

All comments responding to regulation 201.29 as reproposed endorsed the requirement that all market agencies, dealers, and packers subject to the Act file and maintain a surety bond. No comments were received opposing the regulation. The Administration has determined that regulation 201.29 as re-proposed will be adopted as a final rule.

Amount of Bond

Fourteen of the comments received in response to the August proposal responded to the suggested revisions to regulation 201.30. Twelve of these comments supported the proposed revisions to regulation § 201.30, which sets forth the method of calculating the amount of required bond coverage for persons subject to the Act. No comments opposed the $10,000 minimum bond level and two comments offered formula changes.

One response recommended a formula that would increase the minimum bond by basing it on the actual number of days during the week each buyer purchased livestock, rather than the average of 2 days' purchases as proposed. The latter formula is preferred as it is keyed to the prompt payment requirements of the Act.

Another comment questioned the divisor change in the bond formula for market agencies selling on commission, and the factual basis for raising the 10 percent excess calculation from $50,000 to $75,000 on dealer and order buyer bonds. That comment also expressed strong objection to the overall bond formula, stating that the formula did not address "alleviation of risk," as no "business worth" factor was included in the bond calculation.

By this proposal, the Administration is not changing the divisor used to determine the amount of bond coverage required for market agencies selling on commission. The wording of the present regulation, "the actual number of auction sales at which livestock was sold," has been long interpreted to be the number of days on which auction sales are conducted and not the number of sales conducted. The proposed wording is designed to clarify and to insure that the amount of bond will accurately reflect the volume of business conducted on the days livestock was sold.

With respect to the application of the 10 percent calculation to bond coverage levels in excess of $75,000, during 1980, prior to the first published recommendation to modify regulation 201.30, the agency prepared a draft impact analysis which evaluated alternate bond formulas for dealers and order buyers. In that analysis, excess factors were applied to varying "break points" including $50,000, $75,000, and

$200,000. The percent factor was also varied from 10 percent to 20 percent. A 6-year period was used for purposes of analysis. A review of the claims filed on the bonds of dealers and order buyers during the 6-year test period showed that 15 percent of the bonds on which claims were filed were in excess of $50,000, and represented 38.8 percent of the total dollars claimed on all bonds. Bonds in the amount of $55,000, $60,000, or $65,000 represented 61 percent of the bonds over $50,000 and accounted for 31 percent of the total dollars claimed on all bonds. If the proposed $75,000 "break point" had been in effect during the period studied, an additional 12 percent of the bonds over $50,000 would have been sufficient to pay the claims filed. The increase in the amount of bond coverage would have provided at least $427,000 in additional funds for the payment of filed bond claims. The agency has determined, therefore, that increasing the "break point" to $75,000 will increase bond coverage in the area where a large percentage of the bonds had been of insufficient proportion to pay the claims filed.

The inclusion of a net worth factor in the bond formula was recommended as a means of further alleviating financial risk in livestock purchase and sales transactions. The Administration has considered several alternative bonding formulas besides the one proposed. However, it has concluded that the value of livestock purchased provides the best basis for establishing the required amount of bond coverage. Net worth is not an indicator of solvency under the Packers and Stockyards Act, nor the buyer's ability to pay promptly for livestock purchases. Further, a positive net worth in no way guarantees payment, as does the bond, in the event of a buyer's failure to pay. Additionally, net worth may fluctuate with changes in business activities, asset values, and market conditions. Certainly, a seller may choose to consider net worth or "business worth" before deciding to sell livestock to any buyer. The Administration, however, has determined, for the reasons stated above, that the inclusion of the net worth of the buyer as a factor in the bond formula would not improve the formula proposed, would result in increased risk to livestock sellers, and would increase the reporting requirements and paperwork costs associated with compliance and monitoring of the bonding requirements. The Administration has determined that regulation § 201.30 as proposed will be adopted as a final rule.

The Administration bases its bond coverage calculations on the business volume figures submitted on the annual report. Inasmuch as most persons subject to the Act's bonding requirements report their business on a calendar year basis and file their annual reports on or before April 15, the effecive date of regulation § 201.30 will be July 1, 1983. That effective date will allow those persons required to change their bonds based on 1982 business volume sufficient time to obtain the necessary coverage. If the effective date were established prior to this April filing, it is possible that the bond amount would need to be changed twice within a short period of time. Therefore, in order to reduce paperwork for the affected industry, surety companies, and the agency, the July 1, 1983, effective date will be used.

Letter of Credit As Bond Equivalent

Of the 27 comments filed with respect to the letter of credit proposal, 25 comments strongly supported the proposal to permit the use of irrevocable letters of credit to fulfill the bonding requirements of the Act. Twelve of the supportive comments were received from individual packers predominantly located in the southwestern United States. The only negative comments were filed by persons involved in insurance underwriting who stand to lose business as a result of the proposal. One such comment suggested that the proposed letter of credit and trust agreement were too lengthy and that the actual mechanics of administering the program would require much more paperwork than the traditional bond or trust fund agreement. However, the use of an irrevocable letter of credit in lieu of a bond or trust fund agreement is optional for the registrant or packer, who would certainly evaluate the costs associated therewith before electing this option.

While indicating no specific objection to letters of credit, the comment by the Surety Association of America nonetheless stated that bonds had proven effective over time, that bonds offered the advantage of prequalification expertise, and warned that in recent court cases bankruptcy judges enjoined the honoring of letters of credit. Other authorities show such injunctions to be erroneous and reversible. The agency does not believe the threat of such injunctions sufficient to warrant withdrawal of the proposed regulation. With respect to the financial prequalification of the bond applicant by the surety, the agency has been informed that similar prequalification procedures will be exercised by those financial institutions issuing such letters of credit. Finally, the comment stated that letters of credit provided inadequate protection against invalid claims because said letters of credit are payable on demand. The trust agreement which accompanies the letter of credit will provide the necessary protection against invalid claims. The trustee must determine that funds are in fact due the claimant before the trustee can pay them. Also, the principal may contest claims as it sees fit.

The Ohio Department of Agriculture recommended that the issuer of the letter of credit be prohibited from acting as trustee under the trust agreement. The discretion given to the trustee is so limited and the provisions for legal action by the claimant so broad that this arrangement is unlikely to cause a serious conflict of interest. Secondly, the Ohio Department of Agriculture suggested that the trustee be required to give advance notice of his intent to resign. A sentence has been added to paragraph (1) of the trust agreement to clarify that the trustee would continue to be obligated to act after resignation and until a successor trustee is appointed so that there will be no period of time without a trustee authorized and obligated to act.

A question was raised with respect to the "therefore clause" in the proposed trust agreement form and the provision allowing reimbursement and compensation to the trustee from the trust funds. The proposed trust agreement, as printed in the Federal Register, contained a typographical error, which has been corrected in this notice. This correction should answer the question raised concerning the "therefore" clause. The new trust agreement provides for trustee reimbursement and compensation. However, under the other arrangements, bond trustees are presently allowed reasonable fees and expenses. Such compensation has been awarded in the past without being specified under the other arrangements. When the suggested surety bond and trust fund agreement in lieu of bond forms are reprinted, the inclusion of such provision will be considered.

The Administration has determined that regulation § 201.35 will be adopted as a final rule with the clarifying changes described herein.

Executive Order

It has been determined that the provisions of the regulations relating to bonding of market agencies and dealers and the new regulation concerning

irrevocable letters of credit are not "major" rules as defined by section 1(b) of E.O. 12291.

The rules will not have an annual effect on the economy of $100 million or more, will not result in major increases in costs or prices for consumers, individual industries, government agencies or geographic regions, and will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S. based enterprises to compete with foreign based enterprises in domestic or export markets. Accordingly, regulatory impact analyses are not required.

Regulatory Flexibility Act

B. H. (Bill) Jones, Administrator, Packers and Stockyards Administration, has determined that the rules will not have a significant economic impact on a substantial number of small entities. For those registrants required to increase bond coverage from $5,000 to $10,000, the cost of this increased bond coverage, approximately $50 per year per registrant, is insignificant.

Paperwork Reduction Act of 1980

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), the reporting or recordkeeping provisions that are included in this rule have been submitted for approval to the Office of Management and Budget (OMB). They will not be effective until OMB approval has been obtained.

List of Subjects in 9 CFR Part 201

Reporting and recordkeeping requirements, Stockyards, Surety bonds, Trade practices.

Accordingly, Part 201, Chapter II of Title 9 of the Code of Federal Regulations is amended and revised as set forth below:

PART 201—[AMENDED]

1. Section 201.29 is revised to read as follows:

§ 201.29 Market agencies, packers and dealers required to file and maintain bonds.

(a) Every market agency, packer, and dealer, except as provided in paragraph (d) herein, and except packer buyers registered as dealers to purchase livestock for slaughter only, shall execute and maintain a reasonable bond on forms approved by the Administrator containing the appropriate condition clauses, as set forth in § 201.31 of the regulations, applicable to the activity or activities in which the person or persons propose to engage, to secure the performance of obligations incurred by such market agency, packer, or dealer. No market agency, packer, or dealer required to maintain a bond shall conduct his operations unless there is on file and in effect a bond complying with the regulations in this part.

(b) Every market agency buying on a commission basis and every dealer buying for his own account or for the accounts of others shall file and maintain a bond. If a registrant operates as both a market agency buying on a commission basis and as a dealer, only one bond to cover both buying operations need be filed. Any person operating as a market agency selling on a commission basis and as a market agency buying on a commission basis or as a dealer shall file and maintain separate bonds to cover his selling and buying operations.

(c) Each market agency and dealer whose buying operations are cleared by another market agency shall be named as clearee in the bond filed and maintained by the market agency registered to provide clearing services. Each market agency selling livestock on a commission basis shall file and maintain its own bond.

(d) Every packer purchasing livestock, directly or through an affiliate or employee or a wholly-owned subsidiary, except those packers whose annual purchases do not exceed $500,000, shall file and maintain a reasonable bond. In the event a packer maintains a wholly-owned subsidiary or affiliate to conduct its livestock buying, the wholly-owned subsidiary or affiliate shall be registered as a packer buyer for its parent packer firm, and the required bond shall be maintained by the parent packer firm.

2. Section 201.30 is revised to read as follows:

§ 201.30 Amount of market agency, dealer and packer bonds.

(a) *Market agency selling livestock on commission.* To compute the required amount of bond coverage, divide the dollar value of livestock sold during the preceding business year, or the substantial part of that business year, in which the market agency did business, by the actual number of days on which livestock was sold. The divisor (the number of days on which livestock was sold) shall not exceed 130. The amount of bond coverage must be the next multiple of $5,000 above the amount so determined. When the computation exceeds $50,000, the amount of bond coverage need not exceed $50,000 plus 10 percent of the excess over $50,000, raised to the next $5,000 multiple. In no case shall the amount of bond coverage for a market agency selling on commission be less than $10,000 or such higher amount as required to comply with any State law.

(b) *Market agency buying on commission or dealer.* The amount of bond coverage must be based on the average amount of livestock purchased by the dealer or market agency during a period equivalent to 2 business days. To compute the required amount of bond coverage, divide the total dollar value of livestock purchased during the preceding business year, or substantial part of that business year, in which the dealer or market agency or both did business, by one-half the number of days on which business was conducted. The number of days in any business year, for purposes of this regulation, shall not exceed 260. Therefore, the divisor (one-half the number of days on which business was conducted) shall not exceed 130. The amount of the bond coverage must be the next multiple of $5,000 above the amount so determined. When the computation exceeds $75,000, the amount of bond coverage need not exceed $75,000 plus 10 percent of the excess over $75,000, raised to the next $5,000 multiple. In no case shall the amount of bond coverage be less than $10,000 or such higher amount as required to comply with any State law.

(c) *Market agency acting as clearing agency.* The amount of bond coverage must be based on the average amount of livestock purchased by all persons for whom the market agency served as a clearor during a period equivalent to 2 business days. To compute the required amount of bond coverage, divide the total dollar value of livestock purchased by all persons for whom the market agency served as a clearor during the preceding business year, or substantial part of that business year, in which the market agency acting as clearing agency did business, by one-half the number of days on which business was conducted. The number of days in any business year, for purposes of this regulation, shall not exceed 260. Therefore, the divisor (one-half the number of days on which business was conducted) shall not exceed 130. The amount of bond coverage must be the next multiple of $5,000 above the amount so determined. When the computation exceeds $75,000, the amount of bond coverage need not exceed $75,000 plus 10 percent of the excess over $75,000, raised to the next $5,000 multiple. In no case shall the amount of bond coverage be less than $10,000 or such higher amount as required to comply with any State law.

(d) *Packer.* The amount of bond coverage must be based on the average amount of livestock purchased by the packer during a period equivalent to 2

business days. To compute the required amount of bond coverage, divide the total dollar value of livestock purchased during the preceding business year, or substantial part of that business year, in which the packer did business, by one-half the number of days on which business was conducted. The number of days in any business year, for purposes of this regulation, shall not exceed 260. Therefore, the divisor (one-half the number of days on which business was conducted) shall not exceed 130. The amount of the bond coverage must be the next multiple of $5,000 above the amount so determined. In no case shall the amount of bond coverage for a packer be less than $10,000.

(e) If a person applying for registration as a market agency or dealer has been engaged in the business of handling livestock before the date of the application, the value of the livestock handled, if representative of future operations, must be used in computing the required amount of bond coverage. If the applicant for registration is a successor in business to a registrant formerly subject to these regulations, the amount of bond coverage of the applicant must be at least that amount required of the prior registrant, unless otherwise determined by the Administrator. If a packer becomes subject to these regulations, the value of livestock purchased, if representative of future operations, must be used in computing the required amount of bond coverage. If a packer is a successor in business to a packer formerly subject to these regulations, the amount of bond coverage of the successor must be at least that amount required of the prior packer, unless otherwise determined by the Administrator.

(f) Whenever the Administrator has reason to believe that a bond is inadequate to secure the performance of the obligations of the market agency, dealer or packer covered thereby, the Administrator shall notify such person to adjust the bond to meet the requirements the Administrator determines to be reasonable.

3. A new § 201.35 is added to read as follows:

§ 201.35 Letters of credit as bond equivalents.

(a) Any packer, market agency, or dealer required to maintain a surety bond under these regulations may elect to maintain, in whole or partial substitution for such surety bond, one or more irrevocable letters of credit on which a trustee is authorized to draw funds subject to a trust agreement. The amount of such letters of credit, surety bond, trust fund agreement, or combination thereof, must be the total amount of the surety bond otherwise required under these regulations.

(b) Any such letter of credit must be issued by a national bank or a bank insured by the Federal Deposit Insurance Corporation.

(c) The trustee on any such trust agreement must be a person financially responsible, independent of the packer, market agency or dealer, and satisfactory to the Administrator.

(d) Any letter of credit issued pursuant to this section must be received by the trustee authorized to draw funds on it, and a photographically reproduced copy of such letter of credit, and a fully executed duplicate of such trust agreement, and of any endorsement, rider, amendment, indemnity agreement, or other attachment to such trust agreement, must be filed with the Regional Supervisor for the area of the packer's, market agency's, or dealer's principal place of business.

(e) Such letters of credit and trust agreements to which funds drawn thereunder would be subject must be on the following forms:

(Identification of bank and, if desired, branch, division, department, etc.)

Irrevocable Transferable Standby Letter of Credit

Our letter of credit no.———. (if desired:) This number must be mentioned on all drafts and correspondence.

Date:

To: (Identification of Trustee), as Trustee under a certain Trust Agreement, effective on (date), to which (packer, market agency or dealer) is a party, or successor Trustee under the same Trust Agreement.

This credit is transferable, one or more times, but only to a successor Trustee designated by the Packers and Stockyards Administration, United States Department of Agriculture, under the same Trust Agreement. Any such transfer shall govern all rights of the Trustee, including the entire amount which remains available under this credit at the time of such transfer.

Sight draft or drafts should be drawn on us, your draft or drafts drawn at sight bearing the clause, "drawn under (bank) standby letter of credit no.—— dated ——— up to the aggregate amount of $——."

Any such draft must be accompanied by drawer's signed statement, "drawer will dispose of funds received under the accompanying draft in accord with the Trust Agreement effective on (date) to which (packer, market agency or dealer) is a party." We will not be responsible for drawer's disposition of funds received by drawer.

If any such draft is drawn by a successor Trustee under the same Trust Agreement, it must be accompanied by a copy of the letter of the Packers and Stockyards Administration, United States Department of Agriculture, designating such drawer as successor Trustee. We will not be responsible for verifying the authenticity of any such document which appears on its face to be authentic.

Except as otherwise specifically provided herein, any such draft need not be accompanied by any other document.

This credit may not be modified without the written approval of the Administrator, Packers and Stockyards Administration, United States Department of Agriculture.

(Either:)

Any such draft must be received by us on or before (expiration date). We hereby agree with drawers, endorsers, and bona fide holders of all drafts drawn hereunder and in compliance herewith that such drafts will be duly honored at sight upon presentation to us. (if desired:) The amount of any draft drawn hereunder must be endorsed on the reverse side of this letter of credit by the negotiating bank, and any such draft must be accompanied by a signed statement that an appropriate notation has been made, or by this letter.

(Or, if desired, the preceding paragraph may read as follows:)

Any such draft must be received by us on or before (expiration date). We hereby agree with drawers of all drafts drawn hereunder and in compliance herewith that such drafts will be duly honored at sight upon presentation to us. (if desired:) This letter must be presented with any such draft, for endorsement of the amount of such draft on the reverse side of this letter.

Except as provided above, this credit is subject to the Uniform Customs and Practice for Documentary Credits (1974 revision), International Chamber of Commerce Publication No. 290.

Authorized Signature.

Trust Agreement for Use With One or More Letters of Credit in Lieu of Bond Required of Livestock Market Agencies, Dealers and Packers Under the Packers and Stockyards Act, 1921, as Amended and Supplemented

Whereas the provisions of the Packers and Stockyards Act, 1921, as amended and supplemented, and the regulations issued thereunder by the Secretary of Agriculture, acting through the Administrator, Packers and Stockyards Administration, United States Department of Agriculture, Washington, D.C. 20250, hereinafter known as the Administrator, require a good and sufficient surety bond or its equivalent of market agencies, dealers, and packers as defined in said Act to cover their obligations as such; and

Whereas ———, hereinafter known as the principal, is engaged in business as a market agency, dealer, or packer as defined in that Act and ———, hereinafter known as the trustee, accepts the obligations of the trustee hereunder;

Now, therefore, the principal has obtained or will obtain, from one or more banks, one or more irrevocable letters of credit, under which the trustee may draw funds from such banks, for the account of the principal, for the following purposes and subject to the following conditions:

Applicable if Principal Sells on Commission

(1) If the principal shall pay when due to the person or persons entitled thereto the gross amount, less lawful charges, for which all livestock is sold for the accounts of others by the principal.

Applicable if Principal Buys on Commission or as Dealer

(2) If the principal shall pay when due to the person or persons entitled thereto the purchase price of all livestock purchased by the principal for his own account or for the accounts of others, and if the principal shall safely keep and properly disburse all funds, if any, which come into his hands for the purpose of paying for livestock purchased for the accounts of others.

Applicable if Others Clear Through Principal

(3) If the principal, acting as a clearing agency responsible for the financial obligations of other registrants engaged in buying livestock, viz: (insert here the names of such other registrants as they appear in the application for registration), or if such other registrants shall (1) pay when due to the person or persons entitled thereto the purchase price of all livestock purchased by other such registrants for their own account or for the accounts of others and (2) safely keep and properly disburse all funds coming into the hands of such principal or such other registrants for the purpose of paying for livestock purchased for the accounts of others.

Applicable if Principal Buys as a Packer

(4) If the principal shall pay when due to the person or persons entitled thereto the purchase price of all livestock purchased by the principal for his own account.

Conditions ——— and ——— were deleted prior to execution and are not part hereof.

If such condition or conditions are met, then funds drawn by the trustee hereunder shall not be liable, but if there shall be any defaults, failures, or neglects under any one or more of said conditions, then such funds shall be liable, subject to the following terms, conditions and limitations:

(a) Any person damaged by failure of the principal to comply with any condition of this agreement, in a transaction occurring on or after the effective date of this agreement and before the termination date of this agreement in accord with its provisions, may recover under this agreement in accord with and subject to its provisions. Acts, omissions or failures of authorized agents or representatives of the principal or persons whom the principal shall knowingly permit to represent themselves as acting for the principal shall be taken and construed to be acts, omissions or failures of the principal and to be within the protection of this agreement to the same extent and in the same manner as if they were the personal acts of the principal.

(b) The trustee shall not be liable to pay any claim for recovery under this agreement if it is not in writing and received by either the trustee or the Administrator within 120 days from the date of the transaction of which the claim is based. Whichever of these persons receives such a claim shall notify the other such person and the principal at the earliest practicable date.

(c) The trustee, upon determination that funds are due to a claimant, shall draw funds pursuant to a letter of credit obtained by the principal under this agreement, as necessary to pay what is due to the claimant, up to the amount of such letter, and pay such funds to the claimant, except as otherwise provided hereinafter. The trustee, prior to paying any funds to any claimant, shall determine the total amount due to all claimants under this agreement. If such total amounts exceeds the total of funds which can be drawn by the trustee under letter(s) of credit obtaining by the principal under this agreement, the trustee shall distribute such funds pro rata among the claimants to which funds are due. Payment by the trustee to any such claimant and acceptance by any such claimant of such payment from the trustee shall discharge the trustee, and reduce the amount of funds subject to this agreement, as to such claimant and in the amount of such payment.

(d) If the principal seeks an order of a court to enjoin the honoring of a draft drawn by the trustee, or an order of a court to enjoin payment by the trustee of a claim, or both, the trustee shall notify the claimant and the Administrator. In any such action the trustee shall not be obligated to defend; the claimant at his own expense may defend in the name of the trustee.

(e) Any claimant under this agreement may maintain suit in his own name and at his own expense against the trustee and, if desired, the principal, to recover under this agreement even though such claimant is not a party named in this agreement, except as provided hereinafter. The trustee shall not be liable to pay any claim for recovery under this agreement if it is not in writing and received by the trustee or the Administrator within 120 days from the date of the transaction on which it is based, or if the claimant commences suit against the trustee thereon in less than 180 or more than 547 days (which is approximately 18 months) of the date of the transaction on which the claim is based. The principal and the trustee hereby waive every defense, if any there be, based on the fact that any such claimant is not a party or privy to this agreement. In any such action brought by a claimant against the trustee, the trustee shall not be obligated to defend; the principal or any other claimant at his own expense may defend in the name of the trustee.

(f) If any draft of the trustee under a letter of credit obtained by the principal under this agreement is not honored by the bank on which it is drawn, the trustee shall notify the claimant and the Administrator. The claimant may at his own expense bring legal action in the name of the trustee to compel payment under the letter of credit to the trustee for disposition under this agreement. The trustee shall not be obligated to prosecute in any such action.

(g) If one irrevocable letter of credit obtained by the principal under this agreement is replaced by another in the same form issued by the same bank under which the trustee can draw the same or a greater amount at the same or a later time than under the former such letter of credit, the trustee may surrender the former in exchange for the latter. In exchange for the entire amount which can be drawn by the trustee under any such letter of credit, the trustee may surrender such letter. The trustee may dispose of any such letter which has expired. The trustee shall not, without written approval of the Administrator, otherwise surrender or dispose of any letter of credit obtained by the principal under this agreement.

(h) If any letter of credit obtained by the principal under this agreement is about to expire and has not been replaced by another in the same form issued by the same bank under which the trustee can draw the same or a greater amount at a later time than under the expiring letter of credit, the trustee, unless the Administrator shall in writing state that this is unnecessary, shall obtain the full amount of such expiring letter of credit before it expires.

(i) This agreement may be terminated by either the trustee or the principal, by delivering, to the other such person and the Administrator, written notice of termination stating or describing a termination date. The termination date shall not be less than 30 days after the date such notice of termination is received by the Administrator unless the Administrator in writing approves an earlier termination date. Transactions occurring after the termination date may not be the basis of claims under this agreement. The trustee shall deliver such notice upon receipt of any claim for recovery under this agreement unless the principal informs the trustee that action will be taken to contest the claim. The trustee, unless otherwise directed in writing by the Administrator, shall, before the termination date, draw the full amount which can be drawn under every letter of credit obtained by the principal hereunder.

(j) During times when the trustee holds funds which have been obtained under this agreement, the trustee shall invest such funds in the name of the trustee in fully negotiable obligations of or guaranteed by the United States, or in deposits in national banks or other banks insured by the Federal Deposit Insurance Corporation, or as otherwise approved in writing by the Administrator. The trustee shall not be obligated to maximize interest received on such funds. Interest received by the trustee on such funds shall be disposed of by the trustee in the same manner as such funds. The trustee shall not expend such funds except as follows:

(1) Such funds may be used to pay taxes due on account of interest received by the trustee on such funds;

(2) Such funds may, with the written approval of the Administrator, be used to pay reasonable expenses and compensation of the trustee;

(3) Such funds may be paid to claimants to whom such funds are due under this agreement;

(4) Such funds determined not to be needed to pay claimants under this agreement may, with the written approval of the Administrator, be returned to the bank from which such funds are obtained for credit to the account of the principal.

(k) No amendment, endorsement, rider, or modification of this agreement shall be effective unless it is in writing, a fully executed duplicate of it is received by the Administrator, and either 30 days shall elapse after the date the duplicate is received by the Administrator or the Administrator shall state in writing that he has no objection to it. Termination of the clearance of a registrant under condition clause 3 of this agreement may be accomplished by a rider deducting the name of such registrant.

(l) The trustee may resign by delivering written notice of resignation to the Administrator. The Administrator is hereby authorized to designate a person to act as trustee under this agreement if the trustee designated herein or a successor trustee resigns, or fails or is unable to act or serve. Immediately upon such designation by the Administrator, the prior trustee shall transfer all letters of credit obtained by the principal hereunder, and shall pay over all funds drawn under such letters of credit and in the possession of the prior trustee, to the person so designated by the Administrator. Such transfer and payment shall discharge the prior trustee from all obligation hereunder to draw funds after such transfer under any letter of credit so transferred, or to disburse any funds so paid, and from all other obligations accruing under this agreement after such transfer and payment. Resignation shall not operate to discharge the prior trustee from obligations accruing under this agreement prior to such transfer and payment.

(m) The term "person" as used in this agreement shall be construed to mean and include both singular and plural, corporations, partnerships, associations, individuals and the heirs, executors, administrators, successors, or assigns thereof.

(n) Any reference herein to one letter of credit shall be deemed to apply to multiple letters of credit if obtained by the principal under this agreement.

(o) Any notice or document required to be given to or filed with the Administrator under this agreement may be given to the Regional Supervisor, Packers and Stockyards Administration, for the region of the principal's residence or principal place of business. Any approval, authorization, designation or other action by the Administrator under this agreement may be taken or performed by such Regional Supervisor or by the Administrator.

This agreement shall become effective on the —— day of ——, 19 —.

Signature of Trustee

Signature of Principal

BILLING CODE 3410-KD-M

FEDERAL ELECTION COMMISSION

11 CFR Part 110

[Notice 1983-5]

Disclaimer Notices

AGENCY: Federal Election Commission.

ACTION: Transmittal of regulations to Congress.

SUMMARY: FEC regulations at 11 CFR 110.11 governing the inclusion of disclaimer notices in political communications and advertising have been revised and transmitted to Congress pursuant to 2 U.S.C. 438(d). The revisions clarify the Act's requirements for the use of disclaimers on solicitations and on communications expressly advocating the election or defeat of a clearly identified candidate. Further information on the precise changes made is contained in the supplementary information which follows.

EFFECTIVE DATE: Further action, including the announcement of an effective date, will be taken by the Commission after these regulations have been before the Congress 30 legislative days in accordance with 2 U.S.C. 438(d).

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, 1325 K Street, NW., Washington, D.C. 20463, (202) 523-4143 or (800) 424-9530.

SUPPLEMENTARY INFORMATION: The revisions are based upon the Commission's experience in administering 2 U.S.C. 441d and on public comment received in response to the Commission's Notice of Proposed Rulemaking (47 FR 3796; January 27, 1982).

2 U.S.C. 438(d) requires that any rule or regulation prescribed by the Commission to implement Title 2, United States Code, be transmitted to the Speaker of the House of Representatives and the President of the Senate prior to final promulgation. If neither House of Congress disapproves of the regulations within 30 legislative days of their transmittal, the Commission may finally prescribe the regulations in question. The following regulations were transmitted to Congress on February 25, 1983.

Explanation and Justification for 11 CFR 110.11(a)

The Commission has revised subsection (a) of 11 CFR 110.11 to address several issues that have arisen concerning the current regulation. Overall, the language of this subsection has been redrafted to more closely follow 2 U.S.C. 441d.

Subsection (a)(1) has been revised to more clearly indicate that all communications that expressly advocate the election or defeat of a candidate or that solicit contributions must contain a disclaimer if they are made through a form of general public political advertising. References to posters and yard signs have been included in the list of media which trigger the notice requirement. In addition, the last sentence of this subsection now requires that the disclaimer appear on the front face of communications, such as those on billboards, that only have a front side viewed by the public.

Subsections (a)(1) (i) and (ii) generally follow 2 U.S.C. 441d(a) (1) and (2). Subsection (a)(1)(iii) has been redrafted to more closely follow 2 U.S.C. 441d(a)(3).

Subsection (a)(1)(iv) has been revised to contain two subsections. Subsection (A) now covers solicitations directed to the general public made on behalf of a political committee that is not a candidate's authorized committee. Subsection (B) exempts solicitations by a separate segregated fund from the disclaimer notice requirement when the solicitation is for contributions to the separate segregated fund. This latter provision incorporates into the regulations the Commission's opinion in Advisory Opinion 1980-71.

A new second sentence has been added to subsection (a)(2), exempting communications made using means on which inclusion of a disclaimer would be impracticable. Examples of such means are skywriting and watertowers.

The Commission notes that 2 U.S.C. 435(b), which required committees to include a notice on all literature and advertising stating that a copy of the committee's reports were on file with and available from the Commission, was repealed by Congress in the 1979 Amendments to the Federal Election Campaign Act, effective January 8, 1980. Pub. L. 96-187.

List of Subjects in 11 CFR Part 110

Campaign funds, Political committees, Political candidates.

PART 110—[AMENDED]

11 CFR Part 110 is amended by revising § 110.11(a) to read as follows:

§ 110.11 Communications; advertising.

(a)(1) Except as provided at 11 CFR 110.11(a)(2), whenever any person makes an expenditure for the purpose of financing a communication that expressly advocates the election or defeat of a clearly identified candidate,

or that solicits any contribution, through any broadcasting station, newspaper, magazine, outdoor advertising facility, poster, yard sign, direct mailing or any other form of general public political advertising, a disclaimer meeting the requirements of 11 CFR 110.11(a)(1) (i), (ii), (iii) or (iv) shall appear and be presented in a clear and conspicuous manner to give the reader, observer or listener adequate notice of the identity of persons who paid for and, where required, who authorized the communication. Such person is not required to place the disclaimer on the front face or page of any such material, as long as a disclaimer appears within the communication, except on communications, such as billboards, that contain only a front face.

(i) Such communication, including any solicitation, if paid for and authorized by a candidate, an authorized committee of a candidate, or its agent, shall clearly state that the communication has been paid for by the authorized political committee; or

(ii) Such communication, including any solicitation, if authorized by a candidate, an authorized committee of a candidate or an agent thereof, but paid for by any other person, shall clearly state that the communication is paid for by such other person and, is authorized by such candidate, authorized committee or agent; or

(iii) Such communication, including any solicitation, if made on behalf of or in opposition to a candidate, but paid for by any other person and not authorized by a candidate, authorized committee of a candidate or its agent, shall clearly state that the communication has been paid for by such person and is not authorized by any candidate or candidate's committee.

(iv)(A) For solicitations directed to the general public on behalf of a political committee which is not an authorized committee of a candidate, such solicitation shall clearly state the full name of the person who paid for the communication.

(B) For purposes of this section, whenever a separate segregated fund solicits contributions to the fund from those persons it may solicit under the applicable provisions of 11 CFR Part 114, such communication shall not be considered a form of general public advertising and need not contain the disclaimer set forth in 11 CFR 110.11(a)(1)(iv)(A).

(2) The requirements of 11 CFR 110.11(a)(1) do not apply to bumper stickers, pins, buttons, pens and similar small items upon which the disclaimer cannot be conveniently printed. The requirements of 11 CFR 110.11(a)(1) do not apply to skywriting, watertowers or other means of displaying an advertisement of such a nature that the inclusion of a disclaimer would be impracticable.

Dated: February 25, 1983.

Danny Lee McDonald,

Chairman, Federal Election Commission.

BILLING CODE 6715-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL 2290-2]

Approval and Promulgation of Implementation Plans; Ohio

AGENCY: Environmental Protection Agency (EPA)

ACTION: Final rule.

SUMMARY: The EPA announces final rulemaking on a revision to the Ohio State Implementation Plan (SIP) for Volatile Organic Compounds (VOC). The revision is a variance from the December 31, 1982, SIP deadline for achieving final compliance with emission limits, applicable to the Standard Register Company, for a surface coating line and spray booth for painting miscellaneous metal parts at its Dalton facility. The SIP revision allows the Standard Register Company additional time to convert to high-solids paints and extends the final compliance date to December 31, 1983. EPA's action is based upon a request from the State of Ohio to approve a revision to its SIP.

DATE: This action will be effective May 2, 1983 unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of this revision to the Ohio SIP are available for inspection at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408.

Copies of the SIP revision, and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Uylaine McMahan at (312) 353-0396 before visiting the Region V Office).

Environmental Protection Agency, Region V, Air Programs Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

Ohio Environmental Protection Agency, Office of Air Pollution Control, 361 East Broad Street, Columbus, Ohio 43216

Written Comments Should be Sent to: Gary Gulezian, Chief, Regulatory Analysis Section, Air Programs Branch, Region V, Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Uylaine McMahan, (312) 353-0396.

SUPPLEMENTARY INFORMATION: On October 22, 1982, the Ohio Environmental Protection Agency (OEPA) submitted a revision to its ozone SIP for the Standard Register Company. The revision is in the form of a variance for an extended compliance time schedule to convert to high-solids paints for a surface coating line and spray booth for painting miscellaneous metal parts. The surface coating line and spray booth are located at the Standard Register Company in Montgomery County.

Under the existing Federally approved SIP a surface coating line and spray booth for painting miscellaneous metal parts are subject to the compliance schedule contained in Ohio Administrative Code (OAC) Rule 3745-21-04(C)(28) and emission limits contained in OAC Rule 3745-21-09(U)(1)(a)(iv). Final compliance is required by December 31, 1982.

In lieu of the requirements contained in OAC Rule 3745-21-04(C)(28) the State is requesting an extended compliance time schedule for the Standard Register Company to convert to high-solids paints. The final compliance date contained in the variance is December 31, 1983, for the surface coating line and spray booth at this facility.

The variance contains a compliance schedule which includes legally enforceable increments of progress toward compliance. To ensure reasonable progress in achieving compliance for a surface coating line and spray booth for painting miscellaneous metal parts, compliance schedules were established for the calendar year 1982 and 1983. The revised compliance schedule contains the following increments of progress: (a) submittal of a final control plan by October 22, 1982; (b) conversion of french gray color line to high-solids paints by March 31, 1983; (c) conversion of cinnamon air dry and bake enamels to high-solids paints by June 30, 1983; (d) conversion of all remaining baking enamels to high-solids paints by September 30, 1983; and (e) final compliance achieved by December 30,

1983. The Standard Register Company is required to submit a report to the State two weeks after each of the milestone dates listed above.

When the Ohio SIP was approved in 1980, it was determined that the Standard Register Company would achieve the December 31, 1982, compliance date through the use of waterborne coatings. However, the amount of time necessary for waterborne coatings to dry would be such that the parts and the line would require more space than is available at this facility. Due to the low amount of VOC emitted by the coating operation, add-on control equipment prohibitively costly for this facility. These problems render waterborne coatings technicallly and economically infeasible as RACT for this facility.

The technology for high-solids paints is available, as is the application. The Standard Register Company believes that its suppliers can overcome some minor problems which now exist and make a coatings switch to high-solids by December 31, 1983.

The Montgomery County area is currently designated as urban nonattainment for ozone. The approved 1979 ozone attainment demostration in the SIP for this area originally showed a growth cushion of 2761 tons of VOC emissions. This demonstration relied on use of the rollback model and current and comprehensive VOC emission inventories. This cushion has been revised by Ohio EPA to reflect the impact of new sources, variance requests and shutdowns since approval of the 1979 Ozone SIP. The growth cushion is now 2250 tons per year of VOC emissions. If a variance for Standard Register Company is approved, the cushion at the end of 1982 will still be 2244 tons of VOC. Thus, attainment and maintenace of the ozone standard will not be jeopardized. Once compliance has been achieved, the six tons per year of VOC emitted by the Standard Register Company will be added back to the growth cushion.

EPA has reviewed this variance and the State's documentation concerning RACT for this source and concurs with the State's conclusion. In addition, EPA has reviewed the existing Ozone SIP for Montgomery County and determined that its growth cushion will not be jeopordized. EPA is, therefore, approving this variance.

Because EPA considers today's action noncontroversial and routine, we are approving it today without prior proposal. The action will become effective on May 2, 1983. However, if we receive notice by April 1, 1983 that someone wishes to submit critical comments, *then* EPA will publish: (1) A notice that withdraws the action, and (2) a notice that begins a new rulemaking by proposing the action and establishing a comment period.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291. Under 5 U.S.C. Section 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709). Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 2, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See Sec. 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

Note:—Incorporation by reference of the State Implementation Plan for the State of Ohio, was approved by the Director of the Federal Register on July 1, 1982.

(Secs. 110 and 172 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7502))

Dated: February 18, 1983.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Title 40 of the Code of Federal Regulations, Chapter I, Part 52 is amended as follows:

Subpart KK—Ohio

1. Section 52.1870 is amended by adding paragraph (c)(50) as follows:

§ 52.1870 Identification of the plan.

* * * * *

(c) * * *

(50) On October 22, 1982, the Ohio Environmental Protection Agency submitted a revision to its Ozone SIP for the Standard Register Company. The revision request is in the form of a variance for an extended compliance time schedule for a surface coating line and spray booth for painting miscellaneous metal parts. Final compliance is changed from December 31, 1982 to December 31, 1983.

40 CFR Part 52

Revision to State of Oregon State Implementation Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: By this Notice, EPA today announces its approval of a revision to the Oregon State Implementation Plan (SIP) which was received by EPA on August 10, 1982. This revision amends the Motor Vehicle Emission Control Test Criteria Methods and Standards (OAR 340–34–320 through 24–350) as it relates to Oregon Vehicle Inspection Program. EPA is approving the amendments because these changes will improve the operational providers of the testing program.

DATE: This action will be effective on April 1, 1983, unless notice is received before 30 days after date of publication that someone wishes to submit adverse or critical comments. If such notice is received, EPA will open a formal 30-day comment period on this action.

ADDRESSES: Copies of materials submitted to EPA may be examined during normal business hours at:

Central Docket Section (10A–82–19), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460;

Air Programs Branch, Environment Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101;

State of Oregon, Department of Environmental Quality, 522 SW. Fifth, Yeon Building, Portland, Oregon 97207.

Copy of the State's submittal is Located at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C.

Comments should be addressed to: Laurie M. Kral, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Loren McPhillips, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone, (206) 442–7369, FTS, 399–7369.

SUPPLEMENTARY INFORMATION:

On June 24, 1980, EPA published in the Federal Register (45 FR 42265) final rulemaking on Part D revisions to the Oregon SIP. As part of that action, EPA approved the ongoing Portland inspection and maintenence (I/M)

program on the condition that the Oregon Department of Environmental Quality (DEQ) submit adequate operating rules for this program by July 15, 1980. DEQ responded on July 28, 1980 by submitting a SIP revision which included regulations OAR 340-24-300 through 340-24-350 and on January 2, 1981 EPA approved in the Federal Register (46 FR 36) this revision.

On August 10, 1982, DEQ submitted amendments to the Motor Vehicle Emission Control Test Criteria Methods and Standards (OAR 340-24-320 through 24-350) as part of the Vehicle Inspection Program rules. These amendments include minor revisions to certain definitions and test procedures and incorporate a clarification to DEQ's engine change policy. EPA hereby approves the amendments because these changes will improve the operational procedures and will not affect the programs effectiveness.

The public should be advised that this action will be effective 60 days from the date of this Federal Register notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments on any or all of the revisions approved herein, the action on those revisions will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action on those revisions and another will begin a new rulemaking by announcing a proposal of the action on those revisions and establish a comment period.

Under Section 307(b)(1) of the Clean Air Act, a judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of the date of publication of this notice. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Pursuant to the provisions of 5 U.S.C. Section 605(b), the Administrator has certified that SIP approval under Section 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities (46 FR 8709, January 27, 1981).

Under Executive Order 12291, EPA must judge whether or not a regulation is "major" and therefore subject to the requirements of regulatory impact analysis. This regulation is not judged to be major, since it merely approves actions taken by the State and does not establish any new requirements.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of the Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

(Secs. 110 and 172, Clean Air Act (42 U.S.C. 7410(a) and 7502))

Dated: February 18, 1983.

Anne M. Gorsuch,

Administrator.

Note.—Incorporation by reference of the Implementation Plan for the State of Oregon was approved by the Director of the Office of Federal Register on July 1982.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

Subpart MM—Oregon

Section 52.1970 is amended by adding paragraph (c)(59) as set forth below:

§ 52.1970 Identification of plan.

* * * * *

(c) * * *

(59) On August 16, 1982 the State of Oregon Department of Environmental Quality submitted a revision to OAR 340-24-300 to 24-350 (Vehicle Inspection Program Rules).

40 CFR Part 180

[PP2F2635/R534; PH-FRL 2312-2]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; 1-(8-Methoxy-4,8-Dimethylnonyl)-4-(Methylethyl) Benzene

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance of residues for the insect growth regulator 1-(8-Methoxy-4,8-dimethylnonyl)-4-(1-methylethyl) benzene when used on pastures and range grass for the control of red imported fire ants.

This regulation to eliminate the need to establish a maximum permissible level for residues of the insect growth regulator was requested by Stauffer Chemical Company.

EFFECTIVE DATE: March 2, 1983.

ADDRESS: Written objections may be submitted to the: Hearing clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Franklin D. R. Gee, Product Manager (PM) 17, Registration Divison (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 207, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-2690).

SUPPLEMENTARY INFORMATION: EPA issued a notice in the Federal Register of March 17, 1982 (Federal Register/Vol. 47, No. 52/Wednesday, March 17, 1982) which announced that Stauffer Chemical Company, 1200 South 47th Street, Richmond, Calif. 94804, had filed a pesticide petition (2F2635) with the EPA which proposed that an exemption from the requirement of a tolerance be established for residues of the insect growth regulator 1-(8-Methoxy-4,8-dimethylnonyl)-4-(1-methylethyl) benzene to control red imported fire ants on fields, fallow pasture or crops. Subsequently, the petition was amended to delete crops and include only pasture and range grass.

No comments were received in response to this notice of filing.

The active ingredient 1-(8-methoxy-4,8-dimethylnonyl)-4-(1-methylethyl) benzene in this product is an insect growth regulator which acts slowly to reduce fire ant colonies. This insect growth regulator does not exhibit direct toxic effects to fire ants; it acts by disrupting the endocrinological functions of the fire ants. When it is picked up by the worker ants as food and brought to the nest, and fed by trophallaxis to the larvae, the larvae develop into nonviable sexuals, therefore, shifting the caste development from workers to sexuals. Consequently, this leads to the disappearance of the workers which ultimately leads to a decline in food gathering, brood tending, colony maintenance and eventually death of the colonies.

1-(8-methoxy-4,8-dimethylnonyl)-4-(1-methylethyl) benzene is a bait formulation which consists of 1.2% active and 98.8% inert ingredients. A relatively low application rate is recommended at 4.8 grams of active ingredient per acre two times per year.

The data submitted for referenced in the petition and all other relevant material have been evaluated. The toxicological data considered in support of the exemption from the requirement of a tolerance for this petition included:

- Acute oral toxicity (rats)—LD_{50}>5g/kg
- Acute dermal toxicity (rabbits)—LD_{50}>2g/kg
- Primary dermal and ocular irritation studies showing no irritation in the ocular study and only moderate irritation in the dermal study
- Mutagenicity evaluation in Salmonella typhimurium with no mutagenic potential
- In-vitro mutagenicity study
- Mouse lymphoma foreward mutation study—negative
- Liver enzyme induction study
- Teratogenicity study—Negative
- Interim 90-day subchronic study (rats) showing an apparent no-observed-effect level (NOEL) of 10 mg/kg/day

The above tests did not show any deleterious effects that would indicate a cause for alarm by the use of this product. However, additional data has been requested. The following is a list of studies to be submitted after Conditional Registration:

Toxicology

- Final Report on 90-Day Feeding Study (Rat)—due May 1983
- Teratogenicity Study (Rabbit)—due Dec. 1983
- 90-Day Feeding Study (Dog)—due Sept. 1984

Actions being taken to obtain the lacking information are:

- The petitioner has been advised of the data that are lacking, and has agreed in writing to submit all data by the specified dates and not to contest tolerance revocation in the event the results of the data indicate unreasonable adverse effects as stated in 40 CFR 162.11.

Finally, the use will be permitted under a conditional registration, and may be terminated quickly should additional data not be provided or should some unreasonable adverse effects be identified during the review of new data and information.

Considering the beneficial role of this compound in fire ant control management, the reduction of more hazardous pesticides and the inherent target species specificity of this compound, the Agency concludes that the benefits of use far exceed any risk postulated under worst case possibilities.

The toxicity data reviewed in support of the exemption from the requirement of a tolerance is adequate to support an exemption from the requirement of a tolerance for the insect growth regulator 1-(8-Methoxy-4,8-dimethylnonyl)-4-(1-methylethyl) benzene when used on pasture and range grass.

The pesticide is considered useful for the purpose for which the exemption is sought, and it is concluded that the exemption from the requirement of a tolerance will protect the public health. Therefore, 40 CFR Part 180 is amended as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of March 9, 1982.

Effective on: March 2, 1983.

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

(Sec. 408(d)(2), 68 Stat. 512 (21 U.S.C. 346a(d)(2)))

Dated: February 10, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR Part 180 is amended by adding a new § 180.1079 to read as follows:

§ 180.1079 1-(8-Methoxy-4,8-dimethylnonyl)-4-(methylethyl) benzene; exemptions from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of the insecticide 1-(8-methoxy-4,8-dimethylnonyl)-4-(methylethyl) benzene when used for fire ants control on pasture and range grass.

BILLING CODE 6560-50-M

40 CFR Part 180

[PP 2E2648/R518] [PH-FRL 2313-7]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Cyano(3-Phenoxyphenyl)Methyl 4-Chloro-Alpha-(1-Methylethyl)Benzeneacetate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide cyano(3-phenoxyphenyl)methyl 4-chloro-alpha-(1-methylethyl)benzeneacetate in or on the raw agricultural commodity artichokes. This regulation to establish a maximum permissible level for residues of the insecticide in or on artichokes was requested, pursuant to a petition, by the Interregional Research Project No. 4 (IR-4).

EFFECTIVE DATE: March 2, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs, Emergency Response Section, Process Coordination Branch, Registration Division (TS-767C), Environmental Protection Agency, Rm. 716B, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA. 22202, (703-557-1192).

SUPPLEMENTARY INFORMATION: EPA is issued a notice of proposed rulemaking published in the Federal Register of January 5, 1983 (48 FR 484) that announced that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 2E2648 to EPA on behalf of the IR-4 Technical Committee and the Agricultural Experiment Station of California.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the insecticide cyano(3-phenoxyphenyl)methyl 4-chloro-alpha-(1-methylethyl)benzeneacetate in or on the raw agricultural commodity artichokes at 0.2 ppm.

There were no comments on requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the notice of proposed rulemaking. The pesticide is considered useful for the purpose for which the tolerance is sought. It is concluded that the tolerance would protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

(Sec. 409(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

BILLING CODE 6560-50-M

41 CFR Part 15-1

[OA-FRL 2312-8]

General

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is revising its procurement regulation relating to debarred, suspended and ineligible bidders. The intended effect of this revision is to eliminate Agency regulations duplicating intended Federal Procurement Regulations.

EFFECTIVE DATE: March 2, 1983.

FOR FURTHER INFORMATION CONTACT: Lawrence E. Sawler, Procurement and Contracts Management Division (PM-214), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202/382-5182).

SUPPLEMENTARY INFORMATION: (a) The Office of Federal Procurement Policy issued a Policy Letter on June 24, 1982, on Government-wide Debarment, Suspension and Ineligibility.

(b) This Policy Letter sets forth in Appendix A the Government-wide policies for debarment and suspension of Government contractors and provides for a consolidated listing of debarments and suspensions. In addition, it provides for a listing of contractors that have been declared ineligible pursuant to statutory authority.

(c) Amendments to the Federal Procurement Regulations will be made in order to implement this policy.

(d) The EPA has determined that its current procurement regulations contain duplications and conflicts with the Policy Letter.

(e) This rule deletes those policies and procedures in the EPA procurement regulation pertaining to debarred, suspended and ineligible bidders.

(f) The Agency has not invited public comments on this rule as its purpose is to reduce the proliferation of regulations and administrative burdens associated with debarred, suspended and ineligible bidders.

(g) The Office of Management and Budget (OMB) has exempted this regulation from the requirements of Executive Order 12291 pursuant to section 8(b) of that Order.

List of Subjects in 41 CFR Part 15-1

Conflict of interest, Government procurement, Environmental protection.

PART 15-1—[AMENDED]

For the reasons set out in the preamble, 41 CFR Part 15-1 is amended as follows:

1. The table of contents for Part 15-1 is amended by removing the contents of Subpart 15-1.6—Debarred, Suspended and Ineligible Bidders.

Subpart 15-1.6—[Removed]

2. Subpart 15-1.6 is removed in its entirety.

Dated: December 28, 1982.

John P. Horton,

Assistant Administrator for Administration.

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Circular No. 2521]

43 CFR Part 3800

Surface Management of Unpatented Mining Claims Located on the Public Lands; Amendments Affecting Special Category Lands

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking will maintain a special protection for special category lands contained within the public lands while lessening the burden on mining claimants by removing the requirement for a plan of operation for certain of those areas.

EFFECTIVE DATE: April 1, 1983.

ADDRESS: Any suggestions or inquiries should be sent to: Director (520), Bureau of Land Management, 1800 C Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Eugene Carlat, (202) 343-6537.

SUPPLEMENTARY INFORMATION: The proposed rulemaking amending the existing regulations on Surface Management of Unpatented Mining Claims Located on the Public Lands was published in the Federal Register on March 22, 1982 (47 FR 12197). Comments were invited for a 45-day period during which 68 comments were received. The comments came from the following sources: 51 individuals; 12 associations, including one that represented 6 different groups; 2 companies identified with the mining industry; 2 Federal agencies; and one local government. The comments have been carefully reviewed as part of the decisionmaking process on this final rulemaking.

In summary, the final rulemaking retains the mandatory requirement for filing a plan of operations for mining operations, irrespective of the areal extent of the surface disturbance, located in areas designated for controlled or limited use in the California Desert Conservation Area;

existing and potential components of the Wild and Scenic Rivers System; Areas of Critical Environmental Concern; components of the National Wilderness Preservation System; and areas closed to off-road vehicle use. It removes the requirement for filing a plan of operations for disturbance of five acres or less on lands designated for moderate use and intensive use by the California Desert Conservation Area plan; in areas where off-road vehicle use is limited; and for lands encompassed in valid existing right areas within lands withdrawn from operation of the mining laws. In its place, as is the case for all other public lands, operations that disturb more than five acres must have an approved plan before starting operations and notices must be filed for operations that would disturb 5 acres or less 15 days prior to commencement of operations.

The final rulemaking also provides that a properly filed notice affecting 5 acres or less and any plans of operations properly filed and approved, will constitute authorization for the use of off-road vehicles, avoiding the need to acquire separate authorization for such use.

In general, the comments suggested that the changes made by the proposed rulemaking may not have struck a reasonable balance between efforts to reduce the administrative burden on mining claimants, and the need to prevent unnecessary and undue degradation on special category lands. Some comments applauded the changes made by the proposed rulemaking, with a few of those comments requesting only minor changes.

One of the comments stated the view that a regulatory impact analysis should have been completed on this rulemaking. An environmental assessment was completed on the proposed rulemaking. That assessment showed that the proposed changes would have some impact on the human environment, but that impact would not be significant. Operations conducted under a notice must include reclamation of surface disturbance. Operators must not knowingly disturb Federal property, cultural resources, fossils or threatened or endangered species. Inspection of reclaimed operations by Bureau of Land Management personnel is mandatory under the regulations. The protection afforded by a notice and the requirement for a plan would, in the judgment of the Bureau, provide public lands comprehensive protection, including those no longer subject to mandatory plans of operations. The changes made by the final rulemaking further enhance this view by the retention of the requirement for the filing of a plan of operations on those special category lands that have legislative mandates regarding their significance. Therefore, no regulatory impact analysis has been prepared on this rulemaking.

Comments on the specific sections of the proposed rulemaking will be discussed in connection with the specific section to which they relate.

Section 3809.1–3

The proposed rulemaking would have deleted the mandatory requirement for the filing of a plan of operations for operations located within special category lands. The majority of the comments objected to deleting the requirement for the filing of a plan of operations on such lands because: (1) The lands are sensitive and highly susceptible to unnecessary or undue degradation; (2) an operator, through ignorance or intent, could cause unnecessary or undue degradation; and (3) a perception that the Bureau of Land Management's limited manpower and general unwillingness to adopt tough enforcement measures will not act as a deterrent. In response to those comments, and as a result of the legislative mandates relating to special category lands, the final rulemaking continues to require the filing of a plan of operations for any operation, other than casual use, in designated special category lands; however, the number of special category areas have been reduced in the final rulemaking. Those categories that have been eliminated (California Desert Conservation Area lands classed as moderate or intensive use areas, lands designated for "limited" off-road vehicle use, and areas of valid existing rights within lands withdrawn from the operation of the mining laws), are adequately protected under notice requirements and do not require the additional scrutiny of plans of operations for disturbance to five acres or less.

Paragraph (a) is amended by the final rulemaking to clarify when operations conducted under a notice will not be allowed. When proposed operations overlap or are contiguous to unreclaimed project areas that are a result of operations conducted under a previous notice, the operator is required to file a plan of operations. This requirement will not apply to those cases where non-contiguous project areas disturb five acres or less and are covered by individual notices.

In order to have paragraph (b) of § 3809.1–3 conform to the requirements of the existing regulations, the final rulemaking adds language that states that a properly filed notice of disturbance of five acres or less will constitute authorization for use of off-road vehicles in connection with any operations. The requirement to reclaim lands disturbed in furtherance of mining operations conducted under a notice, plus the mandatory inspection by the authorized officer reduce the amount of paperwork that an operator needs to file. This is a continuance of the clear intent of the existing regulations when they were initially promulgated in 1980.

A number of comments objected to the change made by the proposed rulemaking in paragraph (f) § 3809.1–3 which requires the authorized officer to issue a notice of noncompliance in connection with activities that fail to comply with the existing regulations as they relate to the prevention of undue or unnecessary degradation or completion of reclamation. The final rulemaking gives the authorized officer discretion on the issuance of the notice of noncompliance. This change makes the regulations less burdensome and makes them a better management tool.

Section 3809.1–4

Several of the comments objected to eliminating the mandatory filing of a plan of operations within special category lands as being directly counter to the intent of Congress on the treatment of designated wilderness areas, wild and scenic river areas, designated Areas of Critical Environmental Concern and areas closed to off-road vehicle use. After a review of the legislative mandate relating to special category lands, the final rulemaking retains the requirement for a plan of operations for all of the special category lands described above, as well as for areas designated as controlled or limited use areas by the California Desert Conservation Area plan. Eliminated from such category are lands classified by the California Desert Conservation Area plan as moderate or intensive use areas, lands designated for "limited" off-road vehicle and areas of valid existing rights within withdrawn lands. Those lands under wilderness review will still be subject to the provisions of 43 CFR Subpart 3802. This change will reduce the administrative burden on the public and the Bureau of Land Management, while ensuring adequate protection for special category lands. The change made by the final rulemaking will affect only a small number of mining operations which will be more than offset by the protection afforded lands that have characteristics that should be protected.

A new paragraph (e) has been added to § 3809.1–4 by the final rulemaking that makes it clear that the filing and approval of a plan of operations constitutes authorization for use of an off-road vehicle under the provision of 43 CFR PArt 8340. This change is in keeping with the intent of the existing regulations and reduces the administrative burden on the using public.

Section 3809.1–9

A few comments objected to the removal by the proposed rulemaking of the provision for a nationwide bond in paragraph (d) of § 3809.1–9. After a careful review of the comments and the capabilities of the Bureau of Land Management to administer a nationwide bonding system for unpatented mining claims, the final rulemaking retains the nationwide bonding system.

Editorial changes and technical corrections have been made as needed.

The principal author of this final rulemaking is Eugene Carlat, Division of Minerals and Geothermal Resources, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

The changes made by this final rulemaking have a uniform impact on all entities having unpatented mining claims located on the public lands. The changes should, in fact, reduce the regulatory burden on all those affected by the requirements of 43 CFR Subpart 3809.

The information collection requirements contained in 43 CFR Subpart 3809 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004–0104.

List of Subjects for 43 CFR Part 3800

Administrative practice and procedure, Environmental protection, Public lands—mineral resources, Wilderness areas.

Under the authority of section 2319 (30 U.S.C. 22) and 2478 (43 U.S.C. 1201) of the Revised Statutes and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), Part 3800, Group 3800, Subchapter C, Chapter II of Title 43 of the Code of Federal Regulations is amended as set forth below.

Garrey E. Carruthers,
Assistant Secretary of the Interior.
February 10, 1983.

PART 3800—LANDS AND MINERALS SUBJECT TO LOCATION

Subpart 3809—Surface Management

Note.—The information collection requirements contained in this subpart have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004–0104. This information is needed to permit the authorized officer to determine if a plan of operations is needed to protect the public lands and their resources and to determine if the plan of operations, if one is required, is adequate. The obligation to respond is required to obtain a benefit.

§ 3809.0–5 [Amended]

1. Section 3809.0–5 is amended by:

a. Amending paragraph (b) by removing the words "or limited"; and

b. Amending paragraph (k) by inserting in the last sentence of the paragraph immediately after the phrase "Wild and Scenic Rivers," the phrase "areas designated as part of the National Wilderness System administered by the Bureau of Land Management".

§ 3809.1–3 [Amended]

2. Section 3809.1–3 is amended by:

a. Amending paragraph (a) by inserting in the second sentence after the phrase "a subsequent notice" the phrase "covering substantially the same ground";

b. Amending paragraph (b) by adding at the end of the paragraph the sentence "Notices properly filed under this section constitute authorization under part 8340 of this title (Off-Road Vehicles)."; and

c. Revising paragraph (f) to read:

(f) Failure of the operator to prevent undue or unnecessary degradation or to complete reclamation to the standards described in this subpart may cause the operator to be subject to a notice of noncompliance as described in § 3809.3–2 of this title.

§ 3809.1–4 [Amended]

3. Section 3809.1–4 is amended by:

a. Revising paragraph (b)(1) to read:

* * * * *

(b) * * *

"(1) Lands in the California Desert Conservation Area designated as 'controlled' or 'limited' use areas by the California Desert Conservation Area plan;";

b. Removing paragraph (b)(5) in its entirety; and

c. Renumbering paragraph (b)(6) as paragraph (b)(5) and amending it by removing the phrase "or 'limited'".

4. Section 3809.1–4 is amended by adding a new paragraph (c) to read:

* * * * *

"(c) Plans properly filed and approved under this section constitute authorization under part 8340 of this title (Off-Road Vehicles)."

§ 3809.2–1 [Amended]

5. Section 3809.2–1(c) is amended by removing the phrase "in § 3809.1–6(a)" and replacing it with the phrase "in § 3809.1–6".

§ 3809.2–2 [Amended]

6. Section 3809.2–2(e)(2) is amended by adding at the end the phrase "after notification to the authorized officer of such discovery."

§ 3809.4 [Amended]

7. Section 3809.4(b) is amended by inserting after the phrase "within 30 days after the date of" the phrase "receipt of".

BILLING CODE 4310–84–M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1033

Various Railroads Authorized To Use Tracks and/or Facilities of the Chicago, Rock Island and Pacific Railroad Co., Debtor (William M. Gibbons, Trustee)

AGENCY: Interstate Commerce Commission.

ACTION: Forty-Eighth Revised Service Order No. 1473.

SUMMARY: Pursuant to Section 122 of the Rock Island Transition and Employee Assistance Act, Public Law 96–254, this order authorizes various railroads to provide interim service over the Chicago, Rock Island and Pacific Railroad Company, Debtor (William M Gibbons, Trustee), and to use such tracks and facilities as are necessary for operations. This order permits carriers to continue to provide service to shippers which would otherwise be deprived of essential rail transportation.

EFFECTIVE DATE: 12:01 a.m., March 1, 1983, and continuing in effect until 11:59 p.m., July 31, 1983, unless otherwise modified, amended or vacated by order of this Commission.

FOR FURTHER INFORMATION CONTACT:
M. F. Clemens, Jr., (202) 275-7840 or 275-1559.

SUPPLEMENTARY INFORMATION:

Decided: February 24, 1983.

Pursuant to Section 122 of the Rock Island Railroad Transition and Employee Assistance Act, Public Law 96-254 (RITEA), the Commission is authorizing various railroads to provide interim service over Chicago, Rock Island and Pacific Railroad Company, Debtor (William M. Gibbons, Trustee), (RI) and to use such tracks and facilities as are necessary for those operations.

In view of the urgent need for continued rail service over RI's lines pending the implementation of long-range solutions, this order permits carriers to provide service to shippers which may otherwise be deprived of essential rail transportation.

Appendix A, to the previous order, is revised by deleting at Item 13., the authority for The Brandon Corporation (BRAN), to operate between Clay Center and Manhattan, Kansas, at the request of the carrier. Appendix A is further revised by deleting at Item 21.B., the authority for the Burlington Northern Railroad (BN), to operate at Okeene, Oklahoma. This property has been leased to the North Central Oklahoma Railway (NCOK). Also revised is the Cadillac and Lake City Railway's (CLK) authority to operate 6.23 miles at Colorado Springs, Colorado, which property has been sold to Denver and Rio Grande Western Railroad. All succeeding items beyond 12 are renumbered accordingly in this appendix.

Appendix A is further revised in this order, by adding at Item 18.C, the authority for NCOK to extend its operation to Homestead, Oklahoma, and at Item 18.D., between North Enid and Ponca City, Oklahoma, as described in the appendix.

An application has been received from COE requesting interim authority in Iowa, Nebraska, Kansas, and Missouri, over Rock Island lines which, in some cases, presently have rail service. COE has been requested to provide additional information to the Board on these overlapping operations, as well as certification of the right to do business in Kansas, Missouri, and Iowa, and compensation arrangements with the Trustee. Further action on COE's application has been suppended pending the receipt of the requested information.

Appendix B of Forty-Third Revised Service Order No. 1473 is unchanged and is incorporated into this order by reference.

It is the opinion of the Commission that an emergency exists requiring that the railroads listed in the named appendices be authorized to conduct operations using RI tracks and/or facilities; that notice and public procedure are impracticable and contrary to the public interest; and good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

§ 1033.1473 Service Order No. 1473.

Various railroads authorized to use tracks and/or facilities of the Chicago, Rock Island and Pacific Railroad Company, Debtor (William M. Gibbons, Trustee).

(a) Various railroads are authorized to use tracks and/or facilities of the Chicago, Rock Island and Pacific Railroad Company (RI), as listed in Appendix A to this order, in order to provide interim service over the RI; and as listed in Appendix B to this order, to provide for continuation of joint or common use facility agreements essential to the operations of these carriers as previously authorized in Service Order No. 1435.

(b) The Trustee shall permit the affected carriers to enter upon the property of the RI to conduct service as authorized in paragraph (a).

(c) The Trustee will be compensated on terms established between the Trustee and the affected carrier(s); or upon failure of the parties to agree as hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by Section 122(a) Public Law 96-254.

(d) Interim operators, authorized in Appendix A to this order, shall, within fifteen (15) days of its effective date, notify the Railroad Service Board of the date on which interim operations were commenced or the expected commencement date of those operations. Termination of interim operations will require at least (30) thrity days notice to the Railroad Service Board and affected shippers.

(e) Interim operators, authorized in Appendix A to this order, shall, within thirty days of commencing operations under authority of this order, notify the RI Trustee of those facilities they believe are necessary or reasonably related to the authorized operations.

(f) During the period of the operations over the RI lines authorized in paragraph (a), operators shall be responsible for preserving the value of the lines, associated with each operation, to the RI estate, and for performing necessary maintenance to avoid undue deterioration of lines and associated facilities.

1. In those instances where more than one railroad is involved in the joint use of RI tracks and/or facilities described in Appendix B, one of the affected carriers will perform the maintenance and have supervision over the operations in behalf of all the carriers as may be agreed to among themselves, or in the absence of such agreement, as may be decided by the Commission.

(g) Any operational or other difficulty associated with the authorized operations shall be resolved through agreement between the affected parties or, failing agreement, by the Commission's Railroad Service Board.

(h) Any rehabilitation, operational, or other costs related to authorized operations shall be the sole responsibility of the interim operator incurring the costs, and shall not in any way be deemed a liability of the United States Government.

(i) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign traffic.

(j) *Rate applicable.* Inasmuch as the operations described in Appendix A by interim operators over tracks previously operated by the RI are deemed to be due to carrier's disability, the rates applicable to traffic moved over these lines shall be the rates applicable to traffic routed to, from, or via these lines which were formerly in effect on such traffic when routed via RI, until tariffs naming rates and routes specifically applicable become effective.

(k) In transporting traffic over these lines, all interim operators described in Appendix A shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to that traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between the carriers; or upon failure of the carriers to so agree, the divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(l) To the maximum extent practicable, carriers providing service under this order shall use the employees who normally would have performed the work in connection with traffic moving over the lines subject to this Order.

(m) *Effective date.* This order shall become effective at 12:01 a.m., March 1, 1983.

(n) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., July 31, 1983, unless otherwise modified,

amended, or vacated by order of this Commission.

This action is taken under the authority of 49 U.S.C. 10304, 10305, and Section 122, Public Law 95–254.

This order shall be served upon the Association of American Railroads, Transportation Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

Railroads.

By the Commission, Railroad Service Board, members J. Warren McFarland, Bernard Gaillard, and John H. O'Brien.

Agatha L. Mergenovich,

Secretary.

Appendix A

RI Lines Authorized To Be Operated by Interim Operators

1. *Peoria and Pekin Union Railway Company (PPU):*

A. Mossville, Illinois (milepost 148.23) to Peoria, Illinois (milepost 161.0) including the Keller Branch (milepost 1.55 to 6.15).

2. *Union Pacific Railroad Company (UP):*

A. Beatrice, Nebraska.

B. Approximately 36.5 miles of trackage extending from Fairbury, Nebraska, to RI Milepost 581.5 north of Hallam, Nebraska.

3. *Toledo, Peoria and Western Railroad Company (TPW):*

A. Peoria Terminal Company trackage from Hollis to Iowa Junction, Illinois.

4. *Chicago and North Western Transportation Company (CNW):*

A. From Minneapolis-St. Paul, Minnesota, to Kansas City, Missouri.

B. From Rock Junction (milepost 5.2) to Inver Grove, Minnesota (milepost 0).

C. From Inver Grove (milepost 344.7) to Northwood, Minnesota.

D. From Clear Lake Junction (milepost 191.1) to Short Line Junction, Iowa (milepost 73.6).

E. From East Des Moines, Iowa (milepost 350.8) to West Des Moines, Iowa (milepost 394.34).

F. From Short Line Junction (milepost 73.6) to Carlisle, Iowa (milepost 64.7).

G. From Carlisle (milepost 64.7) to Allerton, Iowa (milepost 0).

H. From Allerton, Iowa (milepost 363) to Trenton, Missouri (milepost 415.9).

I. From Trenton (milepost 415.9) to Air Line Junction, Missouri (milepost 502.2).

J. From Iowa Falls (milepost 97.4) to Estherville, Iowa (milepost 206.9).

K. From Bricelyn, Minnesota (milepost 37.7) to Ocheyedan, Iowa (milepost 246.7).

L. From Palmer (milepost 434.5) to Royal, Iowa (milepost 362).

M. From Dows (milepost 123.4) to Forest City, Iowa (milepost 159.2).

N. From Cedar Rapids (milepost 100.5) to Cedar River Bridge, Iowa (milepost 96.2) and to serve all industry formerly served by the RI at Cedar Rapids.

O. At Sibley, Iowa.

P. At Hartley, Iowa.

Q. From Carlisle to Indianola, Iowa.

R. At Omaha, Nebraska, (between milepost 502 to milepost 504).

5. *Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW):*

A. From Newport, Minnesota to a point near the east bank of the Mississippi River, sufficient to serve Northwest Oil Refinery, at St. Paul Park, Minnesota.

B. From Davenport (milepost 182.35) to Iowa City, Iowa (milepost 237.01).

6. *Missouri Pacific Railroad Company (MP):*

A. From Little Rock, Arkansas (milepost 135.2) to Hazen, Arkansas (milepost 91.5).

B. From Little Rock, Arkansas (milepost 135.2) to Pulaski, Arkansas (milepost 141.0).

C. From Hot Springs Junction (milepost 0.0) to and including Rock Island milepost 4.7.

7. *Norfolk and Western Railway Company (NW):* is authorized to operate over tracks of the Chicago, Rock Island and Pacific Railroad Company running southerly from Pullman Junction, Chicago, Illinois, along the western shore of Lake Calumet approximately four plus miles to the point, approximately 2,500 feet beyond the railroad bridge over the Calumet Expressway, at which point the RI track connects to Chicago Regional Port District track, for the purpose of serving industries located adjacent to such tracks. Any trackage rights arrangements which existed between the Chicago, Rock Island and Pacific Railroad Company and other carriers, and which extend to the Chicago Regional Port District Lake Calumet Harbor, West Side, will be continued so that shippers at the port can have NW rates and routes regardless of which carrier performs switching services.

8. *Cadillac and Lake City Railway Company (CLK):*

A. From Poplar Street (milepost 0.76) to and including junction with DRGW Belt Line (milepost 3.99) all in the vicinity of Denver, Colorado.

*B. From Colorado Springs (milepost 602.7) to Caruso, Kansas (milepost 430.0) a distance of 172.7 miles.

C. Over-head rights from Caruso, Kansas (milepost 430.0) to Colby, Kansas (milepost 387.0), a distance of approximately 43 miles, in order to effect interchange with the Union Pacific Railroad.

9. *Baltimore and Ohio Railroad Company (BO):*

A. From Blue Island, Illinois (milepost 15.7) to Bureau, Illinois (milepost 114.2), a distance of 98.5 miles.

B. From Bureau, Illinois (milepost 114.11) to Henry, Illinois (milepost 128.94) a distance of approximately 12.8 miles.

10. *Keota Washington Transportation Company (KWTR):*

A. From Keota to Washington, Iowa; to effect interchange with the Chicago, Milwaukee, St. Paul and Pacific Railroad Company at Washington, Iowa, and to serve any industries on the former RI which are not being served presently.

B. At Vinton, Iowa (milepost 120.0 to 123.0).

C. From Vinton Junction, Iowa (milepost 23.4) to Iowa Falls, Iowa (milepost 97.4).

11. *The La Salle and Bureau County Railroad Company (LSBC):*

A. From Chicago (milepost 0.80) to Blue Island, Illinois (milepost 16.61), and yard track 6, 9 and 10; and crossover 115 to effect interchange at Blue Island, Illinois.

B. From Western Avenue (Subdivision 1A, (milepost 18.8) to 119th Street (Subdivision 1A, milepost 14.8), at Blue Island, Illinois.

C. From Gresham (subdivision 1, milepost 10.0) to South Chicago (subdivision 1B, milepost 14.5) at Chicago, Illinois.

D. From Pullman Junction, Chicago, Illinois, (milepost 13.2) running southerly to the entrance of the Chicago International Port, a distance of approximately five miles, for the purpose of bridge rights and to effect interchange at the Kensington and Eastern Yard.

12. *The Atchison, Topeka and Santa Fe Railway Company (ATSF):*

A. At Alva, Oklahoma.

B. At St. Joseph, Missouri.

13. *Iowa Northern Railroad Company (IANR):*

A. From Cedar Rapids, Iowa (milepost 100.5), to Manly, Iowa, (milepost 225.1).

B. At Vinton, Iowa, and west on the Iowa Falls Line to milepost 24.3.

14. *Iowa Railroad Company (IRRC):*

A. From Council Bluffs (milepost 490.15) to West Des Moines, Iowa (milepost 364.34) a distance of approximately 126.81 miles.

B. From Audubon Junction (milepost 440.7) to Audubon, Iowa (milepost 465.1) a distance of approximately 24.4 miles.

C. From Hancock, Iowa (milepost 0.4) to Oakland, Iowa (milepost 12.3) a distance of approximately 5.9 miles.

D. Overhead rights from West Des Moines, Iowa (milepost 364.34) to East Des Moines, Iowa (milepost 350.8). (This trackage is currently leased to the CNW, see Item, 5.E.).

E. From East Des Moines, Iowa (milepost 350.8) to Iowa City, Iowa (milepost 237.01) a distance 113.79 miles.

F. Overhead rights from Iowa City, Iowa (milepost 237.01) to Davenport, Iowa (milepost 182.35), including interchange with the Cedar Rapids and Iowa City Railway. [This trackage is currently leased to the MILW, see Item 6.D.].

G. From Bureau, Illinois (milepost 114.2) to Davenport, Iowa (milepost 182.35).

H. From Rock Island, Illinois through Milan, Illinois, to a point west of Milan sufficient to serve the Rock Island Industrial Complex.

I. At Rock Island, Illinois including 20th Street Yard.

J. From Altoona to Pella, Iowa.

15. *Missouri-Kansas-Texas Railroad Company (MKT):*

A. From Oklahoma City, Oklahoma (milepost 496.4) to McAlester, Oklahoma (milepost 365.0), a distance of approximately 131.4 miles.

16. *Chicago Short Line Railway Company (CSL):*

A. From Pullman Junction easterly for approximately 1000 feet to serve Clear-View Plastics, Inc., all in the vicinity of the Calumet switching district.

B. From Rock Island Junction westerly for approximately 3000 feet to Irondale Wye.

17. *Kyle Railroad Company (Kyle):*

A. From Belleville (milepost 187.0) to Caruso, Kansas (milepost 430.0), a distance of approximately 243 miles. KYLE will be responsible for the maintenance of the jointly used track between Colby and Caruso as mutually agreed upon with CLK, and for coordinating operations.

B. From Belleville (milepost 187.0) to Mahaska, Kansas (milepost 170.0) a distance of approximately 17 miles.

C. From Belleville (milepost 226.34) to Clay Center, Kansas (milepost 178.37) a distance of approximately 47 miles.

18. *North Central Oklahoma Railway, Inc. (NCOK):*

A. From Mangum, Oklahoma (milepost 97.2) to Anadarko, Oklahoma (milepost 16.14).

B. From El Reno, Oklahoma (milepost 515.0) to Hydro, Oklahoma (milepost 553.0) a distance of approximately 38 miles.

*C. From Geary, Oklahoma (milepost 0.0) to Homestead, Oklahoma (milepost 42.8) a distance of approximately 43 miles.

*D. From North Enid, Oklahoma (milepost 0.30) to Ponca City, Oklahoma (Milepost 54.8) a distance of approximately 54.5 miles.

19. *South Central Arkansas Railway, Inc. (SCAR):*

A. From El Dorado, Arkansas (milepost 90) to Ruston, Louisiana (milepost 154.77).

*20. *Burlington Northern Railroad Company (BN):*

A. At Burlington, Iowa (milepost 0 to milepost 2.06).

2. *Fort Worth and Denver Railway Company (FWD):*

A. From Amarillo to Bushland, Texas, including terminal trackage at Amarillo, and approximately three (3) miles northerly along the old Liberal Line.

B. At North Fort Worth, Texas (mileposts 603.0 to 611.4).

22. *Omaha, Lincoln and Beatrice Railway Company (OLB):*

A. At Lincoln, Nebraska (milepost 559.16) to (milepost 561.37).

23. *Enid Central Railway Company, Inc. (ENIC):*

A. From North Enid, Oklahoma (Milepost 0.12) to Ponca City, Oklahoma (Milepost 54.8).

24. *Texas North Western Railway Company (TNW):*

A. From Hardesty, Oklahoma (milepost 119.20) to Liberal, Kansas (milepost 152.35) a distance of approximately 33.15 miles.

* Changed.

* Added.

Correction

In FR Doc. 83-4050 beginning on page 6715 in the issue of Tuesday, February 15, 1983, make the following correction.

On page 6715, third column, fifth line in the "SUPPLEMENTARY INFORMATION" paragraph, "January 4, 1983" should read "January 4, 1982.".

BILLING CODE 1505-01-M

Proposed Rules

Federal Register
Vol. 48, No. 42
Wednesday, March 2, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 103 and 109

Powers and Duties of Service Officers; Availability of Service Records; Employment Authorization; Excludable or Deportable Aliens

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: The proposed rule would revise the regulations relating to the imposition of bond conditions against employment in the case of aliens who are in exclusion or deportation proceedings. The rule sets forth conditions under which employment may be authorized. The decision to waive a no-work rider on a bond will lie with the district directors. The revisions will eliminate the present cumbersome procedures by which Regional Commissioners are authorized to impose bond conditions against employment.

DATE: Comments must be received on or before April 4, 1983.

ADDRESS: Please submit written comments in duplicate to the Commissioner of Immigration and Naturalization Service, Room 7100, 425 Eye Street, NW., Washington, D.C. 20536.

FOR FURTHER INFORMATION CONTACT: For General Information Contact: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536 Telephone: (202) 633-3048.

For Specific Information Contact: Michael J. Heilman, Associate General Counsel, Immigration and Naturalization Service, 425 Eye Street, NW., Washington, D.C. 20536 Telephone (202) 633-2520.

SUPPLEMENTARY INFORMATION: The proposed rule revises the procedure for imposing a condition against unauthorized employment in an appearance and delivery bond. The present rule authorizes the imposition of such a condition with the prior approval of the Regional Commissioner. The proposed rule would allow automatic imposition of this condition without referral to the Regional Commissioner.

The proposed rule also sets forth conditions which must be met by the alien in deportation or exclusion proceedings where that alien desires release on bond with employment authorized. Factors to be considered in imposing and waiving bond conditions include: The adverse effect of the alien's employment on U.S. citizens and permanent residents, the numbers of aliens engaged in illegal employment, the recentness of the alien's arrival, the likelihood of discretionary relief, and the effect on U.S. citizen or permanent resident dependents.

These revisions are consistent with the general principle that employment of aliens in the United States is to be strictly controlled to safeguard the interests of U.S. citizens and permanent resident aliens.

In accordance with 5 U.S.C. 605(b), the Commissioner certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

This would not be a major rule as defined by Section 1(b) of E.O. 12291.

List of Subjects

8 CFR Part 103

Administrative practice and procedure, Authority delegation, Bonding, Bonds, Surety bonds.

8 CFR Part 109

Aliens, Employment.

Accordingly, it is proposed to amend Chapter I of Title 8 of the Code of Federal Regulations as follows:

PART 103—POWER AND DUTIES OF SERVICE OFFICERS: AVAILABILITY OF SERVICE RECORDS

1. In § 103.6, paragraphs (a)(2)(ii) and (a)(2)(iii), would be revised to read as follows:

§ 103.6 Surety bonds.

(a) * * *

(2) * * *

(ii) *Condition against unauthorized employment.* A condition barring employment shall be included in an appearance and delivery bond in connection with a deportation proceeding or bond posted for the release of an alien in exclusion proceedings, unless upon application by the alien the District Director determines that employment is appropriate.

(iii) *Factors to be considered.* Only those aliens who upon application under § 109.1(b) of this chapter establish compelling reasons for granting employment authorization may be authorized to accept employment. Among the factors to be considered when imposing bond conditions are:

(A) Safeguarding employment opportunities for United States citizens and lawful permanent resident aliens;

(B) Impact upon and dislocation of American workers by the employment of aliens;

(C) The number of aliens involved in performing unauthorized employment:

(D) Prior immigration violations relating to acceptance of unauthorized employment of the alien;

(E) The likelihood of continued violations with the same employer;

(F) The recentness of the alien's arrival in the United States;

(G) The acceptance of the unauthorized employment shortly after the alien's arrival;

(H) Whether there is a reasonable basis for considering discretionary relief; and

(I) Whether a United States citizen or lawful permanent resident spouse or children are dependent upon the alien for support, or other equities exist.

* * * * *

(Sec. 103, of the Immigration and Nationality Act, as amended (8 U.S.C. 1103))

PART 109—EMPLOYMENT AUTHORIZATION

1. In § 109.1, a new paragraph (b)(8) is added to read as follow:

§ 109.1 Classes of aliens eligible.

* * * * *

(b) * * *

(8) Any excludable or deportable alien who has posted an appearance and delivery bond may be granted temporary employment authorization if the District Director determines that employment is appropriate under § 103.6(a)(2)(iii) of this chapter.

* * * * *

(Sec. 103, 245(c) of the Immigration and Nationality Act, as amended (8 U.S.C. 1103, 1255(c)))

Dated: Febuary 15, 1983.

Alan C. Nelson,

Commissioner, Immigration and Naturalization.

BILLING CODE 4410-10-M

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Part 381

[Docket No. 83-004P]

Removal of Kidneys From Mature Chickens and Mature Turkeys

AGENCY: Food Safety and Inspection Service.

ACTION: Proposed rule.

SUMMARY: This is a proposal to amend the Federal poultry products inspection regulations to require the removal of kidneys from mature chicken and mature turkey carcasses after the inspectors complete their post-mortem inspection of the poultry viscera, but before completion of eviscerating operations, and to prohibit the use of such kidneys for human food. It appears that the concentration of cadmium found in these kidneys causes them to become adulterated under the Poultry Products Inspection Act. Cadmium is a toxic metal associated with kidney damage in humans and is, therefore, injurious to human health. Prohibiting kidneys from mature chicken and mature turkey carcasses to be used for human food would prevent a substantial amount of cadmium from entering the American diet. Additionally, the Agency proposes amending the definition of "Ready-to-Cook poultry" to include the removal of kidneys from mature chickens and mature turkeys.

DATE: Comments must be received on or before May 2, 1983.

ADDRESS: Written comments to: Regulations Office, Attn: Annie Johnson, FSIS Hearing Clerk, room 2637, South Agriculture Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. Oral Comments may be made to Dr. John C. Prucha, (202) 447-3219. (See also "Comments" under SUPPLEMENTARY INFORMATION.)

FOR FURTHER INFORMATION CONTACT: Dr. John C. Prucha, Director, Slaughter Inspection Standards and Procedures Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-3219.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Agency has determined in accordance with executive Order 11291 that this proposed rule is not a "major rule". It will not result in an annual effect on the economy of $100 million or more. There will be no major increase in cost or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. It will not have a significant adverse effect on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Five options were considered during the developmental phases of this regulatory action. These options included removal of kidneys from all poultry, or from all poultry destined for mechanical deboning; or from all mature chickens and turkeys destined for mechanical deboning; or from all mature poultry; or from all mature chickens and turkeys. The option of removal of kidneys from all mature chickens and mature turkey carcasses was selected as the most efficient and least costly option. This option would be relatively easy to enforce, yet its focus is narrow without being burdensome to the industry. It focuses on only those birds with a high probability of having kdineys contaminated with unacceptably high levels of cadmium.

There are two types of costs which would be incurred by the poultry industry due to the removal of kidneys as proposed. The first is increased personnel costs due to the fact that additional manpower must be used on the production line to remove the kidneys. The second is product cost due to the loss of yield from the weight of the kidneys. Total industry costs are estimated to range between $1.5 million and $1.9 million annually. These figures assume total recovery of such kidneys compared to total loss under the proposal. They may be inflated due to the fact that the costs do not reflect that kidneys are presently being removed from some poultry being exported. No significant impacts are expected on competition, innovation or foreign trade due to the fact that only 5 percent of all chickens slaughtered and 1 percent of all turkeys slaughtered will be affected.

Effect on Small Entities

The Administrator, Food Safety and Inspection Service, has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act, Pub. L. 96-354 (5 U.S.C. 601), because the proposal only requires the removal of kidneys from mature chickens and mature turkeys at the time of slaughter. It does not address all processed poultry products. It is anticipated that this will not have a significant economic impact because it affects less than 5 percent of the poultry slaughtered under Federal inspection (less than 5 percent of all chickens slaughtered and only 1 percent of all turkeys slaughtered).

Comments

Interested persons are invited to submit written comments concerning this proposal. The Agency is particularly interested in receiving additional scientific data on the effect of cadmium ingestion on the human body, the cadmium content of the kidneys of mature poultry, and the potential adverse health effects to humans of cadmium from that source. This information will be reviewed by the Agency in determining whether to promulgate a final rule.

Written comments should be sent in duplicate to the Regulations Office. Comments should reference the docket number which appears in the heading of this document. Any person desiring an opportunity for oral presentation of views on this proposal must make such request to Dr. Prucha so that arrangements may be made for such views to be presented. A transcript will be made of all views orally presented. All comments submitted pursuant to this notice will be made available for public inspection in the Regulations Office between 9:00 a.m. and 4:00 p.m., Monday through Friday.

Background

The Food Safety and Inspection Service is proposing to amend the Federal poultry products inspection regulations to provide for the removal of kidneys from the carcasses of mature chickens and mature turkeys after USDA inspectors complete their post-mortem inspection of the poultry viscera, but before completion of eviscerating operations, and to prohibit the use of such kidneys for human food. The available data indicates that the kidneys of mature poultry are an adulterant because of their cadmium concentration and should be considered to be unfit for human food.

Toxicity of Cadmium

Cadmium is associated with acute and chronic health problems in humans. Acute toxic effects have been manifested in man through kidney, lung, and bone disorders. However, chronic kidney disease is the principal human health hazard associated with ingestion. The human body does not excrete all the cadmium ingested which results in its accumulation primarily in the kidneys and liver. The earliest sign of kidney disease is the presence of low molecular weight proteins in the urine. Normally, there should be no proteins in the urine. Their presence indicates that the kidneys are not properly filtering the plasma and conserving essential blood components. In addition, the damaged kidneys cannot excrete toxic waste products, with the result that these waste products accumulate in the body and eventually result in uremic poisoning. Once cadmium induced kidney disease begins, it is likely to continue even when exposure to the cadmium has stopped, because of the low rate of excretion. The accumulated cadmium continues to affect functional kidney tissue. (Ref. 1).

Cadmium accumulates in the body with age. Infants are virtually free of cadmium. In January of 1979 the Environmental Protection Agency (EPA) released a study on cadmium toxicity. Their findings suggest that by age 50 a daily cadmium consumption of 60 mcg (micrograms) will have resulted in kidney damage in 1 percent of the population. They further estimate that daily ingestion of 80 to 100 mcg will result in kidney damage in 2.5 to 5 percent of the population by age 50. (Ref. 2).

In experimental animals, high cadmium levels have been associated with hypertension, testicular atrophy, teratomas, and chromosome abnormalities. (Ref. 3). Further, when an animal's diet is deficient in calcium or protein, there is an increased cadmium accumulation in the kidneys and liver. (Ref. 4). The correlation between similar acute and chronic ailments in humans is uncertain but several scientists have recommended that research in this area be continued.

Cadmium in Food

Some exposure to cadmium is unavoidable. It is present in air, water, and soil and becomes incorporated in various human food products. Grains, such as wheat, soybeans, and rice, absorb and concentrate cadmium from the soil in which they are grown. The cadmium is then accumulated in the kidneys of poultry or other animals eating the grain. With the exception of environmental exposure in certain industrial areas, the largest concentration of cadmium comes to people through food. (Ref. 5).

In 1972, an expert committee for the Food and Agriculture Organization/World Health Organization (FAO/WHO) examined the issue of cadmium toxicity and its accumulation in the body. They proposed that the maximum acceptable level of dietary cadmium for an adult should not exceed 400 to 500 mcg per week (57 to 71 mcg per day), from all sources. (Ref. 6).

Cadmium Levels in Poultry Kidneys

On June 29, 1979, the Agency published a notice in the **Federal Register** (44 FR 37965) of the availability of a report entitled "Health and Safety Aspects of the Use of Mechanically Deboned Poultry" (MDP). The section of the report addressing the cadmium issue noted the very high concentration of cadmium in the kidneys of mature chickens. The report stated that use of these kidneys in processed products increases the potential for adverse health effects to consumers because of the contribution those kidneys make to the levels of cadmium in consumers' diets. The report recommended a prohibition against the use of mature chicken kidneys in MDP. (Ref. 7).

The report contained a discussion of the findings of chemical analyses, which were the basis of the authors' recommendations. Samples of kidneys from young chickens (broilers) and mature chickens (laying hens) were analyzed to determine if the cadmium earlier detected in MDP could have resulted from inclusion of the kidneys. The data from these analyses showed sharp increases in the cadmium content of the kidneys with age. The average value for cadmium in young chickens was 0.05 mcg/g (micrograms per gram) with the highest value being 0.18 mcg/g. The average in mature chicken kidneys was 0.80 mcg/g with the highest value being 2.78 mcg/g. The results indicated a 16-fold increase in the amount of cadmium present in mature chicken kidneys when compared to young chicken kidneys. (Ref. 8). After the 1979 report was issued kidneys were sampled from mature turkeys (breeders) with similar results. The average value of cadmium in mature turkeys was 1.0 mcg/g with the highest value being greater than 4 mcg/g.

When the kidneys from mature chickens and mature turkeys are incorporated into the MDP the cadmium present in these tissues is also included in the product. One poultry frankfurter prepared from mature chicken MDP could contribute up to 3.5 mcg of cadmium to the diet. (This calculation is based on the assumption that each frankfurter weighs 1.6 ounces and that 80 percent of the weight is MDP prepared from mature chickens.) As stated in the 1979 report, if the average amount of cadmium in MDP prepared from raw foul backs with kidneys was calculated to be 0.096 mcg/g, then one such frankfurter could contribute 8 percent of the recommended maximum acceptable amount for an adult. Furthermore, depending upon an individual's dietary habits and age, the additional cadmium present in MDP containing mature poultry kidneys may contribute a much greater proportion of that person's acceptable daily intake. The 1979 report states:

> [I]ntakes of cadmium from use of MDP made from fowl with kidneys were projected to range from 5 to 28 percent of the acceptable daily intake (ADI) for infants, and 5 to 27 percent of the ADI for children ages 6 to 12. These amounts are excessive for a food group [meat, poultry, fish] which provides overall only 5 percent of the daily body burden of cadmium. (Ref. 9).

The June 29, 1979, notice also solicited comments on the findings in the report. Fifty-two of those commenting discussed the health and safety aspects of MDP. Of these, twenty-four generally addressed the issues of cadmium and/or poultry kidneys. Two comments stated that there was insufficient evidence, at this time, to prohibit the use of mature chicken kidneys in processed products. Nine concurred with the recommendation for removal. One of these also suggested the removal of mature turkeys kidneys. One commenter preferred controlling the cadmium content of the finished product. However, seven comments stated that even if there was cadmium present it was only in trace amounts. Four of these went on to question the figures used by the Agency to represent consumption and challenged the figures as being inflated.

Poultry Processing Practices and Technology

Poultry kidneys are not marketed separately as a food item and are generally not removed during poultry eviscerating operations. However, the kidneys can be removed by suction, which would reduce the yield by approximately ½ oz. (14.2 gms) in mature chickens and ¾ oz. (21.3 gms) in mature turkeys.

Generally, the machinery used to produce MDP finely grinds the carcass and extrudes the soft tissue through a fine sieve, leaving behind most of the

bone. This results in kidneys being bleeded into the other tissues making up the MDP.

MDP is used as an ingredient in an increasing volume of poultry products. A poultry industry survey conducted by the Agency indicates that MDP has been used in poultry products in the United States since 1965, and its use has increased greatly since 1976. In 1976, approximately 195 million pounds of MDP were produced. Production increased to about 330 million pounds in 1979. MDP is used in poultry sausage products such as chicken frankfurters and chicken bologna.

AS MDP is used in more food items and poultry sausage products gain increased usage, more people will become increasingly exposed to this source of dietary cadmium.

Based on a total diet study FDA estimated that in the United States, the average daily intake of cadmium for adults was 36.9 mcg, in 1977. (Ref. 10). This was based on composite samples of foods as they were prepared for consumption. FDA has also calculated levels of cadmium for specific commodities. By combining their results, FDA estimated that the daily intake is about 57 mcg per day. These results were of similar magnitude and reasonably close to those proposed by FAO/WHO as being in the tolerable range. Neither of FDA's estimates were based on a selection of food items that included poultry frankfurters or other foods likely to contain MDP.

Based on the above information, the Agency estimates that the average level of cadmium intake that will produce renal damage is between 2 and 20 times the current levels from all sources, and that for some individuals cadmium intakes may already be at the critical level. This very narrow margin of safety indicates that it would be prudent to reduce the levels of cadmium in foods where practical. This becomes increasingly important as the estimated dietary levels of cadmium are likely to increase as poultry food items containing MDP become more popular.

Reducing the Level of Cadmium Intake From Poultry

Although vegetables, including grains, are the most common source of cadmium, in the diet, the metal in these foods is present at only very small levels and is uniformly distributed in such products. There is no reasonable means to reduce cadmium exposure from these sources. However, cadmium is concentrated at very high levels in the kidneys of mature poultry. These organs have not traditionally been considered to be human food. Preventing the incorporation of mature chicken and turkey kidneys into MDP and other poultry products will prevent an additional, relatively high, exposure of consumers to cadmium from this source.

Although it is generally known that cadmium is widespread in the environment, albeit at higher concentrations in certain urban and industrial areas, the data available provide no scientific basis for discriminating between the kidneys of mature poultry on the basis of geographical origin. Furthermore, an attempt to discriminate among mature poultry kidneys from flocks in various regions of the country, or on any other basis, would lead to inspection and compliance costs which are not warranted by the relatively small amount of product involved.

Removal of kidneys after post-mortem inspection of the viscera and before completion of the eviscerating operations would prevent processed poultry products from becoming a major additional source of cadmium in the human diet.

For the sake of clarity the Agency is also proposing to amend § 381.1(b)(44) of the regulations (9 CFR 381.1(b)(44)) which defines "ready-to-cook poultry." This is poultry which has undergone processing to remove all unsuitable parts and organs and is ready for marketing. This proposed change would merely reference the proposed revision requiring the removal of kidneys from affected poultry, which would appear in new § 381.65(d) of the regulations (9 CFR 381.65(d)).

(The reports referenced above are available for inspection in the Regulations Office, Hearing Clerk's office.)

On the basis of the data discussed above, it appears that the high concentration of cadmium in the kidneys of mature chickens and mature turkeys render each such kidney unfit for human food and otherwise adulterated under the Poultry Products Inspection Act (21 U.S.C. 453(g)) and, therefore, the kidneys of mature chickens and mature turkeys should not be permitted to be used for human food.

Therefore, the Agency proposes to revise § 381.1(b)(44) and add a new paragraph to § 381.65 of the Federal poultry products inspection regulations (9 CFR 381.1(b)(44) and 381.65). It would require that the kidneys of mature chickens and mature turkeys be removed from their carcasses after the inspectors complete their post-mortem inspection of the viscera, but before completion of the eviscerating operations, and would prohibit the use of such kidneys for human food.

Indexing Terms. As required by 1 CFR 18.20 (46 FR 1762, January 22, 1981), the following are the indexing terms for this regulation:

List of Subjects in 9 CFR Part 381

Definitions, Preparation of products, poultry and poultry products.

Accordingly, Part 381 of the Federal poultry products inspection regulations would be amended to read as follows:

PART 381—POULTRY PRODUCTS INSPECTION REGULATIONS

1. The authority citation for Part 381 reads as follows:

Authority: Section 14 of the Poultry Products Inspection Act, as amended by the Wholesome Poultry Products Act (21 U.S.C. 451 et seq.); the Talmadge-Aiken Act of September 28, 1962, (7 U.S.C. 450); and Subsection 21(b) of the Federal Water Pollution Control Act, as amended by Pub. L. 91–224 and by other laws (33 U.S.C. 1254).

2. Section 381.1(b)(44) would be revised to read as follows:

§ 381.1 Definition.

* * * * *

(b) * * *

(44) *Ready-to-cook poultry.* "Ready-to-cook poultry" means any slaughtered poultry free from protruding pinfeathers, vestigial feathers (hair or down as the case may be) and from which the head, feet, crop, oil gland, trachea, esophagus, entrails, mature reproductive organs, and lungs have been removed, and in

the case of poultry as defined in § 381.170(a)(1) (vi), (vii) and (2)(iv) kidneys have been removed as required for certain mature poultry by § 381.65(d), and with or without the giblets, and which is suitable for cooking without need of futher processing. Ready-to-cook poultry also means any cut-up or disjointed portion of poultry or other parts of poultry such as reproductive organs, head, or feet that are suitable for cooking without need of further processing.

3. Section 381.65 would be amended by adding a new paragraph (d) to read as follows:

§ 381.65 Operations and procedures, generally.

* * * * *

(d) Kidneys of mature chickens and mature turkeys (poultry defined in § 381.170(a)(1)(vi) and (vii) and (2)(iv)) shall be removed from their carcasses after the inspectors complete their post-mortem inspection of the poultry viscera, but before completion of the eviscerating operations, and shall not be used for human food.

BILLING CODE 3410-DM-M

CIVIL AERONAUTICS BOARD

14 CFR Part 320

[Economic Reg. Docket 41303; Order 83-2-116]

Procedures for Awarding Japanese Charter Authorizations

February 28, 1983.

AGENCY: Civil Aeronautics Board.

ACTION: Shortening of answer period for petition for rulemaking.

SUMMARY: The CAB is shortening the answer period to a petition filed by Flying Tiger Lines to amend the transfer/penalty mechanism for Japan charter authorizations. Because this year's authorizations must be used by September 30, 1983, prompt action is essential if the CAB is to permit unwanted authorizations to be turned in and be redistributed to other interested parties.

DATES: Adopted February 28, 1983. Answers to petition due no later than 4 p.m., March 9, 1983.

FOR FURTHER INFORMATION CONTACT: George Wellington, Bureau of International Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; 202-673-5676.

SUPPLEMENTARY INFORMATION:

Order Shortening Answer Period

On February 23, 1983, The Flying Tiger Line Inc. (FTL) petitioned the Board for institution of a rulemaking proceeding to amend the transfer/penalty mechanism in 14 CFR Part 320, *Procedures for awarding Japanese charter authorizations*. The full text of the petition is as follows:

Petition for Rulemaking

The Flying Tiger Line Inc. (Flying Tigers) hereby requests, pursuant to Part 302.38 of the Board's Rules of Practices, that the Board institute a rulemaking proceeding to revise procedures for awarding authorizations to conduct charter operations to Japan (PR-251,[1] 14 CFR § 320) as set forth below:

1. By Regulation PR-251, September 20, 1982, the Board established procedures for allocating among eligible U.S. carriers the 300 charter authorizations provided for in the Memorandum of Understanding (MOU) signed with the Government of Japan on September 7, 1982. The Board assumed that "U.S. carrier demand to obtain the limited * * * authorizations was likely to be far in excess of the 300 flights available." (Regulation PR-251, p. 1.) To encourage maximum use of the authorizations, the Board established a transfer/penalty mechanism which permitted carriers to transfer slots and imposed substantial penalties for non-use of any authorizations by year-end (September 30) of each of the three years covered by the MOU. By this means the Board hoped to promote vigorous competition among several carriers in the Japan charter market and full use of the rights obtained from the Government of Japan.

2. Because of a number of factors, U.S. carriers are not making maximum use of the rights secured under the MOU. World-wide economic conditions have significantly dampened the market for U.S.-Japan passenger charter programs. Moreover, the penalty on the transfer of grandfather slots has created a disincentive to the disposition of those authorizations to a line-haul carrier which could, in conjunction with a tour operator, package a program to Japan. Nearly five months into the first year of the program, few of the authorized charters have taken place and, to our knowledge, only limited use of the remaining authorizations is contemplated. It is now clear that given existing conditions, the carriers holding slots have found no practical way to utilize most of them this year. On the other hand, there may be carriers which—if more slots were available to them—could work with a major tour operator to mount an effective Japan passenger charter program over the next six months.

Under the current allocation procedures, therefore, these valuable rights will be substantially wasted during the first year. To avoid this result, it is proposed that the Board amend PR-251 to provide for a limited "window" period during the coming weeks within which carriers holding more authorizations than currently anticipated needs demand may turn them back to the Board without penalty. These excess slots could then be immediately distributed by lottery or any other method the Board deems proper.

3. The proposed amendment would provide other carriers the opportunity to establish charter operations to Japan and maximize the potential for immediate and full use of the rights obtained in the MOU.

4. The proposal would require the addition of a new § 320.19 and conforming amendments as follows:

1. New § 320.19.

Section 320.19 Turn Back of Authorizations

(a) Any carrier holding charter authorizations awarded or acquired by it under this part may turn back any or all of those authorizations to the Board without penalty between ——— and ———.

(b) The Board will promptly redistribute the charter authorizations returned under this subsection to carriers eligible under § 320.12(a).

(c) Any charter flight authorization obtained under subsection (b) of this section shall not continue beyond September 30 of the allocation year in which it was so obtained.

2. Conforming amendments.

Section 320.4 Charter Authorizations

(a) * * *

(b) * * *

(1) A charter flight authorization for an allocation year that has not been used by September 30 of that year *and has not been turned back as provided in § 320.19* will result in a penalty of a forfeiture of two charter flight authorizations for the remaining allocation years, as provided in § 320.15.

(2) * * *

(3) *A charter flight authorization obtained under § 320.19 shall not continue beyond September 30 of the allocation year in which it was so obtained.*

(4) * * *

Wherefore, the Flying Tiger Line Inc. respectfully requests that the Board institute rulemaking proceedings to provide a limited "window" period for the return of excess authorizations without penalty and for such other and different relief as may be appropriate.

Respectfully submitted,

Joel Stephen Burton,

Counsel for The Flying Tiger Line Inc.

Dated: February 23, 1983.

Section 302.38(a) of the Rules of Practice in Board Proceedings provides a 30-day period for interested persons to file and answer to a petition for rulemaking. This order shortens the answer period.

The charter authorizations for a given year distributed under Part 320 are only

[1] 47 FR (42932) October 1, 1982.

good for a 1-year period ending September 30. If any action is to be taken in response to FTL's petition, prompt action is essential. Unwanted charter authorizations would have to be turned in and distributed to other interested parties with sufficient lead-time for the new parties to plan, advertise and conduct the flights before September 30 of this year. The Board is particularly sensitive to the fact that the peak season for passenger travel is rapidly approaching, and that carriers and tour operators wishing to obtain an authorization would need to finalize their plans as soon as possible. The Board, therefore, is shortening the answer period to the petition in order to expedite this proceeding and to determine if further rulemaking action is required.

Accordingly, the Civil Aeronautics Board:

(1) Shortens the answer period to Flying Tiger's petition from March 25, 1983, to 4 p.m., March 9, 1983.

(2) Copies of this Order will be served to all certificated air carriers and persons on the Service List for Docket 40901.

(Secs. 101, 203, 204, 401, 402, 403, 404, 406, 412, 901, 1001, 1002, 1005, Pub. L. 85-726, as amended, 72 Stat. 737, 742, 743, 754, 757, 758, 760, 763, 770, 783, 788, 794; 49 U.S.C. 1301, 1323, 1324, 1371, 1373, 1374, 1376, 1382, 1471, 1481, 1482, 1485)

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 122, 123 and 264

[SWH-FRL 2311-8]

Hazardous Waste management System; Extension of Public Comment Period

AGENCY: Environmental Protection Agency.

ACTION: Extension of comment period for proposed rule.

SUMMARY: On February 8, 1983, EPA published in the **Federal Register** a proposed rule concerning certain procedures for issuing permits for hazardous waste management facilities under the Resource Recovery and Conservation Act. This rule would made the permit effective for the designated operating life of the facility and the post-closure period for a land disposal facility and would give EPA and authorized States increased opportunities for reopening a permit to make changes in permit conditions. The RCRA Permit Advisory Committee requested EPA to extend the public comment period by 30 days so that the Committee can respond to the proposed rule. The purpose of this notice is to extend the public comment period on that proposed rule until May 11, 1983. The public comment period was originally due to end on April 11, 1983.

DATE: Comments must be received on or before May 11, 1983.

ADDRESSES: Comments should be addressed to Docket Clerk, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street SW, Washington, D.C. 20460 (202) 382-4487. Comments should identify the regulatory docket number as "Section 122.9—Duration of Permits".

The public docket for this proposed rule is located in Room S-269C, U.S. Environmental Protection Agency, 401 M Street SW, Washington, D.C. and is available for viewing from 9:00 a.m. to 4:00 p.m. Monday through Friday excluding holidays.

FOR FURTHER INFORMATION CONTACT: Amy Mills, Office of Solid Waste (WH-563), U.S. Environmental Protection Agency, Washington, D.C. 20460 or call (202) 382-4755 or the RCRA Hotline at (800) 424-9346 or (202) 382-3000.

SUPPLEMENTARY INFORMATION: On February 8, 1983, EPA published a proposed rule that would change the effective life of a permit issued under the Resource Conservation and Recovery Act (RCRA) to a hazardous waste management facility from ten years to the designated lifetime of the facility and the period of post-closure care for land disposal facilities. The proposed rule also gave EPA and authorized States increased opportunities for reopening permits during the life of the permit. The time period for public comment was sixty days.

One week after the proposed rule was published, the RCRA Permit Advisory Committee held its first meeting. The Committee was established under the auspices of the Federal Advisory Committee Act (FACA) in order to provide EPA with expert advice and provide recommendations on effective and responsive permit policies and procedures. At the February 16, 1983 meeting, the Committee adopted a motion requesting that EPA extend the public comment period by thirty days so that the Committee can respond to the proposed rule. This request was made because it would be impossible for the Committee to formulate its recommendations and hold the necessary public meetings, with public notice (as required under FACA), in the original sixty day comment period.

In order to allow time for the Committee and the interested public to comment, EPA is extending the comment period on the proposed rule until May 11, 1983.

Dated: February 21, 1983.

Michael A. Brown,

Acting Assistant Administrator.

Acquisition of Rights and Development of Mineral Resources; Extension of Comment Period

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of extension of comment period on intent to propose rulemaking.

SUMMARY: A notice of intent to propose rulemaking requesting the public to comment on regulations dealing with acquisitions of rights and development of mineral resources under the mining laws (30 U.S.C. 22 et seq.) and other Special Acts of Congress was published in the **Federal Register** on December 27, 1982 (47 FR 57521). That notice requested that comments be submitted by February 1, 1983. A notice of extension extending the comment period to March 1, 1983, was published in the **Federal Register** on January 31, 1983 (48 FR 4296). Due to requests to further extend the comment period, this notice extends the comment period for an additional 60 days to May 1, 1983.

DATE: Comments should be submitted by May 1, 1983. Comments received or postmarked after this date may not be considered in the decisionmaking process on a proposed rulemaking.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

February 28, 1983.

BILLING CODE 4310-84-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 630

Swordfish Fishery Management Plan; Public Hearings

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public hearings.

SUMMARY: The South Atlantic Fishery Management Council, Gulf of Mexico Fishery Management Council, Caribbean Fishery Management Council, New England Fishery Management Council, and Mid-Atlantic Fishery Management Council will hold public hearings to allow for input on the Swordfish Fishery Management Plan.

DATES: Written comments will be accepted until April 18, 1983. See Supplementary Information for dates of hearings scheduled in the South Atlantic and Gulf of Mexico management areas. Dates and cities for the Caribbean, New England, and Mid-Atlantic public hearings have been selected and a notice of specific locations will be published at a later time.

ADDRESS: Send comments to: David H. G. Gould, Executive Director, South Atlantic Fishery Management Council, 1 Southpark Circle, Suite 306, Charleston, South Carolina 29407, or Jack T. Brawner, Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

See Supplementary Information for times and locations of hearings.

FOR FURTHER INFORMATION CONTACT: David H. G. Gould, (803–571–4366) Executive Director, South Atlantic Fishery Management Council; or Jack T. Brawner, (813–893–3141) Regional Director, Southeast Region.

SUPPLEMENTARY INFORMATION: The hearings will deal with a fishery management plan which establishes a management regime for swordfish in the fishery conservation zone from Maine through Texas, including Puerto Rico and the U.S. Virgin Islands. Plan objectives and management measures are directed toward alleviating the following problems:

1. Growth overfishing is expected and could become intense.

2. Competition exists between users of domestic drift gill nets and other gear; also between domestic and Japanese longliners; and

3. Large amounts of swordfish are incidentally caught by Japanese tuna longliners.

Optimum yield is the harvest that will not exceed the maximum yield-per-recruit (YPR) for female swordfish that occurs with the predominant method of harvest (longlines). The Council proposes the following management measures:

Data Year: January 1 through December 31.

Fishing Year: June 1 through May 31.

Core Management Measures

1. The variable season closure will cap fishing mortality at the maximum YPR for female swordfish. Based on the 1980 analysis, this will require restricting fishing mortality at approximately what occurred in 1980. This method will result in a number of closed days in each Council area.

2. Data will be collected from a sample of fishermen indicating their intent to fish by sending a letter to the National Marine Fishery Service, Southeast Regional Director. All vessels selected to be sampled are required to participate. The sampling program will use an on-board technician who collects data for YPR analysis (sex, size, age, indicators), data for other stock assessment techniques, and incidental catch.

Regional Management Measures

1. Minimum of 20 percent sampling of all commercial and recreational swordfishing boats in the Mid-Atlantic Region.

2. Prohibition of gill nets in the New England and Mid-Atlantic Regions.

3. Inclusion or exclusion of rod and reel fishing for the variable season closure.

4. Exclusion of the new England harpoon fishery from the variable season closure.

Foreign Fishing Management Measures

1. There is no allowable foreign fishing for swordfish. Foreign fishing measures address the foreign incidental catch of swordfish when targeting species exempt from the Magnuson Act (tuna) or species covered by a Governing International Fisheries Agreement.

2. Adoption of existing requirements for observers on foreign vessels and that all hooked swordfish be released.

3. Adoption of existing area closures for foreign longliners.

4. A declining quota on the number of swordfish that can be hooked by foreign fishing based on 1980 Japanese data.

5. Accelerated phaseout of foreign hooked swordfish when the first domestic closure is required by an amount sufficient to make the domestic closure unnecessary.

6. The incidental catch of swordfish by foreign fishing for species covered by a Governing International Fisheries Agreement is limited to the 1979 level.

Public Hearings: The scheduled public hearings in the South Atlantic and Gulf of Mexico areas are as follows:

Date	South Atlantic	Gulf of Mexico
March 15...	Key West High School, C-Wing Auditorium, 21099 Flagler Ave., Key West, FL.	Key West High School, C-Wing Auditorium, 2100 Flagler Ave., Key West, FL.
	S.C. Wildlife & Marine Resources Auditorium, Ft. Johnson Rd., Charleston, SC.	Community Center, Mesier St., Port Aransas, TX.
March 16...	Sea Gardens Resort, 615 N. Ocean Blvd., Pompano Beach, FL.	Holiday Inn, 115208 Gulf Blvd., Madeira Beach, FL.
	Savannah Science Museum, 4405 Paulsen St., Savannah, GA.	Jury Assembly Room, 722 Moody, Galveston, TX.
March 17...	Holiday Inn on the Beach, 2600 N. Highway A1A, Ft. Pierce, FL.	Best Western Bayside Inn 711 W. Beach Drive, Panama City, FL.
	Holiday Inn, 1300 N. Atlantic Ave., Ft. Canaveral/Cocoa Beach, FL.	Landmark Motor Hotel, (Capri Room), 2601 Severn Ave., New Orleans/ Metairie, LA.
March 29...	Georgetown Public Library Auditorium, 702 Highmarket St., Georgetown, SC.	
March 30...	Marine Resources Center, Bogue Banks, Morehead City/Atlantic Beach, NC.	
March 31...	Marine Resources Center, Manteo, NC.	

All hearings will be from 7:30–10:00 p.m. and will be tape recorded with the tapes filed as the official transcript of the hearing.

Selected dates and cites for public hearings in the Caribbean, New England, and Mid-Atlantic areas are as follows:

Caribbean

April 6, St. Thomas, U.S. Virgin Islands
April 8, Mayaguez, Puerto Rico

Mid-Atlantic

March 28, Hampton, VA
March 29, Ocean City, MD
March 30, Atlantic City, NJ
March 31, Riverhead, NY

Caribbean

April 6, St. Thomas, U.S. Virgin Islands
April 8, Mayaguez, Puerto Rico

Notices

Federal Register
Vol. 48, No. 42
Wednesday, March 2, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 83-307]

Availability of a Site-Specific Environmental Analysis for the USDA Cooperative Gypsy Moth Supression and Regulatory Program

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of the availability of a site-specific environmental analysis for the proposed treatment areas in California.

SUMMARY: This gives notice of the availability of a site-specific environmental analysis for the proposed treatment areas in Alameda, Contra Costa, Los Angeles, Marin, San Mateo, and Santa Clara Counties in California.

ADDRESSES: Requests for a copy of this document should be addressed to California Department of Food and Agriculture, Division of Plant Industry, 1220 N. Street, Room A 350, Sacramento, California 95814. A copy is available for public inspection at this same address and in Field Operations Support Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 663 Federal Building, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: Gary E. Moorehead, Staff Officer, Field Operations Support Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 663 Federal Building, Hyattsville, MD 20782, (301) 436-8295.

SUPPLEMENTARY INFORMATION: The USDA draft Programmatic Environmental Impact Statement (PEIS) for the Cooperative Gypsy Moth Suppression and Regulatory Program was submitted to the Environmental Protection Agency (EPA) on November 26, 1980. The public comment period for this document closed January 25, 1981. The final Programmatic Environmental Impact Statement (PEIS) was filed with the EPA on March 6, 1981, and a notice of availability of this document was published in the **Federal Register** on April 28, 1981. The final PEIS was supplemented by a document published in the **Federal Register** on May 14, 1981 (46 FR 2666–2667). The PEIS discussed the national Gypsy Moth Suppression and Regulatory Program and noted that annual site-specific environmental documents would be prepared for the proposed treatment areas. A site-specific environmental analysis for the proposed treatment areas in Alameda, Contra Costa, Los Angeles, Marin, San Mateo, and Santa Clara Counties in California has been prepared. The document discusses the environmental effects of the program for approximately 900 acres that are proposed to be treated in these counties in the State of California. None of the treatment options discussed for possible use in such proposed treatment areas pose any significant adverse impact upon the environment of the areas. Further, there are no unique characteristics or aspects of or within the proposed treatment areas that would place it outside the scope of considerations addressed in the PEIS.

Done at Washington, D.C., this 28th day of February 1983.

Harvey L. Ford,

Deputy Administrator, Plant Protection and Quarantine Animal and Plant Health Inspection Service.

Office of the Secretary

Forms Under Review by Office of Management and Budget

February 23, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of P.L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Comments and questions about the items in the listing should be directed to the agency person named at the end of each entry. If you anticipate commenting on a form but find that preparation time will prevent you from submitting comments promptly, you should advise the agency person of your intent as early as possible.

Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Statistical Clearance Officer, (202) 447-6201.

CIVIL AERONAUTICS BOARD

[Docket 41071]

Akron/Canton Airlines Fitness Investigation; Prehearing Conference

Notice is hereby given that a prehearing conference in the above-titled matter is assigned to be held at the Civil Aeronautics Board on March 9, 1983, at 10:00 a.m. (local time), in Room 1003, Hearing Room A, North Universal Building, 1875 Connecticut Avenue, NW., Washington, D.C., before the undersigned.

In order to facilitate the conduct of the conference, parties including the Bureau of Domestic Aviation are instructed to submit on or before March 3, 1983, one copy to each party and prospective party and six copies to the judge of: (1) A proposed statement of issues; (2) proposed stipulations; (3) proposed requests for additional information and evidence; (4) statements of positions; and (5) proposed procedural dates.

Dated at Washington, D.C., February 24, 1983.

William A. Kane, Jr.,
Administrative Law Judge.

[Order No. 83-2-85; Docket 41077]

Application of American International Airways, Inc.; Certificate Authority Under Subpart Q

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order instituting the American International Airways, Inc. Fitness Investigation, 83–2–85 Docket 41077.

SUMMARY: The Board is instituting an investigation to determine the fitness of American International Airways, Inc. to engage in interstate and overseas air transportation of persons, property, and mail, except for all-cargo service in Alaska and Hawaii.

DATES: Petitions to intervene should be filed in Docket 41077, and addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428, by March 14, 1983.

ADDRESSES: Petitions to intervene should be filed in Docket 41077, and addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

In addition, copies of such filings should be served on the person listed in the attachment to Order 83–2–85, and on any other person filing petitions.

FOR FURTHER INFORMATION CONTACT: Joseph W. Bolognesi, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Ave., NW., Washington, D.C. 20428; (202) 673–5333.

SUPPLEMENTARY INFORMATION: The complete text of Order 83–2–85 is available from our Distribution Section, Room 100, 1825 Connecticut Ave., N.W., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 83–2–85 to that address.

By the Bureau of Domestic Aviation: February 24, 1983.

[Order 83–2–88; Docket 41306]

Application of Unicorn Air, Ltd. for Certificate Authority Under Subpart Q

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order instituting the Unicorn Air, Ltd. Fitness Investigation, 83–2–89, Docket 41306.

SUMMARY: The Board is instituting an investigation to determine the fitness of Unicorn Air, Ltd. to engage in interstate and overseas scheduled air transportation of persons, property, and mail and foreign scheduled air transportation of persons, property, and mail between all U.S. points and points in the Federal Republic of Germany, Belgium, and the Netherlands. If the carrier is found to be fit, it will receive certificates of public convenience and necessity authorizing such air transportation.

DATES: Persons wishing to intervene in the *Unicorn Air, Ltd. Fitness Investigation* shall file their petitions in Docket 41306 by March 14, 1983.

ADDRESSES: Petitions to intervene should be filed in Docket 41306 addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

FOR FURTHER INFORMATION CONTACT: Rhonda Starck or Larry Kravor, Bureau of International Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; (202) 673–5035 or 5203.

SUPPLEMENTARY INFORMATION: The complete text of Order 83–2–89 is available from our Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 83–2–89 to that address.

Commuter Fitness Determination

The Board is proposing to find the following carriers fit, willing and able to provide commuter air carrier service under Section 419(c)(2) of the Federal Aviation Act, as amended, and that aircraft used in this service conform to applicable safety standards.

Order	Applicant	Response date
83–2–87	Nevada County Aviation, Inc.	Mar. 16, 1983.
83–2–86	Montauk Caribbean Airways, Inc. and Ocean Reef Airways, Inc.	Mar. 17, 1983.
83–2–88	Chesapeake Transport, Inc.	Do.

All interested persons wishing to respond to the Board's tentative fitness determination shall serve their responses on all persons listed in Attachment A of the respective orders and file response or additional data with the Special Authorities Division, Room 915, Civil Aeronautics Board, Washington, D.C. 20428.

The complete text of the orders is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request to the above address.

For Further Information Contact: Ms. Carolyn S. Kramp for Orders 83–2–87 and 83–2–86 at (202) 673–5918; and Mr. Joseph Bolognesi for Order 83–2–88 at (202) 673–5333; Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

BILLING CODE 6320-01-M

[Order 83-2-94]

Fitness Determination of Air Logistics of Alaska, Inc.

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause (Order 83-2-94).

SUMMARY: The Board is proposing to award a certificate of public convenience and necessity to Air Logistics of Alaska, Inc., authorizing it to engage in the interstate and overseas air transportation of persons, property, and mail as well as all-cargo service in the Anchorage-Iliamna, Alaska market. The Board has tentatively decided that Air Logistics is fit, willing, and able to provide the service.

DATES: Objections: All interested persons having objections to the Board issuing the proposed certificate shall file, and serve upon all persons listed below no later than March 17, 1983, a statement of objections, together with a summary of testimony, statistical data, and material expected to be relied upon to support the objections.

ADDRESSES: Responses or additional data should be filed in Docket 41091, and should be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428, and should be served on all persons listed in Attachment B to the order.

FOR FURTHER INFORMATION CONTACT: Mr. Nicholas Lowry, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; (202) 673-5345.

SUPPLEMENTARY INFORMATION: The complete text of Order 83-2-94 is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 83-2-94 to that address.

By the Civil Aeronautics Board: February 24, 1983.

BILLING CODE 6320-01-M

[Order 83-2-88; Docket 41305]

OCS America Inc.; Order to Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause: Order 83-2-88, Docket 41305.

SUMMARY: The Board proposes to deny authority to operate as a foreign freight forwarder in interstate air transportation to OCS America Inc., a Japanese air freight forwarder, because the Government of Japan does not allow U.S. citizens to obtain like authority in that country.

Objections: All interested persons having objections to the Board's tentative findings and conclusions as described in the order cited above, shall, no later than March 22, 1983, file in Docket 41305 a statement of such objections with the Civil Aeronautics Board (20 copies) and mail copies to the applicant, to the Ambassador of Japan in Washington, D.C., and to the Departments of State and Transportation.

A statement of objections must cite the docket number and must include a summary of testimony, statistical data, or other such supporting evidence.

If no objections are filed, the Board may enter an order which would make final the Board's tentative findings and conclusions and deny the requested foreign freight forwarder registration to the applicant.

Addresses for Objections:

Docket 41305, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428, or

OCS America Inc., c/o Richard Linn, Esq., Wender Murase & White, 1120 20th Street, N.W., Washington, D.C. 20036.

To get a Copy of the Complete Order: Request it from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the Washington metropolitan area may send a postcard request.

FOR FURTHER INFORMATION CONTACT: Dean L. Johnson (202) 673-5371, Regulatory Affairs Division, Bureau of International Aviation, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: February 24, 1983.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

Preliminary Negative Countervailing Duty Determination; Fresh Asparagus From Mexico

AGENCY: International Trade Administration, Commerce.

ACTION: Preliminary negative countervailing duty determination.

SUMMARY: We preliminarily determine that certain benefits which constitute bounties or grants within the meaning of the countervailing duty law are not being provided to producers or exporters in Mexico of fresh asparagus, as described in the "Scope of Investigation" section of this notice. If this investigation proceeds normally, we will make our final determination by May 9, 1983.

EFFECTIVE DATE: March 2, 1983.

FOR FURTHER INFORMATION CONTACT: G. Leon McNeill or Julia E. Hathcox, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, telephone (20) 377-1273 or 377-0184.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon our investigation, we preliminarily determine that there is no reason to believe that certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to producers or exporters in Mexico of certain fresh asparagus, as described in the "Scope of Investigation" section of this notice.

Case History

On November 3, 1982, we received a petition from the California Asparagus Growers' Association, Washington Asparagus Growers' Association, Michigan Asparagus Growers' Association, and Imperial Valley Asparagus Growers' Association, filed on behalf of the fresh asparagus industry in the United States. The petition alleges that the government of Mexico bestows bounties or grants upon the production or exportation of fresh asparagus within the meaning of section 303 of the Act.

We found the petition to contain sufficient grounds upon which to initiate a countervailing duty investigation and, on November 23, 1982, we initiated a countervailing duty investigation. We stated that we expected to issue a preliminary determination on or before December 26, 1982.

Mexico is not a "country under the Agreement" within the meaning of section 701(b) of the Act, and therefore section 303 of the Act applies to this investigation. Under this section, where as here the merchandise being investigated is dutiable, the domestic industry is not required to allege that, and the U.S. International Trade Commission is not required to determine

whether imports of this product cause or threaten material injury to a U.S. industry.

On December 6, 1982, we presented a questionnaire concerning the allegations in the petition to the government of Mexico in Washington, D.C. On December 22, 1982, we presented a letter clarifying certain points in our questionnaire, to the government of Mexico in Washington, D.C.

On December 17, 1982, we received from the government of Mexico a request for the postponement of the preliminary determination to the extent permitted by the law. The government of Mexico made this request upon the basis that the case is "extraordinarily complicated" under section 703(c)(1)(B) of the Act.

On January 7, 1983, we announced our intention to postpone the preliminary countervailing duty investigation involving fresh asparagus until not later than February 22, 1983. We determined, under section 703(c)(1)(B) of the Act, that the case is extraordinarily complicated because the alleged subsidy practices are numerous and complex, because the issues involved are novel, and there are numerous firms whose activities must be investigated. We determined that the government of Mexico was cooperating, that the other parties concerned were cooperating, and that additional time was necessary to make the preliminary determination.

On January 14, 1983, we received from the government of Mexico a response to our contervailing duty questionnaire regarding fresh asparagus. The response stated that Mexican producers or exporters of fresh asparagus: (a) Had not benefited from, (b) had not applied for or received, or (c) were not eligible for any of the benefits referred to by the petitioners' allegations. In accordance with our proceducers, we sent on February 9, 1983, a supplemental questionnaire to the government of Mexico. We also informed the petitioners and other interested parties that they, too, now had additional time to comment. On February 16, 1983, we received from the government of Mexico the response to our supplemental questionnaire regarding fresh asparagus. Following our notification of the extension of the comment period, we also received comments, including additional allegations, from the petitioners' counsel on February 14, 1983, and a letter from counsel for the Imperial Valley Asparagus Growers' Association. The Mexcian government's response provided additional information regarding certain programs, and again stated that producers or exporters of fresh asparagus had not received benefits under any of the alleged programs or practices.

Scope of Investigation

The product covered by this investigation is fresh asparagus currently is imported under item 137.9520 of the *Tariff Schedules of the United States Annotated (TSUSA)*.

The period for which we are measuring subsidization is January 1, 1982 to September 30, 1982.

Analysis of Programs

I. Program Determined Preliminarily Not To Be Used or for Which Producers or Exporters of This Product Are Not Eligible

A. *Fund for the Promotion of Exports of Mexican Manufactured Products (FOMEX).* The Fund for the Promotion of Exports of Mexican Manufactured Products (FOMEX) is a trust established by the government of Mexico to promote the manufacture and sale of exported products. The fund is administered by the Mexican Treasury Department with the Bank of Mexico acting as the trustee. The Bank of Mexico administers the financing of FOMEX loans through financial institutions which establish contracts for lines of credit with manufacturers and exporters.

In order for a company to be eligible for FOMEX financing for exports, the following requirements must be met: (1) The product to be manufactured must be included on a list made public by FOMEX; (2) the articles to be exported must have a minimum of 30 percent national content in direct production costs; (3) loans granted for pre-export must be in Mexican currency, while loans for export sales are established in U.S. dollars or any other foreign currency acceptable to the Bank of Mexico; and (4) the exporter must carry insurance against commercial risks to the extent of the loans. In previous final countervailing duty determinations regarding Mexico, we have found the FOMEX program to confer benefits constituting bounties or grants.

The government of Mexico has stated that producers or exporters of fresh asparagus are not eligible for FOMEX financing because FOMEX does not provide loans to agricultural products and that only manufactured articles may qualify for FOMEX financing. We will further investigate to determine if producers or exporters of the subject merchandise receive benefits constituting bounties or grants through the FOMEX program.

B. *Certificados de Promocion Fiscal (CEPROFI).* In 1979 the government of Mexico introduced a four-year National Industrial Development Plan (NIDP) which spells out broad economic goals for the country. Tax credits, which are called Certificates of Fiscal Promotion (CEPROFI), are used to promote the NIDP goals, which include increased employment, regional decentralization, industrial development, and the promotion of small and medium-sized firms.

CEPROFI certificates are non-transferable tax certificates of a set value which may be used for a five-year period to pay federal taxes. CEPROFI certificates are granted for carrying out investments in "priority" industrial activities. The amount of the CEPROFI is based upon the location of the activity, the number of jobs generated, the value of the investment in new plants and equipment, or the value of the purchase of capital goods produced in Mexico. In previous final countervailing duty determinations regarding Mexico, we have found the CEPROFI program to provide benefits constituting bounties or grants.

Petitioners allege that producers or exporters of fresh asparagus may receive benefits constituting bounties or grants under the tax and developmental aspects of the CEPROFI program. The response of the Mexican government states no Mexican producer or exporter of fresh asparagus has applied for or received any CEPROFI. We will investigate further to determine the applicability of the CEPROFI program to producers or exporters of fresh asparagus. (See Sections III B–E).

C. *Import Duty Reductions and Exemptions.* Petitioners allege that companies establishing facilities in the border zone are eligible for import duty reductions or exemptions on raw material, machinery, and equipment. Petitioners also allege that companies or producers capable of demonstrating increased export volume may receive a reduction or exemption on imported machinery or equipment used in the manufacture of exported products. Petitioners also allege producers or exporters of fresh asparagus benefit from their location in areas which are declared free zones and into which merchandise may be imported duty free.

The government of Mexico states that no Mexican producer or exporter of fresh asparagus has benefitted from any import duty reduction or exemption. According to the Mexican government's response, the two largest Mexican producing and exporting associations of fresh asparagus are located in the states of Baja California and Sonora.

We are aware that Baja California and portions of Sonora have been

declared free zones by the government of Mexico. According to Mexico's Industrial Development Plan (Abridged Version), certain portions of the states of Baja California and Sonora have been designated as priority areas for industrial urban development. According to this plan, certain portions of the state of Guanajuato have also been designated as priority areas for industrial urban development. According to the Mexican government's response, other producers and exporters of fresh asparagus are located in the state of Guanajuato.

In a previous final countervailing determination, we have determined that import duty reductions or exemptions on machinery, spare parts, or tools confer benefits constituting bounties or grants. (Certain Iron-Metal Construction Castings from Mexico, February 17, 1983). We determine that import duty reductions and exemptions on raw materials and auxiliary materials physcially incorporated into the final product do not confer benefits constituting bounties or grants. See the Department's regulations (paragraph 3, annex 1 of 19 CFR Part 355) which provide that the nonexcessive drawback, rebate or remission of duties on imported items physcially incorporated in the final product is not a subsidy, but that the drawback, rebate or remission of duties on imported capital goods or items not physically incorporated (e.g. capital equipment) is a subsidy. We will seek further information to determine whether producers or exporters of fresh asparagus from Mexico receive import duty reductions or exemptions on machinery, spare parts, or tools.

D. *The Sistema Alimentario Mexicano (SAM) Program.* According to publicly available information, the SAM program, established in March 1980, is an effort on the part of the Mexican government to guarantee a minimum level of nutrition for the Mexican populace and to achieve independence for Mexico in the food sector. In order to achieve this minimum level of nutrition, the SAM program focuses upon the production, processing, marketing and consumption of those items defined by the National Institute of Nutrition as being included in the "basic food basket" for Mexico. In order to foster the availability of basic food products, the SAM program provides numerous services, including the subsidization of inputs in these basic foods, increasing the guaranteed prices for basic foodstuffs, increasing credit to the agricultural sector and developing technology suitable to the needs of Mexico's small farmers.

Petitioners allege that under the SAM program Mexican producers or exporters of fresh asparagus received the following benefits which could constitute bounties or grants: (a) Duty reductions for producers on imports of raw materials for the production and distribution of goods covered by the SAM program; (b) tax credits for investments in vehicles used to distribute basic goods; (c) reductions on business income tax rates for companies in the agricultural sector or such companies which process their basic product; (d) preferential loans granted to Mexican agriculture; (e) credits for crop insurance and marketing reorganization; (f) credits to producers selling products at prices fixed by the government.

In its responses of January 14 and February 16, 1983, the government of Mexico stated that since eligibility for the SAM program is limited to basic foodstuffs and that fresh asparagus is considered a luxury item in Mexico, producers or exporters of fresh asparagus in Mexico have not received any benefits through the SAM program.

We will continue to seek information regarding the SAM program and its possible applicability to the producers or exporters of fresh asparagus.

E. *Preferential Loans Granted to Mexican Agriculture.* Petitioners allege that producers or exporters of fresh asparagus have received benefits which could constitute bounties or grants through preferential financing provided to Mexican agriculture, specifically through the National Bank of Rural Credit. Petitioners and interested parties further allege that preferential financing is also being provided to producers or exporters of fresh asparaus through two other institutions: the Fund Established in Relation to Agriculture (FIRA) and the Guarantee and Development Fund for Agriculture, Livestock and Poultry (FONDO).

According to publicly available information, the FIRA is a series of trusts administered by the Bank of Mexico. These trusts were established to support farming and livestock sectors and agriculture-related industries through the provision of fixed asset investment loans and working capital loans. These trusts guarantee up to 80 percent of loans granted by the banking system to low-income producers.

Public information also states that the FONDO, a specialized trust, encourages credit institutions to finance farmers. It does this through financial backing and technical assistance services. The National Bank of Rural Credit provides long- and short-term loans to farmers and livestock producers. The National Bank of Rural Credit receives direct support from the Trust Funds of Support and Promotion to the Agricultural and Livestock Industry.

Respondents have stated that no producer or exporter of fresh asparagus has been granted loans by the National Bank of Rural Credit. Further, the government of Mexico states that no producer or exporter of fresh asparagus has received any preferential loans under any other government loan program. Because the petitioners did not raise until February 14, 1983, the issue of possible preferential financing for fresh asparagus producers or exporters through the FONDO and FIRA, we will seek further information regarding these allegations before the issuance of our final countervailing duty determination. We will continue to seek information to determine whether producers or exporters of fresh asparagus have received preferential financing through these organizations under the auspices of the SAM program or independently of that program.

F. *Discounts on Fertilizers, Insecticides, Seeds, and Fuels.* Petitioners allege that producers or exporters of fresh asparagus have received discounts on fertilizers, insecticides, seeds, and fuel. Petitioners and interested parties point out that fertilizer production in Mexico is a government monopoly and that the entire petroleum industry of Mexico is controlled by the government. Respondents state producers and exporters of fresh asparagus have not received any benefits from any program intended to assist basic agricultural products, including the SAM program.

We preliminarily determine the general availability of petroleum products in Mexico at government-controlled prices does not confer a benefit constituting a bounty or grant. Further, we determine preliminarily that government operation of the petroleum/fertilizer industry in Mexico does not *per se* confer a benefit constituting a bounty or grant. We have no evidence that preferential prices for the above products were provided to producers or exporters of fresh asparagus. We will seek further information as to whether benefits constituting bounties or grants are conferred upon a specific industry or group of industries through government-controlled petroleum prices or government operation of the petroleum/fertilizer industry in Mexico.

We will continue to seek information to determine whether producers or exporters of fresh asparagus have

received benefits which might constitute bounties or grants through discounts or fertilizers, insecticides, seeds, or fuel.

II. Program Preliminarily Determined to Be Suspended And Not Used Recently

Certificado de Devolucion de Impuestos Indirectos (CEDI). The CEDI is a tax certificate issued by the government of Mexico in an amount equal to a percentage of the f.o.b. value of the exported merchandise or, if national insurance and transportation are used, a percentage of the c.i.f. value of the exported product. The Secretary of Commerce of Mexico is responsible for setting the CEDI rate, which is not published. Exporters are required to apply for each CEDI by providing to the Ministry of Commerce (SECOFIN) documentation with respect to each individual shipment of qualifying exports. SECOFIN processes the application and instructs the Ministry of Treasury to issue the CEDI's in the amount specified. The CEDI's are non-transferable and may be applied against a wide range of federal tax liabilities (including payroll taxes, value added taxes, federal income taxes, and import duties) over a period of five years from the date of issuance.

We have determined in the past that the CEDI program is countervailable. The government of Mexico notified us that, as of August 25, 1982, it has discontinued the eligibility of all products for the CEDI program. Because the CEDI program has been suspended, the Department preliminarily determines that it is not being used.

III. Programs for Which Additional Information is Needed

A. *Irrigation Projects.* Petitioners allege that the producers or exporters of fresh asparagus from Mexico receive benefits constituting bounties or grants through government financing of and operation of irrigation projects. In addition, petitioners and interested parties allege that Mexican producers or exporters of fresh asparagus receive benefits constituting bounties or grants from water provided by the government at subsidized rates. Petitioners and interested parties state that 40 percent of all irrigated land in Mexico is currently located in the northwest section of the country. In particular, they allege that the Mexicali, Baja California area is a major beneficiary of Mexican government irrigation projects in the northwest of Mexico.

In its response to our supplemental countervailing duty questionnaire, the government of Mexico states that the irrigation projects of the Mexican government have not been installed for the purpose of asparagus growing. The Mexican government states that over one half of the water needs of asparagus producers or exporters in Mexicali is served by canals and that this service must be paid for on a water usage rate established on a water district basis and are uniform for all agricultural products and growers within each water district. The Mexican government further states that the remainder of the asparagus producers in the Mexicali area, as well as in the Guanajuato and Sonora areas of production, use deep wells drilled at the cost of the producers themselves.

While irrigation *per se* may not be considered a subsidy, it could be targeted in such a way as to confer a benefit constituting a bounty or grant. We will seek further information to determine if, in this case, such targeting exists.

We will seek further information regarding the Mexican government's participation in the construction and operation of irrigation facilities in order to determine if such participation provides benefits which could constitute bounties or grants to producers or exporters of fresh asparagus from Mexico. In addition, we will seek further information regarding petitioners' and interested parties' allegation that Mexican asparagus producers or exporters receive benefits which would constitute bounties or grants through the provision of water resources, resulting from activities of the Mexican government.

B. *Investment Credits for New Machinery.* Petitioners allege that producers or exporters of fresh asparagus may receive investment credits for the acquisitions by purchasers located in border areas of new machinery and equipment manufactured in Mexico. Respondents state that producers or exporters have not received any such credits through the CEPROFI program. We will continue to seek further information to determine whether producers or exporters of fresh asparagus have received benefits which might constitute bounties or grants through such investment credits provided through the CEPROFI program or any other program existing independently of the CEPROFI program.

C. *Credits to Promote Employment.* Petitioners allege that producers or exporters of fresh asparagus may receive credits provided to promote increased employment or to maintain pre-devaluation employment. Respondents state that producers or exporters of fresh asparagus do not receive such credits as they have not applied for or received CEPROFI. We will continue to seek information to determine whether producers or exporters of fresh asparagus receives under any program such credits which could provide benefits constituting bounties or grants.

D. *Incentives for the Establishment of Plants.* Petitioners allege that producers or exporters may receive special incentives if they are companies establishing manufacturing plants in the border areas. Respondents state that producers or exporters of fresh asparagus have not received such incentives under CEPROFI. We will seek information to determine whether producers or exporters of fresh asparagus receive under any program such incentives which may provide benefits constituting bounties or grants.

E. *Accelerated Depreciation for Construction.* Petitioners alleged that producers or exporters of fresh asparagus may be eligible for accelerated depreciation for the construction of wholesale warehouses in the border area. Respondents state producers or exporters of fresh asparagus have not received such as they have not applied for or received any CEPROFI. We will seek information to determine if producers or exporters of fresh asparagus have received through any program such accelerated depreciation which could provide a benefit constituting a bounty or grant.

Verification

In accordance with section 776(a) of the Act, we will verify all the information used in making our final determination.

Public Comment

In accordance with § 355.35 of the Commerce Department Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10 a.m. on March 29, 1983, at the U.S. Department of Commerce, Room 6802, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant secretary for Import Administration, Room 3099B, at the above address within 10 days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs must be submitted to the Deputy Assistant Secretary by March 22, 1983. Oral presentations will be limited to issues raised in the briefs. All written

views should be filed in accordance with 19 CFR 355.34 within 30 days of this notice's publication, at the above address and in at least 10 copies.

Dated: February 22, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Certain Iron-Metal Construction Castings From Mexico

AGENCY: International Trade Administration, Commerce.

ACTION: Final affirmative countervailing duty determination and countervailing duty order.

SUMMARY: We have determined that certain benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Mexico of certain iron-metal construction castings, as described in the "Scope of Investigation" section of this notice. The net bounty or grant is 2.85 percent *ad valorem*.

EFFECTIVE DATE: March 2, 1983.

FOR FURTHER INFORMATION CONTACT: G. Leon McNeill or Julia E. Hathcox, Office of Investigations, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230, telephone (202) 377-5495 or 377-0184.

SUPPLEMENTARY INFORMATION:

Final Determination and Order

Based upon our investigation we determine that certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended, (the Act) are being provided to manufacturers, producers, or exporters in Mexico of certain iron-metal construction castings as described in the "Scope of Investigation" section of this notice. We determined the net bounty or grant to be 2.85 percent *ad valorem*.

Case History

On September 10, 1982, we received a petition from counsel on behalf of 11 domestic manufacturers of certain iron-metal construction castings. Those manufacturers are: Alhambra Foundry, Allegheny Foundry Company, Campbell Foundry Company, E. B. Mortiz Foundry, East Jordan Iron Works, Inc., LeBaron Foundry Company, Memphis Machine Works, Neenah Foundry Company, Pinkerton Foundry Company, U.S. Foundry and Manufacturing Corporation, and Vulcan Foundry, Inc. The petition alleged that certain benefits which constitute bounties or grants within the meaning of section 303 of the Act are being provided, directly or indirectly, to the manufacturers, producers, or exporters in Mexico of certain iron-metal construction castings.

We found the petition to contain sufficient grounds upon which to initiate a countervailing duty investigation, and on September 30, 1982, we initiated a countervailing duty investigation. We stated that we expected to issue a preliminary determination on or before December 6, 1982.

Since Mexico is not a "country under the agreement" within the meaning of section 701(b) of the Act, section 303 of the Act applies to this investigation. Because the subject merchandise is nondutiable and there is no "international obligation" within the meaning of section 303(a)(2) of the Act which requires an injury determination for nondutiable merchandise from Mexico, the domestic industry is not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of this product cause or threaten to cause material injury to a U.S. industry.

On October 8, 1982, we presented a questionnaire concerning the petitioner's allegations to the government of Mexico in Washington, D.C.

On December 6, 1982, we preliminarily determined that the government of Mexico was providing its manufacturers, producers, or exporters of certain iron-metal construction castings with benefits that are bounties or grants within the meaning of the countervailing duty law (47 FR 53700). This determination was based upon the best information available as we had not, at the time, received a response to our questionnaire. On December 27, 1982, January 4 and 13, 1983, we received responses to our countervailing duty questionnaire from the Mexican government. On January 17–28, 1983, we verified in Mexico the response submitted by the Mexican government.

Our notice of preliminary determination gave interested parties an opportunity to submit oral or written views. We held a public hearing on January 12, 1983, at which counsel for the petitioners, counsel for the Mexican respondents, and a representative from the Mexican Embassy participated.

Scope of Investigation

The merchandise covered by this investigation is certain iron-metal construction castings, including manhole covers, rings and frames, catch basin frames and grates, cleanout covers and grates, meter boxes, and valve boxes. These castings are commonly called municipal or public works castings. This merchandise is currently classifiable under item numbers 657.0950 of the *Tariff Schedules of the United States Annotated (TSUSA)* and under TSUSA item number 657.0990. These products enter the United States duty-free.

The period for which we are measuring subsidization is from January 1, 1982, to September 30, 1982.

Analysis of Programs

In its response, the government of Mexico provided data for the applicable period. Based upon our analysis of the petition, the response to our questionnaire, our verification, and oral and written comments by interested parties, we determine the following.

I. Programs Determined to Confer Bounties or Grants

We determine that bounties or grants are being provided to manufacturers, producers, or exporters in Mexico of certain iron-metal construction castings under the programs listed below.

A. Fund for the Promotion of Exports of Mexican Manufactured Products (FOMEX).—FOMEX is a trust established by the government of Mexico to promote the manufacture and sale of exported products. The fund is administered by the Mexican Treasury Department, with the Bank of Mexico acting as the trustee. The Bank of Mexico administers the financing of FOMEX loans through financial institutions. The financial institutions establish contracts for lines of credit with manufacturers and exporters of merchandise.

The producers, manufacturers, and exporters of certain iron-metal construction castings obtained loans from the Fund for the Promotion of Mexican Manufactured Products (FOMEX) for two purposes: pre-export (production) financing and export financing.

In order for a company to be eligible for FOMEX financing for exports, the following requirements must be met: (1) The product to be manufactured must be included on a list made public by FOMEX; (2) the articles to be exported must have a minimum of 30 percent national content in direct production costs; (3) loans granted for pre-export must be in Mexican currency, while loans for export sales are established in U.S. dollars or any other foreign currency acceptable to the Bank of Mexico; and (4) the exporter must carry insurance against commercial risks to the extent of the loans. We found that the maximum annual interest rate that credit institutions may charge borrowers for FOMEX pre-export financing is 8 percent in Mexican pesos. The maximum annual interest rate for FOMEX export financing is 6 percent in the currency of the country of importation.

We verified the Mexican government's response that certain iron-metal construction castings firms had received pre-export financing or export financing from FOMEX. We verified that, in this case, export financing was provided at the maximum interest rate of 6 percent and pre-export financing at the maximum interest rate of 8 percent. We determined the receipt of pre-export and export financing through FOMEX to be countervailable as it constitutes a bounty or grant through the provision of loans for export purposes, at interest rates significantly less than the interest rates for commercially available loans.

We used as benchmarks for the commercial rate of interest in Mexico the national average commercial rate for comparable short-term peso or dollar-denominated loans, as applicable during January through September 1982. We have determined that during the first nine months of 1982, comparable peso loans were available at an average interest rate of 59.32 percent, and comparable dollar-denominated loans were available at an average interest rate of 21.16 percent. The peso rate and the dollar rate were determined from information supplied by the Department of the Treasury.

For those FOMEX loans obtained by manufacturers during the period January 1, 1982 to September 30, 1982, we computed the difference in interest rates between the FOMEX loans and that which would have been incurred had the loans been made at the benchmark commercial rates of interest. We allocated the amount of benefits for all pre-expert FOMEX loans over the value of total exports to the United States of the subject merchandise. We allocated the amount of benefit for FOMEX export financing loans to the United States for the merchandise under investigation exported over the value of such exports during the same period.

We determine the net amount of the benefit for loans granted for pre-exports to be 0.12 percent *ad valorem* and the net amount of benefit for export financing to be 2.43 percent *ad valorem*, for a total bounty or grant under the program of 2.55 percent *ad valorem*.

B. Fund for Industrial Development (FONEI).—FONEI is a specialized financial development fund, administered by the Bank of Mexico, which grants long-term preferential credit for the creation, expansion or modernization of enterprises in order to foster the efficient production of industrial goods, the production of goods capable of competing in the international market, and industrial decentralization.

We determine that FONEI confers a benefit which constitutes a bounty or grant within the meaning of the countervailing duty law upon the producers, manufacturers or exporters of iron-metal construction castings from Mexico. FONEI benefits are not generally available. The program provides preferential financing, at interest rates below prevailing commercial rates only for approved projects (i.e., those determined to meet the program's objectives).

Among FONEI's objectives is to promote industrial decentralization. FONEI funds are only available for projects located outside of Zone III, the area of controlled industrial growth (Mexico City, Guadalajara, and Monterrey). Promotion of relocation of an industry in order to avoid congestion and environmental problems constitutes a bounty or grant under U.S. law. We further note that this objective also is among the types of programs cited as domestic subsidies in Article 11.1 of the GATT Subsidies Code.

We verified the Mexican government's response that a manufacturer, producer, or exporter of the merchandise subject to this investigation did receive FONEI preferential financing. This loan was obtained in 1977 for a period of 7 years.

We used as our benchmark for the commercial rate of interest in Mexico, the national average commercial rate for comparable peso-denominated loans as applicable in 1977. We have used as best available information for this rate 15.25 percent which was obtained from the Diario official of July 1977.

We computed the difference in payment stream between the FONEI loan and that which would have been incurred had this loan been made at the benchmark commercial rate of interest. We allocated the amount of benefit of this loan ove all of the companies' total value of sales of all products during the period January 1, 1982 to September 30, 1982.

We determine that the net amount of the bounty or grant to be 0.17 percent *ad valorem*.

C. Guarantee and Development Fund for Medium and Small Industries (FOGAIN).—We determine that the Guarantee and Development Fund for Medium and Small Industries (FOGAIN) program confers a benefit which constitutes a bounty or grant within the meaning of the countervailing duty law upon the producers, manufacturers, or exporters of iron-metal construction castings from Mexico. The FOGAIN program provides preferential financing at interest rates below prevailing rates to small and medium sized businesses. This interest rate varies depending upon: (a) Whether a small or medium business has a designated priority status, and (b) the geographical location of the business. Small and medium businesses with priority designation, located within specific zones targeted for industrial growth, receive the most preferential rate. Medium sized businesses, not designated as priority and located within the area of controlled industrial growth, may receive the most adverse FOGAIN interest rate. We determine this program to be countervailable because of its provision of preferential financing based on the designations of certain industries as priority industries and based upon regional targeting indicated by the varying interest rates. We verified that the manufacturer, producer, or exporter of iron-metal construction castings listed in the Mexican response as having received financing through FOGAIN.

We used as our benchmark for the non preferential rate in Mexico the national average commercial rate for comparable peso-denominated loans as applicable in 1981. The manufacturer, producer, or exporter of iron-metal construction castings listed as having received FOGAIN financing obtained this financing in 1981. We have determined, as best available information, that in 1981, the comparable peso loans were available at an interest rate of 43.77 percent. This

rate was supplied by the Department of the Treasury.

We computed the difference in payment stream between FOGAIN loans and that which would have been incurred had the loans been made at the benchmark commercial rate of interest. We allocated the amount of benefit of the loans over all of the companies' total value of sales of all products during the period January 1, 1982 to September 30, 1982. We determine the net amount of the bounty or grant to be 0.13 percent *ad valorem*.

D. State Tax Incentive.—Petitioners allege that business entities may receive partial or total exemption from state taxes, or free or low-priced land incentives for establishing or expanding industry. We verified that only in one instance did an exporter of iron-metal construction castings receive a partial exemption of a state tax. This was a small percentage over the amount of each worker's wages. This exemption was granted to this firm as it is an exporter. Because this benefit is tied to the export performance of this producer, this confers a countervailable benefit. We calculated the amount resulting from the exemption given this firm and allocated the amount of the benefit over all of the companies' total exports of the subject merchandise to the United States during the period January 1, 1982 to September 30, 1982. We determine the net amount of the bounty or grant to be .0008 percent *ad valorem*.

E. Import Duty Reductions and Exemptions.—We determine that the program for import duty reductions or exemptions applicable to imported machinery, spare parts or tools into free zones on border areas would, to the extent utilized, confer a benefit constituting a bounty or grant upon the manufacturers, producers, or exporters of iron-metal construction castings. (See paragraph 3 of Annex 1 to the countervailing duty regulations). Since such import duty exemptions and reductions are contingent upon location in free zones or border areas, they provide bounties or grants for industries located in those zones. Because of the proximity of the manufacturers, producers, or exporters of iron-metal construction castings to the United States-Mexican border, we recognize the possibility of such importation. However, we have determined that the iron-metal construction castings industry in Mexico is primarily labor-intensive. Based upon our verification, the production facilities used in the manufacture of this product do not appear to have been imported. During the course of our verification, we did obtain some information that indicates the possibility that small amounts of tools may have been imported. We will review the applicability of this program in the annual reviews under section 751 of the Act.

II. Program Determined to Confer a Bounty or Grant But Not Applicable to the Investigation

Certificado de Promocion Fiscal (CEPROFI).—In 1979, the government of Mexico introduced a four-year National Industrial Development Plan (NIDP) which sets forth broad economic goals for the country. Tax credits, which are called CEPROFIs, are used to promote the NIDP goals, which include increased employment, the promotion of regional decentralization, and industrial development particularly of small and medium sized firms. CEPROFI certificates are non-transferable tax certificates of a set value which may be used for a five-year period to pay federal taxes.

One Mexican producer of the merchandise under investigation received a CEPROFI certificate during the period for which we are measuring subsidization. During the course of our verification, we determined that the receipt of this CEPROFI was based upon the production of a merchandise not subject to this investigation and a related increase in employment. Since the CEPROFI was provided for a product not under investigation, we determined that, while CEPROFI in previous cases has been determined countervailable, the company receiving this CEPROFI did not receive a benefit related to the merchandise under investigation.

III. Program Determined To Be Suspended

Certificado de Devolucion de Impuesto (CEDI).—The CEDI is a tax certificate issued by the government of Mexico in an amount equal to a percentage of the f.o.b. value of the exported merchandise or, if national insurance and transportation are used, a percentage of the c.i.f. value of the exported product. The Secretary of Commerce of Mexico is responsible for setting the CEDI rate, which is not published. Exporters are required to apply for each CEDI by providing to the Ministry of Commerce (SECOFIN) documentation with respect to each individual shipment of qualifying exports. SECOFIN processes the application and, on approval, instructs the Ministry of Treasury to issue the CEDIs in the amount specified. The CEDIs are non-transferable and may be applied against a wide range of various federal tax liabilities (including payroll taxes, value added taxes, federal income taxes, and import duties) over a period of five years from the date of issuance.

The government of Mexico suspended the eligibility of the products under investigation for CEDI tax rebates by an executive order published on August 25, 1982, in the *Diario Oficial de la Federacion* (Diario Oficial). The order abrogates prior executive orders which contained the lists of products eligible to receive CEDI certificates. Suspension of the eligibility to apply for the CEDI was effective one day after publication of the executive order in the *Diario Oficial*.

Although exporters of the merchandise under investigations received benefits under the CEDI program during the period for which we are measuring subsidization, the CEDIs ceased to be available after August 25, 1982. Because the exporters used the CEDI certificates on a current basis, the iron-metal construction castings that were accorded benefits under this program are not likely to enter the United States on or after the date of the suspension of liquidation of the merchandise.

Therefore, although the CEDI program is countervailable, we are not setting a cash deposit rate. If this program were to be reactivated, the Department will review its applicability in the annual reviews under section 751 of the Act.

Programs Determined Not To Confer Bounties or Grants

A. Government Control of Mexican Iron and Steel Industries.—Petitioners claim that all benefits or grants provided by the government to the iron and steel industry of Mexico confer a benefit to the iron-metal construction castings industry as the iron and steel industry may produce such castings or provide material input into the merchandise under investigation. We verified that the exporters of iron-metal construction castings are not related to Mexican iron and steel producing companies. We believe that benefits bestowed upon the manufacturer of an input, are not passed on to a purchaser if the sales are transacted at "arms length". In such a transaction, we believe it is reasonable to assume that the seller, for example a Mexican iron or steel producer, does not pass forward any benefits to an unrelated purchaser. Furthermore, in many instances, those companies which we verified purchased scrap iron inputs originating in the United States. Therefore, we determine that no bounty or grant was conferred upon iron-metal construction castings manufacturers.

producers, or exporters through government control of the Mexican iron and steel industry.

B. Dual Level Currency Exchange.—At verification, we determined that Mexican exporters who receive U.S. dollars for their products must deposit these dollars in accounts where they are exchanged for pesos at a "controlled" rate. Currently, the controlled rate is significantly less than the "free" rate of exchange.

According to public information, most imports are also purchased at the controlled rate, while others may be purchased at the "free" rate. Therefore, we determine and have verified that exporters of iron-metal construction castings do not benefit from the dual level currency exchange system. Depending upon the required import, they may even find themselves in a detrimental position as a result of the dual level currency exchange system.

C. Free Zone and In-Bond Assembly Programs.—Petitioners allege that 100 percent foreign-owned companies producing iron-metal construction castings located in the Mexican "free zones" of Baja California and Sonora may move merchandise, materials and equipment into and from these zones without the payment of import duties. Petitioners further allege that companies located outside the free zones and border area may temporarily import machinery, equipment, and materials without paying customs duties. We found none of the iron-metal construction castings firms verified by us to be foreign-owned. We did verify that certain firms producing and exporting iron-metal construction castings are located in Mexican "free zones" and that one company does perform in-bond processing. In the case of in-bond processing, the firm may import material duty-free under bond, but such material must be exported within a certain time limit or pay customs duty. In the case of exporters of the subject merchandise located in "free zones," permits must be obtained for any importations and payment must be made if the merchandise is sold into Mexico (See DOC position on Respondent's Comment 1).

D. Mexican Credit Insurance (COMESEC).—Petitioners allege that Mexican manufacturers receive through COMESEC commerical risk insurance at preferential rates for exports. COMESEC is a company founded by law and owned by private insurance companies. COMESEC provides export insurance. In conformity with the Department's previous determinations (47 FR 57632) *Final Affirmative Countervailing Duty Determinations and Countervailing Duty Orders: Toy Balloons (Including Punchballs) and Playballs from Mexico),* we determine that COMESEC does not provide a bounty or grant to manufacturers, producers, or exporters of the subject merchandise. In the previous case, it was verified that COMESEC experiences an operating profit on insurance activities.

Programs Determined Not To Be Used

A. Government-Financed Facilities.—Petitioners allege that government-financed facilities, including housing, developed to attract labor to the United States-Mexican border area provide a benefit to industries located in this area. The firms selected for on-site verification are located in the United States-Mexican border area. We verified that firms, regardless of the industry, must pay a certain percentage, based on an employee's wage into a government fund, a portion of which is allocated to government housing and other social services.

Such housing and services are provided through a national program. They are not provided specifically for the iron-metal construction castings industry, nor are they provided for any specific region. Based on our verification, we found that manufacturers, producers, or exporters do not participate in any government program providing government-financed facilities which could be construed to be a bounty or grant.

B. Mexican Institute for Foreign Trade (IMCE).—Created by law published December 31, 1970 in the Diario Official, IMCE has as its organizational purpose the promotion of the foreign trade of Mexico and the coordination of efforts stimulating foreign trade. In addition, IMCE functions as an advisory board in the previously mentioned matters. IMCE has a number of functions which include organizing and directing trade fairs abroad, promoting the visits of foreign trade missions to Mexico, carrying out investigations to identify national products or services which could be in demand abroad, and providing exporters with technical assistance. We verified the Mexican government's response that none of the companies exporting the merchandise under investigation used any of the services offered by IMCE. The IMCE Mexico City office provided us with certification that none of the manufacturers, producers, or exporters of the subject merchandise received IMCE services and that one foundry, a non-exporter, requested information from IMCE regarding merchandise not subject to this investigation.

C. Trust for Industrial Parks, Cities, and Commerical Centers (FIDEIN).—Operating under the Nacional Financiera, this program is aimed at the development of industrial parks an cities. We verified the Mexican government's response that none of the companies exporting the merchandise under investigation were eligible for any benefits relating to being located in industrial parks. We verified that manufacturers, producers, or exporters of iron-metal construction castings are not located in industrial parks.

D. National Preinvestment Fund for Studies and Projects (FONEP).—FONEP is a trust administered by the Nacional Financiera. Its primary objective is to assist firms to invest in economic feasibility studies.

Petitioners allege that FONEP is one of the specialized programs through which the Mexican government assists the manufacturers, producers and exporters of iron-metal construction castings in the production of exports and in the promotion of exports. We verified the Mexican government response on FONEP that none of the companies exporting the merchandise under investigation used any services offered by FONEP.

E. Favorable Tax Treatment.—Petitioners allege that some Mexican industries, such as the construction industry, receive special incentives specifically favorable tax treatment in the form of special rates or tax filing procedures. We verified the Mexican government's response that iron-metal construction castings manufacturers, producers, or exporters do not receive any special treatment regarding favorable methods of taxation, such as special rates or filing procedures.

F. Discounts on Industrial Energy and Basic Petrochemicals.—Petitioners allege that firms constructing new industrial installations may have benefited from discounts on industrial energy and basic petrochemicals. We verified that the manufacturers, producers or exporters of the subject merchandise did not receive discounts on basic petrochemicals or industrial energy supplies.

G. Fondo Nacional de Fomento Industrial (FOMIN).—Petitioner allege that FOMIN provides producers, manufacturers, or exporters of the subject merchandise with a bounty or grant. FOMIN operates as a trust fund, providing funding to certain companies through either stock acquisition or the provision of convertible loans at rates below those of commercial lending institutions. We verified the Mexican government's response that

manufacturers, producers, or exporters of the subject merchandise do not receive benefits through FOMIN.

Petitioner's Comments

Comment 1: The establishment of foreign exchange controls provides a subsidy to Mexican manufacturers in the form of preferential exchange rates.

DOC Position: It is the DOC's understanding that Mexican companies which export to the United States and receive payment in U.S. dollars must place those dollars in accounts where they are exchanged into pesos at the "controlled" rate which is significantly less than the "free" rate of exchange. This exchange rate system became operational at the end of 1982. It is our understanding that firms requiring U.S. imports can purchase most imports at the controlled market rate. Some imports, however, must be purchased at the free market rate. Given the required purchase of pesos at the controlled rate with dollars from exports, this dual level currency exchange system cannot be considered countervailable. At best, the dual currency exchange system would not be beneficial to exporters as it places certain restrictions on their use of foreign exchange. At worst, the dual currency exchange system could prove detrimental to exporters should they find it necessary to purchase any imports at the free rate.

Comment 2: The rescheduling of foreign debts constitutes a subsidy by providing a benefit through the postponement, delay or rescheduling of such debts.

DOC Position: The fact that the Mexican Government rescheduled official financial obligations is not relevant for purposes of the countervailing duty law. Only the preferential rescheduling of private debt could give rise to a bounty or grant.

Comment 3: The FOMEX program falls within the category of a countervailable subsidy.

DOC Position: We agree. FOMEX Loans have been found to be countervailable by the DOC, in other investigations, and benefits have been calculated on the basis of commercially available rates. Although those companies which received FOMEX loans in the past have stated they will not reapply for such loans, this program is still operational and still available to those who have received benefits from it during the period. Unlike CEDI, it has not been suspended and, unlike certain other programs, it was used by certain firms in the period for which we are measuring subsidization. Therefore, we have determined that FOMEX loans are countervailable in this case.

Comment 4: Discounts on industrial energy supplies available to firms which are located in certain geographic regions and which produce export items are countervailable.

DOC Position: During the course of our verification at the government and at the company level, we determined that the manufacturers, producers, or exporters as listed in the Mexican government's response did not receive such discounts.

Comment 5: The CEDI program has been determined to be countervailable and, if reactivated, it would form part of any future review.

DOC Position: The CEDI program as it existed in the past was found to be countervailable by the Department in previous investigations. On August 25, 1982, we were notified by the government of Mexico that the CEDI program was suspended for all products. Should CEDI be reactivated either in its past form or in some modified form, it would become the object of reviews under section 751 of the Act.

Respondent's Comments

Comment 1: Mexico does not provide an import duty reduction for raw materials or equipment used in the iron-metal construction castings. Further, the free trade zones of Baja California, and Sonora, along with the in-bond processing practice, are not countervailable.

DOC Position: The Department's regulations (paragraph 3, annex 1 of 19 CFR Part 355) provide that the nonexcessive drawback, rebate or remission of duties on imported items physically incorporated in the final product is not a subsidy, but that the drawback, rebate or remission of duties on imported capital goods or items not physically incorporated (e.g. capital equipment) is a subsidy. For further information see section I–E.

Comment 2: The Mexican government does not provide benefits to exporters of iron-metal castings in the form of government housing provided specifically for that industry.

DOC Position: During the course of our verification, we determined that business entities must pay a certain percentage of an employee's wage to the government for the purpose of contributing to a social service fund which provides reasonable cost housing. Such housing is generally available, and it is the individual's decision as to whether to apply for government housing. Therefore, we determine that this practice does not provide a benefit which would confer a bounty or grant upon the manufacturers, producers, or exporters of iron-metal construction castings.

Comment 3: Loans offered by the government of Mexico under the FONEI program are not countervailable domestic bounties or grants.

DOC Position: FONEI loans are not available to industries located in the areas of controlled industrial growth that is, Mexico City, Monterrey, and Guadalajara. FONEI loans are regionally targeted inasmuch as they are not available to industries located in all parts of Mexico. Therefore, we determine that FONEI loans do provide a benefit which confers a bounty or grant upon the recipients.

Comment 4: FOGAIN does not constitute a countervailable domestic subsidy.

DOC Position: FOGAIN provides preferential financing to small and medium sized businesses. The FOGAIN interest rate varies based upon the type of industry receiving the loan and the location of the business entity. We determine that the FOGAIN program provides a benefit which constitutes a bounty or grant as it provides preferential financing based upon priority designation and upon geographical location.

Comment 5: The Department should establish zero rates for those firms which requested such rates and indicated they had not applied for nor had they received benefits during the period for which we are measuring subsidization. The Department should also establish zero rates for those companies which, even though they received benefits conferring bounties or grants during the period for which we are measuring subsidization, have stated they will not apply for or receive such benefits in the future.

DOC Position: In accordance with our procedures, we generally establish a country-wide rate for each of those programs which we determine to be countervailable and for which we calculated a net bounty or grant. It has been a long-standing practice of the Department to set country-wide rates except in exceptional circumstances not present here. In this case, the requests for zero-rate treatment were not submitted in a timely or adequate fashion. We are therefore not accepting these certifications.

The firms which received benefits constituting bounties or grants but stated they would not do so in the future did, under the Act, have the opportunity to participate in entering into a suspension agreement whereby their activities with regard to these bounties or grants could be monitored by the

Department. These firms did receive benefits during the period for which we are measuring subsidization, therefore, we have found those benefits to be countervailable.

Verification

In accordance with section 776(a) of the Act, we verified the data used in making our final determination. During this verification, we followed normal procedures, including inspection of manufacturers' operations and records.

Administrative Procedures

The Department has afforded interested parties an opportunity to present oral views in accordance with its regulations (19 CFR 355.34(a)). Oral and written views have been received and considered.

The suspension of liquidation ordered in our preliminary affirmative determination shall remain in effect until further notice. The net bounty or grant is 2.85 percent *ad valorem*. As required by section 706(a)(3), we are directing the United States Customs Service to require a cash deposit in the amount indicated above for each entry of the subject merchandise entered or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the Federal Register, and to assess countervailing duties in accordance with sections 706(a)(1) and 751 of the Act. The net amount of bounties or grants is smaller than the 40.53 percent *ad valorem* bounty or grant preliminarily determined. Section 707 of the Act provides that the difference between the deposit of an estimated countervailing duty and the final assessed duty under a countervailing duty order shall be refunded for entries of merchandise entered, or withdrawn from warehouse, for consumption prior to the date of publication of this notice.

The Department intends to conduct administrative reviews within 12 months of publication of this determination as provided in section 751 of the Act.

This notice is published pursuant to sections 303 and 780 of the Act (19 U.S.C. 1303, 1671e).

Dated: February 17, 1983.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

BILLING CODE 3510-25-M

Frozen Concentrated Orange Juice from Brazil; Suspension of Investigation

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of suspension of investigation.

SUMMARY: The Department of Commerce has decided to suspend the countervailing duty investigation involving frozen concentrated orange juice from Brazil. The basis for the suspension is an agreement by the government of Brazil to offset with an export tax all benefits which we find to be subsidies on frozen concentrated orange juice exported to the United States.

EFFECTIVE DATE: March 2, 1983.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 377-3003.

SUPPLEMENTARY INFORMATION:

Case History

On July 14, 1982, we received a petition from Florida Citrus Mutual, filed on behalf of the U.S. growers of oranges for processing into frozen concentrated orange juice. The petition alleged that certain benefits which constitute subsidies within the meaning of section 701 of the Act are being provided, directly or indirectly, to the manufacturers, producers, or exporters in Brazil of frozen concentrated orange juice.

We found the petition to contain sufficient grounds upon which to initiate a countervailing duty investigation, and on August 2, 1982, we initiated a countervailing duty investigation (47 FR 37172). We stated that we expected to issue a preliminary determination by October 7, 1982. We subsequently determined that the investigation is "extraordinarily complicated," as defined in section 703(c) of the Act, and postponed our preliminary determination for 65 days until December 13, 1982 (47 FR 49698).

Since Brazil is a "country under the Agreement" within the meaning of section 701(b) of the Act, an injury determination is required for this investigation. Therefore, we notified the U.S. International Trade Commission (ITC) of our initiation. On September 9, 1982, the ITC preliminarily determined that there is a reasonable indication that these imports are materially injuring, or threatening to materially injure, a U.S. industry (47 FR 39740).

We presented a questionnaire concerning the allegations to the government of Brazil in Washington, D.C. On December 1, 1982, we received the response to that questionnaire.

On December 13, 1982, we issued our preliminary determination in this investigation (47 FR 56525). We stated in our preliminary determination that the government of Brazil was providing its manufacturers, producers, or exporters of frozen concentrated orange juice with benefits that constitute subsidies. The programs preliminarily determined to bestow subsidies were:

- Preferential working capital financing for exports.
- Income tax exemption for export earnings.

On January 25, 1983, the Department initialed a proposed agreement to suspend the countervailing duty investigation involving frozen concentrated orange juice from Brazil. The basis for the proposed agreement was that the government of Brazil would offset by an export tax the entire amount of benefits we found to confer subsidies on frozen concentrated orange juice exported to the United States.

In compliance with the procedural requirements of section 704(e) of the Act, we discussed with the parties to the proceeding the proposed agreement and provided them a copy of the proposed agreement.

Scope of Investigation

The product covered by this investigation is frozen concentrated orange juice as currently provided for in item 165.35 of the *Tariff Schedules of the United States*.

There are nine known producers and exporters in Brazil of frozen concentrated orange juice to the United States. We have received information from the government of Brazil regarding three of these companies, Cargill Industrial Ltda. (CARGILL), Citrosuco Paulista S.A. (CITROSUCO) and Succocitrico Cutrale S.A. (CUTRALE), which represented over 85 percent of exports of this product to the United States during a recent, representative period—calendar year 1981.

The period for which we are measuring subsidization is that fiscal year for each company which most closely corresponds to calendar year 1981. That period is March 1, 1981 to February 28, 1982 for CARGILL; and May 1, 1981 to April 30, 1982 for CITROSUCO and CUTRALE. We have referred to these periods as fiscal year 1981 in this notice.

Changes Since the Preliminary Determination

Preferential Working Capital Financing for Exports: Resolution 674

On February 11, 1983, the government of Brazil notified the Department that the Banco do Brasil rate for discounting accounts receivable had increased from 59.6 percent to 72 percent effective January 3, 1983. In addition, effective January 11, 1983, the tax on financial transactions was reduced from 6.9 percent to 4.6 percent. These changes result in a subsidy rate differential of 32.6 percent rather than 22.5 percent as stated in the preliminary determination with respect to frozen concentrated orange juice. Consequently, since the rate established for purposes of the suspension is prospective, we will use 32.6 percent as the applicable differential in determining the subsidy rate from this program.

Petitioner's Comments

The Department has consulted with the petitioner, and has received no comments from them concerning the proposed suspension agreement. However, we did receive comments from the petitioner with respect to our preliminary determination.

Comment 1

The petitioner disagrees with the methodologies employed by the Department in the determination of the net subsidy stemming from the preferential working capital financing program. The petitioner alleges that access to preferential short-term financing has significantly enhanced the long-term market position of the Brazilian exporters of frozen concentrated orange juice. They argue that because of these alleged long-term benefits, the Department should equate the benefits received under this program to capital benefits and calculate the subsidy rate in a manner similar to that used to calculate the net subsidy for preferential long-term loans or capital grants. They suggest that rather than allocate the benefits of this program only to exports in the year in which such financing was received, the Department should employ a present value methodology to allocate to the review period benefits of financing received "during the past five years." They do not suggest, however, a period of time over which financing should be allocated.

Further, the petitioner argues that the benchmark used by the Department in determining the net subsidy for this program was incorrect. The petitioner argues that the Department should compound the monthly or quarterly rate for discounting accounts receivable in order to establish an effective annual rate as a comparable benchmark for financing received under this program. In addition, they argue that the department failed to account for alleged compensating balances on these short-term loans (although illegal in Brazil).

DOC Position

The Department has in previous cases used a present value methodology to calculate the benefits stemming from long-term loans in order to match the flow of benefits more directly to the production of goods under investigation. In such instances the benefits were either allocated over the life of the loan or over the average useful life of the asset(s) purchased with the loan(s). The loans which were received by the processors of frozen concentrated orange juice under the preferential working capital financing program had a duration of less than one year and, by their nature, were not tied to assets. Likewise, the loans did not have any of the characteristics of capital grants; the amounts received are repayable and they are not tied to assets.

Therefore, the Department believes that it is inappropriate to determine the value of the benefits of this program using the present value of a cumulation of short-term loans as if they had long-term benefits for which the financial markets ordinarily account in the structure of interest rates based on maturity of instruments.

The conceptual basis for the Department's calculations of the amount of the subsidy is based on the following: (1) That the sale of an account receivable constitutes the purchase of an asset by a bank, in which the bank absorbs the risk of non-payment; (2) that once the sale is completed, the seller has no further obligation (such as repayment with interest) to the bank; and (3) that a series of sales of accounts receivable is not equivalent to rolling over a loan where interest on the original loan is compounded. As a result, the discount rate we have used is a simple rate and additive.

If the sale of an account receivable does in fact have more the character of a loan than the sale of an asset, we may have to reassess our position. We will investigate this matter further in the course of montoring the agreement and make any necessary adjustments in the calculation of the interest differential and net subsidy.

Concerning the argument that the Department has not accounted for compensating balances when determining the net subsidy stemming from this program, we have found no evidence of compensating balances in company records. The only deductions from the value of the receivables noted during verification were the discount, the tax on financial transactions and a commission on the transactions.

Respondent's Comments

Comment 1

The respondent argues that the benefits from preferential working capital financing are realized by a borrower at the time the cost of a loan is paid. Consequently, they argue that the Department should calculate the net subsidy based upon the date of repayment of such loans rather than to prorate the benefit throughout the duration of the loans.

DOC Position

In the notice of final results of administrative review of the countervailing duty order on certain scissors and shears from Brazil (47 FR 10266), we noted that the government of Brazil argued for the allocation of the benefits from these loans throughout the duration of the loans rather than to assign them to the period in which the loan was received. The government stated that the method of assigning the entire benefit to the period in which the loan was received did not fully allow for factors, such as increased or decreased exports from one period to another, factors, which affect the *ad valorem* value of the benefit. We agreed with the government of Brazil's argument and prorated the benefits throughout the duration of the loan. At that time we stated that when each year there is a substantial growth in the value of exports over the previous year, the allocation of the whole loan to the period in which it was received can create a distortion and overstate the value of the benefit. Likewise, in similar circumstances, the allocation of the whole loan to the period in which it is repaid can understate the value of the benefit. Therefore, we have not changed the methodology as stated in the preliminary determination.

Comment 2

The respondent argues that the benefit from the income tax exemption for export earnings should be reduced by 26 percent, the amount of taxes which corporate taxpayers may direct into certain investment funds. The corporations then receive stock for their investment. Respondent claims that had the companies subject to the investigation paid additional taxes, absent the income tax exemption program, they would have elected to

direct 26 percent of such taxes to the investment funds.

DOC Position

It is speculative to assume that the concerned companies would take part in a voluntary investment program. Moreover, the fact that the government of Brazil administers two programs exempting taxes on earnings under differing terms and conditions does not argue that the amount of the countervailable benefit under the export program should be adjusted. Consequently, the Department believes that the proper basis for calculating the benefit from this program is 100 percent of the amount of taxes saved by the companies which participated in it.

Comment 3

The respondent argues that the Department should offset the amount of any subsidies from countervailable programs by the amount of an export tax paid on the export of frozen concentrated orange juice and by the amount of a government imposed increase in the price which exporters of frozen concentrated orange juice must pay for oranges.

During the period for which we are measuring subsidization, exporters paid a 10 percent tax upon exportation of frozen concentrated orange juice. In June 1982 the government also established minimum prices which purchasers must pay for oranges. In conjunction with the establishment of those minimum prices, the export tax was reduced to one percent, the rate currently in effect. They state that processors of frozen concentrated orange juice are contractually bound "to comply with the current system for the foreign sale of frozen concentrated orange juice and to the terms that make up the (strandard) agreement for setting supply prices of raw material (fruit)" in order to obtain export licenses and any financial incentives from exporting the product under investigation. Therefore, they argue that the Department should allow offsets for the export tax and the minimum price for oranges under section 771(6)(A) as application fees, deposits, or similar payments paid in order to qualify for or to recieve the subsidy.

The respondent also cites two other conditions to which a company must agree in order to obtain export licenses, namely, export quotas and minimum export prices. All of these conditions, the export tax, minimum price for raw materials, export quotas and minimum export prices are part of a policy of "diversification" by which the government of Brazil controls the exportation of certain products such as frozen concentrated orange juice, coffee, cocoa, sugar and other items.

The respondent also suggests that the Department should allow offsets for a three percent "excise equalization tax" imposed by the State of Florida and for duties paid to the United States government upon importation of frozen concentrated orange juice.

DOC Position

The government of Brazil has used certain mechanisms in its policy of diversification to restrain the exportation of certain agricultural commodities. The restraints on frozen concentrated orange juuce were imposed in 1979 and have varied widely in their application since then, apparently in reaction to differing market conditions. The purpose of such restraints counters the purpose of export incentives, to expand trade. That they are imposed suggests that any financial "burdens" which result from these restraints serve another purpose than to act as applications or fees to qualify for export incentives.

The policies of restraint and expansion not only differ in purpose but also in operation. As has been noted, the restraints have varied substantially since their inception. Such controls can be further modified in nature (currently a mixture of monetary and quantitative controls), in the extent of their application, or even as to their existence. Such modifications are related to market conditions rather than to qualification for export incentives. As has been shown in previous countervailing duty investigations involving Brazilian products for which no such controls exist, the working capital financing and the income tax exemption for export earnings programs have operated independently of these controls, without any application fees or other payments which allegedly stem from such controls. The controls exist as basic conditions under which the frozen concentrated orange juice may be exported, regardless of the participation, or extent of participation of the exporters of frozen concentrated orange juice in any financial incentive program. As such, the Department considers any cost resulting from these controls to be in the nature of a general expense borne by the exporter, rather than an application fee, deposit or similar payment paid to qualify for, or to receive, the benefit of any specific subsidy program. Therefore, we have not offset the gross subsidy amount of any countervailible program by the costs of these controls. Concerning the export tax imposed under these controls, we are indifferent as to the amount (or existence) of such a tax as it relates to the export tax to be established under the terms of the suspension as long as the latter is sufficient to offset completely the amount of the net subsidy determined by the Department to exist with respect to the subject product. In addition, the Department does not consider taxes imposed by the state of Florida and customs duties imposed by the U.S. Government to constitute offsets under the Act.

Suspension of Investigation

The Department consulted with the petitioner with respect to the proposed suspension agreement. We have determined that the agreement will offset the subsidies completely with respect to the subject merchandise exported directly or indirectly to the United States, that the agreement can be monitored effectively, and that the agreement is in the public interest. Therefore, we find that the criteria for suspension of an investigation pursuant to section 704 of the Act have been met. The terms and conditions of the agreement, signed February 24, 1983, are set forth in Annex 1 to this notice. Pursuant to section 704(f)(2)(A) of the Act, the suspension of liquidation of all entries, entered or withdrawn from warehouse, for consumption of frozen concentrated orange juice from Brazil effective November 19, 1982, as directed in our notice of "Preliminary Affirmative Countervailing Duty Determination, Frozen Concentrated Orange Juice from Brazil," is hereby terminated.

Any cash deposits on entries of frozen concentrated orange juice from Brazil pursuant to that suspension of liquidation shall be refunded and any bonds shall be released.

The Department intends to conduct an administrative review within 12 months of the anniversary date of publication of this suspension as provided in section 751 of the Act.

Notwithstanding the suspension agreement, the Department will continue the investigation if we receive such a request in accordance with section 704(g) of the Act within 20 days after the date of publication of this notice.

This notice is published pursuant to section 740(f)(1)(A) of the Act.

Dated: February 24, 1983.

Judith H. Bello,

Acting Deputy Assistant Secretary for Import Administration.

Annex I—Suspension Agreement; Frozen Concentrated Orange Juice

Pursuant to section 704 of the Tariff Act of 1930, as amended (the Act), and section

355.31 of the Commerce Regulations, the United States Department of Commerce (the Department) and the government of Brazil enter into the following suspension agreement (the agreement) on the basis of which the Department shall suspend its countervailing duty investigation initiated on August 2, 1982 (47 FR 37172) with respect to frozen concentrated orange juice from Brazil. The agreement shall be in accordance with the terms and provisions set forth below.

A. Scope of the Agreement

The agreement applies to frozen concentrated orange juice manufactured in Brazil and exported, directly or indirectly, from Brazil to the United States (hereinafter referred to as the "subject product"), as currently provided for in item 165.35 of the *Tariff Schedules of the United States*.

B. Basis of the Agreement

1. The government of Brazil hereby agrees to offset completely the amount of the net subsidy determined by the Department in this proceeding to exist with respect to the subject product. The offset shall be accomplished by an export tax applicable to the subject product exported on or after April 30, 1983. The export tax shall offset completely any benefits found to exist with respect to the following programs:

(a) Preferential working capital financing for exports.

(b) Income tax exemption for export earnings.

(c) Any other program subsequently determined by the Department to constitute a subsidy under the Act to the subject product.

The Department shall officially notify the government of Brazil of any determination made with respect to items (a) through (c) above.

2. The government of Brazil certifies that no new or equivalent benefits shall be granted on the subject product as a substitute for any benefits offset by the agreement.

3. The offset of these benefits does not constitute an admission by the government of Brazil that such benefits are subsidies within the meaning of the U.S. countervailing duty law.

4. The government of Brazil agrees that from the effective date of the suspension of the investigation and until the imposition of an export tax no later than April 30, 1983 that completely offsets the net subsidy determined by the Department to exist, the rate of exports of the subject product will not exceed the average monthly rate of exports to the United States in the period June 1981–May 1982. Exports in excess of this quantity will constitute a violation of the agreement pursuant to section 704(i) of the Act.

C. Monitoring of the Agreement

1. The government of Brazil agrees to supply to the Department documentation concerning the method and time of payment of the export tax and other information the Department deems necessary to demonstrate that it is in full compliance with the agreement.

2. The government of Brazil shall notify the Department if any exporters of the subject product which benefit from the programs described in paragraph B.1 regarding the manufacture, production or export of the subject product transship the subject product through third countries to the United States.

3. The government of Brazil shall certify to the Department within 15 days after the first day of each three-month period beginning on July 1, 1983 whether it continues to be in compliance with the agreement by offsetting completely the net subsidy referred to in paragraph B.1 and whether it has substituted any new or equivalent benefits for the benefits offset by the agreement. The first certification shall include the period April 30, 1983—June 30, 1983. Failure to supply such information or certification in a timely fashion may result in the immediate resumption of the investigation or issuance of a countervailing duty order.

4. The government of Brazil shall permit such verification and data collection as is requested by the Department in order to monitor the agreement. The Department will request such information and perform such verification periodically pursuant to administrative reviews conducted under section 751 of the Act.

5. The government of Brazil shall promptly notify the Department, with appropriate documentation, of any change in the amount of benefits to the subject product, of any change in the rate of the export tax, or if it decides to alter or terminate its obligations with respect to any of the terms of the agreement.

D. Violation of the Agreement

If the Department determines that the agreement is being or has been violated or no longer meets the requirements of section 704(b) or (d) of the Act, then section 704(i) shall apply.

E. Effective Date

The effective date of the agreement is the date of publication.

Signed on this 24th day of February 1983 for the Government of Brazil.

José Alfredo Graça Lima,

First Secretary of the Brazilian Embassy.

I have determined that the provisions of paragraph B completely offset the subsidies that the government of Brazil is providing with respect to frozen concentrated orange juice exported directly or indirectly from Brazil to the United States and that the provisions of paragraph C ensure that this agreement can be monitored effectively pursuant to section 704(d) of the Act. Furthermore, I have determined that the agreement meets the requirements of section 704(b) of the Act and suspension of the investigation is in the public interest.

Department of Commerce.

Judity H. Bello,

Acting Deputy Assistant Secretary for Import Administration.

[FR Doc. 83-5355 Filed 3-1-83; 8:45 am]

BILLING CODE 3510-DS-M

Investigation of Imports of Bolts, Nuts and Large Screws of Iron or Steel

AGENCY: Office of Industrial Resource Administration, International Trade Administration, Commerce.

ACTION: Notice of the completion of the investigation under Section 232 of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862) to determine the effects on the national security of imports of bolts, nuts and large screws of iron or steel.

SUMMARY: An investigation was conducted under Section 232 of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862), to determine the effects on the national security of imports of bolts, nuts and large screws of iron or steel (excluding mine roof bolts but including lag screws and bolts). It was found that bolts, nuts and large screws of iron or steel are not being imported into the United States in such quantities or under such circumstances as to threaten to impair the national security. Accordingly, no action to adjust imports was recommended. A final report was sent to the President by the Secretary of Commerce on February 10, 1983. The Department of Defense concurred in this finding.

Background

On February 11, 1982, the Secretary of Defense requested that the Secretary of Commerce conduct an investigation to determine the effects on the national security of imports of nuts, bolts and large screws of iron or steel (excluding mine roof bolts, but including lag screws and bolts). The petition was accepted and a notice was published in the **Federal Register**, 47 FR 13540, March 31, 1982, advising the public that an investigation was being conducted under the authority of Section 232, of the Trade Expansion Act of 1962, as amended. Interested parties were invited to submit written comments.

In his petition, the Secretary of Defense stated that, ". . . data indicates that a significant shortfall in our industrial capability as related to national defense needs existed in 1977. The situation probably has worsened since that time because our mobilization requirements have increased (over 6 percent), and the output of the domestic industrial base has not improved."

The investigation was undertaken in accordance with International Trade Administration Regulation 15 C.F.R. Part 350, "Effect of Imported Articles on the National Security."

Public Comments

Six comments were received pertaining to this investigation. Commenters recognized the malaise suffered by the domestic industry; two commenters attributed the industry's problems to imports. The remaining blamed general economic conditions. The Industrial Fastener Institute, the industry's trade association, stated that survival of the U.S. fastener industry is important to the national security.

The public record concerning this investigation, including the Secretary's report to the President, will be maintained in the International Trade Administration's Freedom of Information Records Inspection facility, Room 4102 (202–377–3031), U.S. Department of Commerce, 14th and Pennsylvania Avenue, NW., Washington, D.C. 20230. Copies of entire report are also available in Room 3875, U.S. Department of Commerce, 14th and Pennsylvania Avenue, NW., Washington, D.C. 20230.

The Executive Summary of the report of the investigation follows.

Executive Summary

The Department of Commerce initiated this investigation to determine the effect on the national security of imports of nuts, bolts and large screws of iron or steel (excluding mine roof bolts, but including lag screws and bolts) under the authority of Section 232 of the Trade Expansion Act of 1962, as amended (19 USC 1862), as the result of a February 11, 1982, request from the Secretary of Defense.

After assessing relevant data as required by the statute, we have concluded that the nuts, bolts and large screws of iron or steel investigated here are not being imported into the U.S. in such quantities or under such circumstances as to threaten to impair our national security. During a mobilization imports of fasteners would be reliable, would comprise an important part of our required supply of industrial fasteners and would augment our domestic production. The decline in productive capacity in the U.S. industrial fastener industry, consequently, does not pose a threat to our national security. The industry's difficulties are due not only to import penetration, but also to general economic conditions, and the general economic recovery can be expected to help the industry significantly.

This investigation concerned imports of the following industrial fastener categories as defined by the Tariff Schedules of the United States (TSUS):

Item No.

646.4920 Lag screws or bolts (of iron or steel)
646.5400 Bolts and bolts and their nuts imported in the same shipment (of iron or steel)
646.5600 Nuts (of iron or steel)
646.6320 Cap screws (of iron or steel) having shanks or threads over 0.24 inch in diameter
646.6340 Other screws with shanks or threads over 0.24 inch in diameter (of iron or steel)

Nuts, bolts and large screws or iron or steel, commonly called industrial fasteners, are mechanical devices designed specifically to hold, join, couple or assemble multiple components. Most U.S. industries require such fasteners. Leading users of nuts, bolts and large screws include the automobile, construction, industrial equipment and home appliance industries.

The Department of Commerce regulations governing Section 232 mandate certain criteria for determining the effects of imports on the national security including:

(1) Requirements of the direct defense, indirect defense and civilian sectors of the national economy;

(2) domestic production needed for projected national defense needs;

(3) capacity of domestic industries to meet projected national defense needs;

(4) existing and anticipated availability of labor (skilled and unskilled), raw materials, production equipment and facilities, and other supplies and services essential to the national defense;

(5) growth requirements of domestic industries to meet national defense requirements;

(6) quantity, quality and availability of imports;

(7) impact of foreign competition on the economic welfare of any essential domestic industry;

(8) serious effects of imports on the possible displacement of domestic products, unemployment, decrease in revenues to the government, loss of investments, loss of specialized skills and loss of productive capacity;

(9) any other relevant factors that may weaken the national economy; and

(10) other factors relevant to the national security in light of any unique circumstances associated with each case.

In order to determine if imports of nuts, bolts, and large screws of iron or steel are threatening the national security, the investigation began by determining the U.S. national security requirements (direct defense, indirect defense, and civilian) for such items. Identification of requirements was based upon the guidance in National Security Directive 47 which states that maintenance of the capacity to mobilize resources efficiently and effectively in the event of a national emergency is of fundamental importance to U.S. national security. The directive further states that the broadly defined crisis scenarios are to serve as the principal basis for mobilization planning.

We determined that this investigation could most appropriately be conducted using the scenario developed for National Defense Stockpile planning. Therefore, requirements calculations were made under the assumed emergency conditions it contains.

The Department of Defense (DOD) provided the Federal Emergency Management Agency (FEMA) with defense mobilization expenditure levels based on that scenario, from which FEMA derived direct defense and indirect defense production requirements of fasteners. FEMA calculated civilian production requirements for fasteners based on the defense requirements mentioned above taking into account austerity in consumption patterns and other pertinent considerations and assumptions.

With requirements defined, the next step was to examine the possible sources for meeting them: 1) Domestic production and 2) reliable imports.

Approximately 100 companies produce nuts, bolts and large screws in the U.S. Original equipment manufacturers (OEMs), *i.e.*, manufacturers of major consumer end-products and industrial equipment, predominantly automotive and machinery manufacturers, receive the bulk of the fastener shipments. Distributors purchase the remainder. Business in the fastener industry is cyclical, closely tied to demand for manufacturing and consumer durables. When the economy is good and demand for durables is high, the fastener industry flourishes. When the economy turns down and demand for durables shrinks, the fastener industry suffers. The industry is currently in a cyclical downturn.

Poor market condidtions have forced various U.S. fastener manufacturers to either alter their product mix, consolidate with other companies, spin off unprofitable operations or go out of business. In general, import penetration has led firms to either eliminate or reduce their production of smaller diameter standard fasteners, and to

concentrate their manufacture on more specilized fasteners.

The data collected show that during mobilization, while current domestic production capacity can meet defense requirements, additional supply wouuld be required to meet civilian needs. The shortfall could be reduced in the following ways: 1) surge in domestic production, 2) reliable imports, or 3) a combination of the two.

Historically, the fastener industry has been able to surge its production in times of high demand such as World War II (when it nearly doubled), the Korean conflict and the Vietnam involvement. Lack of skilled labor could be a major constraint to expanding the industry during a mobilization. However, there is evidence that one of the principal reasons the industry has been able to surge in the past is due to the practice of labor hoarding, in which industry finds it more cost effective, even in times of declining demand, to retain its skilled labor force rather than to institute layoffs and train new workers later when demand increases again. Therefore, although the Department of Labor reports that proficiency in skilled workers requires three to eight years to attain, industry analysis indicates that in surge times, labor increases have been comprised largely of unskilled or semi-skilled people (requiring some on-the-job training) who augment the skilled labor pool.

The number of workers in the fastener industry has fallen steadily for the last three years: 23 percent fewer workers were employed in 1982 than in 1979. The decline is not wholly due to imports, but to general sluggishness of the economy. Numerous investigations conducted by the Department of Labor from 1976 to 1981 under the Trade Adjustment Assistance Program, found that 51.6 percent of the laid-off workers had been affected adversely by imports.

During a mobilization one could assume that with the addition of sufficient skilled workers and semi or unskilled workers, with some on-the-job-training, production could be brought up to its maximum capacity. The addition of more machinery and plant space could increase production somewhat, although availability of skilled labor would remain a limiting factor.

Expansion in the fastener industry has been hampered by high interest rates and restructuring to meet import competition. A high proportion of currently idle machinery is over 15 years old. A large amount of used machinery is inventoried in the free world; hence, there exists an active used equipment market.

Sufficient new machinery with technically up-to-date automated controls can be built in the U.S. by several firms to increase domestic production capacity by just under one-third during the mobilization year and by approximately one-third to two-thirds during subsequent years. Similar machinery could be produced in Japan, Germany, Italy and other countries. Production machinery and fasteners cold be shipped to the U.S. during the mobilization year when no shipping losses are anticipated.

The relationship of imports to the shortfall was studied to determine if imports are casual to the shortfall of domestic production compared to requirements. This assessment of imports included an analysis of the 13½-year trend (1969–June 1982) of producer shipments, domestic production, imports, consumption, domestic production capacity, domestic capacity utilization, and the reported price differentials between domestic and imported products. Market penetration by imported products was studied by ploting the ratio of imports to apparent consumption over the 13½-year period.

Imports, although currently down in absolute terms, have increased as a share of the domestic market, from 21 percent of apparent consumption in 1969 to 53.7 percent in the first half of 1982 (by weight).

The State Department has determined that our major foreign suppliers are politically reliable, an indication that their exports of fasteners to us would not be interrupted in time of mobilization or conflict. Principal foreign fastener suppliers in recent years are: Japan, Taiwan, Canada, India, Germany, Italy, The Netherlands and Australia. (In 1981, fifty-one percent (by weight) of U.S. imports of fasteners came from Japan.) Under the terms of the scenario, which specifies that shipping losses from the major exporting countries in Asia would be minimal, our principal Asian suppliers are also considered geographically reliable, whereas Western Europe is not, given predicted shipping losses in the North Atlantic, imports from Canada are assumed to be assured due to our common border and to the mobilization agreements in place between us. During mobilization and conflict, large quantities of fasteners also could be purchased from Argentina, Brazil, and Mexico, if these countries are able to surge their production.

Because Japan and the other Asian suppliers are dependent upon imports of iron ore, coking coal and other factors of production (except labor) to make steel, their reliability as exporters of fasteners to the U.S. could hinge on their ability to obtain raw materials. Under surge conditions, the U.S. could, if necessary, produce a surplus of these steels and could supply friendly countries which manufacture fasteners for us with fastener grade steel if those countries could not procure the steel elsewhere.

The bulk of U.S. fastener imports are "standards," rather than "specials." Standard fasteners are multipurpose products which are normally mass produced in long production runs. Special fasteners are designed and produced to fit a particular purchaser's requirements, and are usually not inventoried except at the request of an end-user. The ratio of domestic consumption of standards to specials was 3 or 4 to 1 in the late 1950s and is reportedly 2 to 1 today. Results of the analysis of data for this investigation verify that (by weight) imported and domestic standard fasteners comprise 65–70 percent of the market and special fasteners comprise 30–35 percent of the market. OEMs consume an estimated 90 percent of the specials and more than 50 percent of the standards.

Currently depressed economic conditions and imports of lower priced high volume type standards are about equally responsible for the recent declines in capacity utilization rates for the U.S. industrial fastener industry. The decline can also be explained by the domestic industry's shift into specials production which first became apparent in 1975. Specials production usually results in more downtime because of frequent equipment changeovers or "set-ups" and often longer set-up times. The U.S. is competitive and self-sufficient in specials production, however, only 20 percent of the standards (in terms of pieces) used in the U.S. are domestically produced.

During peacetime, specialization in product lines among friendly nations is not detrimental; in this situation market forces work to bring about the lowest cost for each type of product.

Conclusion

The report shows that there would be a shortfall in domestic fastener supplies to meet scenario-based requirements. Domestic producers of the industrial fasteners under investigation can, in surge and conflict years, meet only the defense requirements for these products. Imports can help us reduce the shortfall in requirements for civilian production. The analysis has shown that most of our foreign sources are politically reliable, due to their stable pro-U.S. governments;

and that their geographic locations, in light of projected shipping losses under the scenario, make them reliable in practice, as well. While it is true that the domestic industry has declined, general economic conditions contributed greatly, and import penetration alone is not causal to its reduced capacity.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Modification To General Permit; Federation of Japan Salmon Fisheries Cooperative Associations

Notice is hereby given that pursuant to the provisions of Section 216.24(b)(4) of the Regulations Governing the Taking and Importing of Marine Mammals, Section 14 of the North Pacific Fisheries Act of 1954 as amended (16 U.S.C. 1034), and Special Condition B–2 of the Permit, the Category 5 General Permit issued on May 7, 1981, to the Federation of Japan Salmon Fisheries Cooperative Associations, is hereby modified as detailed below.

1. Condition B–2 is deleted and replaced by:

"2. This permit shall be valid from 0001 hours, June 10, 1981, to 2400 hours, June 9, 1987, subject to annual review by the Assistant Administrator for Fisheries. This review will be based in part on reports required herein and on other information available to the Assistant Administrator for Fisheries. The terms, conditions, limitations on take, number of observers, and duration may be modified by the Assistant Administrator for Fisheries in such a manner as he deems consistent with and necessary to carry out the purposes of the Marine Mammal Protection Act of 1972."

2. Condition 8 is deleted and replaced by:

"8. The Permit Holder shall provide appropriate funding each year to carry out fully a joint research program on Dall's porpoise and other marine mammals incidentally taken in the fishery."

3. Condition 9 is deleted and replaced by:

"9.a. Within 30 days of the close of each mothership salmon fishery season, the Permit Holder will submit to the Assistant Administrator for Fisheries the number and species of all marine mammals taken by each mothership fleet both inside and outside the U.S. fishery conservation zone."

"b. Within 120 days of the close of each mothership salmon fishery season, the Permit Holder will submit to the Assistant Administrator for Fisheries, a report detailing what gear modifications were tested either by operating catcherboats or by research vessels performing under actual fishing conditions; the percentages of the catcherboats which operated with modified gear; the effect such modified gear had on the incidental taking of Dall's porpoise and other marine mammals; the effect the modified gear had on the catch of the various target species of salmon; the cost of producing the modified equipment for that season; and a best estimate of the cost to outfit the entire fleet with the modified gear."

4. Condition B–10 is renumbered as B–11 and a new condition B–10 is added as follows:

"10. The Assistant Administrator for Fisheries shall determine the fishing gear or techniques or both which will offer the most practical and effective opportunity for reducing porpoise mortality and shall specify to the Permit Holder which gear or techniques will be required. The Permit Holder shall install the designated fishing gear or adopt techniques or both, which are designed to reduce porpoise mortality into the fleet as specified timetable.

A. A 25 per centum of the mothership-based salmon catcherboat fleet by the commencement of the 1984 salmon fishing season;

B. 50 per centum of the mothership-based salmon catcherboat fleet by the commencement of the 1985 salmon fishing season; and

C. 75 per centum of the mothership-based salmon catcherboat fleet by the commencement of the 1986 salmon fishing season.

These modifications become effective on February 24, 1983.

The General Permit as modified and supporting documentation pertaining to the modifications are available for review in the Office of the Assistant Administrator for Fisheries, National Marine Fisheries Services, Room 412, 3300 Whitehaven Street, NW., Washington, D.C.

Dated: February 24, 1983.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

BILLING CODE 3510-11-M

COMMODITY FUTURES TRADING COMMISSION

MidAmerica Commodity Exchange Soybean Meal and Soybean Oil Futures Contracts

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contracts.

SUMMARY: The MidAmerica Commodity Exchange ("MCE") has applied for designation as a contract market in both soybean meal and soybean oil. The Commission has determined that the terms and conditions of the proposed futures contracts are of major economic significance and that, accordingly, making available the proposed contracts for public inspection and comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before May 2, 1983.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to the MCE soybean meal and soybean oil futures contracts.

FOR FURTHER INFORMATION CONTACT: Fred Linse, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C., (202) 254–7303.

Copies of the terms and conditions of the MCE proposed soybean meal and soybean oil futures contracts will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Other materials submitted by the MCE in support of its applications for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1982)). Requests for copies of such materials should be made to the FOIA, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures contracts, or with respect to other materials submitted by the MCE in support of its applications, should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, by May 2, 1983. Such comment letters will be publicly available except to the extent that they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C., on February 25, 1983.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket 83-C0001]

Suomen Trikoo Oy d/b/a Finnwear; Consent Order Agreement

AGENCY: Consumer Product Safety Commission.

ACTION: Provisional acceptance of a Consent Order Agreement under the Flammable Fabrics Act.

SUMMARY: Under requirements of 16 CFR 1605.13, the Commission must publish in the **Federal Register** consent agreements which it provisionally accepts under the Flammable Fabrics Act. Published below is a provisionally-accepted Consent Order Agreement with Suomen Trikoo Oy, doing business as Finnwear, a corporation organized and existing under the laws of the country of Finland.

DATES: Any interested person may ask the Commission not to accept this agreement by filing a written request with the Office of the Secretary by March 17, 1983.

ADDRESS: Persons wishing to comment on this Consent Order Agreement should send written comments to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: Stephen E. Joyce, Directorate for Compliance and Administrative Litigation, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492–6626.

Dated: February 23, 1983

Sadye E. Dunn,

Secretary

SUPPLEMENTARY INFORMATION:

In the Matter of SUOMEN TRIKOO OY d/b/a FINNWEAR, CPSC Docket No. 83–C0001.

Consent Order Agreement

SUOMEN TRIKOO OY, doing business as Finnwear (hereinafter "Finnwear"), a corporation organized and existing under the laws of the country of Finland, enters into this Consent Order Agreement (hereinafter, "Agreement") with the staff (hereinafter, the "Staff") of the Consumer Product Safety Commission (hereinafter the "Commission") pursuant to the procedure for consent order agreements contained in § 1605.13 of the Commission's Procedures for Investigations, Inspections, and Inquiries under the Flammable Fabrics Act (FFA), 16 CFR Part 1605.

This Agreement and Order is for the sole purpose of settling the allegations of the staff that Finnwear has imported into the United States and sold certain noncomplying children's sleepwear, in violation of the Flammable Fabrics Act and the standards, rules, and regulations thereunder as more fully set forth in the Complaint accompanying this Agreement.

Finnwear and the Staff Agree:

1. The Consumer Product Safety Commission has jurisdiction in this matter under the following Acts: the Flammable Fabrics Act (15 U.S.C. 1191 *et seq.*); The Federal Trade Commission Act (15 U.S.C. 1191 *et seq.*); the Federal Trade Commission Act (15 U.S.C. 41 *et seq.*); and the Consumer Product Safety Act (15 U.S.C. 2051 *et seq.*)

2. Finnwear is a corporation, organized and doing business under the laws of the country of Finland; engaged in the manufacture for sale and importation into the United States of articles of children's playwear considered by the Commission to be sleepwear; and has its principal place of business and address located at Box 65, 33101 Tampere, Finland.

3. For the purpose of this Consent Order Agreement only and without any admission on its part of a violation of any of the Acts or regulations cited in this Paragraph 3, Finnwear will not contest the Commission's allegations that it is now and has been engaged in one or more of the following:

a. The manufacture for sale, the sale, or the offering for sale, in commerce, or the importation into the United States, and the introduction, delivery for introduction, transportation or causing to be transported, in commerce, or the sale or delivery after sale or shipment in commerce, of a product, fabric, or related material which is subject to the requirements of the Flammable Fabrics Act (15 U.S.C. 1191 *et seq.*); the Standard for Flammability of Children's Sleepwear; Sizes 0 through 6X (FF 3–71), and the implementing rules and regulations (16 CFR Part 1615); or

b. The importation into the United States, or the manufacture for sale, the sale, or the offering for sale, of a product made of fabric or related material, which has been shipped or received in commerce and which is subject to the requirements of the Flammable Fabrics Act, the Standard for the Flammability of Children's Sleepwear; Sizes 0 through 6X (FF 3–71), and the implementing rules and regulations; or

c. The manufacturing for sale, or the offering for sale, in commerce, or the importation into the United States, and the introduction, delivery for introduction, transportation or causing to be transported, in commerce, or the sale or delivery after sale or shipment in commerce, of a product, fabric, or related material which is subject to the requirements of the Flammable Fabrics Act (15 U.S.C. 1191 *et seq.*), the Standard for the Flammability of Children's Sleepwear; Sizes 7 through 14 (FF 5–74), and the implementing rules and regulations (16 CFR part 1616); or

d. The importation into the United States, or the manufacture for sale, the sale, or the offering for sale, of a product made of fabric or related material, which has been shipped or received in commerce, and which is subject to the Flammable Fabrics Act, the Standard for Flammability of Children's Sleepwear; Sizes 7 through 14 (FF 5–74), and to the implementing rules and regulations.

4. This Agreement is for settlement purposes only and does not constitute an admission by Finnwear that the law has been violated, and is conditioned on the Commission's issuance of the Order (hereinafter, the "Order") contained in this Agreement. Therefore, if this Agreement is not accepted by the Commission, it may not used against Finnwear in adjudicative proceedings, either administrative or judicial.

5. Finnwear waives (a) all requirements for findings of fact and conclusions of law in the

disposition of this matter, and (b) administrative and judicial review of the facts and proceedings, including the validity of this Agreement; provided, however, that in any action or proceeding relating to a violation of the Order, Finnwear may challenge the interpretation of the Order or the violation thereof. This Agreement and the Complaint accompanying the Agreement may be used in interpreting the Order. Except for the express waivers contained in this Agreement, Finnwear retains all other rights to which it may be entitled under applicable law.

6. The provisions of the Order shall become effective upon receipt by Finnwear of written notice that the Commission has accepted the Agreement and issued the Order.

7. Violation of the provisions of the Order may subject Finnwear to a civil penalty of not more than $10,000 for each such violation.

8. The Commission shall have jurisdiction in this matter for purposes of implementing and enforcing this Agreement and Order only. Venue for any action based on an alleged violation of the Order shall be in the United States district courts for the Southern District of New York. All notices and service of process upon Finnwear may be made by certified or registered mail to the following address: Box 65, 33101 Tampere, Finland, attention: International Marketing Manager; and by certified or registered mail to the firm of Gilbert, Segall and Young, 430 Park Avenue, New York, New York 10022, attention Thomas Silbiger, Esquire. Finnwear shall notify the Secretary of the Commission in writing of any change in these addresses and of any change in the persons designated to receive said notices and service of process.

9. The Commission may disclose the terms of this Consent Order Agreement.

10. The requirements of this Order are in addition to, and not to the exclusion of, other remedies such as criminal penalties which may be pursued under section 7 of the FFA.

11. No agreement, understanding, representation or interpretation not contained in this Agreement or Order may be used to vary or contradict the terms of the Order.

Upon acceptance of this Agreement, the Commission may issue the following Order:

Order

I

It is hereby ordered that Finnwear consider before importing or selling any style garment, subject to this Order: (a) The nature of the product and its suitability for use by children for sleeping or activities related to sleeping, (b) the manner in which the product is distributed or promoted, and (c) the likelihood that the product will be used by children primarily for sleeping or activities related to sleeping.

II

It is further ordered that from the date this Order becomes effective, Finnwear, its officers, directors, authorized agents, assigns, successors, authorized representatives and authorized employees, directly or through any corporation, subsidiary, division or other device, forthwith cease and desist from selling or offering for sale, in commerce, or importing into the United States, or introducing, delivering for introduction, transporting or causing to be transported, in commerce, or selling or delivering after sale or shipment in commerce, the following styles of garments irrespective of color and trim which the Commission staff has alleged do not comply with the Standard for Flammability of Children's Sleepwear: Sizes 0 through 6X (FF 3-71), 16 CFR Part 1615, or the Standard for Flammability of Children's Sleepwear: Sizes 7 through 14 (FF 5-74), 16 CFR Part 1616:

A. A one-piece mid-calf or longer "A" line gown with or without sleeves and with or without a collar. Attachment "A" is a photograph of the type gown that is the basis for this prohibition.

B. A one-piece garment with or without a collar and with sleeves, attached feet, a zipper or other front closure (e.g. button, snaps) made of ribbed knit, filling knit or stretch terry fabric. Attachment B is a photograph of the style of garment that is the basis for this prohibition.

C. A one-piece gown with a draw-string bottom with or without sleeves and with or without a collar. Attachment "C" is a diagram of an example of this type of garment.

D. A two-piece color-coordinated garment, including a bottom with attached feet, a top with sleeves, and with or without a collar, both pieces made of the same ribbed knit, filling knit or stretch terry fabric. Attachment "D" is a diagram of an example of this type of garment.

III

It is further ordered that this Order shall expire at such time the Commission revokes the foregoing Standards or there is a ruling or determination modifying the Standards or their implementation so that they are no longer considered by the Commission to apply to the aforementioned garments.

Dated: October 4, 1982.

BILLING CODE 6355-01-M

[CPSC Docket No. 83-1]

Sun and Sand Imports, Ltd., a Corporation, and Guido Muller, Individually

AGENCY: Consumer Product Safety Commission.

ACTION: Publication of a Complaint under the Flammable Fabrics Act.

SUMMARY: Under Provisions of its Rules of Practice for Adjudicative Proceedings (16 CFR Part 1025, 45 FR 29206), the Consumer Product Safety Commission must publish in the Federal Register Complaints which it issues. Printed below is a Complaint in the matter of Sun and Sand Imports, Ltd., a corporation, and Guido Muller, individually.

Dated: February 24, 1983.

Sheldon D. Butts,

Acting Secretary.

SUPPLEMENTARY INFORMATION:

In the Matter of SUN AND SAND IMPORTS, LTD., a corporation, and GUIDO MULLER, individually. COMPLAINT CPSC Docket No. 83-1.

Nature of Proceedings

The Consumer Product Safety Commission (Commission) has reason to believe that Sun and Sand Imports, Ltd., a corporation, and Guido Muller, its president, (Respondents) are subject to and have violated provisions of the Flammable Fabrics Act, as amended (FFA); the Federal Trade Commission Act, as amended (FTCA); the Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (FF 3-71), 16 CFR Part 1615, Subpart A, and the implementing rules and regulations, 16 CFR Part 1615, Subpart B.

It appears to the Commission, from factual information available to its staff, that it is in the public interest to issue this Complaint. Therefore, by virtue of the authority vested in the Commission by Section 30(b) of the Consumer Product Safety Act, as amended, 15 U.S.C. 2051, 2079(b), the Commission, pursuant to Section 5 of the FFA, 15 U.S.C. 1194, and Section 5 of the FTCA, 15 U.S.C. 45, and in accordance with the Commission's Rules of Practice for Adjudicative Proceedings, hereby issues this Complaint, and states its charges as follows:

Charges

1. Respondents are engaged in the importation and sale of Children's Sleepwear: Sizes 0 through 6X and have their office and principal place of business located at 1441 Broadway, Room 1415, New York, New York 10018.

2. Guido Muller is President of Sun and Sand Imports, Ltd. and controls its acts, practices and policies.

3. At the times the infractions and violations charged herein occurred, Respondents were engaged in the importation into the United States and in the introduction, into commerce, and in the sale or shipment in commerce of wearing apparel as the terms "commerce" and "wearing apparel" are defined in the FFA Sections 2 (b) and (d), 15 U.S.C. 1191 (b) and (d).

4. Respondents have been engaged in the importation into the United States, and caused to be transported in commerce, Children's Sleepwear: Sizes 0 through 6X that are subject to and fail to conform to the requirements of this Standard in violation of Section 3 of the FFA, 15 U.S.C. 1192.

5. Pursuant to Section 3 of the FFA, 15 U.S.C. 1192, the aforesaid violative acts and practices of Respondents are unlawful and constitute unfair methods of competition and unfair and deceptive practices in commerce under the FTCA.

Relief Sought

Wherefore, the premises considered, the Commission hereby issues this Complaint on the seventh day of February 1983, seeking an Order to Cease and Desist future violations of the FPA.

Dated: February 7, 1983.

By the Commission:

David Schmeltzer,

Associate Executive Director, Directorate for Compliance and Administrative Litigation, Consumer Product Safety Commission, Washington, D.C. 20207, Telephone: (301) 492–6621.

COPYRIGHT ROYALTY TRIBUNAL

[Docket No. 82-1]

Determination of a Controversy With Respect to the Distribution of 1981 Cable Royalty Fees

AGENCY: Copyright Royalty Tribunal.

ACTION: Notice.

SUMMARY: The Copyright Royalty Tribunal declares a controversy concerning the distribution of the 1981 cable royalty fees.

EFFECTIVE DATE: March 2, 1983.

FOR FURTHER INFORMATION CONTACT: Commissioner Edward W. Ray, Chairman, Copyright Royalty Tribunal, (202) 653–5175.

SUPPLEMENTARY INFORMATION: At a public meeting on November 22, 1982, after reviewing and considering comments from claimants, the Tribunal adopted a motion, effective March 2, 1983, declaring in accordance with 17 U.S.C. 111(d)(5)(B) the existence of a controversy concerning the distribution of the 1981 cable royalty fees. A proceeding to determine the distribution of such fees is commenced as of March 2, 1983. As in previous proceedings, Phase I will determine the distribution of royalty fees to categories of claimants, while Phase II will resolve any disputes among claimants in each category.

The Tribunal directs claimants or their authorized representatives who wish to participate in Phase I to inform the Tribunal of such intention not later than April 1, 1983.

Edward W. Ray,

Commissioner, Chairman.

DEPARTMENT OF ENERGY

Bonneville Power Administration

Delay in Release of Initial Wholesale Power Rate Proposal

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of delay in release of initial wholesale power rate proposal.

BPA File Number: WP–83

Bonneville Power Administration (BPA) requests that all comments and documents which become part of the Official Record compiled in the process of adjusting wholesale power rates contain the file number designation WP–83.

SUMMARY: BPA is in the initial stages of developing adjusted rates for wholesale power which will become effective November 1, 1983. On January 28, 1983, (48 FR 4028) BPA announced its intent to revise wholesale power rates and requested suggestions, advice, and recommendations from interested persons to be used to assist in the development of the wholesale power rate proposal. On February 17, 1983, (48 FR 7001) BPA announced its intent to revise marketing and transmission rates applied to Hanford extension energy. In each case, BPA also indicated an intent to have its initial proposed rates formulated and published in February 1983. Delays have occurred in the preparation of the initial wholesale power and Hanford extension energy marketing proposals and publication is now expected to occur on March 20, 1983. The initial proposal for a marketing rate for Hanford extension energy will be included in the initial wholesale power rate proposal. The initial proposal for transmission rates for Hanford extension energy will be included in BPA's initial transmission rate proposal which is expected to be published on March 28, 1983. The notice announcing the availability of BPA's proposal wholesale power and Hanford extension energy marketing rates will also include a schedule for public and formal hearings as specified in Secton 7(i) of the Pacific Northwest Electric Power Planning and Conservation Act (Regional Act). These hearings will give interested persons an opportunity to present both oral and written comments on the proposal.

Mr. Thomas Wagenhoffer, Snake River Area Manager, West 101 Popular, Walla Walla, Washington 99362, 509–525–5500, extension 701.

Mr. Robert N. Laffel, Idaho Falls District Manager, 531 Lomax Street, Idaho Falls, Idaho 83401, 208–523–2706.

SUPPLEMENTARY INFORMATION: BPA, an agency of the U.S. Department of Energy, is the Federal electric power marketing agency in the Pacific Northwest. BPA markets hydroelectric

power from 30 U.S. Army Corps of Engineers and U.S. Bureau of Reclamation projects on the Columbia River and its tributaries, as well as thermal power it acquires from non-Federal interests in the region. In addition, BPA owns, operates, and maintains the nation's largest high-voltage transmission system grid.

BPA supplies about 50 percent of the electric energy consumed in the Pacific Northwest and accounts for about 80 percent of the region's high-voltage transmission capacity. It sells power to 161 customers, including publicly, cooperatively, and privately owned utilities, Federal and State (California) agencies, and electroprocess and other Northwest industries. The power is sold at wholesale to BPA utility customers for resale to ultimate consumers, and directly to BPA's industrial and Federal agency customers. In addition, BPA sells power which is surplus to the needs of the Pacific Northwest to customers outside the region.

The rate that BPA charges its customers must produce revenues that are sufficient to repay, with interest, the Federal investment in generation and transmission facilities, as well as conservation, and to pay BPA's operation and maintenance expenses, its purchased power costs, and certain other miscellaneous expenses. Inflation, high interest rates, and contract obligations have created substantial increases in BPA's costs.

BPA's last wholesale power rate increase became effective on an interim basis on October 1, 1982. The developmental process for the 1983 wholesale power rate proposal will be similar to that used to develop the 1982 wholesale power rates. BPA is preparing current repayment studies to determine the extent to which anticipated repayment requirements for operating year 1983 would exceed expected revenues collected under the current rates. Following a determination of the increase in revenues that will be necessary to meet repayment requirements, BPA will develop various studies to be used in designing rates. BPA also will evaluate the environmental effects of the proposed rates.

In developing the rate proposal, BPA will consider the six ratemaking standards of Section 111 of the Public Utility Regualtory Policies Act (PURPA, Pub. L. 95-617). This Act requires each utility whose total retail sales exceed 500 million kilowatt-hours in a calendar year to consider ratemaking standards with respect to conservation of power, optimal and efficient use of facilities and resources, and equity in establishing rates for all electric consumers. Section 111 is applicable to BPA because of BPA's direct sales to Federal agencies and industrial customers. The six ratemaking standards of Section 111 were adopted by BPA on November 19, 1979 (44 FR 66949). The standards regard: (1) Cost of service; (2) declining block rates; (3) time-of-day rates; (4) seasonal rates (5) interruptible rates; and (6) load management techniques. Other factors BPA will consider in designing the 1983 wholesale power rates include conservation, renewable resource acquisitions, consumer understanding, ease of administration, fiscal responsibility, environmental protection, and continuity of rates.

BPA is also considering the need for a two-staged wholesale power rate increase for BPA customers, as appropriate, to take effect November 1, 1983, and July 1, 1984.

Following publication of the initial rate proposal in the **Federal Register**, both public and formal hearings will be conducted by BPA on the proposal. The Honorable Seymour Wenner, retired Administrative Law Judge, is designated the hearing officer for the wholesale power rate adjustment proceedings. Written comments also will be accepted. Following the hearings BPA will announce its final proposed wholesale power rates. The Administrator will submit the final rate proposal to the Federal Energy Regulatory Commission for approval on a interim basis and ultimately for final confirmation and approval.

Issued in Portland, Oreg., February 23, 1983.

Marvin Klinger,

Acting Administrator.

BILLING CODE 6450-01-M

Delay in Release of Initial Transmission Rate Proposal

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of delay in release of initial transmission rate proposal.

BPA File Number: TR-83.

BPA requests that all comments and documents which become part of the Offical Record compiled in the process of adjusting transmission rates contain the file number designation TR-83.

SUMMARY: Bonneville Power Administration (BPA) is in the initial stages of developing adjusted rates for the transmission of electric power of other entities over Federal facilities and for the transmission of Hanford extension energy. It is presently anticipated that the adjusted rates will become effective November 1, 1983. On January 28, 1983, (48 FR 4027) BPA announced its intent to revise transmission rates and requested comments and recommendations from the public to be used to assist in the development of the transmission rate adjustment proposal. On February 17, 1983, (48 FR 7001) BPA announced its intent to revise marketing and transmission rates applied to Hanford extension energy. In each notice, BPA also indicated an intent to have its initial proposed rated formulated and published in February 1983. Delays have occurred in the preparation of the initial transmission and Hanford extension energy transmission proposals and publication is now expected to occur March 28, 1983. The initial proposal for rates for the transmission of Hanford extension energy will be included in the initial transmission rate proposal. The initial proposal for a marketing rate for Hanford extension energy will be included in BPA's initial wholesale power rate proposal which is expected to be published March 28, 1983. The notice announcing the availability of BPA's proposed transmission and Hanford extension energy transmission rates will also include a schedule for public and formal hearings as specified in Section 7(i) of the Pacific Northwest Electric Power Planning and Conservation Act (Regional Act). These hearings will give interested persons an opportunity to present both oral and written comments on the proposal.

FOR FURTHER INFORMATION CONTACT:

Mr. George Gwinnutt, Lower Columbia Area Manager, Suite 288, 1500 Plaza Building, 1500 NE. Irving Street, Portland, Oregon 97232, 503-230-4551.

Mr. Ladd Sutton, Eugene District Manager, Room 206, 211 East Seventh Street, Eugene, Oregon 97401, 503-345-0311.

Mr. Ronald H. Wilkerson, Upper Columbia Area Manager, Room 561, West 920 Riverside Avenue, Spokane, Washington, 99201, 509-456-2518.

Mr. George E. Eskridge, Montana District Manager, 800 Kensington, Missoula, Montana 59801, 406-329-3900.

Mr. Ronald K. Rodewald, Wenatchee District Manager, P.O. Box 741, Wenatchee, Washington 98801, 509–662–4377, extension 378.
Mr. Richard D. Cheed, Puget Sound Area Manager, 415 First Avenue North, Room 250, Seattle, Washington 98109, 206–442–4130.
Mr. Thomas Wagenhoffer, Snake River Area Manager, West 201 Poplar, Walla Walla, Washington 99362, 509–525–5500, extension 701.
Mr. Robert N. Laffel, Idaho Falls District Manager, 531 Lomax Street, Idaho Falls, Idaho 83401, 208–523–2706.

SUPPLEMENTARY INFORMATION: BPA, as an agency of the U.S. Department of Energy, owns and operates the Federal Columbia River Transmission System (FCRTS), which includes approximately 80 percent of the capacity of the high-voltage electric transmission system within the Pacific Northwest. The FCRTS integrates and transmits electric power from Federal or non-Federal generating units. BPA also provides interregional transmission services to its customers outside the Pacific Northwest. BPA is now undertaking studies to support changes to the current transmission rates and rate designs.

The current rates apply to four types of transmission service which generally involve: (1) Transmission service for firm electric power from points of generation to load or between other points of supply and delivery (current contracts provide this service for periods of up to 50 years); (2) transmission service for firm electric power on a postage-stamp rate basis; (3) transmission service for non-firm energy (current contracts for this service provide for short-term energy transfers and usually provide for termination by the customer on 1 year's notice and by BPA on 3 years' notice); and (4) transmission service for firm electric power over specified transmission facilities. BPA also will examine the adequacy of current charges for other transmission related services.

The anticipated transmission rate adjustments are needed to cover increasing FCRTS costs. Normally, transmission costs are small compared to a utility's total costs, and BPA expects that the increase in FCRTS revenues will have minimal impact on ultimate power costs to the consumer.

The anticipated transmission rate adjustments are being developed concurrently with a proposed transmission policy which is expected to be completed in early 1983. These rate adjustments will reflect that policy.

The present transmission rates have been approved by the Federal Energy Regulatory Commission (FERC) on an interim or final basis until BPA's 1983 rates become effective. The revenues now being collected under these rates are subject to refund, pending a final ruling by FERC.

Following publication of the initial proposal in the Federal Register, both general public and formal hearings will be conducted by BPA. The Honorable Seymour Wenner, retired Administrative Law Judge, is designated the hearing officer for the transmission rate adjustment proceedings. Written comments will also be accepted. Following the hearings BPA will announce its final proposed transmission rate schedules. The Administrator will submit the final rate proposal to the FERC for approval on an interim basis and ultimately for final confirmation and approval.

Issued in Portland, Oreg., February 23, 1983.

Marvin Klinger,
Acting Administrator.

Energy Information Administration

Changes to Reporting and Recordkeeping Requirements

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of changes to the inventory of Department of Energy reporting and recordkeeping requirements.

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy (DOE) hereby gives notice to respondents and other interested parties of changes to the inventory of current energy information collections as defined in the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

The listing that follows this notice indicates changes made during the quarter from October 2, 1982, to January 1, 1983, to the inventory of current DOE information collections published in the Federal Register (47 FR 55,410; December 9, 1982). The listing includes new information collections approved by the Office of Management and Budget (OMB), collections extended, discontinued or allowed to expire, and changes to continuing information collections. For each new requirement, requirement extended, and requirement discontinued, the current DOE control or form number, the title, and the OMB control number and approval expiration date are listed by DOE sponsoring office. If applicable, the appropriate Code of Federal Regulations citation is also listed. Also, information collections not utilizing structured forms are designated by an asterisk (*) placed to the right of the control or form number.

FOR FURTHER INFORMATION CONTACT: Carolyn Sinclair, EI–73, Energy Information Administration, Mail Stop 1H–023, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585; (202) 252–2313.

Single blank copies of those collections utilizing structured forms may be obtained by contacting the National Energy Information Center, EI–20, Forrestal Building, U.S. Department of Energy, Washington, D.C. 20585; (202) 252–8800.

Issued in Washington, D.C., February 25, 1983.

J. Erich Evered,
Administrator, Energy Information Administration.

BILLING CODE 6450-01-M

National Petroleum Council, Coordinating Subcommittee on Petroleum Inventories and Storage Capacity; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), 86 Stat. 770)], notice is hereby given of the following advisory committee meeting:

Name: Coordinating Subcommittee of the Committee on Petroleum Inventories and Storage Capacity.

Date and Time: Wednesday, March 9, 1983—10:00 a.m.

Place: Ten Penn Center, Board Room, 27th Floor, 1801 Market Street, Philadelphia, Pennsylvania.

Contact: Jimmie L. Peterson, Director, Office of Oil and Gas, Energy Information Administration, U.S. Department of Energy, Forrestal Building, Room 2H-059, Washington, D.C. 20585, telephone 202: 252-9601.

Purpose of Committee: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to petroleum inventories and petroleum storage product capacities.

Tentative Agenda:

- Discuss and prepare a preliminary scope, methodology, and timetable for the study for the consideration of the NPC Committee on Petroleum Inventories and storage capacity.
- Discuss any other matters pertinent to the overall assignment from the Secretary.
- Public comment.

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda

items should contact Jimmie L. Peterson at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between 8:00 a.m. and 4 p.m., Monday through Friday, except federal holidays.

Issued at Washington, D.C., on February 25, 1983.

J. Erich Evered,

Administrator, Energy Information Administration.

BILLING CODE 6450-01-M

National Petroleum Council, Subcommittee on Petroleum Inventories and Storage Capacity; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463), 86 Stat. 770)), notice is hereby given of the following advisory committee meeting:

Name: Subcommittee on Petroleum Inventories and Storage Capacity, National Petroleum Council.

Date and Time: Friday, March 18, 1983—2:00 p.m.

Place: The Madison Hotel, Mount Vernon Room, Fifteenth and M Streets, NW., Washington, D.C.

Contact: Jimmie L. Peterson, Director, Office of Oil and Gas, Energy Information Administration, U.S. Department of Energy, Forrestal Building, Room 2H–056, Washington, D.C. 20585, telephone 202–252–5401.

Purpose of Committee: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to petroleum inventories and petroleum product storage capacities.

Tentative Agenda:

- Discuss the scope of the study to be conducted in response to the Secretary of Energy's request for an analysis of petroleum inventories and storage capacity.
- Discuss an organizational structure for the study.
- Discuss a timetable for completion of the study.
- Discuss any other matters pertinent to the overall assignment from the Secretary.
- Public comment. (10 minute rule).

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Jimmie L. Peterson at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between 8:00 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on February 25, 1983.

Howard H. Raiken,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Pride Refining, Inc.; Proposed Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed Consent Order and opportunity for comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order with Pride Refining, Inc. (Pride) and provides an opportunity for public comment on the terms and conditions of the proposed Consent Order.

DATE: Comments by: April 1, 1983.

ADDRESS: Sent comments to: Donald A. Muncy, Deputy Chief Counsel, Dallas Office, Economic Regulatory Administration, Department of Energy, 1341 W. Mockingbird, Suite 200E, Dallas, Texas 75247.

FOR FURTHER INFORMATION CONTACT: Donald A. Muncy, Deputy Chief Counsel, Dallas Office, Economic Regulatory Administration, Department of Energy, 1341 W. Mockingbird, 200E, Dallas, Texas 75247, 214/767–7561. (Copies of the Consent Order may be obtained free of Charge by writing or calling this office.)

SUPPLEMENTARY INFORMATION: On February 2, 1983, the ERA executed a proposed Consent Order with Pride Refining, Inc. of Abilene, Texas. Under 10 CFR 205.199J(b), a proposed Consent Order which involves the sum of $500,000 or more, excluding interest and penalties, becomes effective no sooner than thirty days after publication of a notice in the Federal Register requesting comments concerning the proposed Consent Order. Although the ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Order or issue the Consent Order as signed.

I. The Consent Order

Pride Refining, Inc., with its home office located in Abilene, Texas, is a firm engaged in the refining of crude oil and the sale of covered petroleum products as well as other petroleum related activities, and was subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR Parts 210, 211, and 212 during the period covered by this Consent Order. To resolve certain potential civil liability arising out of the Mandatory Petroleum Allocation and Price Regulations and related regulations, 10 CFR Parts 205, 210, 211, and 212, in connection with Pride's transactions involving petroleum products during the period January 1, 1973 through January 28, 1981 ("the period covered by this Consent Order"), the ERA and Pride entered into a Consent Order, the significant terms of which are as follows:

A. The Consent Order is intended by the signatories to settle the civil issues between DOE and Pride relating to Pride's compliance with the Federal petroleum price and allocation regulations during the period from January 1, 1973 through January 28, 1981.

B. ERA conducted a through audit to determine Pride's compliance during the period covered by this Consent Order with the Federal petroleum price and allocation statutes, regulations and requirements. ERA and Pride disagree in several respects concerning the proper application of such Federal petroleum price and allocation statutes, regulations and requirements to Pride's activities during the settlement period. Pride and ERA each believes that its respective positions on the legal issues underlying suvh disagreement are meritorious. Nether Pride nor ERA disallows any position it has taken with respect to such legal issues.

C. Notwithstanding the above, Pride maintains that it has calculated all of its costs, determined all of its prices, and operated in all other respects in accordance with all applicable statutes, regulations and other requirements. Execution of the Consent Order constitutes neither an admission by Pride nor a finding by ERA of any violation by Pride of any statute or regulation.

II. Refunds

A. Disposition of Refunds

Under the Consent Order, Pride Refining, Inc., will pay the sum of $800,000 to the administrator of the ERA. The administrator will hold the funds in an appropriate account pending a determination by the DOE of the disposition of the funds in accordance with applicable statutes and regulations. Payment is to be made in three installments of $200,000 each, the first payment on or before thirty days after the effective date of the Consent Order, the second on or before July 31, 1983, and the third on or before March 31, 1984. If payments are not made within the specified periods of time, Pride agrees to pay installment interest on the unpaid balance. Upon full satisfaction of the terms and conditions of this Consent Order by Pride, the DOE releases Pride and its affiliates from any civil claims that the DOE may have arising out of the specified transactions during the period covered by this Consent Order.

The foregoing provisions for payment of the refund amount were concurred in after ERA attempted to determine and identify all injured parties. These attempts were unsuccessful due to the nature of the business transactions in which Pride was engaged during the settlement period. Pride's activities were of such a nature so as to make it impossible to identify specific parties who or which may have been injured.

III. Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of this Consent Order to the address given above. Comments should be identified on the outside of the envelope and on the documents submitted with the designation, "Comments on Pride Refining, Inc. Consent Order." The ERA will consider all comments it receives by 4:30 p.m., local time, on 30 days after the date of publication of this notice. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedures in 10 CFR 205.9(f).

Issued in Dallas, Texas on the 23rd day of February 1983.

Ben Lemos,

Director, Dallas Office, Economic Regulatory Administration.

Office of Energy Research

University Programs Panel; Energy Research Advisory Board; Meeting

Notice is hereby given of the following meeting:

Name: University Programs Panel of the Energy Research Advisory Board (ERAB). ERAB is a Committee constituted under the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770).

Date and Time: March 21, 1983, from 9 a.m. to 5 p.m.

Place: Department of Energy, Room 8E-080, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

Contact: Joan Snodderly, Energy Research Advisory Board, Department of Energy, Forrestal Building, ER-6, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: 202/252-6033.

Purpose of the Parent Board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative Agenda:

- Discussion of draft outline of report
- Briefings on DOE university programs
- Presentations by representatives from research community

Public Participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Joan Snodderly at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between 8:30 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on February 24, 1983.

J. R. Young,

Director for Management, Office of Energy Research.

BILLING CODE 6450-01-M

Office of the Secretary

National Petroleum Council, Chemical Task Group of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Chemical Task Group of the Committee on Enhanced Oil Recovery will meet in March 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location, and agenda of the Chemical Task Group meeting follows:

The Chemical Task Group will hold its fourth meeting on Thursday, March 10, 1983, starting at 10:00 a.m., in Room 112, Phillips Petroleum Company, Research Forum, Bartlesville, Oklahoma.

The tentative agenda for the Chemical Task Group Meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.

2. Review progress of Task Group study assignments.

3. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Chemical Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Chemical Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G. J. Parker, Office of Oil, Gas and Shale Technology, Fossil Energy, 301/353-3032, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on February 22, 1983.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

BILLING CODE 6450-01-M

Procurement and Assistance Management Directorate

AGENCY: Department of Energy.

ACTION: Notice of suspension and proposed debarment.

SUMMARY: This notice announces that the Department of Energy (DOE) has suspended Alexandria Printing and Photo Service, an affiliate of Earl P. Postell, who was suspended on December 13, 1982, from participating in any new DOE contract or subcontract (*see*, 47 FR 56004 (December 20, 1982)). In addition, Alexandria Printing and Photo Service has been advised that DOE proposes to debar it for a period not to exceed three years beginning on March 3, 1983, or such later date as a final DOE decision to debar is entered.

DATE: The suspension became effective on February 23, 1983, and shall last until the proposed debarment becomes effective or for 12 months, whichever occurs earlier.

FOR FURTHER INFORMATION CONTACT: James Nelson, Procurement and Assistance Management Directorate, Room 1I–018, Forrestal Building, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585, telephone 202/252–1150.

SUPPLEMENTARY INFORMATION: The suspension and proposed debarment actions are being taken in accordance with the procedures set forth in Federal Procurement Regulations (FPR) Temporary Regulation No. 65, 41 CFR Subpart 1–1.6, 47 FR 43662 (October 4, 1982), and the DOE Procurement Regulations (DOE–PR), 41 CFR Subpart 9–1.6. In addition to the Alexandria Printing and Photo Services, the other known affiliates of Earl R. Postell, affected by a previous suspension and proposed debarment action are E&P Associates, Inc., and Alexandria Graphics and Reproduction Service. Mr. Postell's address is 418 Hume Avenue, Alexandria, Virginia 22301. The address of all the known affiliates is the same: 418 Hume Avenue, Alexandria, Virginia 22301.

During the period of suspension and subsequent debarment, DOE will neither accept nor consider a bid or proposal submitted by Mr. Postell or by any organization with which he is affiliated. In addition, DOE will not approve any new contract between him or any such affiliated organization and a DOE contractor.

The suspensions and proposed debarments are based on Mr. Postell's November 2, 1982, indictment by a Federal Grand Jury in the United States

District Court for the Eastern District of Virginia and January 21, 1983, conviction in the United States District Court for the Eastern District of Virginia, Alexandria Division, for violation of Title 18 of the United States Code, 1341 and 2, Mail Fraud, Section 201(g) Bribery, and Title 26, United States Code 7206, False Income Tax Return. Mr. Postell has requested a hearing which has been scheduled for March 3, 1983.

As required under DOE–PR 9–1.602, Mr. Postell and the above named affiliated organizations have been placed on the DOE Consolidated List of Debarred, Suspended, and Ineligible Contractors which is distributed periodically to DOE Contracting Officers. DOE has also notified the General Services Administration (GSA) of this suspension action. When the proposed debarment becomes effective, GSA shall be notified in accordance with FPR Temporary Regulation No. 65, 41 CFR Subpart 1–1.6, 47 FR 43692 (October 4, 1982).

Issued in Washington, D.C., on February 23, 1983.

Hilary J. Rauch,

Director, Procurement and Assistance Management Directorate.

ENVIRONMENTAL PROTECTION AGENCY

[PF–313; PH–FRL 2313–8]

Pesticide, Food, and Feed Additive Petitions; Penick Corp. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide, food, and feed additive petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each petition at the address below: Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202. Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number (PF–313) and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide, food, and feed additive petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

Initial Filing

FAP 9H5210. Penick Corporation, 1050 Wall St. West, Lydhurst, NJ 07071. Proposes amending 21 CFR Part 193 by establishing a regulation permitting residues of the insecticide resmethrin ([5-(phenylmethyl)-3-furanyl]methyl 2,2-dimethyl-3-(2-methyl-1-propenyl)cyclopropanecarboxylate) in or on foods at 3.0 parts per million (ppm) resulting from the application of the insecticide in food processing and storage areas. (PM–17, Franklin D. R. Gee, 703–557–2690).

PP 3F2822. E. I. du Pont de Nemours & Co., Wilmington, DE 19898. Proposes amending 40 CFR 180.253 by establishing tolerances for the residues of the insecticide methomyl (*S*-methyl *N*-[(methylcarbamoyl)oxy] thioacetimidate in or on the commodity caneberries at 6.0 ppm. The proposed analytical method for determining residues is by gas chromatography. (PM–12, Jay Ellenberger, 703–557–2386).

PP 3F2823. American Hoechst Corp., Agricultural Division, Route 202–206, North Somerville, NJ 08876. Proposes amending 40 CFR 180.236 by establishing a tolerance for the residues of the fungicide triphenyltin hydroxide in or on the commodity soybeans at 0.05 ppm. The proposed analytical method for determining residues is by gas chromatography with a flame-photometric detector. (PM–21, Henry Jacoby, 703–557–1900).

FAP 3H5384. American Hoechst Corp. Proposes amending 21 CFR Part 561 by establishing a regulation permitting residues of the fungicide triphenyltin hydroxide in or on the commodity soybean soapstock at 0.15 ppm. (PM–21, Henry Jacoby, 703–557–1900).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348))

Dated: February 22, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[SWH–FRL 2314–3]

RCRA Permit Advisory Committee; Open Meeting

Notice is hereby given of a meeting of Task Force A of the RCRA Permit Advisory Committee. The Committee was established in accordance with the requirements of the Federal Advisory Committee Act, 5 U.S.C. (Appendix I), *et seq.* Establishment of the Committee was announced in the **Federal Register** on September 23, 1982. The Task Force was established at the first open meeting of the Committee held on February 15, 1983 as announced in the **Federal Register** on January 27, 1983.

The Task Force meeting will be held on Wednesday, March 30, 1983, at 10:00 a.m. at the U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. in rooms 3906 and 3908. Estimated time of adjournment is 4:00 p.m.

The purpose of the meeting is to explore various recommendations regarding implementation of land disposal permit programs and possible revisions to guidance and training documents relating to storage, treatment, and disposal programs. Any findings will be submitted to the RCRA Permit Advisory Committee for consideration at its next meeting.

This meeting is open to the public. Any member of the public wishing to submit a written statement to the Committee should deliver copies to the Executive Secretary at the meeting. Advance comments on specific subjects may be submitted to Study Group Chairpersons as follows:

Land Disposal programs—Ms. Mary A. Bishop, Senior Analyst, Environmental Department, International Paper Company, 77 West 45th Street, New York, New York 10036.

Incineration/Storage and Treatment programs—Mr. Michael L. Esarey, Environmental Engineer, Environmental Affairs, Eli Lilly and Company, 307 East McCarty Street, Indianapolis, Indiana 46285.

Anyone wishing to make a brief oral statement must indicate this to the Executive Secretary at the opening of the meeting. Oral statements will be heard as time permits.

For further information contact Burl J. Snow, Task Force Chairperson,

Industrial Solid Waste Section, Texas Department of Water Resources, Stephen F. Austin Building, 1700 North Congress Avenue, Austin, Texas 78711, (512) 475–2041 or Susan Mann, Executive Secretary, U.S. EPA, 401 M Street, S.W., Washington, D.C. 20460, WH–563, (202) 382–4493.

Dated: February 23, 1983.

Lewis Crampton,

Acting Assistant Administrator.

BILLING CODE 6560-50-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Forms Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of forms submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

SUMMARY: *Title of Information Collection:* Consolidated Reports of Condition and Consolidated Reports of Income (Mutual Savings Banks).

Background: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a form SF–83, "Request for OMB Review," for the information collection system identified above.

ADDRESS: Written comments may be sent to Mr. Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429 and to Mr. Richard Sheppard, Reports Management Branch, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: For a complete copy of the "Request for OMB Review" or related information, contact the Office of the Executive Secretary, telephone (202) 389–4351.

SUPPLEMENTARY INFORMATION: The proposed information collection pertains to changes in the Consolidated Reports of Condition and Consolidated Reports of Income (Call Reports) filed by mutual savings banks. The proposed changes to the Report of Condition are to commence with the reports that will be filed as of March 31, 1983, while the changes to the Report of Income will commence with the reports that will be filed as of June 30, 1983.

The proposal calls for the addition of new preprinted line items to the Report of Condition for FDIC notes and bank net worth certificates issued in accordance with the provisions of the Garn-St Germain Depository Institutions Act of 1982, and related additions to the Report of Income for collecting data on the interest income and expense of these instruments as well as the amounts of net worth certificates issued during the reporting period.

The change will enable the FDIC or other user of the call report to determine whether a mutual savings bank's surplus accounts have been bolstered by FDIC assistance under the Garn-St Germain Depository Institutions Act.

It is estimated that this information collection will create an annual reporting burden on all mutual savings banks of less than 10 hours a year.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

Forms Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of forms submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

SUMMARY: Title of Information Collection: Consolidated Reports of Condition and Consolidated Reports of Income (State banks not members of Federal Reserve).

Background: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a form SF–83, "Request for OMB Review," for the information collection system identified above.

ADDRESS: Written comments may be sent to Mr. Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429 and to Mr. Richard Sheppard, Reports Management Branch, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: For a complete copy of the "Request for OMB Review" or related information, contact the Office of the Executive Secretary, telephone (202) 389–4351.

SUPPLEMENTARY INFORMATION: The proposed information collection pertains to changes in the Consolidated Reports of Condition and Consolidated Reports of Income (Call Reports) filed by state nonmember commercial banks. The proposed changes are to commence with the call reports that will be filed as of March 31, 1983.

The changes involve two areas in the call reports: (1) Two new memoranda items in Schedule F—Deposits and a modification of an existing memorandum item to provide information on savings deposits by category of instrument, and (2) a new preprinted line item on the balance sheet of the Report of Condition designed to capture the book value of "Intangible Assets" separately from "Other assets" and a related addition to the Report of Income for the amortization expense of these assets.

The changes involving the memoranda items will enable the FDIC to isolate recently authorized rate-sensitive savings deposits from regulated rate savings deposits, and thus to identify banks that exhibit a trend toward excessive reliance on more costly rate-sensitive savings deposits to fund their operations. The change involving the preprinted line item will assist the FDIC in monitoring bank capital in relation to our guidelines for capital adequacy.

It is estimated that these information collections will create an annual reporting burden of 3,400 hours for all state nonmember commercial banks.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

Forms Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of forms submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

SUMMARY: *Title of Information Collection:* Consolidated Reports of Condition and Consolidated Reports of Income (Mutual Savings Banks)

Background: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a form SF–83, "Request for OMB Review," for the information collection system identified above.

ADDRESS: Written comments may be sent to Mr. Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. 20429 and to Mr. Richard Sheppard, Reports Management Branch, Office of Management and

Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: For a complete copy of the "Request for OMB Review" or related information, contact the Office of the Executive Secretary, telephone (202) 389-4851.

SUPPLEMENTARY INFORMATION: The proposed information collection pertains to changes in the Consolidated Reports of Condition and Consolidated Reports of Income (Call Reports) filed by mutual savings banks. The proposed changes to the Report of Condition are to commence with the reports that will be filed as of March 31, 1983, while the changes to the Report of Income will commence with the reports that will be filed as of June 30, 1983.

The changes involve two areas in the call reports: (1) A new memorandum item in the balance sheet of the Report of Condition from which one can derive the amount of rate-sensitive savings deposits, and (2) a new preprinted line item on the balance sheet of the Report of Condition designed to capture the book value of "Intangible Assets" separately from "Other Assets" and a related addition to the Report of Income for the amortization expense of these assets.

The change involving the new memorandum item will enable the FDIC to isolate recently authorized rate-sensitive savings deposits from regulated rate savings deposits, and thus to identify savings banks that exhibit a trend toward excessive reliance on more costly rate-sensitive savings deposits to fund their operations. The change involving the preprinted line item will assist the FDIC in monitoring savings bank capital in relation to our guidelines for capital adequacy.

It is estimated that these information collections will create an annual reporting burden of 200 hours for all 464 mutual savings banks.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by a Bank Holding Company; Suburban Bancorp, Inc.

The company listed in this notice has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Board of Governors of the Federal Reserve System (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Suburban Bancorp, Inc.*, Palatine, Illinois; to acquire 98 percent or more of the voting shares of Suburban Bank of Barrington, Barrington, Illinois. This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Chicago. Comments on this application must be received not later than March 24, 1983.

Board of Governors of the Federal Reserve System, February 24, 1983.

William W. Wiles,

Secretary of the Board.

[FR Doc. 83-5202 Filed 3-1-83; 8:45 am]

BILLING CODE 6210-01-M

BankEast Corp.; Proposed Acquisition of The Wolfeboro Savings Bank

BankEast Corporation, Manchester, New Hampshire, has applied, pursuant to sections 4(c)(8) and 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and §§ 1842(a)(3)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Wolfeboro Savings Bank, Wolfeboro, New Hampshire.

Applicant states that the proposed subsidiary would engage in the activities of a guaranty savings bank. These activities would be performed from offices of Applicant's subsidiary in Wolfeboro, New Hampshire, and the geographic areas to be served are the towns of Wolfeboro, Tuftonboro, and Ossipee, New Hampshire and the surrounding area.

Interested persons are invited to comment on the application. Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Boston.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., not later than March 24, 1983.

Board of Governors of the Federal Reserve System, February 24, 1983.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Formation of Bank Holding Companies; First Guaranty Corp. et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that applications. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, indentifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Cleveland (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *First Guaranty Corporation*, Martin, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of The First Guaranty Bank, Martin, Kentucky. Comments on this application must be received not later than March 22, 1983.

B. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *South Taylor County Bancshares, Inc.*, Tuscola, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of First State Bank in Tuscola, Tuscola, Texas.

Comments on this application must be received not later than March 21, 1983.

Board of Governors of the Federal Reserve System, February 24, 1983.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies, Proposed De Novo Nonbank Activities, Fleet Financial Group, Inc., et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and §225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. Federal Reserve Bank of Boston (Richard E. Randall, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Fleet Financial Group, Inc.*, Providence, Rhode Island (mortgage banking and insurance agency activities; Maine): To engage through its direct subsidiary, Fleet Mortgage Corp. (formerly Mortgage Associates, Inc.), in the origination, sale and servicing of residential mortgage loans, commercial mortgage loans and loans secured by junior liens on residential real estate and the sale of mortgage life and mortgage accident and health insurance directly related to extensions of credit. These activities would be conducted from a new office to be located in South Portland, Maine serving the State of Maine. Comments on this application must be received not later than March 23, 1983.

B. *Federal Reserve Bank of Cleveland* (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *PNC Financial Corp.*, Pittsburgh, Pennsylvania (financing activities; Colorado): To engage through its subsidiary, The Kissell Company, in making or acquiring and servicing for its own accounts and/or the accounts of others, loans and other extensions of credit. These activities would be conducted from an office in Rifle, Colorado, serving the counties of Garfield and Rio Balanco, Colorado. Comments on this application must be received not later than March 22, 1983.

C. *Federal Reserve Bank of San Francisco* (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *Central Pacific Corporation*, Bakersfield, California (mortgage activities; California): To engage through its subsidiary, Bankers' Funding Corp., in making, acquiring, selling, packaging and servicing residential and commercial mortgage loans and services incidental thereto. These activities would be conducted from a *de novo* office to be established in Cupertino, California, serving Northern California. Comments on this application must be received not later than March 23, 1983.

2. *Pacific Western Bancshares*, San Jose, California (data processing activities; California, Arizona, Hawaii, Nevada, New Mexico, Oregon, Utah, Washington): To engage through a subsidiary, Pacific Western Information Systems, in providing bookkeeping or data processing services, providing and maintaining data bases and facilities for the internal operations of the holding company and its subsidiaries; storing and processing other banking, financial, or related economic data, such as payroll, accounts receivable/payable, trust and fiduciary accounting, and billing services to the holding company, its subsidiaries and correspondents and customers of those subsidiaries, non-affiliated banks, thrifts and others on an indirect and direct contract basis; providing other data processing and transmission services, facilities, data bases or access to such services, facilities or data bases by any technologically feasible means for banking, financial or economic data; selling by-products of permissible data processing activities; providing excess capacity on data processing and transmission facilities; leasing data processing and data transmission hardware and software and acting as agent, broker or advisor in obtaining or providing equipment within permissible limits and to the extent required to support the previously mentioned activities. These activities would be conducted from an office in San Jose, California, serving California, Arizona, Hawaii, Nevada, New Mexico, Oregon, Utah and Washington. Comments on this application must be received not later than March 18, 1983.

3. *Rainier Bancorporation*, Seattle, Washington (lending and insurance activities; Washington State): To establish a *de novo* office of Rainier Industrial Loan Company and a *de novo* office of Rainier Credit Company at a shared location in Renton, Washington. The activities in which the *de novo* office of Rainier Credit Company proposes to engage are: the making or acquiring, for its own account or for the account of others, loans and other extensions of credit, including the making of consumer installment loans, purchasing consumer installment sales finance contracts, and making of loans to small businesses; and acting as insurance agent or broker with regard to credit life and disability insurance relating only to extensions of credit by Rainier Credit Company, secured or unsecured, with the limitation that the initial amount of such insurance issued with respect to any debtors may at no time exceed the amount owned by debtors and with regard to consumer credit related property and casualty insurance on personal property subject to security agreements with Rainier Credit Company. The *de novo* office of Rainier Industrial Loan proposes to engage in operating as an office of an industrial loan company in the manner authorized by state law, including the following activities: the making or acquiring, for its own account or for the account of others, loans and other extensions of credit, including the making of consumer installment loans, purchasing consumer installment sales finance contracts, and making of loans to small businesses; and acting as insurance agent or broker with regard to credit life and disability insurance relating only to extensions of credit by Rainier Industrial Loan Company, secured or unsecured, with the limitation that the initial amount of such insurance issued with respect to any debtors may at no time exceed the

amount owned by debtors and with regard to consumer credit related property and casualty insurance on personal property subject to security agreements with Rainier Industrial Loan Company. Both Rainier Industrial Loan Company and Rainer Credit Company have engaged in the insurance activities proposed in this notice prior to May 1, 1982, and thereby qualify for the grandfather privileges of section 601(D) of the Garn-St Germain Act. Comments on this application must be received not later than March 22, 1983.

4. *U.S. Bancorp*, Portland, Oregon (consumer loan activities; Citrus Heights, Concord and Stockton, California): To engage through its existing indirect subsidiary, Bancorp Credit Services, Inc., in the making, acquiring, and servicing of loans and other extensions of credit, either secured or unsecured, for its own account or the account of others, including, but not limited to consumer loans, installment sales contracts and other forms of receivables; making investments and acting as insurance agent with regard to credit life and disability insurance, property and casualty insurance, solely in connection with extensions of credit by Bancorp Credit Services, Inc. Bancorp is in conformance with the provisions of §§ 225.4(a)(1), 225.4(a)(3), and 225.4(a)(9)(i) of Regulation Y. These activities will be conducted from offices located in Citrus Heights, Concord, and Stockton, California. The primary service areas to be served by the proposed offices will be surrounding segments of Citrus Heights, Concord and Stockton, California. Comments on this application must be received not later than March 23, 1983.

Board of Governors of the Federal Reserve System, February 22, 1983.

William W. Wiles,

Secretary of the Board.

National Institutes of Health

Respiratory and Applied Physiology Study Section; Notice of Establishment

Pursuant to the Federal Advisory Committee Act of October 6, 1972, Pub. L. 92-463, 86 Stat. 770-776, the National Institutes of Health announces the establishment of the Respiratory and Applied Physiology Study Section by the Secretary, Department of Health and Human Services.

The Respiratory and Applied Physiology Study Section shall advise the Secretary, the Assistant Secretary for Health, and the Director, National Institutes of Health, regarding applications for grants-in-aid for research and research training awards and proposals relating to lung function in the normal and diseased states, exercise, muscle function, and environmental influences on the body.

Authority for this committee shall terminate on August 31, 1984, unless the Secretary, HHS, formally determines that continuance is in the public interest.

Dated: February 10, 1983.

James B. Wyngaarden,

Director, National Institutes of Health.

Public Health Service

National Toxicology Program; Availability of Carcinogenesis Report on Bis (2-Chloro-1-Methylethyl) Ether

The HHS' National Toxicology Program today announces the availability of a Technical Report on a carcinogenesis study of bis(2-chloro-1-methylethyl) ether (BCMEE), also known as bis(2-chloroisopropyl) ether (BCPE), a betahaloether that has been used extensively in paint and varnish removers, spotting agents, and cleaning solutions. BCMEE has also been used as an intermediate in the manufacture of dyes, resins, and pharmaceuticals and has been added to soap solutions to aid in textile cleaning.

Bis(2-chloro-1-methylethyl) ether (containing about 30 per cent 2-chloro-1-methylethyl(2-chloropropyl) ether) was

administered in corn oil by gavage to B6C3F$_1$ mice (0, 100, or 200 mg/kg) five times a week for 103 weeks. Under these conditions bis(2-chloro-1-methylethyl) ether was carcinogenic for B6C3F$_1$ mice causing increased incidences of alveolar/bronchiolar adenomas in males and females and hepatocellular carcinomas in males. In addition, the occurrence of a low incidence of squamous cell papillomas or carcinomas in the stomach or forestomach of females (a rare tumor in B6C3F$_1$ mice) was probably associated with the administration of bis(2-chloro-1-methylethyl] ether.

Copies of this report—*Carcinogenesis Bioassay of Bis(2-chloro-1-methyl-ethyl) Ether (gavage study)* (T.R. 238)—are available without charge by writing to: NTP Public Information Office, M.D. B2-04, Box: 12233, Research Triangle Park, NC 27709. Telephone: (919) 541-3991. FTS 629-3991.

Dated: February 23, 1983.

David P. Rall,

Director, National Toxicology Program.

[FR Doc. 83-5218 Filed 3-1-83; 8:45 am]

BILLING CODE 4140-01-M

National Toxicology Program; Availability of Carcinogenesis Report on Zearalenone

The HHS' National Toxicology Program today announces the availability of a Technical Report on a carcinogenesis study of zearalenone, a veterinary non-steroidal anabolic estrogenic compound and naturally-occurring mycotoxin which, under some climatic conditions, may contaminate barley, oats, wheat, and corn.

Zearalenone was given in the diets of F344/N rats (0, 25, or 50 ppm) and of B6C3F$_1$ mice (0, 50, or 100 ppm) for 103 weeks. Under these conditions, there was no evidence of carcinogenicity in male or female F344/N rats. For B6C3F$_1$ mice there was some evidence of carcinogenicity—increased incidences of pituitary gland adenomas in male and female mice, and increased incidences of hepatocellular adenomas in female mice.

Copies of this report—*Carcinogenesis Bioassay of Zearalenone in F344/N Rats and B6C3F$_1$ Mice (Feed Study)* (T.R. 235)—are available without charge by writing to: NTP Public Information Office, M.D. B2-04, Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541-3991. FTS 629-3991.

Dated: February 23, 1983.

BILLING CODE 4140-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[F-14839-A]

Alaska Native Claims Selection

On November 14, 1974, Kongnikilnomuit Yuita Corporationat, for the Native village of Bill Moore's, filed selection application F-14839-A, as amended, under the provisions of section 12(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611) (Supp. IV, 1980), for the surface estate of certain lands in the vicinity of Bill Moore's, including lands within the Clarence Rhode National Wildlife Range (Public Land Order (PLO) 4584) 34 FR 1143.

On December 2, 1980, Sec. 303(7) of Pub. L. 96-487, the Alaska National Interest Lands Conservation Act, established the Yukon Delta National Wildlife Refuge consisting of the Clarence Rhode National Wildlife Range (PLO 4584) and additions thereto.

Kongnikilnomuit Yuita Corporationat, in its November 14, 1974 application, excluded several bodies of water. Because certain of these water bodies have been determined to be nonnavigable, they are considered to be public lands withdrawn under section 11(a)(1) and available for selection by the village pursuant to section 12(a) of the Alaska Native Claims Settlement Act. Section 12(a) and 43 CFR 2651.4 (b) and (c) provide that a village corporation must, to the extent necessary to obtain its entitlement, select all available lands within the township or townships within which the village is located, and that additional lands selected shall be compact and in whole sections. The regulations also provide that the area selected will not be considered to be reasonably compact if it excludes other lands available for selection within its exterior boundaries. For these reasons, the water bodies which were improperly excluded in the November 14, 1974 application are considered selected by Kongnikilnomuit Yuita Corporationat.

As to the lands described below, selection application F-14839-A, as amended, is properly filed and meets the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to section 12(a) of ANCSA, aggregating approximately 64,068 acres, is considered proper for acquisition by Kongnikilnomuit Yuita Corporationat and is hereby approved for conveyance pursuant to section 14(a) of ANCSA:

Lands Outside Public Land Order 4584

(Clarence Rhode National Wildlife Range)

Now known as the Yukon Delta National Wildlife Refuge.

Seward Meridian, Alaska (Unsurveyed)

T. 33 N., R. 74 W.,
Secs. 4 to 9, inclusive.
Containing approximately 3,821 acres.

T. 33 N., R. 70 W.,
Sec. 7, that portion within PLO 4584;
Sec. 18, that portion within PLO 4584, excluding Native allotment F–17085 Parcel B.

Containing approximately 300 acres.

T. 33 N., R. 77 W.,
Secs. 1 and 13, those portions within PLO 4584;
Sec. 24, that portion within PLO 4584, exluding Native allotment F–16735;
Sec. 25, that portion within PLO 4584.

Containing approximately 1,375 acres.
Aggregating approximately 1,675 acres within PLO 4584.
Total aggregated acreage approximately 64,065 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Mangement to be navigable because they have been or could be used in connection with travel, trade and commerce, or are pending a tidal determination at the time of survey. Those water bodies are identified on the attached navigability maps, the original of which will be found in easement case file F–14639–EE.

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for the following reason: Lands are under applications pending further adjudication. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface estate of the lands described above shall contain the following reservation to the United States:

The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(f)).

There are no easements to be reserved to the United States pursuant to section 17(b) of the Alaska Native Claims Settlement Act.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official plat of survey confirming the boundary description and acreage of the lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under section 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, section 6(g))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to section 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law;

3. Requirements of section 22(g) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1621(g)), that (a) the above described lands which were, on December 18, 1971, within the boundaries of the Clarence Rhode National Wildlife Range (PLO 4584), now known as the Yukon Delta National Wildlife Refuge (Pub. L. 96–487), remain subject to the laws and regulations governing use and development of such refuge, and that (b) the right of first refusal, if said land or any part thereof is ever sold by the above named corporation, is reserved to the United States; and

4. Requirements of section 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(c) (Supp. IV, 1980)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

Kongnikilnomuit Yuita Corporationat (for the village of Bill Moore's) is entitled to conveyance of 69,120 acres of land selected pursuant to section 12(a) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is approximately 64,063 acres. The remaining entitlement of approximately 5,057 acres will be conveyed at a later date.

Pursuant to section 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate of the lands described above, excluding those lands which, on December 18, 1971, were withdrawn by PLO 4584, and which are reserved thereby as a national wildlife refuge, shall be issued to Calista Corporation when the surface estate is conveyed to Kongnikilnomuit Yuita Corporationat (for the village of Bill Moore's) and shall be subject to the same conditions as the surface conveyance, except for those provisions under section 14(c) of ANCSA; also the right to explore, develop or remove mineral materials from the subsurface estate in lands within the boundaries of the Native Village shall be subject to the consent of Kongnikilnomuit Yuita Corporationat. This conveyance to Calista Corporation will include the subsurface estate of those lands outside of PLO 4584, which were withdrawn, subject to valid existing rights, as the Yukon Delta National Wildlife Refuge by Pub. L. 96–487, on December 2, 1980. Section 12(a)(1) of ANCSA provides that when a village corporation selects the surface estate of lands within the National Wildlife Refuge System, the regional corporation may make selections of the subsurface estate, in an equal acreage, from other lands withdrawn by section 11(a) within the region. The total amount of wildlife refuge system lands withdrawn prior to December 18, 1971 which have been approved for conveyance to Kongnikilnomuit Yuita Corporationat is approximately 1,675 acres, which is less than the 69,120 acres permitted by section 12(a)(1) of ANCSA.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week

for four (4) consecutive weeks, in The Tundra Drums.

Any party claiming property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E, as revised. However, pursuant to Pub. L. 96–487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision by personal service or certified mail, return receipt requested, shall have thirty days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign their return receipt and parties who received a copy of this decision by regular mail which is not certified, return receipt requested, shall have until April 1, 1983 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

Kongnikilnomuit Yuita Corporationat, Bill Moore's Slough, Via Kotlik, Alaska 99620

Calista Corporation, 516 Denali Street, Anchorage, Alaska 99501.

[illegible],
Acting Chief, Branch of ANCSA Adjudication.

Correction

In FR Doc. 83–3803 beginning on page 6789, in the issue of Tuesday, February 15, 1983, second column, in the land description, the second line should read: "Sec. 8, N½SE¼."

BILLING CODE 1505-01-M

Minerals Management Service

Outer Continental Shelf Mid-Atlantic; Proposed Oil and Gas Lease Sale No. 76; Correction

Notice is hereby given of corrections to the Proposed Notice of Sale appearing in the **Federal Register** of December 23, 1982, at 47 FR 57408–57430. There has been no increase in the area of the proposed sale or in specific blocks over what was announced in a December 20, 1982, letter to the Governors of the affected States. Listed on page 57417, under Official Protraction Diagram No. NJ 18–8, Chincoteague, are block numbers 28–41 and 213–217. These block numbers should be changed to 36–41 and 212–217 respectively. Listed on page 57421 under 13(a), Official Protraction Diagram No. NJ 18–8, Chincoteague, are block numbers 86–85. These block numbers should be changed to 80–85. Also on page 57421, a block listing did not print properly: Under Official Protraction Diagram No. NJ 19–1, Block Canyon, the last block numbers should read 406–400.

On page 57423, under Stipulation No. 2, the first line should read, "to be included in all leases resulting from this sale for the following blocks:"; the word "*except*" has been deleted. Listed on page 57426 under Stipulation No. 5, Official Protraction Diagram No. NJ 18–8, Chincoteague, are block numbers 213–217. These block numbers should be changed to 212–217.

In the fourth paragraph on page 57429, under section 14, Information to Lessees, is a listing of block numbers which were offered in Sale No. 59 and reoffered in Sale No. RS–2, but were not leased. The following is an expanded listing reflecting block numbers which were previously offered.

BILLING CODE 4310-MR-M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 367]

Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATES: Protests are due within 154 days of publication in the Federal Register.

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway (202) 275-7278; or Tom Smerdon (202) 275-7277.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirement of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be constued to mean that the Commisson has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Sub No.	Name of Railroad, contract No., and specifics	Review Board [1]	Decided date
817	Southern Pacific Transportation Co., ICC-SP-C-0275, (Petroleum coke)	1	2-23-83

BILLING CODE 7035-01-M

[No. MC-F-15121]

Motor Carriers; Greentree Transportation Company—Purchase Exemption—Midamerican Freight, Inc.; Decision

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: Pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures—Handling Exemptions Filed by Motor Carriers*, 367 I.C.C. 113 (1982), Greentree Transportation Company (Greentree) (No. MC-158698), L. B. Foster Company (Foster) (of which Greentree is a wholly owned subsidiary), and Midamerican Freight, Inc. (Midamerican) (No. MC-160960), seek an exemption from the requirement under section 11343 of prior regulatory approval for the purchase by Greentree of the operating rights of Midamerican.

Note.—A temporary authority (TA) application has been filed.

DATES: Comments must be received within 30 days after the date of publication in the Federal Register.

ADDRESSES: Send comments to:

(1) Motor Section, Room 2378, Interstate Commerce Commission, Washington, DC 20423

and

(2) Petitioner's representative, Anthony E. Young, Ltd., 29 South LaSalle Street, Suite 350, Chicago, IL 60603

Comments should refer to No. MC-F-15121.

FOR FURTHER INFORMATION CONTACT: Joyce Lannon, (202) 275-7992.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: February 23, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[No. MC-F-15127; OP4F-104]

Motor Carriers; Roadway Express, Ltd.—Purchase Exemption—Harkema Express Lines, Limited

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: Pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures For Handling Exemptions Filed by Motor Carriers*, 367 I.C.C. 113 (1982), Roadway Express, Ltd. (Roadway), which holds no authority, and Harkema Express Lines, Limited (Harkema) (MC-140611) seek an exemption from the requirement of prior regulatory approval for the purchase by Roadway of all of Harkema's operating rights. Roadway Services, Inc., a non-carrier holding company, which controls Roadway Express, Ltd. and also controls Roadway Express, Inc. (MC-2202), seeks authority to acquire control of said rights through the transaction. An application to temporarily manage Harkema has been filed.

DATE: Comments must be received within 30 days after the date of publication in the Federal Register.

ADDRESSES: Send comments to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's representative, William O. Turney, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20814

Comments should refer to No. MC-F-15127.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275-7977.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free

of charge by contacting petitioner's representatives. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: February 24, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

In the matter of Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers.

The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated in the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a major common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 2, (202) 275-7030.

Volume No. OP2-076

Decided: February 23, 1983.

By the Commission, Review Board No. 1, members Parker, Chandler, and Fortier.

MC 5723 (Sub-12), filed January 5, 1983. Applicant: VANGUARD INTERSTATE TOURS, INC., 1 Westerly Rd., Ossining, NY 10562. Representative: Jeremy Kahn, 1511 K St., NW., Suite 733 Investment Bldg., Washington, DC 20005, 202-783-3525. Over regular routes, transporting *passenger (1)* between North Salem and New York, NY: from North Salem over NY Hwy 121 to Cross River, then over NY Hwy 35 to junction NY Hwy 124, near South Salem, then over NY Hwy 124 to Pound Ridge, then over NY Hwy 172 to Bedford Village, then over NY Hwy 22 to junction Interstate Hwy 684, then over Interstate Hwy 684 to junction Interstate Hwy 287, then over Interstate Hwy 287 to junction Interstate Hwy 87, then over Interstate Hwy 87 to the exit at 138th St. in New York, NY, then west on 138th St over the Madison Ave Bridge to 5th Ave, then south on 5th Ave to intersection with Broadway at 23rd St, then south on Broadway to Battery Park, then over Greenwich St to intersection Trinity Place, then over Trinity Place to intersection with Church St, to intersection Sixth Ave, then over Sixth Ave to intersection 23rd St, then over 23rd St to intersection Madison Ave, then over Madison Ave to 138th St, and return to North Salem over the same route beginning at Interstate Hwy 87, (2) between Croton Falls, NY and junction NY Hwy 22 and Interstate Hwy 684: from Croton Falls over NY Hwy 22 to Purdys, NY, then over NY Hwy 116 to junction US Hwy 202, then over US Hwy 202 to Somers, then over NY Hwy 100 to junction NY Hwy 138, then over NY Hwy 138 to Golden's Bridge, then over NY Hwy 22 to junction NY Hwy 35, then over NY Hwy 35 to junction NY Hwy 117, then over NY Hwy 117 to junction NY Hwy 120, then over NY Hwy 120 to Chappaqua, then over NY Hwy 120 to

junction NY Hwy 22, then over NY Hwy 22 to junction Interstate Hwy 684, and return over the same route, (3) between Cross River and Bedford Village, NY, over NY Hwy 121, and (4) serving all intermediate points on routes (1) through (3) above.

Note.—Applicant seeks to provide regular-route surface only in interstate or foreign commerce.

MC 150812 (Sub-722), filed January 31, 1983. Applicant: NORTH AMERICAN VAN LINES, INC. 5001 U.S. Hwy 30 West, P.O. Box 988, Fort Wayne, IN 46801. Representative: David D. Bishop (same address as applicant), 219–429–2110. Transporting *household goods*, between points in the U.S., under continuing contract(s) with Standard Oil of Indiana, of Chicago, IL.

MC 149822 (Sub-4), filed January 31, 1983. Applicant: VAUGHAN CARTAGE COMPANY, INC., 116 Cooley Industrial Park, LaGrange, GA 30241. Representative: W. H. Tomlinson, 1001 19th St., Suite B, Columbus, GA 31901, 404–322–6424. Transporting *carpet, carpet tile and carpet roll goods*, between points in Troup County, GA, on the one hand, and, on the other, ports of entry on the international boundary line between the United States and Canada, under continuing contract(s) with Interface Flooring Systems, Inc., of LaGrange, GA, and its wholly owned subsidiary Interface Flooring Systems, (Canada), Inc., of Ontario Canada.

MC 156173 (Sub-1), filed January 10, 1983. Applicant: ARNIE M. ARNDO, 3302 Ivy, Rapid City, SD 57701. Representative: J. Maurice Andren, 1734 Sheridan Lake Rd, Rapid City, SD 57702, 605–343–4208. Transporting (1) as a *Common Carrier, contractors materials*, between points in SD and WY, on the one hand, and, on the other, points in IA, MN, and ND; and (2) a *Contract Carrier, general commodities* (except classes A and B explosives and household goods), between points in the U.S., under continuing contract(s) with (a) Hills Materials Company, of Rapid City, SD, and (b) Hubbard Milling Company, of Mankato, MN.

MC 139823 (Sub-1), filed February 3, 1983. Applicant: ROBERT AND GLORIA ROBERTS, d.b.a. SIERRA CORRUGATED, 157 Clover Lane, Medford, OR 97501. Representative: J. Jaeger, 289 Sharp Circle, Suite 4, Roseville, CA 95678, 916–786–6018. BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

In the matter of Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 3 at (202) 275–5223.

Volume No. OP3–64

Decided: February 24, 1983.

MC 36364 (Sub-16), filed February 3, 1983. Applicant: MISSOURI, KANSAS & OKLAHOMA COACH LINES, INC., d.b.a. M. K. & O. LINES, 321 S. Cincinnati St., Tulsa, OK 74103. Representative: Robert W. BILLING CODE 7035–01–M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note:—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–241

The following applications were filed in Region 4: Send protests to: ICC, Complaint and Authority Branch, P.O. Box 2980, Chicago, IL 60604.

[Volume No. OP3-SCFC-83]

Motor Carriers; Finance Applications

Decided: February 23, 1983.

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board Number 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Please Direct Status Inquiries To Team 3, (202) 275-5223.

MC-FC-81099. By decision issued February 23, 1983 under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 2 approved the transfer to ROBERT NORTON, Jefferson, SD, of Certificate No. MC-59304 issued January 11, 1972, to DEAN HOFFMAN, Jefferson, SD, authorizing the transportation of *general commodities* (except those of unusual value, classes A and B explosives, household goods, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between points in Big Sioux, Brule, Civil Bend, Elk Point, Jefferson, Richland, Sioux Valley and Spink Townships, Union County, SD, and those in Fairview and Praire Center Townships, Clay County, SD, on the one hand, and, on the other, Sioux City, IA. No temporary authority application has be filed. Representative: ROBERT NORTON, Box 388, Jefferson, SD 57038, (605) 966-5898.

[Finance Docket No. 28640 (Sub-8)]

Rail Carriers; Chicago, Milwaukee, St. Paul and Pacific Railroad Co.—Reorganization—Acquisition by Grand Trunk Corporation; Availability of Market Impact Analyses

February 24, 1983.

The Trustee of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor, (MILW) has filed with its Reorganization Court the Market Impact Analyses and related verified statements that will be Appendix III to its Amended Plan of Reorganization. Under the Amended Plan, Grand Trunk Corporation will acquire control of the reorganized MILW. The Reorganization Court referred the Market Impact Analyses and testimony to the Commission in advance of referring the Amended Plan and other supporting documentation, which are due to be filed with the Commission by March 31, 1983.

This notice does not constitute a formal acceptance of the Analyses under the Commission's consolidation procedures in 49 CFR Part 1180. We will publish notice when the Amended Plan is formally accepted. Appropriate procedures will be established to

facilitate discovery, and a procedural schedule will be set for filing comments and responses to the Amended Plan.

Persons interested in obtaining advance copies of the Market Impact Analyses and testimony should contact either:

Robert H. Wheeler, Isham, Lincoln & Beale, 3 First National Plaza, Chicago, IL 60602

or

Basil Cole, Robert P. vom Eigen, Dechart, Price & Rhoads, 1730 Pennsylvania Avenue, NW., Washington, DC 20006

BILLING CODE 7035-01-M

[Finance Docket No. 30107]

Rail Carriers; Western Maryland Railway Company—Abandonment Exemption—in Tucker County, WV

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from the requirement of prior approval under 49 U.S.C. 10903 *et seq.* the abandonment by the Western Maryland Railway Company of a 1.59-mile segment of track between Thomas and Coketon, in Tucker County, WV, subject to the standard labor protective conditions.

DATES: This exemption will be effective on April 1, 1983. Petitions to stay the effectiveness of the decision must be filed by March 14, 1983, and petitions for reconsideration must be filed by March 22, 1983.

ADDRESSES: Send pleadings to:

(1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423.

(2) Petitioners' representative: Rene J. Gunning, Western Maryland Railway Company, Suite 2204, 100 North Charles Street, Baltimore, MD 21201.

Pleadings should refer to Finance Docket No. 30107.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision contact: TS Infosystems, Inc., Room 2227 12th and Constitution Ave., NW, Washington, DC 20423 (202) 289-4357—DC metropolitan area (800) 424-5403—Toll free for outside the DC area.

Decided: February 23, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison.

Correction

In FR Doc. 83-2849 beginning on page 4563 in the issue of Tuesday, February 1, 1983, make the following correction:

On page 4564, middle column, the second paragraph under **Volume No. OP-2-039, Missouri Pacific Truck Lines, Inc.,** now designated "MC 69734 (Sub-76)" should have been designated "MC 69723 (Sub-76)".

BILLING CODE 1505-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Correction

In FR Doc. 83-3282 beginning on page 5813 in the issue of Tuesday, February 8, 1983, make the following corrections:

1. On page 5820, middle column, the first paragraph under **Volume No. OP5-35, Atlas Van Lines, Inc.,** now designated "MC 79658 (Sub-6)" should have been designated "MC 79658 (Sub-46)".

2. On the same page, third column, the third complete paragraph, **Trenton Truck Leasing Service, Inc.,** the MC number was omitted. It should have read "MC 165719".

3. On page 5821, first column, fourth complete paragraph, **Cargo Express Co., Inc.,** in the 10th line, "Ban Zandt" should have read "Van Zandt", and in the 12th line "BL should have read "FL".

BILLING CODE 1505-01-M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Commission on Security and Economic Assistance; Establishment

In order to establish the Commission on Security and Economic Assistance the Federal Advisory Committee Act, as amended, 5 U.S.C. App. the following determination and description of the nature and purpose are hereby published:

1. *Determination.* M. Peter McPherson, as the Acting Director of the International Development Cooperation Agency, and the Administrator for the Agency for International Development, signed the following determination, dated January 26, 1983:

The Commission on Security and Economic Assistance is needed to make recommendations concerning the use of adequate resources for the conduct of U.S. foreign policy.

Accordingly, I hereby determine pursuant to the provisions of the Federal Advisory Committee Act that establishment of the commission is in the public interest.

2. *Description.* The Commission shall be composed of not more than twenty-five members appointed by the Secretary of State. The Commission shall review relevant analyses of the current and long-term trends in the foreign assistance program and make recommendations on these matters.

The Commission shall terminate November, 1983, unless extended.

For further information contact: Mr. Jan W. Miller, Office of the General Counsel (202) 632-8428.

Dated: February 22, 1983.

Jan W. Miller,

Assistant General Counsel.

BILLING CODE 6116-01-M

Agency for International Development

Joint Committee on Agricultural Research and Development of the Board for International Food and Agricultural Development; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the third meeting of the Joint Committee on Agricultural Research and Development (JCARD) of the Board for International Food and Agricultural Development (BIFAD) on March 17 and 18, 1983.

The purpose of the meeting is to assist AID in implementing the components of the Title XII program by providing a two way communications link for concerns of AID and concerns of the universities. The meeting will be addressing several of the issues identified in JCARD's "Program of Work Plan for 1983."

The Executive Committee will meet from 9:00 a.m. to 12:00 noon on March 17; and the full JCARD will meet from 1:00 p.m. to 5:00 p.m. on March 17 and from 9:00 a.m. to 12:00 noon on March 18. The meeting will be held in the Holiday Inn, 1850 N. Fort Myer Drive, Rosslyn, Virginia. The meeting is open to the public. Any interested person may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee, and to

the extent the time available for the meeting permits.

Dr. John Stovall, BIFAD Support Staff, is the designated A.I.D. Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, BIFAD Support Staff, Washington, D.C. 20523 or telephone him at (202) 632–8532.

Dated: February 25, 1983.

John Stovall,

A.I.D. Advisory Committee Representative, Joint Committee Agricultural Research and Development, Board for International Food and Agricultural Development.

BILLING CODE 6116-01-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-138]

Certain Automatic Turret Rewinders; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on January 24, 1983, under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of Compensating Tension Controls, Inc., 11 York Avenue, West Caldwell, New Jersey 07006. The complaint alleges unfair methods of competition and unfair acts in the importation of certain automatic turret rewinders into the United States, or in their sale, by reason of alleged infringements of claims 1, 2, 3, and 6 of U.S. Letters Patent 3,930,620. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure and industry, efficiently and economically operated, in the United States.

The complainant requests the Commission to institute an investigation and, after a full investigation, to issue a permanent exclusion order and a permanent cease and desist order.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on February 17, 1983, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation is instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain automatic turret rewinders into the United States, or in their sale, by reason of alleged infringement of claims, 1, 2, 3, and 6 of U.S. Letters Patent 3,930,620, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—

Compensating Tension Controls, Inc., P.O. Box 1137, 11 York Avenue, West Caldwell, New Jersey 07006.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

IMC America, Inc., 128 East King Street, York, Pennsylvania 17403;

IMC Trading B.V. Hogeweyselaan, 73, 1380 Ab, Weesp, Netherlands; or

Arabin GmbH, Biengartenweg 19, 6306 Langoons-Cleeberg, Federal Republic of Germany.

(c) Samuel Bailey, Jr., Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., room 126, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with section 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to § 201.16(d) and 210.21(a) of the rules (19 CFR 201.15(d) and 19 CFR 210.21(a)), such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., room 156, Washington, D.C. 20436, telephone 202–523–0471.

FOR FURTHER INFORMATION CONTACT: Samuel Bailey, Jr., Esq., Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202–523–1273.

By order of the Commission.

Issued: February 23, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-132]

Certain Hand-Operated, Gas-Operated, Welding, Cutting, and Heating Equipment and Component Parts Thereof; Extension of Time for Commission Decision on Whether To Review Initial Determination

AGENCY: International Trade Commission.

ACTION: Extension of time for Commission decision on whether to review initial determination in the

above-referenced investigation.

SUPPLEMENTARY INFORMATION: On February 7, 1983, the presiding officer issued an initial determination denying complainant Victor Equipment Co.'s request for temporary relief in the above-referenced investigation. On February 18, 1983, complainant Victor Equipment Co. and the Commission investigative attorney filed petitions for review of the initial determination.

Pursuant to §§ 201.14(b) and 210.53(b)(2) of the Commission's Rules of Practice and Procedure, the Commission has extended the time for a Commission decision on whether to grant or deny review by fifteen (15) days. *See* 19 CFR 201.14(b); 47 FR 25137 (June 10, 1982), to be codified at 19 CFR 210.54(b). The new deadline for Commission action is March 9, 1983.

Copies of the presiding officer's initial determination, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

BILLING CODE 7020-02-M

[Investigations Nos. 731–TA–118 and 119 (Preliminary)]

Certain Lightweight Polyester Filament Fabric From Japan and the Republic of Korea

Determinations

On the basis of the record [1] developed in the subject investigations, the Commission unanimously determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury [2] by reason of imports from Japan and the Republic of Korea of certain lightweight polyester filament fabric [3] which is alleged to be sold in the United States at less than fair value (LTFV).

Background

On January 4, 1983, counsel for the American Textile Manufacturers Institute, Inc. and certain member companies filed a petition with the U.S. International Trade Commission and the U.S. Department of Commerce alleging that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry is materially retarded by reason of imports from Japan and the Republic of Korea of certain lightweight polyester filament fabric which is allegedly being sold at LTFV.

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C. and by publishing the notice in the **Federal Register** on January 12, 1983 (48 FR 1359). The conference was held in Washington, D.C. on January 26, 1983, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its report on the investigations to the Secretary of Commerce on February 18, 1983. A public version of the Commission's report, *Certain Lightweight Polyester Filament Fabric from Japan and the Republic of Korea* (investigations Nos. 731–TA–118 and 119 (Preliminary), USITC Publication 1350, 1983), contains the views of the Commissioners and information developed during the investigations.

By Order of the Commission.

Issued: February 18, 1983.

Kenneth R. Mason,

Secretary.

[FR Doc. 83-5277 Filed 3-1-83; 8:45 am]

BILLING CODE 7020-02-M

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] Commissioner Haggart determines that there is a reasonable indication of material injury and therefore does not reach the issue of reasonable indication of threat of material injury.

[3] For the purposes of this determination the term "certain lightweight polyester filament fabric" means polyester fabric, other than fabric of polyester strip, provided for in items 338.5009, 338.5011, 338.5012, 338.5013, and 338.5015, of the Tariff Schedules of the United States Annotated.

[Investigation 701–TA–179 through 181 (Final)]

Hot-Rolled Stainless Steel Bar, Cold-Formed Stainless Steel Bar, and Stainless Steel Wire Rod From Brazil

AGENCY: International Trade Commission.

ACTION: Suspension of final countervailing duty investigation.

EFFECTIVE DATE: February 7, 1983.

SUMMARY: On January 27, 1983, the United States Department of Commerce suspended its countervailing duty investigation on hot-rolled stainless steel bar, cold-formed stainless steel bar, and stainless steel wire rod (certain stainless steel products) from Brazil (48 FR 4703, February 2, 1983). The basis for the suspension is an agreement by the government of Brazil to offset completely the amount of the net subsidy with an export tax applicable to the subject merchandise. Accordingly, the United States International Trade Commission hereby gives notice of the suspension of its countervailing duty investigation involving the subject certain stainless steel products, provided for in items 606.90, 607.26, and 607.43 of the Tariff Schedules of the United States, from Brazil (investigation No. 701–TA–179 through 181 (Final)), and cancellation of the public hearing scheduled for February 14, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Bill Schechter (202–523–0300), Office of Investigations, U.S. International Trade Commission.

This notice is published pursuant to § 207.40 of the Commission's Rules of Practice and Procedure (19 CFR 207.40).

By order of the Commission.

Issued: February 25, 1982.

BILLING CODE 7020-02-M

[Investigations Nos. 701-TA-195 and 196 (Final)]

Stainless Steel Sheet, Strip, and Plate From the United Kingdom

AGENCY: International Trade Commission.

ACTION: Institution of final countervailing duty investigations and scheduling of a hearing to be held in connection with these investigations.

EFFECTIVE DATE: February 24, 1983.

SUMMARY: As a result of affirmative preliminary determinations by the U.S. Department of Commerce that there is a reasonable basis to believe or suspect that the Government of the United Kingdom is providing directly or indirectly, subsidies to the manufacturers, producers or exporters in the United Kingdom of certain steel products within the meaning of section 701 of the Tariff Act of 1930 (19 U.S.C. 1671), the United States International Trade Commission hereby gives notice of the institution of the following investigations under section 705(b) of the Act (19 U.S.C. 1671(b)) to determine whether an industry in the United States is materially injured or is threatened with material injury or the establishment of an industry in the United States is materially retarded, by reason of allegedly subsidized imports from the United Kingdom of the specified merchandise:

Stainless steel sheet and strip, provided for in items 607.7610, 607.9010, 607.9020, 608.4300, and 608.5700 of the tariff Schedules of the United States Annotated (TSUSA) (investigation No. 701–TA–195 (Final)),

Stainless steel plate, provided for in TSUSA items 607.7605 and 607.9005 (investigation No. 701–TA–196 (Final)).

Unless the investigations are extended, the Department of Commerce will make its final subsidy determinations on or before April 20, 1983, and the Commission will make its final injury determinations June 9, 1983 (19 CFR 207.25).

FOR FURTHER INFORMATION CONTACT: Mr. Stephen A. Vastagh (202–523–0283), Office of Investigations, U.S. International Trade Commission.

SUPPLEMENTARY INFORMATION:

Background.

On November 22, 1982, the Commission determined, on the basis of the information developed during the course of its preliminary investigations, that there was a reasonable indication that an industry in the United States was materially injured or threatened with material injury by reason of allegedly subsidized imports of stainless steel strip, sheet, and plate from the United Kingdom. The preliminary investigations were instituted in response to a petition filed on October 7, 1982, by members of the Tool & Stainless Steel Industry Committee (since renamed: Specialty Steel Industry of the United States), and the United Steelworkers of America.

Participation in the Investigations

Persons wishing to participate in these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than 21 days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Upon the expiration of the period for filing entries of appearance, the Secretary shall prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation, pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)). Each document filed by a party to this investigation must be served on all other parties to the investigations (as identified by the service list, and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service (19 CFR 201.16(c), as amended by 47 FR 33682, Aug. 4, 1982).

Staff Report

A public version of the staff report containing preliminary findings of fact in these investigations will be placed in the public record on April 19, 1983, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing

The Commission will hold a joint hearing in connection with these investigations and Inv. Nos. 731–TA–92 (Final), Stainless Steel Sheet and Strip from the Federal Republic of Germany, and 731–TA–95 (Final), Stainless Steel Sheet and Strip from France, beginning at 10:00 a.m. on May 4, 1983, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on April 12, 1983. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 10:00 a.m. on April 18, 1983, in room 117 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is April 20, 1983.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23, as amended by 47 FR 33682, August 4, 1982). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 (19 CFR 207.22, as amended by 47 FR 33682, August 4, 1982). Posthearing briefs must conform with the provisions of § 207.24 (19 CFR 207.24), and must be submitted not later than the close of business on May 12, 1983.

Written Submissions

As mentioned, parties to these investigations may file prehearing and posthearing briefs by the dates shown above. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations on or before May 12, 1983. A signed original and fourteen (14) true copies of each submission must be filed with the Secretary to the Commission in accordance with section 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired shall be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

For further information concerning the conduct of these investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and C (19 CFR part 207, as amended by 47 FR 33682, August 4,

1982), and part 201, subparts A through E (19 CFR part 201, and amended by 47 FR 33682, August 4, 1982).

This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Issued: February 25, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[322-154]

U.S. Trade-Related Employment; Investigation

AGENCY: International Trade Commission.

ACTION: In accordance with the provisions of section 332 of the Tariff Act of 1930 (19 U.S.C. 1332), the Commission has instituted investigation No. 332-154 for the purpose of estimating the labor content of U.S. exports and of U.S. imports. This trade-related employment will be estimated for U.S. trade with all other countries and for U.S. trade with particular trading partners, including Japan, the European Community, the newly industrializing countries, the less development countries, and the nonmarket economies.

EFFECTIVE DATE: February 22, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Donald Rousslang, Chief, Research Division, U.S. International Trade Commission, Washington, D.C. 20436 (Phone 202-523-0075).

SUPPLEMENTARY INFORMATION: *Public Hearing:* A public hearing will be held in connection with the investigation. At least 60 days prior to the hearing, a **Federal Register** notice will be posted giving the time and place. All persons shall have the right to appear by counsel or in person, to present information, and to be heard. Requests to appear at a public hearing should be filed with the Secretary, United States International Trade Commission, 701 E Street, NW., Washington, D.C. 20436.

Written Submissions: In lieu of or in addition to appearances at the public hearing, interested persons are invited to submit written statements concerning the investigation. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submission requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be ensured of consideration by the Commission, written statements should be submitted at the earliest practicable date, but no later than June 23, 1983. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: February 23, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Enrolled Actuary Examinations

AGENCY: Joint Board for the Enrollment of Actuaries.

ACTION: Proposed restructure of examination program.

SUMMARY: This notice contains a proposal by the Joint Board for the Enrollment of Actuaries to restructure its examination program. It also accords the public an opportunity to comment on the proposal.

DATE: Comments must be in writing and must be received on or before May 2, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Leslie S. Shapiro, Executive Director, Joint Board for the Enrollment of Actuaries, c/o Department of the Treasury, Washington, D.C. 20220, 202-634-5135.

SUPPLEMENTARY INFORMATION: The Joint Board for the Enrollment of Actuaries (Joint Board) is responsible for the enrollment of individuals who wish to perform actuarial services under the Employee Retirement Income Security Act of 1974 (ERISA). Consistent with that mandate, regulations governing eligibility for enrollment have been promulgated by the Joint Board. Those regulations appear at 20 CFR Part 901. An individual who wishes to be enrolled may qualify for that status by successfully completing two examinations offered by the Joint Board—one in basic actuarial mathematics and one in pension actuarial mathematics. The examinations have been offered in their current format since the year 1977.

The enactment of ERISA has resulted in the adoption of a large body of implementing regulations. In addition, new legislation affecting the private pension system has been enacted. The emergence of new laws and regulations has resulted in a belief by the Joint Board that its current examination structure is not adequate to meet its responsibility to be assured that those who qualify for enrollment have demonstrated competence in the pension law which is relevant to the performance of pension actuarial services.

The matter was discussed by the Advisory Committee on Actuarial Examinations and the public at a meeting held for that purpose on November 17, 1982. A great deal of further consideration has been given the issues involved, and it is felt that a redesign of the examination program is needed to adequately test prospective enrolled actuaries.

Executive Order 12291

Since there is no modification to regulations contemplated, Executive Order 12291 does not affect this Notice.

Regulatory Flexibility Act

Since there is no modification to regulations contemplated, the Regulatory Flexibility Act does not affect this Notice.

Drafting Information

The principal author of the notice is Mr. Leslie S. Shapiro, Executive Director, Joint Board for the Enrollment of Actuaries.

Proposed Modification

The Joint Board for the Enrollment of Actuaries has under consideration a restructuring of the examinations it offers under 20 CFR 901.13(c)(1) and 901.13(d)(1). The need for restructure is based on the emerging body of law under the Employee Retirement Income Security Act of 1974 (ERISA) and subsequent Congressional acts affecting the private pension system and the enrolled actuary's responsibilities. The current pension actuarial examination, one of the two a prospective enrolled actuary must pass in order to satisfy the knowledge requirement of eligibility for enrollment, does not provide sufficient opportunity in its syllabus to test a candidate's knowledge of pension law.

As a result of discussion at a public meeting held on November 17, 1982 and a great deal of evaluation, the Joint Board and its examination co-administrators, the Society of Actuaries and the American Society of Pension Actuaries, contemplate redesigning the pension actuarial examination to cover only pension law and its application to specific problems. The basic actuarial

examination, the other qualifying examination, also will be restructured. In addition to its including questions on compound interest and life contingencies (as it currently does), the basic examination will contain basic pension mathematics questions, i.e. questions relating to traditional pension mathematics without regard to ERISA. The basic examination would be extended in length—from four hours to at least five hours. As indicated, the subject matter would be divided between a compound interest/life contingencies segment and a basic pension mathematics segment. A minimum standard of achievement would be expected for each segment.

It is the Joint Board's current intention to offer each examination once a year—the basic examination in the spring and the pension examination in the fall. The restructured examinations would begin in 1984, and appropriate transition credit would be accorded persons who have successfully completed either the basic or pension examination before the commencement of the new examination program. The Joint Board is contemplating the following recommendations for such transition credit.

(1) A person who has successfully completed the pension actuarial examination before the onset of the restructured program (before 1984) will satisfy the basic knowledge requirement of the Joint Board's regulations if he or she passes the compound interest/life contingencies segment of the basic examination. The period for carrying the credit would extend for two years from the onset of the program (1984 and 1985).

(2) A person who has successfully completed the basic actuarial examination before the onset of the restructured program (before 1984) will satisfy the pension knowledge requirement of the Joint Board's regulations if he or she passes the basic pension mathematics segment of the basic examination and the restructured pension examination. The period for carrying the credit would extend for two years from the onset of the program (1984 and 1985).

The above is subject to approval by the respective co-administrators of the examination. The concepts of the proposal reflect the views expressed at the November 17, 1982 public meeting. However, the Joint Board continues to welcome public comment on the restructure. Views and recommendations of the public therefore are encouraged.

There will be no substantive changes to the examination program for 1983. However, candidates should note the type of calculators that will be allowed: All persons using calculators are required to utilize those which: (1) Have self-contained power sources; (2) are noiseless; (3) are non-programmable by the user; (4) have no alpha-numeric storage capability; and (5) have no printing capability.

Notices with greater detail will be furnished each examination candidate.

Winfield C. Burley,

Chairman, Joint Board for the Enrollment of Actuaries.

BILLING CODE 4000-02-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

American Iron and Steel Institute, et al.; Notice of Decision Not To Initiate an Investigation Under Section 301 of the Trade Act of 1974

On December 16, 1982, a petition for relief under Section 301 of the Trade Act of 1974 was filed by the American Iron and Steel Institute (AISI), et al. The petition alleged that the Government of Japan, by entering into a bilateral agreement to limit steel exports to the European Coal and Steel Community (ECSC) has acted inconsistently with provisions of the General Agreement on Tariffs and Trade (GATT) and the U.S.-Japan Treaty of Friendship, Commerce and Navigation. It further alleges that the Japanese industry is able to maintain a competitive advantage by reason of an undervalued yen. The petition was conditionally withdrawn on January 31, 1983 and refiled, in its original form, on February 23, 1983.

On February 25, 1983, the United States Trade Representative (USTR) decided not to initiate an investigation on the basis of the AISI petition on the grounds that information sufficient to warrant an investigation has not been presented. This decision is without prejudice to the petitioners' ability to refile a petition containing all necessary information to support the allegations contained therein.

The petition adequately demonstrates the existence of a bilateral agreement to restrain steel exports between the Government of Japan and the ECSC which, in USTR's view, is inconsistent with the provisions of Article XI of the GATT. However, the petition fails to present evidence to demonstrate that U.S. benefits arising under the GATT have been nullified or impaired by reason of the GATT-inconsistent

measure. The petition does not include specific information relating to the impact on petitioners and on U.S. commerce arising from the alleged foreign practices as required by 15 CFR 2006.1(f).

USTR is nevertheless concerned that the Japan-ECSE arrangement could cause nullification or impairment of U.S. benefits under GATT. For this reason, USTR raised this issue in recent talks with the Government of Japan. Following those talks the Government of Japan stated its intention not to cause such nullification or impairment through any government action, including the establishment of conditions of export. Both governments agreed to consult as appropriate on the full range of steel trade issues of concern to either party. The U.S. has indicated its intention to pursue its GATT rights vigorously whenever it believes our benefits are being nullified or impaired. Thus, the decision not to initiate an investigation at this time and on the basis of the information contained in the AISI petition in no way limits possible future actions in regard to the issues raised by the petition.

Joanne S. Archibald,

Chairman, Section 301 Committee.

BILLING CODE 3190-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-19632; File No. SR-NYSE-83-7]

Self-Regulatory Organizations; Proposed Rule Change; New York Stock Exchange, Inc.

Relating to the revisions to the Specialist Performance Evaluation Questionnaire ("SPEQ"), concerning the Exchange's specialist performance evaluation system and the administration of Exchange Rule 103A.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 15, 1983, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of a revised Specialist Performance Evaluation Questionnaire which is a tool used by the Exchange's Market Performance Committee in the specialist performance evaluation system of the Exchange and by the Allocation Committee as the primary criterion in the allocation decision-making process.

II. Self-Regulatory Organization's Statement of the Purposes of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to file the changes to the SPEQ which is distributed quarterly to Floor brokers who are asked to rate and provide comments on the performance of specialists with whom they deal most frequently. Information derived from the SPEQ is used both for initial stock allocations, and in reallocation proceedings pursuant to Rule 103A. In addition, information derived from the SPEQ plays an important role in assisting the Market Performance Committee and the Exchange staff in identifying areas where Floor brokers perceive specialist performance is weak and as a basis for counselling specialists in need of improvement.

The principal changes to the SPEQ concern: (1) A decrease in the number of questions from eight to five, (2) new language for each question designed to encourage brokers to support their numerical evaluations with substantive comments about individual stocks or specialists, (3) explanatory descriptions of the specialists' functions being evaluated have been added to the SPEQ, (4) an increase in the rating scale from 1 to 5 points to 1 to 7 points, with clarification as to the meaning of each numerical evaluation, (5) each question will have equal weight and the specialist unit's overall grade will be based on the combined evaluations of the responding brokers on all five questions, and (6) the format of the Questionnaire.

The statutory basis for the rule changes being requested is Section 6(b)(5) and Section 11A(a)(1)C(ii) of the Securities Exchange Act of 1934 as amended ("the Act") which, among other things, requires Exchange rules to be designed to facilitate transactions in securities, perfect the mechanism of a free and open market, and protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

This rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding; or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communication relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for

inspection and copying in the Commission's Public Reference Section, 450 5th Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication. For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 23, 1983.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-5220 Filed 3-1-83; 8:45 am]

BILLING CODE 8010-01-M

Midwest Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

February 24, 1983.

In the matter of applications of the Midwest Stock Exchange, Inc.; for unlisted trading privileges in certain securities; Securities Exchange Act of 1934.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

C3, Inc.
Common Stock, $.01 Par Value (File No. 7-5525)
Pantry Pride, Inc.
Common Stock, $.01 Par Value (File No. 7-5520)
US Air Group
Common Stock, $1 Par Value (File No. 7-5527)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 17, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

Open Commission Meeting, Thursday, March 3, 1983

February 24, 1983.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, March 3, 1983, which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street, NW., Washington, D.C.

Agenda, Item No., and Subject

General—1—*Title:* In re petition by AT&T for amendment of Part 2 of the FCC Rules and regulations. *Summary:* Commission consideration of a Report and Order to amend Parts 2 and 21 to modify the calculation of necessary bandwidths for frequency modulated microwave radio relay systems.

Common Carrier—2—*Title:* Interconnection Arrangements Between and Among Domestic and International Record Carriers: Store-and-forward and TWX/Telex Conversion (CC Docket No. 82–122). *Summary:* A June 11, 1982 Tentative Decision had proposed terms for interconnection of record carriers' store-and-forward and TWX/Telex conversion facilities, as required by the Record Carrier Competition Act of 1981, and invited comment. Subsequently, informal meetings among the carriers where held under Commission sponsorship, and thereafter further comment was accepted. The Commission will consider resolution of the store-and-forward and TWX/Telex interconnection issues.

Common Carrier—1—*Title:* Petitions for reconsideration or clarification of the Commission's Interim Order in CC Docket No. 82–122, 89 FCC 2d 928 (1982). *Summary:* The Interim Order established terms for interconnection of record carriers, as required by the Record Carrier Competition Act of 1981. The Commission will consider the issues raised by the petitions for reconsideration of that order.

Video—1—*Title:* "Application for Review" (CAR–19062–01) filed June 9, 1982, by Warner Amex Cable Communications, Inc. *Summary:* Warner Amex Cable Communications, Inc. seeks Commission review of the action taken by the Chief of the Cable Television Bureau, granting Cable Dallas, Inc. a construction permit for a CARS station.

Video—2—*Title:* "Application for Review" (CSR–1860, 1873) filed December 4, 1981 by King Broadcasting Company, licensee of Station KGW–TV (NBC, Channel 8), Portland, Oregon. *Summary:* King Broadcasting Company, licensee of Station KGW–TV (NBC, Channel 8), Portland, Oregon, seeks Commission review of the action taken by the Chief of the Cable Television Bureau in *KOIN–TV, Inc.* (Portland, Oregon), Mimeo No. 299, 50 RR 2d 715 (1981).

Video—3—*Title:* "Request for Tax Certificate" (CSR–2075) filed February 4, 1982, by Fetzer Broadcasting Company. *Summary:* Fetzer Broadcasting Company, pursuant to Section 1071 of the 1954 Internal Revenue Code, requests issuance of a tax certificate in connection with the sale of Wolverine Cablevision, Inc.

Video—4—*Title:* License Renewal Application, as supplemented, of WHYY, Inc. for noncommercial educational television Station WHYY–TV, Wilmington, Delaware. *Summary:* The Commission considers a "complaint" filed against WHYY–TV by the Broadcast and Communications Committee of the City Council of Wilmington, Delaware.

Hearing—1—Revision of § 1.115 of the Commission's Rules concerning applications for review of final Review Board Decisions.

Hearing—2—Revision of § 1.115(e)(3) of the Commission's Rules concerning applications for review of hearing designation orders issued pursuant to delegated authority.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254–7674.

Issued: February 24, 1983.

William J. Tricarico,
Secretary, Federal Communications Commission.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, March 7, 1983, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of the minutes of previous meetings.

Request for extension of time to relocate the main office:

Auburn Savings Bank, Auburn, New York, for an extension of time within which to relocate its main office from 72–74 Genesee Street to 91–95 Genesee Street, Auburn, New York.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications or requests approved by the Director or Associate Director of the Division and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: February 28, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,
Executive Secretary.

3

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, March 7, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors pursuant to sections 552b (c)(2), (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Application for assistance under section 13(c) of the Federal Deposit Insurance Act:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: February 28, 1983.

Part II

Department of Health and Human Services

Health Care Financing Administration

Medicare Program; Payment for Physician Services Furnished in Hospitals, Skilled Nursing Facilities, and Comprehensive Outpatient Rehabilitation Facilities; Final Rule With Comment Period

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 405

Medicare Program; Payment for Physician Services Furnished in Hospitals, Skilled Nursing Facilities, and Comprehensive Outpatient Rehabilitation Facilities.

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule with comment period.

SUMMARY: These rules revise the regulations that govern Medicare coverage and reimbursement for services of physicians who practice in providers such as hospitals, skilled nursing facilities (SNFs), and comprehensive outpatient rehabilitation facilities (CORFs).

The regulations incorporate our decisions on the proposed rules published October 1, 1982 (47 FR 43578), based on public comments and our analysis of those comments and the issues they raised. The regulations set forth basic criteria for distinguishing physician services reimbursable on a reasonable charge basis from physician services reimbursable only on a reasonable cost basis, establish how the amounts reimbursed will be determined on both charge and cost bases, set limits on the amounts reimbursable on a reasonable cost basis to providers for physician services, and establish more specific criteria for determining the basis and amount of payment for the services of anesthesiologists, radiologists, and pathologists.

DATES: Effective Date: These rules are effective for physician services furnished on or after May 31, 1983. (Note: 42 CFR 405.550(e), affecting agreements under which physicians assume some or all of the operating costs of a provider department, contains provisions indicating that it will not be applied until June 30, 1983, for services furnished under agreements established on or after July 1, 1966, and until March 2, 1985; for services furnished under agreements established before July 1, 1966.

COMMENT DATE: To assure consideration, comments must be received by April 1, 1983.

ADDRESS: Address comments in writing to: Health Care Financing Administration, Department of Health and Human Services, Attention: BPP–192–FC, P.O. Box 17073, Baltimore, Maryland 21235.

In commenting, please refer to file code BPP–192–FC. If you prefer, you may deliver your comments to Room 132 East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland, or to Room 309–G Humphrey Building, 200 Independence Ave., SW., Washington, D.C.

Comments will be available for public inspection, beginning approximately three weeks after publication, in Room 309–G of the Department's offices at 200 Independence Ave., S.W., Washington, D.C. on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202–245–7890).

FOR FURTHER INFORMATION, CONTACT: Leonard Peshkin (301) 594–1115.

SUPPLEMENTARY INFORMATION:

Overview

On October 1, 1982, we proposed to make significant changes in the regulations that govern Medicare payment for physician services in providers (47 FR 43578). In response to our request for public comment on these proposed regulations, we received over 3500 substantive comments, many of which were detailed and technical. This document responds to those comments, announces our decisions on the issues raised by our October 1, 1982 proposals, and sets forth final regulations that implement those decisions.

Because of the number and complexity of the comments we received on our October 1, 1982 proposals, this document is necessarily lengthy. To assist readers in referring to our discussion of specific issues, we have provided the table of contents set forth below.

We wish to note at this point that the major substantive differences between the proposed and final regulations are that: (1) These final regulations will not require the application of reasonable compensation equivalent (RCE) limits in determining Medicare Part B reasonable charge payment for physician services to patients; and (2) These final regulations will permit Part B reasonable charge payment to be made for up to four (rather than only two) concurrent anesthesia procedures. In addition, we are providing a delayed effective date for certain provisions that apply where services are furnished under lease agreements. These issues and others are discussed more fully in the following material.

I. Background

A. Statutory Authority and Requirements

The Medicare program was established in 1965 by the addition of Title XVIII to the Social Security Act. Under sections 1102 and 1871 of the Act, the Secretary has broad authority to issue regulations as necessary to carry out the efficient administration of the insurance programs under Title XVIII. This authority is exercised consistently with section 1801 of the act, which prohibits any Federal officer or employee from interfering with the practice of medicine; the manner in which medical services are provided; the selection or compensation of any officer or employee of any institution, agency, or person providing health services; or the administration or operation of any provider of health care services.

The Social Security Amendments of 1965 established two insurance programs. These are a Hospital Insurance Program, which is governed by the statutory provisions of Part A of Title XVIII (sections 1811 through 1818), and a Supplementary Medical Insurance Program, which is governed by Part B of Title XVIII (sections 1831 through 1844). Miscellaneous provisions in Part C of Title XVIII establish definitions and rules applicable to both insurance programs.

Under Part A, beneficiaries are eligible to have certain covered provider services paid for, including inpatient hospital services, as specified in section 1812 of the Act. Section 1814(b) requires that the Medicare program pay providers of services for Part A services an amount that is the lesser of the provider's customary charges for those services or the reasonable cost of those services. (This rule is subject to certain exceptions as specified in section 1814(b).) Since most providers' customary charges for services exceed the costs of the services, Medicare generally pays providers for their services on a reasonable cost basis. "Reasonable cost" is defined in section 1861(v). Section 1861(b) of the Act defines inpatient hospital services, and excludes services to outpatients and medical and surgical services of physicians from that definition.

Under Part B, beneficiaries are eligible to have medical and other health services which have been furnished to them, as specified in section 1832, reimbursed. The definition of "medical and other health services" in section 1861(s) includes outpatient hospital and CORF services and "physicians' services".

Section 1861(q) of the Act defines "physicians' services" as professional services performed by physicians (defined in section 1861(r) to include doctors of medicine or osteopathy, dentists, dental surgeons, and, in regard to certain functions, podiatrists, optometrists, and chiropractors), including surgery, consultation, and home, office, and institutional calls, but excluding services furnished by interns and residents.

Part B services furnished by a provider, such as a hospital or SNF, excluding physicians' services furnished in a provider to individual patients, are reimbursed based on the lesser of the reasonable cost of, or the customary charges with respect to, the services in accordance with section 1833(a)(2) of the Act. (CORF services are reimbursed based on the costs that are reasonable and related to the cost of furnishing the services in accordance with section 1833(a)(3) of the Act.) Since most providers' charges exceed their costs, payment is generally made on a reasonable cost basis. Reasonable costs, under either Part A or Part B, are determined under the rules in section 1861(v).

Title XVIII includes no definition of reasonable charge comparable to that for reasonable cost. Instead, the basic rules on payment of reasonable charges for physicians' services are set forth in section 1842(b)(3) of Part B. (Section 1842(b)(6) includes additional rules applicable to payment for physicians' services furnished in a teaching hospital.) Section 1842(b)(3) requires each Medicare Part B carrier to ensure that payments made on a charge basis are determined to be reasonable on, among other things, the basis of comparison with the physician's customary charges for similar services, as well as with the prevailing charges in the locality for similar services.

It is apparent from the nature of the comparisons a carrier is required to make in determining the reasonableness of charges that payment on a reasonable charge basis should be related to a particular covered service furnished to a particular eligible beneficiary. Our original regulations, therefore, distinguished between a physician's professional services of benefit to patients generally, which constitute services furnished to or on behalf of the provider and are reimbursable to the provider on a reasonable cost basis (under Part A for inpatients and under Part B for outpatients), and "physician's services" reimbursable on a reasonable charge basis under Part B. This distinction is implicit in the definition of "physicians' services" given in 1861(q) of the Act, which lists, as examples of the kinds of services covered by the definition, services that are identifiable services to particular patients. We have always held that a physician's service reimbursable on that basis is "an identifiable service requiring performance by a physician in person, which contributes to the diagnosis of the condition of the patient * * *, or contributes to the treatment of such patient." (42 CFR 405.483(a).)

Since the beginning of the program, some physicians have disagreed with the appropriateness of treating some services performed by physicians as reimbursable only on a reasonable cost basis. These physicians hold that it was the intent of Congress that all physicians' professional services be reimbursed on a reasonable charge basis under Part B. In part, they base their argument on the fact that the statute, in defining "physicians' services" at section 1861(q), did not explicitly refer to such services as being furnished by a physician in person to an individual patient. However, we believed that the statute was intended to be interpreted in the way we have described, and since the beginning of the Medicare program our regulations have been framed accordingly.

In 1967, Congress legislated certain adjustments to the newly enacted Medicare program. The legislative history of one of these provisions (Sec. 131 of Pub. L. 90–248) observed that: "Physicians' charges for services to individual Medicare patients are covered under the [supplementary] medical insurance program. On the other hand, the compensation that some physicians receive from or through a hospital for services which benefit patients generally (for example, administrative services, committee work, teaching, research, and general supervision) as well as other costs the hospital incurs in providing covered services (for example, salaries of technicians employed by the hospital, overhead, and equipment) are reimbursable under the hospital insurance program." S. Rep. No. 744, 90th Congr., 1st Sess. 66 (1967). This

showed the correctness of our interpretation of the original act.

This intent was reaffirmed by Congress when it enacted Section 948 of the Medicare and Medicaid Amendments of 1980, Pub. L. 96-499, which added Section 1842(b)(6) to the Social Security Act (42 U.S.C. 1395u(6)). Section 1842(b)(6) was enacted to ensure that charges under Part B are not billed for educational or supervisory services of physicians in teaching hospitals. The legislative history explains: "The Medicare program, Title XVIII of the Social Security Act is comprised of two complementary programs—the Hospital Insurance program [Part A] which generally pays for institutionally provided services * * * such as hospital care, and the Supplementary Medical Insurance program [Part B] which pays for physician, diagnostic, and ambulatory services. This structure raised several administrative questions when applied to the nation's teaching hospitals where the physicians provide both professional medical services to individual patients and educational and supervisory services to the hospital itself. Essentially, the bipartite structure of the medical program necessitated that the dual activities of these teaching physicians be clearly separated for reimbursement purposes between the Hospital Insurance and Supplementary Medical Insurance components of Medicare. * * * [When the physician provides] only educational or supervisory services * * * the costs of the services are included in the reimbursement from the hospital component of Medicare." Although this provision pertains specifically to problems that arose in the teaching hospital setting, it expresses the longstanding intent to treat physician services to individual patients differently from physician services to providers. Congress has clearly long understood the Medicare program to require this distinction and has repeatedly acted upon this understanding in amending the statute.

Most importantly, our interpretation of the intent of the original Medicare statute was squarely reaffirmed when Congress provided, in section 108 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248; enacted September 3, 1982), for the addition of a new section 1887 of Title XVIII of the Social Security Act, and a conforming change to section 1861(v)(7). Section 1887 deals explicitly with distinguishing between physicians' professional services to patients and services to providers. This section specifies that, in reimbursing the services of provider-based physicians, we must apply certain standards of reasonableness to the costs providers incur for physician services to the providers. (Generally, physicians are considered "based" in a hospital or other provider if they receive compensation from the provider or another entity for services furnished in the provider.) Section 1887(a)(1) directs the Secretary to issue regulations setting forth criteria for services furnished by physicians in hospitals and SNFs that distinguish services:

(A) Which constitute professional medical services which are personally rendered for an individual patient by a physician and which contribute to the diagnosis or treatment of an individual patient and which may be reimbursed as physicians' services under part B, and

(B) Which constitute professional services which are rendered for the general benefit to patients in a hospital or skilled nursing facility and which may be reimbursed only on a reasonable cost basis.

This statutory language differed somewhat from that in our existing regulations, which define, at 42 CFR 405.483(a), a physician's professional service to a patient as "an identifiable service requiring performance by a physician in person, which contributes to the diagnosis of the condition of the patient * * *, or contributes to the treatment of such patient." Senator Robert Dole, chairman of the Senate Finance Committee, explained that intent of this provision when he presented the bill's final version for Senate approval:

While this provision has been slightly modified in conference, the intent in making this change remains the same. Under the amendment, the Secretary is required to differentiate those services that require a physician to personally perform in the diagnosis or treatment of a patient's illness from those activities that are of a general administrative nature. General administrative services—such as supervision of personnel who perform clinical laboratory tests—and those services that do not require a physician to perform in person are to be reimbursed as a hospital service on a cost basis. These distinctions will assure the appropriate source of payment, while continuing to reimburse physicians a reasonable amount for the services they perform. Our intention was not to penalize but rather to create some equity between the way we pay physicians generally and the way we pay those who are hospital based." (Congressional Record, vol. 128, No. 115, August 19, 1982. S10902.)

Therefore, the intent underlying that in section 1887(a)(1) is closely allied to that expressed on our existing regulations.

In addition to requiring improved distinctions between physicians' services to individual patients and to providers, section 1887 includes provisions requiring that, in determining reasonable cost reimbursement for physician services to providers, only those costs be recognized as reasonable that:

- Are related to the amount of time actually spent by a compensated physician in furnishing such services (section 1887(a)(2)(A)); and
- Do not exceed the reasonable compensation equivalent for such services, as established in regulations (section 1887(a)(2)(B)).

Section 1887(a)(2)(C) authorizes the Secretary to grant exceptions to providers that cannot recruit or maintain an adequate number of physicians on account of these reimbursement limits (that is, the reasonable compensation equivalents). Such exceptions would allow the provider to be reimbursed for compensation higher than the limit in order to ensure adequate physician services.

B. Proposed Regulations

On October 1, 1982, we published a Notice of Proposed Rulemaking (NPRM) to implement section 1887(a) (47 FR 43578) and to make other changes in our regulations governing reimbursement of services furnished by provider-based physicians. We initially provided a 30-day period for public comment on the NPRM. However, on November 1, 1982, we published a notice to extent the public comment period through November 16, 1982 (47 FR 49415).

In addition to implementing the provisions of section 1887(a) of the Social Security Act, we had several other objectives in developing the NPRM published on October 1, 1982. One of the objectives was to correct the payment problems indicated by studies, cited in the NPRM preamble, that showed that Medicare was paying unreasonably high amounts in some cases for services furnished by provider-based physicians. These studies also showed that Medicare sometimes inadvertently paid for a single service as both a hospital service and a physician service. These excessive and duplicate payments arose most often in payments for the services of physicians who practice primarily in providers, such as radiologists, anesthesiologists, and pathologists.

To deal with these problems, we concluded that we need to:

- Improve implementation of the statutory requirement that the professional services a physician may perform for a provider that benefit patients generally (such as managerial

and quality control activities) be reimbursed (subject to the lesser of cost or charges rule in section 1814(b) of the Act) only on a reasonable cost basis (from the Part A Trust Fund for inpatients and from the Part B Trust Fund for outpatients) and that "physicians' services" personally rendered for individual patients be paid for only on a reasonable charge basis (from the Part B Trust Fund);

- Ensure that payments for service furnished by provider-compensated physicians are reasonable in amount;
- Avoid duplicate payments for a single service from both Part A and Part B Trust Funds as both a provider and a physician service; and
- Impose billing and payment procedures that fulfill these objectives and that are administratively sound, simple, and efficient.

The underlying prerequisite for realizing all these objectives is to differentiate between those physicians' services that may be reimbursed on a reasonable charge basis, and those which should be reimbursed to a provider on a reasonable cost basis.

To achieve these objectives, the October 1, 1982 NPRM set forth proposed new regulations that would:

- Restate and clarify the general rules governing payments to providers for the reasonable costs of compensating physicians.
- Restate the criteria that must be met for a physician's service to be paid for on a reasonable charge basis; that is, generally, that the service:
  - —must be personally furnished for an individual patient by a physician;
  - —ordinarily requires performance by a physician, and is not frequently and consistently furnished by nonphysicians; and
  - —contributes to the diagnosis or treatment of an individual patient.
- Provide that when a physician assumes some or all of the costs of furnishing services in a provider to the provider's patients, only "physicians' services" to individual patients may be paid for on a reasonable charge basis, and that the costs of the nonphysician inputs in providers must be paid through the provider on a reasonable cost basis.
- Establish prospective limits, adjusted by specialty and location, on the amount of physician compensation paid by a provider that we would consider reasonable in determining Medicare payments for physician services to both providers and individual beneficiaries. Of course, the compensation limits would apply only to amounts paid by Medicare to the provider. The provider and physician remain free to negotiate and enter into whatever compensation agreements they wish. In addition, we would allow exceptions to the compensation limits for providers unable to recruit physicians under the established compensation levels.
- Establish specific rules for coverage, as well as rules for determining the amounts of reasonable charge payments for services by certain medical specialists, as follows:
  - —Radiologists' services—in determining reasonable charges to account for the differences between services furnished in an office where the physician incurs overhead costs and services furnished in a provider where the provider bears much of those costs.
  - —Anesthesiologists' services—allow payment on a reasonable charge basis for a physician's services for up to two concurrent procedures; in determining reasonable charges, account for services that are furnished by a nurse anesthetist employed by the provider, rather than the anesthesiologist.
  - —Pathologists' services—specify pathology services considered to meet the conditions for reasonable charge payment as "physicians' services", excluding clinical laboratory services that are not performed by a physician in person for individual patients and do not require performance by a physician.
  - —Eliminate a billing form (HCFA–1554) now used by providers to bill for physician services. This form does not contain sufficient information to permit carriers to identify services appropriately paid on a charge basis.

C. Number and Types of Public Comments

We received well over 7500 pieces of correspondence in response to publication of the NPRM. While over 4000 of these were requests to extend the comment period, we also received 3516 substantive comments that had been postmarked by November 16, and more than 200 additional substantive comments postmarked after the close of the comment period. We divided the substantive comments into rough categories by type, considering the nature and viewpoint of the commenter, as follows:

Category of commenters	Number posted timely
1. Associations, attorneys, consultants and accountants	196
2. Hospitals, medical schools, and clinics	186
3. Pathologists	1208
4. Radiologists	82
5. Anesthesiologists	87
6. Other physicians	212
7. Nonphysician health personnel, such as medical technologists and nurse anesthetists	1484
8. Miscellaneous commenters, including patients, beneficiaries, and the general public	139
Total	3516

This breakdown may be used only for rough comparisons, since many comments could potentially have been assigned to more than one category. For example, a laboratory director could be considered to be commenting personally or on behalf of a hospital, or an officer of a local medical society could be commenting personally or on behalf of the membership. Further, some letters were probably counted more than once, since we may have incorporated in our files several copies addressed to HCFA, the Secretary, Congressmen, and others.

In addition to commenting specific provisions of the NPRM, a number of individuals and organizations expressed concern regarding the need for revised regulations and the relationship of our proposals to the provisions of the Medicare law. To respond to these commenters' concerns, and to forestall further confusion regarding the basis and purpose of these regulations, we are providing the discussion set forth in section III below.

We have analyzed the comments on the NPRM, and have continued our own analyses of reimbursement patterns, practices, and problems. As a result of these analyses, we have made some revisions of the proposed rules, and are publishing them now as final rules. In sections IV through XI of this preamble, and, where appropriate, in the Appendixes to this document, we discuss the comments received on specific NPRM proposals, set forth our responses to those comments, and describe the changes made in the rules as a result of them.

II. Major Features of Final Regulations

We have revised the final regulations somewhat to improve their clarity and to incorporate changes we believe are needed based on the comments we received. The final regulations set forth below reflect one major substantive change from the proposal, in that they do not provide for the application of RCE limits in determining Part B reasonable charge payments for physician services to patients. In view of the issues raised by our proposal to apply the RCE limits to those payments,

and the concerns expressed by commenters on this proposal, we have decided not to apply these limits at this time.

In addition to making this major change, we have:

- Restated the required criteria for a physician's service to be reimbursable on a reasonable charge basis, deleting the requirement that such services not be "frequently and consistently furnished by a nonphysician";
- Refined our methodology for establishing compensation equivalent limits, resulting in somewhat lower levels of mean annual full-time equivalent income;
- Allowed for adjustments to the RCE limits to account for the costs of malpractice insurance, continuing medical education, and professional memberships;
- Revised the criteria governing concurrent anesthesiology services reimbursable on a reasonable charge basis to allow such reimbursement for up to four concurrent procedures, providing that the other criteria are met;
- Restated the required criteria for a pathology consultation to be reimbursable on a reasonable charge basis, taking into consideration comments on establishing normal ranges for test results; and
- Decided to delay the application of the requirement related to leased departments or services an additional 30 days for services furnished under agreements established on or after July 1, 1966 and two years for services furnished under agreements established before July 1, 1966.

We have also reconsidered our previous proposal, put forth in the NPRM, to extend combined billing, allowing all physician specialties to use this billing method. We are now considering eliminating combined billing altogether, and are so proposing in this document. See the discussion of billing in section VI. E. of this preamble.

III. General Comments

A. Need for Revised Regulations and Payment Procedures

Several commenters questioned the need for our proposed changes in the regulations and suggested that our proposals be withdrawn.

As explained in the NPRM, we believe our original program regulations set forth valid general principles for implementing the statutory requirements regarding payment for services of physicians in providers. However, the payment rules contained in those regulations are not sufficiently explicit to implement fully the Medicare law, and, of course, do not take into account all of the provisions of new section 1887 of the Act. In order to implement section 1887, we must issue regulations that distinguish more clearly between the services of physicians in providers that may be reimbused on a charge basis, and those that should be reimbursed on a cost basis as provider services. In addition, the existing regulations do not deal with the differences in the ways certain specialists (such as anesthesiologists, radiologists, and pathologists) practice medicine in provider settings. For these reasons it has been difficult, under existing regulations, to develop and apply effective tests of reasonableness that can be used in determining payment for services of physicians in providers.

Additionally, since the publication of the original regulations in 1966, several developments have occurred that greatly affect the manner in which services of physicians in provider settings are reimbursed. First, many radiologists and pathologists who previously had been paid by providers for their services to provider patients began to bill charges to the Medicare carrier or the patient for their services. Second, physicians' financial agreements with providers became more complex. Finally, it became a more common practice for anesthesiologists to involve nonphysician anesthetists more extensively in the delivery of anesthesia services, and to bill the carrier or the patient for the anesthetists services as physician services. We believe these developments in many cases have resulted in increases in the level of Medicare payment for services of physicians in provider settings beyond appropriate levels of "reasonableness", in duplicative payments from both trust funds, in payments from the wrong trust fund, and in inappropriate charges to Medicare beneficiaries for inpatient hospital services and other provider services.

Therefore, these revised regulations set forth general conditions for reasonable cost and charge payments for services of all physicians in providers and provide additional conditions and tests of reasonableness for determining reasonable charge payments for anesthesiology, radiology, and laboratory services. In addition, we plan to reform our current billing procedures by eliminating billing by a provider on behalf of a physician of compensation-related charges for physician services on the HCFA–1554 billing forms, and by requiring additional information to be submitted with certain other billings.

B. Scope of the Regulations

In the October 1, 1982 NPRM, we proposed to apply the revised rules to "institutional providers", described in that document as hospitals and SNFs. Since that publication, we have issued final regulations for CORFs, enabling them to participate as providers in the Medicare program (47 FR 56282; December 15, 1982). In the preamble to those final rules, we stated that we would apply the same rules for reimbursement of physician compensation costs as are used for hospitals and SNFs. (Even though section 1887 does not explicitly require us to apply these rules in determining payment for physician services to CORFs, we believe their application is needed to implement the CORF legislation properly and, in particular, to ensure that Medicare does not pay amounts for services to CORFs that would be considered unreasonable for similar services to hospitals and SNFs.) Therefore, we are including CORFs in these final rules.

We received several comments asking whether the regulations would apply to nursing homes or rehabilitation hospitals, in addition to acute care hospitals. We wish to make clear that, except with respect to the services discussed in the immediately following paragraph, these final regulations apply to all services, whether furnished to an individual patient or to a provider for the general benefit of patients, that a physician furnishes in a hospital, SNF, or CORF. The hospitals affected include all facilities certified as hospitals under sections 1861 (e), (f), and (g) of the Act, including psychiatric and tuberculosis hospitals.

The one exception to the applicability of these regulations is those physician services reimbursable under Part B on a reasonable charge basis, furnished in a teaching setting, for which the determination of reasonable charges is also governed by our regulations at 42 CFR 405.520 through 405.525. Those regulations apply when teaching physicians, interns or residents are involved in the delivery of the physician's services. In addition, if the provider is a teaching hospital, it may elect reasonable cost reimbursement for all physician services to its Medicare patients, under regulations at 42 CFR 405.465.

Because of problems related to the administration of the regulations relating specifically to teaching hospitals, and to implement section 1861(b)(7) of the Social Security Act (as amended by section 948 of Pub. L. 98–

498), we also plan to publish, in a separate document, proposed regulations which would establish special new rules on charge payment for services of physicians in teaching hospitals. Those new rules would supersede 42 CFR 405.520 and 405.521 when they become effective.

Several teaching hospitals and medical schools commented that certain provisions of the NPRM should not be applied to their situations without qualification. We agree. Therefore, we have clarified our discussion below of those provisions of those regulations to avoid misunderstanding, and to make clear, where appropriate, that we will not extend those provisions of these final regulations to teaching settings, pending a comprehensive analysis of proper reimbursement policy for teaching hospitals through rulemaking procedures. However, with the exception of those provisions, the other requirements of these regulations will apply to both teaching and non-teaching providers.

Some hospitals have also commented that the NPRM did not make clear whether the proposed new rules would replace the rules for reimbursement of physician services related to outpatient maintenance dialysis services, where the physicians furnishing such services are compensated through a hospital-based dialysis facility. Our current regulations governing these payments are at 42 CFR 405.542. We have also proposed to amend those regulations, in an NPRM published February 12, 1982 (47 FR 6556). In any event, we expect payment for such physician services to be governed by § 405.542, not these rules.

IV. Distinguishing Physician Services to Providers From Physician Services to Individual Patients

A. General Rules

1. *Introduction.* These regulations implement section 1887(a)(1) of the Act by providing criteria that clearly distinguish between physicians' services to an individual patient, which are reimbursable on a reasonable charge basis under Part B, and physicians' services to a provider, which are reimbursable only on a reasonable cost basis. The regulations specify certain criteria that must be met for a physician service to be reimbursable on a reasonable charge basis. Generally, a physician service furnished in a provider that does not meet these criteria will be paid for, as a provider service, on a reasonable cost basis. Thus, except for physician services that are clearly not covered under either Part A or Part B of Medicare, such as research, all physician services furnished for the benefit of Medicare beneficiaries would be reimbursable.

Physician services to providers, that is, services of physicians that do not meet the conditions for charge payment but benefit a provider or its patients generally, always have been considered provider services under our regulations. The costs of these services have been allowed as provider costs, and have been reimbursable only on a reasonable cost basis. Some physicians have disagreed with this policy in that they believe that all professional activities of physicians should be reimbursed on a reasonable charge basis under Part B, whether or not they are specific services to individual patients, and have billed accordingly. Procedures for determining payment for these physician services have not been effective because of the relative lack of specificity in the criteria for distinguishing between the services of physicians in providers that qualify for charge payment, and those that are to be paid for only on a cost basis. As a result, those regulations have not been implemented uniformly enough in all parts of the country or in all settings in in the same part of the country. We believe these problems have led to improper payments for some services because carriers and intermediaries have difficulty making the comparisons needed to ensure that cost and charge payments are reasonable and do not duplicate each other.

2. *Historical Background.* Because of these problems, particularly in regard to payment for pathology services, on March 11, 1980 we published a notice in the Federal Register (45 FR 15550) that announced that we would, effective July 1, 1980, uniformly enforce the regulations at 42 CFR 405.483(a) with respect to services of hospital-based physicians. In that notice, we stated our specific intent to apply these regulations in making payments for clinical laboratory services in providers, to preclude Part B reasonable charge payment for clinical laboratory services furnished in providers to provider patients. Our decision to preclude Part B payment on a reasonable charge basis for these services was based on our understanding of the distinctions in the statute and regulations between physician services and provider services.

The College of American Pathologists, along with other groups and individuals, filed a lawsuit in the U.S. District Court for the Eastern District of Arkansas, Western Division, challenging the effect of the March 11, 1980, notice. In June 1980, the court entered a preliminary injunction against the Department preventing implementation of the notice to deny reimbursement on a reasonable charge basis under Medicare Part B for a physician's professional component of clinical laboratory procedures until the issues raised in the lawsuit were decided. Following a request by HCFA for clarification of the preliminary injunction, the court issued a revised injunction in November 1980. The revised injunction limited the scope of application of the original injunction to instances in which, prior to the court's preliminary injunction, a physician was receiving reasonable charge reimbursement under Part B of Medicare for a professional component of such clinical pathology procedures, had received such reimbursement, or had applied to receive such reimbursement.

On October 6, 1981, HCFA published a notice in the Federal Register (46 FR 49126) withdrawing the March 11, 1980 notice. We stated in that withdrawal notice that we would reassess the policies governing reimbursement for the services of hospital-based physicians and rulemaking. At the same time, the Department filed a motion with the U.S. District Court to dismiss the May 1980 suit. On October 1, 1982, the court issued an order allowing us to engage in rulemaking without being restrained in any way by the preliminary injunction.

After the withdrawal of the March 11, 1980 notice, we proceeded to develop draft proposed regulations addressing problems related to physician services furnished in provider settings, including improved criteria for distinguishing physician services to providers from services to patients. While these draft proposals were undergoing review, Congress added a new section 1887 to the Social Security Act.

3. *Allowable Costs of Physician Services to Providers.* Physician services to the provider are defined in section 1887(a)(1)(B) as "professional services which are rendered for the general benefit to patients in a hospital or skilled nursing facility * * *". As noted above, we have extended the application of these rules to CORFs, as well as to hospitals and SNFs. These physician services to the provider represent activities that benefit the provider or the patients generally or that do not require performance by a physician. They include, but are not limited to, teaching or supervision of professional or technical personnel, administration or management of a hospital department, quality control activities, and work schedule planning.

The costs of physician services to the provider are allowable if—

- The services do not meet the criteria for reasonable charge reimbursement;
- The services do not include physician availability services (except for reasonable availability services furnished for emergency rooms);
- The provider has incurred a cost for the services; and
- The costs of the services meet the requirements in our cost reimbursement regulations, including at 42 CFR 405.451 regarding costs related to patient care.

4. *Standby and availability services.*

Comment: Some physicians, particularly anesthesiologists, have expressed concern about the proposed elimination of physician availability and standby services from allowable provider costs (proposed § 405.460(a)(2)). They believe we should distinguish between physician "availability" and "standby" services.

Response: We agree. The cited section of the proposed regulation was intended to apply to situation in which a hospital incurs costs in connection with a physician's being generally available to furnish services if a need should arise. The expense attributable to such availability is currently reimbursable as an allowable cost only when it is incurred by a provider in connection with an emergency room agreement that meets very specific criteria. Our proposed rule continues this policy. Also, we do not intend to restrict payment for "standby" services when a physician is physically present in an operating suite monitoring the patient's condition, making medical judgments regarding the patient's anesthesia needs, and ready to furnish anesthesia services, as necessary, to a specific patient who is known to be in potential need of such services. For example, when an aged individual is given a local anesthetic for performance of a surgical procedure because of the general state of his or her health, it is also recongized that it may become necessary to administer general anesthesia during the operation, and an anesthesiologist may be physically present in the operating suite and standing by to furnish the services as needed. Such services may be payable on a reasonable charge basis.

Although in the NPRM we referred to both standby and availability services, the final regulations refer only to availability services. This is not a change of policy but a clarification of terms. Despite sometimes inconsistent past usage, we wish to make clear that "standby services" are related to services for a particular patient, and the physician's services resulting from such standby are reimbursable on a reasonable charge basis. "Availability services" are general services related to expectations of need by unspecified patients, such as provided by emergency rooms. Such availability services are reimbursable on a reasonable cost basis, but only when the costs of the services are incurred in connection with an emergency room agreement that meets certain specific criteria.

5. *Physician services reimbursable on a reasonable charge basis.* As proposed in the NPRM, the criteria for determining whether physician services furnished in a provider would be reimbursable on a reasonable charge basis were:

- The services must be personally furnished for an individual patient by a physician;
- The services must contribute directly to the diagnosis or treatment of an individual patient; and
- The services ordinarily require performance by a physician, and are not frequently and consistently furnished by nonphysicians.

Section 1887(a)(1) authorizes the Secretary to establish criteria to implement the distinction between the services described in section 1887(a)(1)(A) and (B). These criteria are implicit both in the language of section 1887(a)(1)(A) and the underlying intent evidenced by its legislative history.

The third criterion we proposed would have expanded on the existing regulations by adding qualifying language to the physician performance requirement, stating that such services must not be frequently and consistently furnished by nonphysicians. We proposed this for two reasons: first, to avoid the appearance of precluding coverage as physicians' professional medical services of any services that are sometimes performed by nonphysicians; second, to avoid paying for services at a level appropriate for physicians if those services are frequently and consistently (and more economically) furnished by nonphysicians.

B. Summary of Comments

We received many comments on the inclusion of the third criterion in the NPRM. By far the majority of commenters have objected to it. The most frequently raised argument against this criterion asserts that the imposition of these requirements would exceed the intent and statutory authority of section 1887.

Several commenters argued that the proposed provision stating that the services must "ordinarily require performance by a physician and are not frequently and consistently furnished by nonphysicians" was not included in either the statute or Conference Report as a basis for determining whether or not Part B reasonable charge reimbursement should be made for physician services. They pointed out that in considering the provision of H.R. 4961 that was enacted as section 108 of Pub. L. 97-248, the Conference Committee's only change was to remove language that could possibly be used to justify the proposed limitation. These commenters contend that our reinsertion of this requirement in the proposed regulation appears to exceed statutory authority and Congressional intent as reflected in section 108 of Pub. L. 97-248.

Commenters also argued that the third criterion causes increased confusion and uncertainty, in that the use of the words "ordinarily", "frequently" and "consistently" raises interpretive problems. For example, these terms may imply that a percentage test might be applied to this coverage determination. One commenter argued that the word "ordinarily" seems to imply that, if in a majority of cases the services are required to be performed by a physician, the services are covered as physician services to individual patients, whereas the words "frequently" and "consistently" seem to imply that if the service is performed by a significant number, but less than a majority, of nonphysicians, the service would never be covered as a physician service to individual patients.

Other commenters made various points in opposition to the existence of such criteria at all. Some physicians disagree with the statute itself, in that they believe that professional activities of physicians should be reimbursed on a reasonable charge basis under Part B, whether or not they are specific services to individual patients. Other commenters expressed uncertainty as to the result of a determination that certain services were not reimbursable on a reasonable charge basis. Some seemed to believe that our intent was not to reimburse them at all, rather than to distinguish services reimbursable on a cost basis from those reimbursable on a charge basis.

Finally, the conclusion of some commenters can best be summarized by quoting the comments submitted by the American Medical Association:

> In our view, the provisions of § 405.550 violate § 1801 of the Act and improperly attempt to control the practice of medicine by reaching the result that a service performed by a physician is not a physician service. Carried to its eventual conclusion and if

applied to the practice of medicine generally, this provision would disqualify many physician services and, in effect, redefine the practice of medicine across the country.

C. Response to Comments

First, we wish to make clear that we do not intend to redefine the practice of medicine, or to disqualify physician services for reimbursement. Our regulations govern only how services furnished to Medicare beneficiaries are paid for, that is, whether on the basis of costs or charges, or from the Part A or Part B trust funds, and how the amounts to be paid are determined. We wish to assure both physicians and the public that all physician services, whether services to individual patients, or services to providers, that are covered under the Medicare program will still be reimbursable under these regulations.

Section 108 of Pub. L. 97–248 clearly requires the Secretary to establish in regulations criteria to determine which services furnished by physicians in hospitals may be reimbursed on a reasonable charge basis under Part B. There is an obvious need to distinguish between the administrative type services that benefit patients generally, e.g., managing a department, quality control, etc., that physicians furnish in hospitals that are properly classified as hospital services reimbursable on a reasonable cost basis, and the services furnished by physicians to individual patients that are reimbursable on a reasonable charge basis. The latter type of services, which we refer to as "physicians' services," are covered only under Part B of Medicare (sections 1832(a)(1), 1861(s)(1)) and, therefore, may be reimbursed only on a reasonable charge basis.

Section 108 directs the secretary to develop criteria for distinguishing between physicians' services to individual patients reimbursable on a reasonable charge basis and professional services of physicians that benefit patients generally. In developing these criteria, in these regulations we incorporated the statute's descriptive language that physicians' services are personally rendered for an individual patient and that they contribute to that patient's diagnosis or treatment. The third requirement, that the service ordinarily requires performance by a physician, further implements the first two requirements. Indeed, as indicated in the legislative history, it is implicit in the statutory language. In addition, it ensures that payment for a service at a level appropriate for physicians is warranted.

We proposed to add language to that of the statute (that is, that "services ordinarily require performance by a physician, and are not frequently and consistently furnished by nonphysicians') because we believe that this criterion expresses the underlying intent of Congress as reflected in the legislative history, and is implicit in the language of sections 1887(a)(1)(A). In some cases, this principle can be clearly applied, such as to physicians working as administrators. Admittedly, in other cases application is more difficult, such as when a physician supervises other health care personnel in the immediate delivery of services.

Because we still hold that this distinction is essential and necessary to implementation of the statute, we are retaining the requirement that, to be reimbursable on a reasonable charge basis, a service must "ordinarily require performance by a physician". However, we have revised the third criterion of the regulation by deleting "and are not frequently and consistently furnished by nonphysicians." Based on comments received, we agree that it would be difficult to administer this part of the third requirement. It is not essential to determine the degree to which a service is performed by nonphysicians in order to decide whether the service requires performance by a physician.

We believe retaining the qualifier "ordinarily", referring to performance by a physician, will be beneficial to all parties concerned in the determinations of whether particular services qualify for reasonable charge reimbursement. An absolute rule would provide no flexibility to permit determinations that services may be reimbursed on a charge basis when in a relatively few situations or circumstances the particular service is being safely performed by nonphysicians. We recognize that there is a continuous evolutionary process in the practice of medicine whereby nonphysicians are trained by physicians to perform services that previously were performed only by physicians. This evolutionary process can result in cost savings and more efficient utilization of physicians' time. We want our criterion to be consistent with this process, particularly to continue to recognize as physicians' services those services that are in the changing process but for which the service does not always require performance by a physician.

We are confident that we, the Medicare contractors, and their medical staffs will be able to apply this criterion in consultation with outside sources of expert medical advice. The vast majority of services reimbursable on a charge basis are readily identifiable, and the cases for which identification is difficult or questionable should be satisfactorily resolvable.

V. Payment for Physician Services to Providers

A. Allocation and Reporting of Compensation Costs

Section 1887(a)(2)(A) of the Act requires that only the part of the total physician compensation cost that is allocated to professional services of the physician to the provider (that is, services related to the physician's professional medical expertise, not for services that may reasonably be furnished by nonphysicians, such as business management, to which the general reimbursement rules are applicable) be considered an allowable provider cost for professional services and taken into account in determining reimbursement to the provider. To implement this, under these regulations, a provider will be able to obtain payment for physician compensation costs only if it can demonstrate to the satisfaction of its Medicare intermediary that a significant and measurable proportion of the physician's time is devoted to services to the provider.

To be paid on this basis, the provider must submit a written allocation agreement between the provider and the compensated physician (that is, any physician who receives compensation, as defined in the regulations, by or through the provider or another organization, such as an organization related to the provider, for furnishing services in the provider) showing the respective amounts of time the physician spends in furnishing physician services to the provider, physician services to patients, and services that are not reimbursable under Medicare. Time records, or other documentation that supports the allocation, must be available for verification by the intermediary upon request.

For purposes of determining these costs, "physician compensation" includes monetary payments, fringe benefits, deferred compensation, and other items of value (but excluding free office space related to treatment of private patients, or billing and collection services) a provider or other organization furnishes a physician in return for the physician's services to it. Other provider costs related to the services, including the capital and operating costs for the space (including office space), equipment, personnel, and other resource inputs necessary to produce the services, are not included in the allocation agreement and are not

covered by the compensation equivalance limits.

In the NPRM, we referred to compensation as paid to a physician by "a provider or other entity (such as a medical school or other organization related to the provider)". However, comments showed that this language resulted in confusion, especially regarding the application of these rules to teaching hospitals. Therefore, we have revised the description of compensation costs in § 405.481(a) by indicating that an "other entity" is an organization related to the provider within the meaning of 42 CFR 405.427.

Except as described in section V. C. below, we will attribute a physician's compensation to all the services the physician furnishes, both to patients and to the provider, in direct proportion to the amounts of time the physician spends in furnishing each type of service. Further, we will recognize only those allocations that are agreed to by both the provider and the physician (rather than an allocation from solely the physician or provider). Generally, effort reports are not acceptable as documentation, since effort usually cannot be quantified as can time. However, as discussed below, an intermediary may accept effort reports if the resulting reimbursement will not differ significantly.

Providers that obtain payment based on an allocation agreement and supporting documentation are required to maintain the time records, or other information they used to prepare the allocation, in a form that permits it to be validated by the intermediary or the carrier. In addition, the provider must report the time allocation data to the intermediary on an annual basis on a form developed by HCFA, and retain each allocation, and the information on which it is based, for at least four years after the end of the cost reporting period to which it applies. (We had proposed requiring record retention for five years, but have revised the time limit to be consistent with the latest OMB guidelines.)

Comment: The Blue Cross Association asked, in reference to the definition of compensation, about the appropriate treatment of payments made to the provider by a physician to cover bad debts and courtesy or professional allowances.

Response: We do not intend that a provider be reimbursed on a basis of gross compensation when it is effectively paying out a lesser amount. For example, to the extent that a physician pays the hospital an amount intended to be used for bad debts attributable to the physician services to patients, that amount must be used to reduce the physician compensation in which Medicare shares. See § 2108.9 of the Medicare Provider Reimbursement Manual (HCFA Pub. 15–1).

Comment: Commenters asked several questions about the documentation and preparation of allocation agreements. Some inquired whether they must be prepared prospectively, or whether they could be retroactively based on actual time worked. Commenters also wanted to know what sort of time studies or records would be accepted as a basis for agreements.

Response: The allocation agreement should be prepared prospectively, although historical records may be the basis of the estimated prospective allocation. If an estimate becomes unacceptable to the provider or physician on the basis of later experience, they may revise the agreement. Generally, this would occur where the volume of services changes, there is a change in the number of physicians who practice in the department or there are other factors that substantially affect the operation of the department. The intermediary must be notified promptly of all such revisions. Generally, the allocations should be based on a reasonable estimate of the manner in which physicians (considered either as individuals or as a department) spend time. If the allocation of time in a particular case is atypical, or if the allocation does not appear to reflect an understanding of the manner in which physicians' services are covered under Medicare, the intermediary should request time studies or other documentation for verification.

Comment: The Healthcare Financial Management Association suggested that we should indicate that daily time records are not required to allocate physician compensation.

Response: Generally, daily time records will not be necessary to make the allocation required by § 405.481. However, if the intermediary has a question about how the physician is spending the time for which payment is sought, the intermediary will require substantiating information, such as time records.

Comment: some hospitals have commented that the National Institutes of Health, in the administration of grants, require effort reports while Medicare requires time allocation reports. They contend that effort reports should be acceptable for use by Medicare.

Response: It has been Medicare policy that time, not effort, should be the basis for determining payments for the services of physicians because time can be quantified, effort cannot. Further, section 1887(a)(2)(A) of the Act specifies that costs must be apportioned on the basis of time actually spent by a physician in furnishing services to the provider. However, effort reports may be used by a hospital and its physicians if the intermediary and carrier determine that Medicare payments will not differ significantly by use of effort reports, i.e., that in the individual case, effort can be equated to time. If the intermediary determines, however, that there is a difference between reported effort and actual time that affects Medicare payments, time reports must be used.

B. Assumed Allocation of All Compensation to Patient Services

Many, if not all, compensated physicians have some administrative and supervisory responsibilities related to services they furnish in a provider, but in many cases these services do not constitute a significant or measurable portion of a physician's activities. In these cases, the physician's compensation is almost entirely related to services he or she furnishes to individual patients, rather than to services to the provider. For the many physicians who spend, for example, less than 10 percent of their time on such services to the provider, the difficulty of identifying those services and documenting the time devoted to them may be excessive considering the relatively small amount of compensation cost that would be allocated to those services.

Therefore, if a provider and a compensated physician agree that the amount of compensation attributable to services that the physician furnishes to the provider is negligible, such as 10 percent or less of the compensation, they may omit furnishing an allocation agreement, so long as the provider claims no cost for such services. We will assume that 100 percent of the services of the physician are services to individual patients that are reimbursable on a reasonable charge basis under Part B.

C. Allocation of All Compensation to Provider Services

In contrast to the situation of those physicians whose time is devoted almost completely to furnishing services to individual patients, some physicians are compensated by a provider solely for the services that the physician furnishes to the provider. In these cases, the entire amount of the compensation is an allowable provider cost, and is

reimbursable, to the extent it is reasonable, on a cost basis. If, in addition to furnishing services to the provider, the physician also furnishes services to individual patients of the provider, two conditions must be met for the entire amount of a physician's compensation to be attributed to services to the provider. First, the provider must certify in writing, with its allocation agreement, that the compensation is attributable solely to the physician's services to the provider. Second, the physician must bill for all of his or her physician services furnished to individual patients and personally receives the payment from such billings. If a physician returns collections for such services to the provider, the provider certification that the physician is paid by the provider only for provider services is not supported. In such a case, the provider must submit an allocation showing the way the physician actually spends his or her time. (Of course, if the physician does not furnish any services to the provider's patients, only the first condition need be met.) In either case, the provider must still keep the time records and other documentation necessary for the intermediary to determine that the physician's compensation is reasonable in view of the time devoted to furnishing the services being reimbursed.

Comment: Proposed § 405.481(d)(2) included a provision that, in addition to billing all patients, a physician must "retain" the payments for physician's services as a condition of allocating all compensation to provider services. Some commenters, including a number of teaching hospitals, objected to that proposed requirement.

Response: Physician compensation generally must be allocated among physician services to providers, physician services to patients, and physician activities, such as funded research, that are not reimbursable under Part A or Part B of Medicare. This allocation is needed to help assure that Medicare Trust Fund liability for physician services under Part A and Part B is appropriately determined. We proposed the provision requiring retention of payments of charges to ensure that there was adequate evidence when the physician is compensated only for his or her services to providers. The proposed requirement was related only to the "attribution of compensation" to all the services furnished by a physician in a provider. It was not intended to affect the determination of charges for an attending physician's services in a teaching hospital made in accordance with 42 CFR 405.521. To clarify this, we have revised the phrasing of the final provision to require only that the physician must personally receive the payments. This will meet the evidentiary requirement that the NPRM provision was intended to establish.

Comment: Many commenters inquired how this provision would be applied to teaching hospitals.

Response: It is common among teaching physicians to authorize their hospital, a medical school or practice plan to bill on their behalf for their services to patients, using charges unrelated to their compensation. Current Medicare policy in Intermediary Letter No. 372 (entitled "Part B Payments for Services of Supervising Physicians in a Teaching Setting", (April, 1969) recognizes the appropriateness of this practice. Further, section 948 of Pub. L. 96–499 (entitled "Reimbursement of Physicians' Services in Teaching Hospitals") authorizes the Secretary to determine customary charges for physicians' services in teaching hospitals using charges unrelated to their compensation. We are not proposing to change this Medicare policy regarding determining customary charges for physician services in teaching hospitals by this rule. A proposed rule implementing section 948 of Pub. L. 96–499 will be published in the **Federal Register** in 1983. It will further clarify this issue and, among other things, provide additional methods for determining customary charges for physician services in teaching hospitals. The similarities and differences between appropriate requirements for teaching hospitals and for hospitals generally will be resolved through rulemaking at that time.

D. Effect of Failure To Submit an Allocation Agreement

In the preamble to the NPRM, we stated that payment for the services of the physician in the provider would be made based on the presumptive allocation, unless an allocation agreement is submitted to show that a different allocation is more accurate because a significant and measurable portion of the physician's time is devoted to services to the provider.

The intent of that proposal was to establish incentives for providers and physicians to agree on how physician compensation was to be allocated. Thus, we were proposing to treat 100 percent of a physician's compensation as related to patient services in two separate types of cases, when the amount of services to the provider was negligible, and also when no allocation agreement was made available to the intermediary. This was made clear in the proposed regulation text by the separate provision for both cases, the assumed allocation requirements being in proposed § 405.481(e), whereas the compliance incentive requirements were in the proposed § 405.481(f)(2). However, the nature of the comments we received showed that our intent was not always understood.

If a provider and physician cannot agree on a compensation allocation, or for other reasons the provider fails to submit a written allocation agreement, the intermediary will assume, for purposes of determining the reasonable costs of the provider, that 100 percent of the physician's compensation cost is allocated to services to individual patients. This assumption will have two effects. First, the provider will not be paid the Medicare portion of the costs of compensation for services the physician furnishes to the provider, and which would otherwise be reimbursable on a reasonable cost basis. Second, payment to the physician on a reasonable charge basis will be limited to payment for services, furnished to individual patients, that meet the criteria for reasonable charge payment. Thus, if a physician furnished and was compensated for a significant amount of services to a provider, and yet the two parties could not reach an agreement as to the allocation of compensation for those services, both parties could be at risk for the value of the services. Medicare would not reimburse the hospital for the cost of the physician's administrative, supervisory, and teaching services, and would reimburse the physician (or the individual Part B claimant) on a charge basis only for services to individual patients, which do not include those administrative, supervisory, and teaching services.

E. Cost of Certain Provider Services to Physicians

Some physicians and providers have entered into agreements under which the providers furnish office space for private practice or furnish billing and collection services for the physician. These costs are different from the costs incurred by providers in compensating physicians to furnish services to provider patients, and different from the costs discussed in section V. F., below, in that they are related to services to nonprovider patients. Although these services (office space, billing, collection) are furnished by the provider to the physician, they are related to the physician's services to the physician's patients, not provider services to provider patients. The costs incurred by

a provider in providing office space and billing and collection services related to private patients are not allowable costs for determining the reimbursement to the provider. Rather, these represent overhead costs related to production of services furnished to nonprovider patients. Ordinarily, a physician would incur and bear these costs as part of an office-based practice in which the physician's services were furnished to individual patients. Therefore, the costs are reflected in the amounts office-based physicians charge for their services to individual patients, and should be paid for only under that reasonable charge reimbursement.

Our experience is that such arrangements, regarding billing, collections, and office space, can make it difficult to determine payment on the proper basis from the appropriate trust fund. Therefore, to ensure that we pay providers only for the costs of producing services to be furnished to provider patients, we are requiring that the costs for these services to physicians be excluded from allowable costs.

Comment: Some commenters indicated that a provider bills a fee for their services and retains a percentage of collections to cover costs associated with furnishing the services such as salaries of provider employed nonphysician personnel. They ask whether this practice may continue.

Response: The carrier may make reasonable charge reimbursement for physician services to individual patients only as specified in these rules. The provider must claim reimbursement for costs associated with producing services furnished to its own patients from its intermediary. If a provider acts as billing agent for a physician, the costs of producing those billing and collection services must be identified and excluded from the provider's allowable costs. To the extent that the intermediary or carrier have included elements of hospital costs in the customary charge profiles of physicians, or elements of physician overhead among provider costs these data must be revised and corrected to assure that all reimbursement is attributed correctly. The manner in which a physician pays a provider for acting as his or her billing agent is outside the scope of these regulations, as long as these regulations, and other program regulations such as those on assignment and reassignment are observed. (42 CFR 405.1668 and 405.1680).

Comment: One commenter expressed a belief that the NPRM provisions affecting Medicare payment for billing costs were inconsistent. The commenter pointed out that under the NPRM, Medicare would continue to pay its share of billing costs when a provider submits combined bills to the intermediary (using the HCFA–1453 and HCFA–1483) for the services of compensated physicians. However, according to the NPRM, if a provider bills for these services to the carrier (using the HCFA–1500), Medicare would not include an amount to cover the provider's billing costs in the compensation-related customary charges for the physician's services. Similarly, other commenters pointed out that many physicians who practice solely in a provider, such as radiologists, and who do not have a compensation agreement with the provider, include an element representing their billing and collection costs in determining the amounts they bill for services furnished to their patients.

Response: It is substantially more expensive for a provider or physician to bill the carrier, since the form required to do so is significantly more detailed than the forms used for combined billing. Further, our administrative costs are considerably higher for processing claims submitted on the HCFA–1500.

In consideration of these comparative costs, we designed our NPRM proposal to avoid creating a situation in which physicians, who have the option of using either method, had no incentive to choose the less costly method. Physicians who are not compensated by providers for the services they are billing for do not have a choice of billing methods, and can recover their overhead costs only through the charges they bill. Other things being equal, we did not believe it reasonable to encourage the use of a more costly billing method by paying its costs.

However, we are now proposing to eliminate combined billing. If we do so, physicians would no longer have a choice of billing methods. In this situation, we must reconsider the effects of various ways of treating billing costs, and welcome comments and data on this. Based on these comments, and our own further analysis, we will make needed changes when we issue final regulations on combined billing.

F. Effect of Physician's Assumption of Operating Costs

Some physicians (or entities to which physicians are related or by which they are employed) enter into an agreement (such as a lease or concession agreement) with the provider, under which the physician furnishes physician services in the provider and assumes some or all of the operating costs of the department in which the services are furnished. (Note that these situations are distinct from those described in section V.E. above, in that the services are furnished to provider patients.) In the past, we have permitted physicians who have entered into agreements of this type to claim Medicare Part B reasonable charge payment as payment in full for all services furnished in the provider department including the technical input and overhead costs of producing those services.

However, this practice has led to increasing problems. Since the beginning of the Medicare program, there have been significant changes in the health care marketplace. Third-party cost-based reimbursement has grown to be the dominant method by which health care services are paid for. The rapid increase of health care costs, relative to cost increases in the rest of the economy, has produced a number of local, State, and Federal strategies to contain those costs. In turn, many providers have adopted various means of maximizing their reimbursement from major payors such as Medicare. In this context, we believe that our long-standing policy related to lease or concession agreements has afforded an opportunity for providers and other parties to make financial arrangements that advantage them at significant cost to the Medicare program. Therefore, in the NPRM, we proposed to require that all provider services be reimbursed on a reasonable cost basis, even when furnished through a department operated under a lease, or some other agreement, such that a physician or other entity assumes operating costs normally incurred by a provider.

Under the regulations now being adopted, the basis for payment for operating costs incurred in furnishing the services is the reasonable cost incurred by the lessee. That is, the costs of the other, technical, inputs involved in the delivery of the service (space, equipment, nonphysician personnel, etc.) will be reimbursed by the intermediary to the provider on a reasonable cost basis, not to the physician or other entity that has assumed these operating costs. As is the case with other costs generally, we will recognize these costs only if the provider actually incurs them (that is, has a legal obligation to reimburse the lessee for them).

Our regulations also require the physician or other entity to make its books and records available both to the provider and to the intermediary to permit verification of these costs. This is

necessary to fulfill the requirement that payments be supported by available data. This is not overly intrusive because the close connection inherent in the relationship between a hospital or other provider and its leased departments. This close connection makes it appropriate to treat them as related-parties for these payment purposes. The Secretary's authority to do this is in addition to the authority granted under section 1861(v)(1)(I), regarding access to records of provider's subcontractor for services. Section 1861(v)(1)(I) furnishes additional authority when the lessee furnishes services to the provider valued at $10,000 or more.

Comment: Some commenters protested that, in view of this proposal, they may wish to reconsider and renegotiate leases and other agreements, and that this could be a complex process requiring considerable time.

Response: We are not requiring either providers or other parties to alter existing agreements, although we recognize that some may wish to do so. Generally, we are allowing 120 days for affected parties to prepare for the implementation of this requirement. However, where an agreement predates Medicare, we are allowing a 2 year delay of application of this provision. See section VIII. B. of this preamble for a discussion of the implementation date of this provision.

Comment: Some commenters asked what procedures will be followed by the intermediary in determining Medicare reimbursement when a physician, e.g., a radiologist, or an entity has a lease arrangement with a provider and bills the provider for the technical component of services furnished to Medicare patients.

Response: In these circumstances, the hospital will include the amount it pays the leasing physician or entity among its Medicare costs. These costs are reimbursable to the extent they are reasonable. In determining reasonable costs, the intermediary can audit the fiscal records of the lessee to determine actual costs.

Comment: Some commenters were strongly opposed to this proposal. Sometimes a physician or entity contracts to furnish certain diagnostic services (such as EKGs) to provider patients and bears the costs of equipment, supplies, and nonphysician personnel necessary to produce those services. The commenters believe that in such a case, the physician (or entity) should be able to bill for (and be reimbursed on a Part B reasonable charge basis) amounts that reflect both the nonphysician input costs and the professional services (such as interpretation of the diagnostic tests) performed by the physician.

Response: When a Medicare patient is furnished services in a provider that are covered under the Medicare program as provider services, we must pay the provider for those services on a reasonable cost basis. When a service is billed for on a reasonable charge basis, the amounts billed are subject to reasonable charge screens and the amount paid by Medicare may be significantly less than the amount billed. In addition, beneficiaries would be liable for 20 percent coinsurance for inpatient hospital services reimbursable on a reasonable charge basis. It is not in accord with the statute, nor is it equitable, for the amounts subject to these reductions and liabilities to vary between beneficiaries depending on the financial agreement between the providers and the contracting entities from which the beneficiaries obtain services. In addition, this rule is designed to eliminate incentives to maximize reimbursement through spinning off hospital services to lessees and contractors. Congress intended that hospital services be reimbursed on a cost basis, rather than a charge basis.

Comment: It is possible for a physician or other entity to contract to furnish services to provider patients (e.g., EKGs and radiology services) and to agree to bill the provider a single amount for each service that would include payment for both nonphysician input costs and the physician's professional services. In such a case, could the provider be subsequently reimbursed by its intermediary on the basis of the total amounts paid to the contracting entity?

Response: No. In view of our decision to propose the elimination of combined billing, we believe that it is not feasible to adopt this suggestion. Under this proposal, we would require all physicians' services reimbursable on a reasonable charge basis to be billed using the HCFA–1500. If we were to continue and extend combined billing, it is possible that we could allow this as an optional billing method, provided that instructions could be implemented under which the amounts for services reimbursable on a charge basis were separately identified by the billing party. However, this will not be possible under the proposed billing changes, since the bills for the physicians' services to individual patients will be submitted on a separate form to carriers, not to the provider's intermediary.

V. Payment for Physician Services to Individual Patients

A. Customary and Prevailing Charges

In accordance with section 1842(b)(3) of the Act, carriers must determine whether physicians' charges for Part B services are reasonable, taking into consideration each physician's customary charge for specific services, and the prevailing charges of other physicians billing for similar services furnished to beneficiaries in the locality. The current regulations for determining customary charges in general are at 42 CFR 405.503, and the regulations on prevailing charges are at 42 CFR 405.504. In making these comparisons, we also consider the amount a physician usually accepts as payment for a service to be his or her charge for that service, regardless of a different amount that he or she may have claimed on a particular bill. Carriers have flexibility in determining customary and prevailing charges, since they have substantial discretion in seeking sources of data, establishing comparison groupings, and using relative value scales. (A relative value scale is the result of an analysis of the comparative values of the various physician services in relation to some base service.)

Under these regulations, the carriers will establish separate customary and prevailing charges for services for which there are two separate payment levels based on setting, such as is the generally accepted practices in billing for electrocardiograms (EKGs) and other services. Carriers will accumulate the charge data for physician services furnished in a provider separately from services furnished in a physician's office. If a particular physician has both an office-based practice and a provider-based practice, the carrier will keep separate the charge data for such services furnished in each practice. Based on data for these services, the carrier will establish separate customary charge profiles and calculate separate customary and prevailing charges (in accordance with the general rules on reasonable charge payment at 42 CFR 405.501 through 405.508), based on setting.

B. Compensation-Related Customary Charges

As discussed above, under the Medicare statute and the existing general rules on determination of reasonable charges (at 42 CFR 405.501 through 405.508), a carrier determines whether a physician's charge for a service furnished to a beneficiary is reasonable by taking into consideration

both the physician's customary charges and the prevailing charges of other physicians. (Prevailing charges are based on the customary charge of all physicians in a locality for that service.) If a physician is compensated by a provider for physician services to individual patients furnished in the provider, and neither the physician nor the provider charges any patients (or patients' insurers) separately for the physician's services, there are no identifiable customary charges for the physician's services.

To establish and apply the required standards of reasonableness to charges for services furnished by compensated physicians, the existing regulations (42 CFR 405.485) state that the carrier computes compensation-related charges based on the assumption that the part of a physician's compensation allocated to patient care services represents the aggregation of the physician's customary charge for patient care services.

These compensation-related charges have been billed on the HCFA–1554, and have not been used by carriers in making the prevailing charge comparisons necessary to determine whether such charges are reasonable. Rather, under existing regulations at 42 CFR 405.485, the intent has been to use these charges to return to the provider the full amount of the Medicare share of the provider's costs of physician compensation.

Under the rules now being adopted, as proposed in the NPRM, when services are furnished to individual patients by a compensated physician and combined billing is not used, the carrier will derive customary charges for physician services to patients from the compensation the physician receives for the services. However, the carrier will also include these compensation-related customary charges, which will now be billed on the HCFA–1500, in determining prevailing charges for the services of physicians in the locality. The carrier will develop compensation-derived charges based on the portion of the compensation allocated to services to individual patients on an item-by-item basis, considering the frequency with which the various services are furnished and the relative values assigned to each service. (In the NPRM, we discussed basing compensation-related charges on compensation limits that we proposed to apply to payment for physicians' services reimbursable on a reasonable charge basis. However, as explained in section VII of this preamble, we are not so limiting these payments at this time.)

Under these regulations, the carrier will use the value of compensation and fringe benefits paid by an organization, including a medical school, to determine customary charges when appropriate, that is, when there is no other basis for determining customary charges. (See the discussion of comments in section VI. D., below, for other permissible bases for determining customary charges in a teaching hospital setting.) For example, if a physician who is paid by a medical school to furnish services in a hospital does not have noncompensation-related customary charges that are applicable to his or her services, the carrier will base payment on the compensation he or she receives from the medical school.

C. Effect of Change of Compensation Agreement on Customary Charges

A physician who has been compensated by or through a provider (or other entity, such as an organization related to the provider, or any organization through which provider patients received patient services and through which physicians are compensated) for physician services to individual patients may choose to end his or her compensation agreement applicable to services furnished to all patients and bill all patients, or their insurers, directly for his or her services. In this case, the carrier will continue to determine the physician's customary charges on the basis of the former compensation agreement until sufficient charge data have been accumulated to enable the carrier to establish a customary charge profile. The regulations specify that the carrier must have charge data from at least 3 months of the calendar year preceding the annual reasonable charge update (which is required by law to occur on July 1 of each year) before establishing a customary charge profile on the basis of the physician's actual charges to his or her patients. If all the patients are not billed on the same basis, or if some patients or their insurers do not pay the charges, Medicare reimbursement would be determined on a compensation-related basis.

Comment: One commenter pointed out that the NPRM did not provide for situations in which a physician who had been billing directly for his or her services to individual patients entered into a compensation agreement under which a provider compensated the physician for those services. The commenter inquired how we would determine compensation-related charges without historical data for that physician.

Response: The commenter correctly identified an omission, which we have now provided for in these final regulations. In such a case, during the first year under the new compensation agreement the total reimbursement for services to individual patients may not exceed what the payment would have been for a similar volume of services under the physician's former billing practice.

D. Elimination of Reimbursement for Physicians' Services Using a Schedule of Charges Unrelated to Compensation

Under existing regulations at 42 CFR 405.480(c), we have permitted an established separately identified schedule of charges unrelated to compensation to serve as the basis for customary charges for services to individual patients furnished by compensated physicians. In NPRM, we proposed to eliminate this reimbursement policy, and we are doing so in these final regulations.

Some hospitals bill amounts for services of compensated physicians that exceed the compensation the physicians receive for the services. The inclusion in charges of amounts that exceed the physicians' compensation for the services enables the hospital to realize a profit from the services of compensated physicians. Our usual reasonable charge rules (under which carriers generally consider only the customary, prevailing, and actual charges for services) have not been effective in preventing payment of unreasonably high charges. Further, it is not reasonable to pay more for a service than the physician receives for furnishing it. In addition, it is consistent with our policies for determining reasonable charges for physicians generally to consider the actual compensation for a service to represent the physician's customary charge. This places payment to provider-compensated physicians on a more equal footing to payments to physicians generally, for whom only amounts they actually reasonably expect to receive qualify as customary charges. Therefore, we believe it is necessary to recognize as reasonable only those charges that would return to the provider the cost of compensating the physician for the services being billed for. (This in no way prevents the provider from billing the beneficiary any amount it wishes.)

As noted above, we are planning separate proposed regulations revising our regulations for reimbursement for the services of physicians, in teaching hospitals. These regulations would implement the provisions of section 948 of the Omnibus Reconciliation Act of 1980, and make other needed changes. Since the determination of customary charges for the services of physicians in teaching hospitals is covered under a separate provision of law, we will

continue to recognize the use of separately identified schedules of charges for physician services furnished in teaching hospitals, consistent with the policies and procedures contained in Intermediary Letter Number 372, until any changes in this policy are effected through the planned rulemaking for teaching hospitals.

Comment: One law firm, which counts a number of providers and physicians among its clients, offered several legal arguments in opposition to this change in our regulations. They argued that elimination of this payment basis is discriminatory and, therefore, violates the equal protection rights guaranteed to all persons under the law. It was described as discriminatory in two ways: first, this provision discriminates against non-teaching hospital providers, by not affording them the same options and opportunities as teaching hospitals; second, it does not apply the same principle to other employers of physicians, such as physician service corporations or partnerships. The commenter also argued that this change disregards the specific provisions of section 1842 of the Act that describe how reasonable charges are to be determined. The commenter states that section 1842 does not permit consideration of a physician's employee/employer relationships and agreements in determining the reasonableness of his or her charges.

Response: In making this change, we are relying on the broad discretion granted the Secretary of HHS by the Medicare law to determine the level of charges that will be considered reasonable, as well as the statutory provision regarding customary charges, discussed above. This authority is implemented in part by our current regulations at 42 CFR 405.502(a)(7), which specifically authorize consideration of additional, unspecified factors that may be found necessary and appropriate in judging whether charges for specific items or services are inherently reasonable. Inherent reasonableness is a basic premise governing all Medicare program payments.

Generally, it is not reasonable for Medicare, as an insurer, to pay amounts for physician services greater than what the physician agrees to accept for his or her services. Since the fiscal records of a provider such as a hospital are available to us, it is feasible to determine the amounts that their compensated physicians accept for their services. Under our general principle, in the absence of specific authority, requirements, or circumstances to the contrary, we believe we should pay no more than those amounts. (Moreover, Medicare payments to providers, with the exception of the return on equity, are limited to costs. Medicare does not fund provider profits, apart from the return on equity.

In the case of teaching hospitals, section 948 of Pub. L. 98-499 specifically directs the Secretary to establish by regulation methods of determining the customary charges for the services of teaching physicians that may result in total payments exceeding the amounts accepted directly for those services by the physicians. Congress authorized this level of payment to help further the special role of teaching hospitals in our nation's health care system. Further, our policies governing reimbursement in this setting are being reviewed currently and the final policy will be set through public rulemaking in the near future.

In the case of nonprovider employers of physicians, the fiscal records necessary to determine the amounts accepted by physicians for their services are not generally available to us. We have no source of data to determine the extent to which the amounts these physicians accept differ substantially from the amounts charged for their services. Therefore, we have no means for assessing the inherent reasonableness of such charges, and rely only on the usual comparisons of actual, customary and prevailing charges.

With respect to the provisions of section 1842, we wish to note that this policy is consistent with the statutory customary charge requirements. In addition, this policy is warranted based on general considerations of reasonableness. Section 1842 describes certain considerations the carriers should make in determining reasonable charges, including customary and prevailing charge comparisons. Section 1842 does not, however, limit considerations solely to these criteria. For example, Medicare carriers should also compare charges for services to Medicare beneficiaries to charges for services to other patients in making a reasonable charge determination. This also is a general test of inherent reasonableness.

Therefore, despite the arguments advanced, we continue to believe that it is generally unreasonable, and inconsistent with section 1842, for Medicare to pay more for a physician's service than the physician has agreed to accept. Finally, the legislative history of section 1842(b)(6), as discussed in section I.A. above, shows an intention that payments for services to patients by provider-based physicians generally be based on the physician's compensation.

Comment: Some commenters asserted that when the provider previously used a separately identified schedule of charges to bill for the services of a compensated physician, and the physician terminates his or her compensation arrangement with the provider, the provider's separately identified schedule of charges should be recognized as the physician's customary charges.

Response: We agree with the comment. If the physician is no longer compensated by the hospital for the services he or she furnished to all patients and the charges were properly established, the carrier may treat the hospital's previously established separately identified schedule of charges as customary charges for that physician.

Comment: Some commenters claimed that the proposal under which separately identified schedules of charges for physicians' services will no longer be recognized as "customary charges" for compensated physicians infringes on a hospital's right to realize a profit on charges for the services of physicians who are compensated by the hospital.

Response: Neither the original Medicare statute, nor the newly established section 1887 of the statute, authorizes the Secretary to reimburse more for physicians' services than is inherently reasonable or more than the physician agrees to accept for his or her services. For the reasons discussed above, we disagree.

E. Changes in Billing Methods for Reasonable Charge Payment

1. *Summary of Current Billing Procedures.* Under Medicare, physicians who accept assignment bill the Medicare carrier for services to Medicare patients. In the past, we have allowed three methods of billing charges. Each method has depended on use of a particular billing form.

The HCFA-1500 (and its predecessor, the HCFA-1490) is used when a physician identifies specific charges for specific services. It has also been used by providers who have identified a separate schedule of charges for physicians whom they employ. The charges identified on the HCFA-1500 represent the fees-for-service generally used in billing for physicians' services to all types of third party and private payers. It is used by physicians who accept assignment of the beneficiary's claim for Medicare reimbursement (see 42 CFR 405.251(b)) and by beneficiaries

whose physicians do not accept assignment (42 CFR 405.251(a).

The HCFA–1554 has been used by some providers to bill compensation-related charges for services furnished to provider patients by physicians compensated by the provider for furnishing those services. In these cases, some providers (or physicians) have not identified a separate charge for each physician service. The calculation of compensation-related charges under existing regulations has been intended to result in total payments to the provider equal to the compensation paid to the physician. Using the HCFA–1554, the compensation-related customary charge for the physician service can generally be computed in one of three ways: the per diem method, the uniform optional percentage method, or the item-by-item method. (See section 8017 of the Medicare Carriers Manual, HCFA Publication 14.) Under the per diem method or the uniform optional percentage method, no specific physician service or its charge is identified; the identification occurs only under the item-by-item method. Upon receipt of the claim, the carrier simply checks the reported billed amounts with the physician compensation data on record and makes appropriate payments. These payments are in turn reported to the provider's intermediary. At the provider's cost settlement, the intermediary compares the amounts paid to the actual allowable costs of compensation, and makes adjustments as necessary.

From the provider's point of view, the advantage of the HCFA–1554 was that, for a particular patient, the hospital could list the charges of various ancillary service departments, such as radiology, cardiology, and laboratory, without having to separately identify each service and list a charge for it.

The HCFA–1490 (now replaced by the HCFA–1500) and the HCFA–1554 were introduced at the inception of the Medicare program. The third method, commonly called combined billing, uses the standard hospital inpatient and outpatient billing forms (the HCFA–1453 and HCFA–1483, respectively) and was introduced subsequent to the 1967 amendments to the Medicare statute (Pub. L. 90–248, enacted January 2, 1968).

Physician and provider services must usually be billed separately, in order to facilitate payment from the correct trust fund and application of deductible coinsurance requirements. Under section 131 of Pub. L. 90–248, the reimbursement rate for certain radiology and pathology services furnished to hospital inpatients by a physician in the field of radiology or pathology was set at 100 percent of the reasonable charges, as opposed to 80 percent under the original Medicare statute. Since there was no need in these cases to determine beneficiary liability for deductible and coinsurance amounts, the payments for these services were allowed to be included on the provider's bills, with no identification of separate charges for physician services.

Program guidelines permit the use of combined billing only where the departmental physicians are compensated by the hospital on a salary or a single uniform percentage of charges basis. The principal advantages of combined billing are that: (1) It frees the hospital from having to compute charges for hospital-based physician services, and (2) billing for departmental services both the institutional component and the physician component can be carried out through a single billing form.

2. *Changes in Billing Procedures and Forms.* As a result of changes in physician reimbursement due to both changes of law and regulations, we are making a number of significant changes in billing.

First, section 112 of Pub. L. 97–248 eliminated the provisions in the Social Security Act that required us to pay 100 percent of the reasonable charges for pathology and radiology services furnished to hospital inpatients. As a result, we needed to decide whether to eliminate or extend combined billing, as discussed below. After review of these issues, we proposed, in the NPRM, to extend combined billing as an option for all specialties of physician services furnished in providers, subject to the proviso that reimbursement under combined billing would be subject to a reasonable compensation limit. We have since decided not to impose such a limit, and have therefore reconsidered the proposed NPRM provision. As a result, we now propose to eliminate combined billing altogether, as explained below. However, until a final decision is made about implementing this proposal, we will continue to recognize combined bills submitted under existing instructions. (Of course, providers and physicians submitting combined bills must do so in conformity with the other provisions of these final regulations.)

We also proposed elimination of the HCFA–1554. Since the services billed for on this form are frequently not separately itemized, use of the form severely restricts carriers' ability to compare actual charges billed to the customary and prevailing charges for similar services in the locality. This has contributed to the payment problems described above.

As a result of elimination of the HCFA–1554, providers which act as billing agents for physicians must submit bills for services furnished by compensated physicians either by using combined billing (HCFA–1453 or 1483), or by submitting itemized bills specifying services and charges on a HCFA–1500. (As explained elsewhere in this preamble, a provider will be permitted to bill for services on the HCFA–1500 only when it is acting as the billing agent for a physician.) We believe this will enable carriers and intermediaries to evaluate more effectively the requests for payment they receive.

Some providers charge for services on an all-inclusive-rate basis. That is, they generally charge patients a single per diem rate that covers both physician and hospital services. Therefore, these providers do not separate the costs for provider and physician services to patients on a patient-by-patient basis. We believe that the provider cost report (HCFA–2552) provides all the information we need to determine payment to these providers accurately. As a result, elimination of HCFA–1554 billing will help reduce paperwork for both these providers and the carriers.

3. *Proposed Elimination of Combined Billing.* Before the enactment of Pub. L. 97–248, combined billing was limited to physicians' services in the field of pathology and radiology furnished under assignment to hospital inpatients, and to physicians' services furnished under assignment to hospital outpatients. In all these cases, combined billing was easily feasible because the Medicare program paid the same proportion of the costs and charges determined to be reasonable for the services furnished. That is, outpatient hospital services were generally reimbursed at 80 percent of reasonable costs, corresponding to the 80 percent of reasonable charges reimbursable for related physicians' services. Similarly, Medicare paid 100 percent of the reasonable costs of inpatient hospital services, while related radiology and pathology services were reimbursed at 100 percent of the reasonable charges, without regard for beneficiary coinsurance and deductible obligations, in accordance with section 131 of Pub. L. 90–248 (enacted January 2, 1968).

Section 112 of Pub. L. 97–248 subjected inpatient radiology and pathology services under assignment to the same deductible and coinsurance requirements as other Part B services. We then had to consider either ending combined billing, or, if we could find a way to handle related beneficiary

liabilities for deductible and coinsurance amounts, continuing it. However, if we continued it, it would have to be extended to all physicians, since many physicians desired to use it, and there were no longer special reimbursement rules for certain services of radiologists and pathologists. This last was our proposal in the NPRM, in connection with the requirement that reimbursement under the combined billing method for physicians' services to individual patients would be subject to the RCE limits.

As a result of our decision not to apply the RCE limit to charges for services to individual patients, we have decided not to extend combined billing as proposed in the NPRM. Without such a limit, the intermediaries receiving combined bills would not have an adequate means of testing them for the reasonableness of physicians' charges, since the usual customary and prevailing charge screens applied by carriers would be inapplicable. (This has been a longstanding problem with combined billing.) Although the 1967 Social Security Amendments permitted combined billing in the expectation that this would simplify reimbursement procedures and claims processing for both providers and intermediaries, these improvements never materialized, as noted in the legislative history of section 112 of Pub. L. 97–248 (S. Rep. 97–494, page 19). Therefore, we have proposed to eliminate combined billing altogether. This would result in all charges for services to individual patients being billed to carriers on the HCFA–1500, which requires the itemization needed to apply prevailing and customary charge screens.

Considering the NPRM proposal to extend combined billing to all physicians, we believe that we should not eliminate combined billing without affording the public the opportunity for comment. Therefore, we are providing an additional 30-day comment period on these regulations, and proposing to change our administration practice by eliminating combined billing entirely and requiring all physicians' services reimbursable on a reasonable charge basis to be billed for on form HCFA–1500. This itemized bill will enable our carriers to make the necessary comparisons of actual amounts billed to customary and prevailing charges for similar services, and to determine whether the amounts of such charges are reasonable.

We expect significant comment on this proposal. If we decide to proceed and eliminate this billing method, we will publish an additional notice announcing that decision. If feasible, we will do this before these regulations become effective, in order to implement the elimination of combined billing at the same time as the provisions of these regulations. Until a notice announcing this decision is published, we will continue to recognize combined bills submitted under existing instructions.

VII. Reasonable Compensation Equivalent Limits

A. General Rules for Setting Reasonable Compensation Equivalents (RCEs)

Allowable compensation for services furnished by physicians to providers that are reimbursable on a reasonable cost basis will be subject to limits for Medicare reimbursement purposes. (We proposed in the NPRM to apply such limits to payments related to compensation for services reimbursable on a reasonable charge basis, but are not doing so in these final regulations.) Under these limits, Medicare program reimbursement will be determined based on the lower of the actual cost of the services to the provider (that is, the compensation to the physician, whatever the form) or a reasonable compensation equivalent (RCE). These limits will apply to reasonable costs payable from the Part B trust fund, for CORF and hospital outpatient services, as well as to the costs of inpatient services payable under Part A.

If a physician receives any compensation from the provider for his or her physician services to providers, reasonable cost reimbursement to the provider for the costs of compensation allocated to those services will be limited by the RCE limit. The RCE limits will not be applied to reimbursement for services furnished to individual patients that are reimbursable on a reasonable charge basis, even if the physician agrees to accept compensation (e.g., from a hospital) for those services, except in teaching hospitals that elect to be reimbursed for such services on a reasonable cost basis in accordance with section 1861(b)(7) of the Act. If the physician is compensated only for services to the provider, the RCE limit will be applied to reimbursement to the provider on a reasonable cost basis for the entire cost of compensating the physician for those services. (See section V. A. above for the definition of compensation and rules for allocating it among types of physician services.)

The limits apply equally to all physician services to providers that are reimbursable on a cost basis under Medicare and for which physicians are compensated by the provider, not just to services of radiologists, anesthesiologists, and pathologists.

The actual methodology for establishing RCE limits is not part of the regulation text. Instead, our regulations establish a general authority to develop, publish, and apply limits. The regulations provide that we will base the limits on the best available data and publish them annually. Notices describing the methodology and setting forth the limits will be published in accordance with established Departmental procedures.

Comment: Several commenters expressed uncertainty as to which provider costs would be subject to the RCE limits, specifically inquiring if they applied only to Part A costs.

Response: Hospital, SNF and CORF payments for physician services to providers are subject to the RCE limits. Inpatient hospital and SNF benefits are generally payable on a Part A reasonable cost basis; outpatient hospital and CORF benefits are reimbursed at 80 percent of reasonable costs under Part B. Both Part A and Part B provider costs for physician services are subject to the RCE limits.

Comment: In the NPRM, we proposed to apply RCE limits to physician services to individual patients for which a physician accepted compensation from or through the provider. Many commenters declared that, although the statute requires us to impose RCE limits on reimbursement for physician services to the provider, to extend these limits to charges for services to individual patients exceeds the authority and intent of the statute.

Response: As indicated previously, we will not apply RCE limits to compensation for physicians' services reimbursable on a reasonable charge basis. Numerous comments on our proposal to apply RCE limits to compensation-related charges have pointed out the difficulty of implementing this, both in terms of technical problems and in view of anticipated great difficulties with such limits being accepted by the medical community. As a result, we have decided not to implement such limits at this time. However, although section 1887 does not require reasonable compensation equivalent limits to be applied to reimbursement for physician compensation for services to individual patients, we believe the Secretary has the authority to apply these limits to that reimbursement. In the NPRM, we set forth in detail the basis of this authority and our reasons for proposing to apply the RCE limits to compensation for these services. Our decision not to apply the

RCE limits to compensation-related charges in these final regulations does not indicate that we have decided that there is not sufficient authority to do so.

Instead, as part of our ongoing review and analysis of the physician reimbursement system, we will monitor and study the level of physician reimbursement under these changes. If necessary, we will later propose other means of testing the reasonableness of charges for physicians' services to patients received through combined billing (HCFA–1453 and 1483) or as compensated-related charges (HCFA–1500). However, the Medicare carrier (and the intermediary when it functions as a carrier in the case of combined billing) has the authority under 42 CFR 405.502(a)(7) to impose other criteria of reasonableness, if, in the individual case, it finds it necessary and appropriate to judge whether the charge for a specific item or service is inherently reasonable.

Comment: A number of commenters protested that, in setting RCE levels on a basis that excluded the overhead costs of private practice, we gave no consideration to overhead expenses incurred by physicians regardless of practice setting, such as the costs of malpractice insurance, professional memberships, and continuing medical education.

Response: We recognize that adjustments are necessary in some cases to take such factors into consideration. However, for a physician with an office-based practice in addition to his other provider/based activities, these costs would be included in the overhead for the private practice. Therefore we are instructing intermediaries that they may adjust an individual physician's RCE limit upward, provided that the physician is engaged in full-time provider practice. This adjustment should be related to actual costs incurred by physicians, up to 5 percent of the limit, to take into consideration the costs of membership in professional societies and continuing education.

We have limited this adjustment to a maximum of 5 percent of the limit, based on our review of data on physician practice costs. However, much of the available data, such as the PSP, does not itemize such costs in a useful manner. Therefore, we plan to monitor the requests made to intermediaries for such adjustments, as well as our sources of information on such costs. If we find this adjustment to be too generous, or inadequate, we will make changes as appropriate.

In addition to the above adjustment, an intermediary may make an appropriate adjustment to the RCE limit to take the cost of malpractice insurance into account. To the extent malpractice insurance is shown to be related to a physician's (or a group of physicians') services to provider patients, the intermediary may, as appropriate, adjust RCE limits upward to reflect malpractice expense incurred by either a provider or a physician.

In making this adjustment, the intermediary will determine the ratio of that portion of compensated physician time spent in furnishing services in the provider (both to the provider and to provider patients) to the physician's total working time, and adjust the total malpractice expense proportionately. The amount of malpractice expense attributed to compensated services will be added to the RCE limit after the limit is adusted by the ratio of the physician's time spent in furnishing provider services to the time spent in furnishing all services compensated by the provider. Thus, if a physician's sole practice is that related to the compensation, the proportionate amount of malpractice cost may be added to the time-adjusted RCE limit.

Comment: Some commenters argued that reasonable physician compensation varied in response to factors not allowed for in our RCE methodology, under which limits are adjusted only for specialty, location, and hours worked. They point out that staffing patterns and levels vary widely, with significantly different resulting costs.

Response: In reviewing the cost of physician compensation for services to the provider, the intermediary will not be limited to merely applying the RCE limit based on existing staffing, but will consider the inherent reasonableness of the arrangement. For example, we generally would consider it unreasonable for a hospital to compensate physicians in a particular department for a number of administrative/managerial hours greatly in excess of the hours utilized in comparable departments in other hospitals.

Comment: Generally, physicians are considered "based" in a hospital or other provider if they receive compensation from the provider. These regulations provide RCE limits on providers' compensation to physicians for services the physicians furnish to providers. Do these limits apply to the compensation to a physician who serves solely as the administrator of a hospital or skilled nursing facility or the chief of a medical staff?

Response: No. The limits apply only to physicians who direct a provider department in which the physician's expertise is required or who furnish other services, such as participating in utilization review committee or quality control activities, or whose personal services to patients are reimbursed on a reasonable cost basis (as elected by a teaching hospital under 42 CFR 405.465). For example, they supersede the salary equivalent limit of $30,000 in 42 CFR 405.465(d).

Comment: Several commenters inquired what recourse a provider would have if it disagreed with the RCE determinations of its intermediary.

Response: The intermediary's determinations of allowable costs under the RCE limit are subject to the same appeal procedures as other intermediary determinations, on accordance with regulations at 42 CFR Part 405, Subpart R, "Provider Reimbursement Determinations and Appeals". If a provider believes that an intermediary's determination is inconsistent with Medicare policy, as shown through regulations, guidelines, and instructions, and if the amounts involved meet the requirements of Subpart R, the provider may appeal the determination in the same manner as an intermediary determination relative to any other provider cost. Providers should first direct their requests for exceptions and adjustments to the intermediary.

Comment: Do the RCE limits apply to compensation to physicians who furnish end-stage renal disease (ESRD) services or who are directors of ESRD facilities?

Response: Reimbursement for compensation to physicians who furnish ESRD services or who are directors of ESRD facilities will be governed by the final regulations resulting from the proposed rules published in the Federal Register February 12, 1982 (47 FR 6550).

Comment: Some commenters asked whether the RCE limits would be applied in determining the reasonable costs of physicians' services to a provider in a hospital emergency room.

Response: Yes. The costs the provider incurs in compensating physicians for emergency room supervisory and administrative services would be subject to the RCE limit. Also, any amount guaranteed a physician to be available in an emergency room to furnish services would be subject to these limits because the physician's availability is a service to the provider and its patients generally. Thus, as a cost of the provider for furnishing outpatient services, the hospital's guarantee payment to the physician is allowable by Medicare on a reasonable cost basis under Part B. However, if the provider and emergency room physician agreed that the amounts of time and

compensation related to administrative and supervisory services were negligible, and if the intermediary found this assumption acceptable, we would consider all of the physician's compensation to be related to physician services to individual patients reimbursable on a reasonable charge basis. Thus, Medicare would not reimburse the hospital on a reasonable cost basis for these physicians' services.

Some physicians who furnish services in hospital emergency rooms may contract with the hospital to be guaranteed a minimum level of compensation to be available to handle emergencies. If the total charges billed by or on behalf of the physician for physicians' services fall short of the guaranteed amount, Medicare program operating guidelines provide that, under certain specified conditions, the program will recognize its proportionate share of the unmet guarantee.

While program operating guidelines indicate that the guaranteed level of compensation must be reasonable, the guidelines do not provide for a specified dollar amount. Effective with the implementation of these regulations, intermediaries will have authority to use the RCE limits as a standard to measure the reasonableness of the guaranteed level of compensation in ER rooms.

Comment: One commenter argued that a provider's costs of physician compensation should include all elements of value received by the physician under the contractual relationship with the provider, and that our exclusion of provider-furnished billing and collection services, and office space to treat private patients, interferes with the right of providers and physicians to negotiate contracts without governmental interference.

Response: A physician and provider may negotiate all aspects of their contractual relationship to their mutual satisfaction. These agreements, however, do not bind Medicare eligibility, coverage, and reimbursement policy. Medicare is not a party to such agreements. There are limitations on Medicare eligibility, coverage, and reimbursement policy which are based on the provisions of the statute and the regulations. The purpose of these regulations is to clarify the extent of Medicare reimbursement for the services physicians furnish to providers of services. The fact that Medicare reimbursement does not recognize or reflect all aspects of a compensation agreement between a physician and a provider does not constitute government interference with contractual relationships between physicians and hospitals.

Comment: Will the RCE limits be applied where the only financial relationship between the physician and the provider is that the physician utilizes the provider as billing and collection agent?

Response: No. The RCE limits apply only where the provider incurs physician compensation costs for services reimbursable on a reasonable cost basis, that is, for physician services that may be included among the provider's services, such as hospital services within the meaning of 1861(b) of the Act.

Comment: Is the reasonable compensation equivalent limit to be applied to the physician's compensation inclusive or exclusive of services that are not covered by Medicare?

Response: Both the physician's time and the portion of his or her compensation attributed to noncovered services are excluded in determining the amount of compensation subject to the RCE limits.

Comment: One commenter argued that where the compensation received by the physician includes payment for some noncovered services, such as research, Medicare should reimburse for the total amount so long as the compensation is less than the reasonable compensation equivalent limit.

Response: The costs of compensation for services that are not covered by Medicare, such as research, cannot be reimbursed because Medicare does not have the legal authority to pay for such services.

Comment: Do the RCE limits have an effect on what a non-Medicare insurer may pay for a physician's service furnished in a provider?

Response: The RCE limits provide the basis upon which the Medicare program will pay its proportionate share for services of general benefit to Medicare beneficiaries. The hospital may bill the non-Medicare patient's insurer whatever it chooses; the RCE would not be controlling. It should be pointed out, however, that the State Medicaid program could choose to use the RCE as its basis for payment of services provided Medicaid hospital patients.

B. Methodology for Establishing RCE Limits

The methodology for establishing RCE limits is based on an internal working paper developed by HCFA's Office of Research and Demonstrations, "A Methodology for Determination of Reasonable FTE Compensation for Hospital-Based Physicians", by James R. Cantwell and Williams J. Sobaski (Working Paper #OR-32, revised December 1982). Copies of this paper are available on request from: ORD Publications, Office of Research and Demonstrations, Health Care Financing Administration, Oak Meadows Building, 1-E-9, 6340 Security Boulevard, Baltimore, MD 21207 (301) 597-3422.

Our methodology for establishing reasonable levels of compensation includes five steps, as follows:

1. *Estimating national average income for all physicians.* We estimated the national average (mean) income for all physicians using 1979 physician net incomes from the American Medical Association (AMA) Periodic Survey of Physicians (PSP), published by the AMA in its *Profile of Medical Practice, 1981.* We also reviewed other data sources and found these to be generally consistent with the PSP data. However, considering the type of compensation limits we are establishing, we found the PSP data to be the best available for our purposes.

Since the original working paper on which this methodology is based was prepared, in January, 1982, the AMA began publishing results from its Socio-Economic Monitoring System (SMS), which has apparently replaced the PSP. In the final version of the working paper, we have used the SMS estimates of 1981 average net earnings of all specialties as a comparison point to check the accuracy of our forecasting on the net earnings.

However, for purposes of calculating FTE earnings relationships between specialties and for localities, we must continue to use the data published from the 1980 *PSP*. That is to say, for FTE estimation it is necessary to have annual work hours data per specialty and locality which underlie the estimated national average for all physicians. Results from the 1980 *PSP* as published in the 1981 *Profile of Medical Practice*, represents the latest source from which all suitable data are available. (National average 1981 earnings estimates for specialties have been published from the newer SMS, but they were not accompanied by work hours data per locality.)

Comment: Some commenters, including the College of American Pathologists, questioned the use of the PSP survey data, gathered largely from office-based physicians, for establishing estimates of reasonable FTE compensation for hospital-based physicians.

Response: The universe sampled by PSP *included* both office-based and hospital-based physicians and excluded *only* those physicians who are full-time salaried employees of institutions. The AMA has commented that full-time

salaried physicians are not a majority among any of the hospital-based specialties.

We believe that, on theoretical grounds, use of these data is appropriate because there should be no significant distinctions in FTE net income per specialty arising from the type of compensation arrangement, unless some significant force, which favors full-time salaried physicians, results in distorted market behavior. The growth in other forms of compensation among these specialist suggests that no such force is at play.

Comment: Other commenters have stated that higher income-earning physicians are disinclined to respond to practice income surveys, even when sponsored by medical organizations, resulting in a downward bias of the survey results.

Response: We believe that data published by *Medical Economics* from their independent survey of what by-and-large is the same universe as used in *PSP* and *SMS* refutes this. In a recent issue of *Medical Economics*, a bi-weekly business and investment magazine intended for the physician market, it was shown that many physicians reported 1981 net pre-tax earnings of $200,000 or more, including 16 percent of responding radiologists, 7 percent of responding anesthesiologists, and 5 percent of responding pathologists.

Comment: Yet other commenters suggested that we use the most recently available hospital cost report data, gathered on the HCFA–2552, as a basis for deriving RCE limits.

Response: The cost reports do not contain information on the number of full-time equivalent physicians in a department. This is critical to establishing the reasonable compensation equivalent limits.

2. *Projecting future year incomes.* As our second step, we projected physicians' 1979 base net income levels to appropriate future years (that is, to 1982 and 1983) to account for changes in net income levels occurring after the period for which we have data. To make this calculation, we needed to determine an appropriate inflation factor to project 1982 and 1983 estimated net income levels, on the basis of 1970 to 1980 data. We considered several methods, including using the compound growth rate found in the PSP averages for the period 1970 to 1979, or using the medical component of the Consumer Price Index (CPI). However, we believe we can achieve more accurate projections by using the historical relationship (1970–1980) between physician incomes and the CPI, and projecting this using forecasts of the CPI for future years.

Comment: Based on review of out working paper, the AMA raised serious concerns over the use of only 1970 and 1979 "real incomes" as the basis for prospective future "real incomes."

Response: The original working paper included a discussion of why that approach was taken. However, on further review undertaken as a result of AMA comments, we now concede that it is preferable to take into account all recent data on incomes. Accordingly, we have revised the forecasting formula to take into account all observations of income from 1970 through 1980, but incorporating an adjustment for the period of the economic stabilization program—1971–1973. This is discussed further below.

3. *Adjusting for specialty differences in physician earnings.* In our third step, we determined the relationship between average net income for all physicians (estimated in step 1) and net incomes of certain categories of specialist physicians that are commonly compensated by providers for services furnished to Medicare beneficiaries.

We did this by calculating adjustment factors based on the 1979 PSP average net income by specialty. This resulted in separate specialty adjustors for the following specialty categories:

- General and family practice;
- Internal medicine;
- Surgery;
- Pediatrics;
- Obstetrics/Gynecology;
- Radiology;
- Psychiatry; and
- Anesthesiology.

In order to develop an adjustment factor for pathologists, who are not separately reported in the PSP data, we used compensation relationships between the income of radiologists and pathologists as reported in a HCFA sponsored study. (Bruce Steinwald, "Hospital Based Physicians: Current Issues and Descriptive Evidence". *Health Care Financing Review*, Volume 2, Issue 1, Summer 1980. Pages 63–75.) Based on this study, we set the pathologist adjustment factor at 95.4 percent of the radiology adjustment factor. (In the NPRM, we erroneously used 93 percent as an adjustor relating pathologist and radiologist incomes. This was noticed by commenters and has been corrected.)

Comment: Numerous respondents indicated that the schedule of specialties is too narrow. Some noted that there are several distinct sub-specialties in internal medicine. Others indicated that from what was published, they could not tell whether their specialty was to be considered "surgical" or "other."

Response: We agree in principle that it would be appropriate to construct "adjustors" for each sub-specialty. However, the base data we used are published only for specialty-types. Information concerning the AMA's classification of specialties into specialty types for presentation of the 1980 PSP results has been added to the revised working paper.

We believe that the AMA's classification of specific specialties into specialty groups reflects their concern for statistical validity of the published averages. Standards of reliability for the PSP data appearing in the *Profile of Medical Practice* require that two conditions be met. First, each estimate must be based on more than five observations. Second, the estimate must be at least twice its standard error. Many averages for each particular sub-specialty might not meet that test.

HCFA has gathered practice and income data for 17 specialties for 1976, 1977, and 1978 from which additional adjusters might have been determined. However, HCFA's survey was conducted primarily for purposes of evaluating the Medicare Economic Index and similar medical economics research. The results have not been as widely disclosed or scrutinized over time as have been the AMA published data. Also, while most of HCFA's survey results appear to be consistent with the findings of AMA and *Medical Economics* surveys, HCFA's study suggests a much larger number of practice hours per week than the other surveys. Accordingly, using HCFA's data would have generally resulted in lower FTE annual earnings estimates that are found from within AMA data.

Comment: The College of American Pathologists suggested in their comments, based on the Steinwald paper, that the 95.4 percent ratio of pathologists' income to radiologists' income is only one of four possible values, 112.1, 95.3, 95.4, and 101.2.

Response: The value of 95.4 is the ratio of pathologists' adjusted net income per hour of medical activity to that for radiologists' ($35.83 for pathologists and $37.55 for radiologists for the period 1976–1977 combined). The value of 112.1 and 101.2 each result from separate studies of only two States or political jurisdictions. The value of 112.1 is from Missouri and the District of Columbia using 1972 income data (General Accounting Office, "A Proposal for Disclosure of Contractual and Financial Arrangements between Hospitals and Their Medical

Specialists," April 30, 1975). The value of 101.2 is from Oklahoma and Louisiana using 1978 income data (Department of Health and Human Services, Office of the Inspector General, Audit Agency, "Report on Need for More Restrictive Policy and Procedures Covering Medicare Reimbursement for Medical Services Provided by Hospital-Based Physicians," 1980). Either of these two values, 112.2 or 101.2 would be inappropriate to use since the data are from such a restricted sample.

The value of 95.3 is from a December 1977 final report prepared by Arthur Andersen and Company for the Health Care Financing Administration. The data in that report are based on each of the selected hospitals' fiscal year 1975 accounts. The value is within one tenth of a percent of the 95.4 percent used in the working paper. The value of 95.4 was used because it is based on more recent data (1976–1977) than the Arthur Andersen study.

Comment: The American Medical Association questions whether the 1979-based specialty adjustors are appropriate for other, expecially for future, years.

Response: We have not yet been able to rigorously test this. Given possible income redistribution effects of rapidly changing technology, we would, of course, prefer to use only the latest available data on the issue. To help assure that the concerns of commenters are fully considered, we intend to monitor forthcoming reports and data. We will develop revised adjustors if it become necessary.

4. *Adjusting for geographic differences in physicians earnings.* Using the specialty-specific adjustors, we also adjusted for differences in costs between types of geographic locations. Again, we used the PSP data on income differences according to location in three types of areas:

- Metropolitan Greater than One Million (includes all counties in Standard Metropolitan Statistical Areas (SMSAs) with 1,000,000 or more inhabitants),
- Metropolitan Less than One Million (includes all counties in SMSAs with 50,000 to 999,999 inhabitants, and all counties considered potential SMSAs in AMA's master data file), and
- Non-Metropolitan (includes all counties not in either of the above groups).

This step yielded a set of three specialty-location adjustors for each specialty category.

Comment: The American Hospital Association, the American Medical Association and other respondents commented that use of only three locality types was inappropriate. AMA recommended use of the same hospital area wage index by SMSA and State as is used for adjusting Medicare's hospital cost limits. AMA suggested that geographic regions also be taken into account.

Response: In developing the working paper, HCFA's Office of Research did give serious considerations to recommending use of the hospital area wage index. However, they found that use of that index would result in adjustments which would have significantly lowered the FTE estimate in rural areas for each specialty type. This would be inconsistent with the AMA published norms and HCFA's own survey results, which show that FTE earnings of some specialists are higher in rural localities than in metropolitan localities. Also, theoretically, the physician service market is much more national in character than the market for hospital wage employees. Finally, the base data as published by the AMA provides only locality or census division as a basis for regional refinement. Undoubtedly, use of more refine (smaller) regional organizations with AMA PSP date (were that possible) would result in very imprecise estimates of averages for each of the over 300 SMSAs.

In principle, we would not object to estimating three locality factors for each census division, but we cannot do so from published data available to us. From the data published from the 1980 PSP, we could make one of two choices for a regional adjustment. Either the three locality classes, or the nine census divisions.

Theoretically, we expect that differences in the distribution of physicians among the three kinds of localities explain a significant portion of the observed differences in average earnings between census divisions by specialty. Also, the market for physicians is largely nationwide in character. Thus, we believe that using the three locality classes is more appropriate than using the nine census divisions. It would not be appropriate to use both published locality and published census division averages because to do so would result in double-counting locality effects.

If we possessed the underlying PSP date, it would be possible to construct averages for most of the twenty-seven (three locality-types for each of the nine census divisions) cells for each specialty type. However, not all of the 27 cells would have large enough numbers of reporting physicians to enable us to derive meaningful or valid averages.

5. *Standardizing adjusted physician earnings to a FTE basis.* Finally, we modified the specialty-location adjustors for variations among specialities in hours worked per year. Because of significant variations in the number of hours worked per year by specialty, this step is necessary to make accurate estimations of FTE specialty — average incomes by location based on the average income of all physicians. We made this calculation using PSP data on hours practiced per week and year, by specialty and location. this allowed us to calculate the average hours practiced per year by specialty and location, which we then related to a standard full-time-equivalent work year of 2080 hours. We used these ratios to weight the specialty-location adjustors from step 4.

Comment: Numerous respondents questioned the relevance of standardizing physician earnings to a 2080 hour work year, indicating that in medicine such a work year is not the norm. Some implied it was punitive—because it assumed no vacation time or continuing education time. Others apparently construed this part of the methodology to imply a requirement that a provider have a compensated physician on duty during all operating hours, and therefore concluded it was excessive, in that there do not exist enough physicians in some specialties to provide 8,760 annual hours of physician service in each hospital.

Response: Standardization was used, following normal analytic conventions, to present a basis for more uniform comparisons. Application of the FTE estimates will take into account the actual work hours circumstances, such that the Medicare compensation, limit for a physician who practices 50 hours per week will be based on an amount at least twenty-five percent *higher* than that shown for his specialty-type in the FTE estimate schedule. Likewise, for the physician who practices 30 hours per week, Medicare compensation limits could be based on an amount twenty-five percent *lower* than that shown for his specialty-type.

There is no intent to require any particular levels of staffing or to penalize any physician as a result of compensible vacations or educational sessions. Had we chosen to use average hours worked per week times 52 (rather than the average number of weeks worked) as a basis for standardizing, this would have resulted in an overall reduction in the published limits, and a different set of specialty and locality adjusters, which would have rewarded specialties which practice fewer weeks

per year and penalized those which work more weeks per year. Similarly, we might have ignored differences in hours worked per week, thus advantaging specialties with shorter work weeks than others. Use of the 2080 annual hours technique provides an equalization of advantages and disadvantages.

The 2080 technique should not be construed as a normative standard for staffing operations in hospitals. Staffing should be a function of the needs of the hospital's patient, goals and objectives, in interaction with the supply of physicians and their alternative earnings opportunities.

6. *Exclusion of Adjusters for Productivity, Skill, Competence, Expertise, Duration of Service, Etc.* Several respondents noted that the methodology did not take into account earnings differences due to differences in individual physicians productivity, skill, competence, expertise, or duration of service. This could not be done from the source data, nor would it necessarily be appropriate to attempt to incorporate them. In fact, it is highly unlikely that a high correlation exists between the level of annual net earnings and the relative technical proficiency of a physician, could anyone accurately measure the latter. No respondent suggested how such measures might be accurately calculated and applied for the intended purpose.

There appear to be many younger physicians whose practice earnings exceed those of many more experienced physicians in the same specialty; hence duration of service does not appear to be pertinent.

7. *Resulting RCE Levels.* By proceeding through these five steps we were able to produce an array of estimated 1982 and 1983 average annual FTE compensation levels for 9 specialty categories by type of location. This array is given in Table I. We considered several different levels of reasonable compensation limits, using some percentage of these FTE levels. We are proposing to set RCE limits, adjusted by the proportion of a FTE year actually worked, at these average annual incomes, because we believe they represent reasonable levels of net annual income by specialty and location.

TABLE I.—ESTIMATES OF FTE ANNUAL AVERAGE NET COMPENSATION LEVELS FOR 1982 AND 1983 [1]

Specialty	Non-Metropolitan areas		Metropolitan areas less than one million		Metropolitan areas greater than one million	
	1982	1983	1982	1983	1982	1983
Total	91,800	97,600	97,700	[illegible]	90,800	97,100
GP/FP	72,900	78,100	[illegible]	74,900	70,900	76,000
Int Med	78,800	[illegible]	78,800	84,400	84,700	90,700
Surgery	93,800	100,200	104,400	111,800	106,400	113,900
Pediatrics	67,000	71,700	77,800	83,300	71,900	77,000
OB/Gyn	[illegible]	[illegible]	[illegible]	105,600	100,500	107,600
Radiology	111,300	119,200	118,200	126,600	115,200	123,400
Psychiatry	70,800	76,000	72,900	78,100	76,800	84,400
Anesthesiology	85,700	91,800	102,400	109,700	102,400	109,700
Pathology	106,400	113,900	112,300	120,300	110,300	118,200

[1] All figures are rounded to the nearest $100.

These estimates are significantly lower than those published in the NPRM. (See Table II below.) This difference is the result of reconsidering our projection techniques based on AMA's comments. The NPRM estimates were based on a projection using "real income" data from 1970 and 1979 as base points of a trend line. This produced a line that conformed closely to Consumer Price Index (CPI) data, and which was not distorted by the artificially restricted price levels of the 1970–1973 economic stabilization period. However, as AMA pointed out, we did not demonstrate that physician incomes for 1970 and 1979 were representative of physician incomes in other years.

TABLE II.—NPRM ESTIMATES OF 1982 AND 1983 FTE ANNUAL AVERAGE NET COMPENSATION LEVELS [1]

Specialty	Non-Metropolitan areas		Metropolitan areas less than one million		Metropolitan areas greater than one million	
	1982	1983	1982	1983	1982	1983
Total	87,400	[illegible]	93,700	98,500	96,900	102,100
GP/FP	77,900	[illegible]	74,800	78,800	75,800	79,900
Int Med	[illegible]	[illegible]	84,200	[illegible]	[illegible]	[illegible]
Surgery	100,000	105,400	111,600	117,600	113,700	[illegible]
Pediatrics	71,600	75,500	[illegible]	[illegible]	[illegible]	[illegible]
OB/Gyn	[illegible]	115,400	[illegible]	112,100	[illegible]	113,200
Radiology	119,000	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Psychiatry	75,800	79,900	[illegible]	[illegible]	[illegible]	[illegible]
Anesthesiology	91,600	[illegible]	[illegible]	115,400	[illegible]	115,400
Pathology [2]	113,500	[illegible]	[illegible]	127,100	117,500	[illegible]

[1] Rounded to the nearest $100.
[2] Corrected from the NPRM estimates based on revised pathology adjustor.

As a result of these and other comments, we decided that it would be more accurate to project future (that is, post 1979) income levels on the basis of a regression analysis of the relation between CPI and physician income levels for *all* years between 1970 and 1980 (using a dummy variable with a value of 1 for the economic stabilization years). The following equation, explained in more detail in our revised working paper, was used to estimate relationships for the period 1970 to 1980.

$Yt = {}_1D + {}_2CPIt$

Yt = physicians' net income in year t

D=a dummy variable taking a value of 1 for the economic stabilization years (1971–1973) and 0 otherwise.
CPIt=Consumer Price Index for all urban consumers in year t.

AMA's PSP data for 1970–1980 were used to obtain ordinary least squares estimates of the parameters of this equation.

The results are:

Yt=3534.32 D+343.664 CPI
(t=2.66) (t=84.008)
R²=.9758

The equation explains 97.58 percent of the observed variation in physicians' net incomes between 1970–1980.

TABLE III.—COMPARISON OF AMA/PSP PHYSICIAN'S NET INCOME ESTIMATES WITH ESTIMATES DERIVED FROM EQUATION

Year	AMA/PSP net income estimate	Equation estimate	Difference
1970	$41,600	$40,000	−1,600
1971	45,300	45,200	−100
1972	47,200	49,600	2,400
1973	48,600	49,300	700
1974	52,000	50,800	−1,200
1975	56,400	55,400	−1,000
1976	[1]58,500	58,600	100
1977	61,200	62,400	1,200
1978	65,500	67,200	1,700
1979	78,400	74,700	−3,700
1980	[1]82,800	84,800	4,000
1981	[1]93,000	93,600	600

[1] Projected by the physician respondent.
[2] From the AMA's Socioeconomic Monitoring System.

In Table III we compare AMA's PSP estimates for the years 1970 to 1982 with the estimates derived from the above equations (described as equation I' in working paper #OR–32, which includes more detailed discussion). Note that both series show great changes around 1979, which indicate the extent to which it is inappropriate to base estimates solely on 1970 and 1979 base years.

In addition to the annual estimates above, we used a near-term forecast of the consumer price index (CPI) to forecast physician net income for 1982. The resulting figure of $98,500 may be compared with an estimate of $95,500 that would result from projecting the AMA/PSP 1979 estimate by the compound rate that occurred between 1970 and 1980, 6.8 percent.

B. *Other Comments on the RCE Methodology. Comment:* Many respondents observed that the working paper estimates average FTE *pre-tax* earnings *after* deduction of practice expenses from gross earnings.

Response: The respondents are correct. However, physicians incur relatively low levels of practice expense related to activities for which they are compensated by providers. As discussed above, we are allowing in these final regulations adjustments to take into account expenses for malpractice insurance, continuing medical education, and professional memberships.

Comment: Several commenters noted that although the working paper on the RCE methodology illustrated three sets of limits in its discussion of "reasonableness", it made no particular recommendation. These commenters requested a justification of our choice of the mean estimated net income as a limit.

Response: The earnings "mean" is a consistently, significantly higher amount for each specialty than the "median" (reaching a differernce of 15 percent for radiologists and pathologists). Hence, we judge it high enough to encompass a large majority of physicians in each specialty type; overall, roughly sixty percent.

Increasing the limits beyond the mean might have encouraged unwanted pressure to escalate physician compensation. Several telephone callers from the hospital community expressed concern that the proposed schedules themselves provide amounts which exceed the salaries generally paid full-time staff physicians.

Comment: Several respondents recommended use of a relative value method by pathologists in lieu of the FTE limits policy.

Response: It is not feasible to use such a method at this time. We do not have any data that show the relative inputs of supervisory, administrative, and other such activities of a physician in a hospital laboratory department as they relate to individual services produced by that department. No methodology has been suggested for applying reasonable compensation equivalency limits on the basis of a relative value system, rather than time. We believe it is inherently reasonable to base such limits on time, just as it is reasonable (as well as required by section 1887(a)(2)(A)) to relate the cost of compensation for physician services to a provider to the time the physician actually spends furnishing such services. However, we would be willing to consider applying reasonable compensation limits on a basis related to the relative values of various services to the provider, is such a system is developed.

We are sponsoring research on alternative methods for developing relative value scales for physician services. We expect that the results of this study, being undertaken by the Urban Institute, will provide a basis for developing better tools for analyzing and determining reasonable charges for services to Medicare patients, and possibly form better bases for developing experimental reimbursement methods. Those who favor application of relative value scales as an alternative to the proposed RCE limits on Medicare reimbursement of physician services to Medicare beneficiaries may wish to respond to HCFA's periodic solicitations of applications for grants to conduct reimbursement research and experiments.

C. Updating the RCE Limits

The RCE limits will be updated annually on the basis of updated economic index data. When we do this without revising the methodology for computing the limits, we will publish a single general notice in the **Federal Register**, setting forth the new limits and their effective date. We will not publish a notice proposing revised limits for public comment unless there is good cause due to unforeseen problems with the limits or the data. However, if we change the methodology by which limits are calculated or the way in which they are applied, we will publish the proposed changes in methodology in a **Federal Register** notice in accordance with the Department's established rulemaking procedures.

This update procedure is dependent on accurate, timely, and reliable economic index data, and a good method of updating the base year limits. We considered several different options for annually updating the limits, taking into account two major aspects of forecasting physician compensation levels: (1) Base year data on physicians' incomes, and (2) expected changes from a selected base level.

We believe that retaining the PSP data for calendar 1979 as the base year is appropriate for the next few years. We will continue to monitor available data on this subject. As the specialty and location-specific supply and demand for physicians change over time, it may become necessary to move to a more current base, but until monitoring demonstrates the need, we believe the 1979 base should be used.

Our research (see ORD Working Paper #32 cited above) indicates that physician net income deflated by the Consumer Price Index (CPI) is nearly constant over time. Consequently, it was suggested that near term physician net income could be estimated from forecasts of the CPI. We used a Data Resources, Inc. (DRI) forecast to project the PSP 1979 data to 1982, providing the base for the limits. We will use a method similar to that in the RCE methodology (see pages 5 and 6 of the above-cited working paper). Thus we

will apply Data Resources, Inc. CPI forecasts for 1981 and subsequent years from *Data Resources Cost Forecasting Review* to the 1980 Periodic Survey of Physicians (1979 income data) in the same manner that the 1982 and 1983 estimates were generated.

D. Application of RCE Limits

We will use the RCE levels to compute the Medicare program's reimbursement when the physician is compensated by the provider or other related organization for administrative, supervisory, and other provider services that are reimbursable under Medicare. In applying the RCE limits, the intermediary will assign each compensated physician to the most appropriate specialty category. If no specialty category is appropriate, for example, in determining the reasonable cost for a full-time physician administration of an emergency room physician, the intermediary will use the RCE level for the "Total" category, which is based on income data for all physicians. The intermediary will determine the appropriate geographic area classification, given in appendix II to this document.

If the physician's contractual compensation covers all duties, activities, and services furnished to the provider or to its patients and the physician is employed full-time, the appropriate specialty compensation limit will be used and adjusted by the physician's allocation agreement to arrive at the program's allowable costs (inpatient Part A and outpatient Part B) for physician compensation. In the absence of an allocation agreement, we generally will assume that 100 percent of the compensation was related to services reimbursable on a Part B reasonable charge basis, and that there are no allowable costs for the physician's services to the provider.

When a physician's compensation from the provider represents payment only for administrative, supervisory, and other provider services (that is, the physician bills fees for all medical/surgical services furnished to individual patients), then the appropriate specialty compensation limit will be used and adjusted by the percentage of the physician's time spent in furnishing administrative, supervisory, and other provider services.

If a physician is employed by a provider to furnish services of general benefit to patients reimbursable on a reasonable cost basis on other than a full-time equivalent basis, then the reasonable compensation limit will be adjusted upward or downward to reflect the percentage of time his or her actual hours related to a full-time-equivalent work year of 2080 hours.

Comment: When the reasonable compensation equivalent methodology is applied on a departmental basis, the proposed rule provides that a weighted departmental allocation agreement be used. Under the same set of facts, if the aggregate departmental compensation is less than the reasonable compensation equivalent, could the individual provider-based physician allocation agreements be used to allocate the physicians' actual compensation amounts?

Response: Yes. Generally it is intended that the physician time allocation will be developed separately for each physician. The option that permits developing an aggregated allocation for all of the physicians in larger hospital departments is intended to facilitate administration and reduce paperwork. Under the optional method, the compensation of the physicians is aggregated and averaged before the RCE is applied; the time allocation is applied to the result of this calculation, not to the actual compensation of each physician. For example, a hospital is located in a metropolitan area having a population greater than one million, and its laboratory department furnishes only clinical laboratory services (that is, all services are reimbursable on a cost basis) and has a staff of five physicians. The director receives $160,000 per year. The other four physicians each receive $80,000 per year. The total annual compensation for all five physicians is $480,000.

If the RCE limit were applied to each physician's compensation individually, the cost of the director's compensation would not be fully allowed, since it exceeds the applicable limit from Table I above ($118,200). However, if the allocations are aggregated, the aggregate limit for the department is $571,000 (5×$118,200) all the compensation for the department is an allowable cost. The provider and its physicians may elect to aggregate the allocation agreement.

E. Exceptions to the RCE Limits

Some hospitals, particularly but not exclusively small or rural hospitals, may be unable to recruit or maintain an adequate number of physicians at a compensation level within the prescribed limits. In accordance with section 1887(a)(2)(C) of the Act, if a hospital is able to demonstrate to the intermediary its inability to recruit or maintain physicians at a compensation level allowable under the RCE limits (as documented, for example, by unsuccessful advertising through national medical or health care publications), then the intermediary may grant an exception to the reasonable compensation limits established under these rules. The procedures for this exceptions process will be included in the implementation instructions.

Comment: Some commenters, including the American Hospital Association, suggested that the RCE limits exception process should be described in more detail, specifically to account for circumstances in which a hospital seeks to retain the services of a preeminent or exceptionally qualified physician.

Response: We do not concur. The RCE limit applies to services furnished by a physician to a hospital, such as, administration, supervision, quality control activities, etc. These services can appropriately be furnished by any physician, to the extent permitted by State licensure. It is not intended for Medicare to address the qualifications of one physician, vis-a-vis another.

F. Initial Implementation of the RCE Limits

These limits will apply to services furnished and portions of cost reporting periods occurring on or after [90 days from the date of publication]. The applicable schedule of annual RCE limits is determined by the beginning date of the provider's cost reporting period. That is, if the provider's cost reporting period begins during calendar year 1982, the 1982 RCE limits apply to all compensation for physicians in that portion of the period occurring on or after the effective date of these regulations. For provider's cost reporting period beginning in calendar year 1983, the 1983 RCE limits will be applied. If a provider has a short cost reporting period, such as frequently occurs due to a change of ownership or operations, the applicable RCE limits are determined by the first day of the cost reporting period, and are adjusted by the ratio of the length of the short period to a standard year.

VIII. Agreements Between Physicians and Providers

A. Noninterference With Contractual Agreements

In the NPRM, we made clear that the policies we were proposing would leave physicians and hospitals free to negotiate the kind of financial agreement, such as salary, fees, or compensation based on a percentage of either gross or net charges, that best suits their circumstances.

These regulations deal only with how Medicare reimbursement should be

computed. They are neutral both as to financial agreements and as to the manner in which medicine is practiced. We believe this implements both the noninterference provisions in section 1801 of the Act, in that the regulations would not interfere with physician and provider decisions to utilize their resources in any manner they choose, and the statutory requirement that Medicare reimbursement be reasonable, and be made in accordance with the statute's classifications and definitions.

Because the noninterference requirements of section 1801 of the Act refer to all Medicare program regulations and policies, we did not believe it was necessary to continue to repeat them in regulatory language, as the existing regulations do at 42 CFR 405.401. This is not a change of policy so much as a result of changes in common rulemaking practices. One of our administrative objectives is to issue regulations that are no longer, more complex, or more discursive than necessary. Therefore, in drafting the regulations text for the NPRM, we omitted that language from § 405.401 that we believed was inessential.

B. Effect of Regulations on Existing Contractual Agreements

Comments: Several commenters inquired whether physicians or entities which lease hospital departments would be permitted a transitional period during which they may terminate or adjust their arrangements.

Response: Generally, these final rules will be effective for services furnished on or after May 31 1983. Section 405.550(e), which requires the overhead incurred by leased departments to be reimbursed on a reasonable cost basis through the provider, contains provisions indicating that it will not be applied until June 30, 1983.

This provides 90 and 120 day delays respectively, during which parties may renegotiate arrangements if they believe it is necessary or appropriate.

However, the Medicare rules do not require that lease arrangements be terminated. They only specify how and to what extent Medicare will make payment. However, some providers that have longstanding arrangements, predating Medicare, under which many of their services are furnished through leased departments, have indicated that they may wish to change this in view of the requirements of these final regulations. Due to the extended tenure of their arrangements, some of these providers have informed us that terminating their existing arrangements will be unusually difficult, and that 120 days does not provide adequate time for the extensive changes required.

We believe it would be unreasonable for us to influence an immediate disruption of these longstanding arrangements. However, we do not want to grant an extended delay of application of these needed requirements to all the providers that have initiated such lease arrangements in recent years. Due to the general growth of third party reimbursement, State rate-setting, and various cost containment measures, many such arrangements have been established to maximize cost reimbursement, or to otherwise seek a reimbursement advantage, rather than due to inherent efficiencies or quality-related consequences of the arrangements. This has greatly contributed to the problems which this provision is intended to address. However, we believe it is clear that, in the case of providers with arrangements established before the inception of the Medicare program, these arrangements were originated with different objectives.

Therefore, § 405.550(e) includes a provision indicating that we will delay for two years, during which time these entities will continue to be reimbursed essentially as before, applying these revised rules to a lease arrangement entered into before July 1, 1966, when Medicare became effective. This should provide adequate time for the parties to the lease to adjust their arrangements in a manner that ensures that delivery of services is not disrupted and that the providers can be adequately reimbursed for services they furnish Medicare patients.

C. Agreements Concerning Physician Billing

(1) *Provider billing for physician services under combined billing.* Combined billing is a special type of billing arrangement that was developed to avoid the need to prepare and process separate bills for physician services furnished in hospital departments, such as radiology departments, in which patients receive large numbers of services, relative to other departments. Under combined billing, the charges for both the physician services and the hospital services furnished in a hospital department are aggregated (i.e., "combined") and billed for by the hospital on its inpatient or outpatient billing forms (the HCFA–1455S and the HCFA–1483, respectively). Payment for both types of services is made by the Medicare intermediary and, at settlement of the hospital's cost report, an adjustment is made to assure that payment for physician services is made from the Part B trust fund, as required by the Medicare law.

Under existing policy, we have permitted combined billing only for hospital inpatient or outpatient services (excluding psychiatric services) furnished by departments in which all physicians are compensated by the hospital on a salary or a single uniform percentage of charges basis. With respect to inpatient services, combined billing has been available only for radiology and pathology services.

In the NPRM we proposed allowing inpatient combined billing to physician specialties other than radiology or pathology (e.g. cardiology) provided the physicians in such departments were compensated on a salary or a single uniform percentage of departmental charge basis and this represented the only method of billing for physicians' services in such departments. We have reconsidered that proposal, as discussed in section VI. E. and are now proposing instead to eliminate combined billing. However, as a result of changes made by section 112 of Pub. L. 97–248, the Medicare program now pays only 80 percent of the reasonable charges for all physicians' services, including radiology and pathology. Therefore, it is necessary in the interim before final rules on combined billing are published for the hospital to identify on the hospital claim form the aggregate charges for physician services. The hospital will be allowed to use the per diem or uniform percentage methods to compute these physician charges.

(2) *Effect of physician billing charges for services to a provider. Comment:* In the preamble to the proposed rules, we stated that if the Medicare beneficiary is inappropriately billed by a physician, a provider or other entity for services that did not meet the conditions for Part B reasonable charge payment (i.e., for provider services), the provider's participation agreement with the Secretary could be terminated in accordance with the regulations at 42 CFR Part 489. Several commenters objected to this, arguing that it is not equitable to expect the providers to "police" the Medicare program.

Response: A provider participating in the Medicare program must have entered into an agreement with the Secretary under section 1866 of the Act. In entering into this agreement, the hospital agrees not to charge any individual for services for which the individual is entitled to have payment made to the provider by Medicare, except for appropriate deductible and copayment amounts. It is the provider's responsibility to assure that its

agreement is not violated. Physicians and other practitioners (e.g., CRNAs) who furnish services in the provider can only do so to the extent permitted by the provider. The agreement under section 1866 of the Act is between the provider and the Secretary; individual practitioners are not a party to the agreement. However, the provider can require adherence to Medicare rules by such individuals as a condition for the right to perform services for the provider, or take other appropriate steps to assure that its agreement with the Secretary is not violated. Particularly in the case of provider-based physicians, the interrelationships between the provider and those physicians are so close, that to conclude that the provider has no responsibility, control, or influence over the activities of those physicians is simplistic.

When services are covered as provider services and reimbursed on a reasonable cost basis, we make payments only to the provider. We wish to ensure that when we make such payments for services that do not meet the conditions for reasonable charge payments, neither the physician nor the provider seeks further payment from either the program or beneficiaries. This particularly applies to physician services that are services to the provider rather than services to individual patients. Therefore, we will treat inappropriate billing of the carrier or the beneficiary, by the physician, the provider, or another entity, as a violation of the provider agreement of the provider in which the services were furnished. In such a case, the provider agreement could be terminated in accordance with the regulations at 42 CFR Part 489.

IX. Anesthesiology Services

A. Personnel Administering Anesthesia

Because of the predominant practice pattern, we use the term "anesthesiologist" in this preamble to denote any physician functioning in the capacity of an anesthesiologist. However, these rules apply to any physician who furnishes, directs, or supervises anesthesia services regardless of that physician's practice specialization or board-certification. This could include not only a doctor of medicine or osteopathy but also a doctor of dental or oral surgery, or a doctor of podiatry, provided that the physician directing or supervising the anesthesia is legally authorized to perform such a function in the particular State.

In many hospitals, actual administration of anesthesia to patients is performed by certified registered nurse anesthetists, (CRNAs), or by anesthesia assistants (AAs) functioning as physician extenders, who work under the direction of an anesthesiologist, or, as noted above, by physicians who do not specialize in anesthesiology. Frequently, the directing physician is the surgeon or oral surgeon who is performing the surgical procedure for which anesthesia is required.

Comment: The American Society of Anesthesiologists (ASA) suggested that we include in the final regulations a definition of "anesthesiologist", and phase the requirements of the regulations, particularly the proposed § 405.552, in terms of an anesthesiologist's, rather than a "physician's", performance of certain functions.

Response: Title XVIII, the Medicare statute, does not restrict coverage of services furnished by a physician (as defined in section 1861(q)) based on that physician's training, medical specialty, or board certification. Generally, States do not so restrict the activities of physicians through their licensure requirements, either. Further, section 1801 of the Act specifically forbids interference in the practice of medicine. In view of these considerations, we do not believe it appropriate to make such a restriction, especially through reimbursement regulations.

Comment: The ASA also asserted that Medicare should not make separate payments for anesthesia services furnished by dentists, oral surgeons, and podiatrists. They suggest that these individuals do not have the academic background, training, and clinical experience to qualify them independently to provide anesthesia for surgical procedures or to supervise nonphysicians in administering such procedures. They also stated that Medicare should, for similar reasons, not pay a separate charge for anesthesia services furnished by a non-physician anesthetist under the direction of the physician performing a surgical procedure.

Response: In accordance with section 1861(r) of the statute, anesthesia services furnished by these individuals are covered Medicare services with respect to functions which they are legally authorized to perform by the State in which the services are furnished. These rules are not intended to restrict or interfere with State licensure requirements regarding the administration of anesthesia.

Comment: The ASA pointed out that the NPRM discussed only the administration of anesthesia. Many anesthesiologists furnish pain management, respiratory care, and other services not discussed in the NPRM. They inquired whether additional criteria would be issued concerning those services.

Response: Those and other physician services not specifically identified in the regulations are not subject to special criteria. To be reimbursable on a reasonable charge basis, however, those services must meet the general criteria at 42 CFR 405.550(b).

Comment: The NPRM spoke in terms of the physician directing the services of CRNAs. However, some commenters pointed out that there are increasing numbers of anesthesia assistants (AAs) who, functioning as physicians' assistants in anesthesiology, administer anesthesia under physician direction. Other commenters also asked how the proposed rules would apply to anesthesia services furnished by a resident (or by CRNAs or AAs in training) under the direction of a physician.

Response: In recognition of these situations, we have revised and clarified the rule to meet these circumstances. We did not intend our proposed rules to suggest that we were attempting to change current medical practice, employment, or education patterns. The individual in the physician's employ could be a CRNA or other qualified individual, consistent with State law and license requirements. The individual employed by a hospital and directed or supervised by a physician could be a CRNA, resident or other qualified individual.

B. Payment for Concurrent Anesthesia Services

By using the services of more than one CRNA or AA, an anesthesiologist may direct or supervise anesthesia administration to two or more patients at the same time. In such cases, a question arises as to whether the level of the physician's involvement in each procedure is sufficient to justify classifying the services as physician services to individual patients and paying for them on a reasonable charge basis. To the extent that an anesthesiologist is performing essentially supervisory duties, rather than furnishing physician services to an individual patient, the services should be reimbursed on a reasonable cost basis.

This raises several controversial issues, which were differently approached, with resulting different suggestions for resolution, by various groups of commenters. As a result of

their suggestions, we reviewed several alternatives to the provisions proposed in the NPRM.

Some commenters requested us to pay CRNAs directly for their services, on a reasonable charge basis. There is no authority in title XVIII to do this and, therefore, it is not an available option.

Other commenters believe that we should pay a supervising physician on a charge basis, regardless of the number of concurrent services performed by nonphysician anesthetists. This essentially reflects the current practice of the carriers. This is also an administratively simple option, but our experience shows that it is subject to abuse, and sometimes results in unreasonably high payment levels. Further, adoption of this option would not be supported by the principles we must implement for distinguishing physician services to individual patients from physician services to providers, and would clearly contradict the policy we are establishing regarding payment for pathology services. Finally, if we determined that we considered anesthesia services furnished by CRNAs, with minimal direct physician input, to be reimbursable on a reasonable charge basis, it would seem logical to extend that principle and reimburse the anesthetists directly.

The necessary rejection of the above two positions led us to carefully examine the middle ground between them. First, it is clear that an anesthesiologist's personal administration of anesthesia is a physician's service reimbursable on a reasonable charge basis, as is administration of anesthesia by a single anesthetist under immediate physician direction. It is also clear that physicians perform many functions related to the care of each individual patient both before and after the administration of anesthesia itself. These pre- and post-anesthetic functions are generally incorporated into the concept of a single service, and are included in a single bill.

We did not believe it would be acceptable to propose to pay physicians for anesthesia services on a charge basis only if the anesthesia were administered by the physician or incident to his or her services. Therefore, in the NPRM we proposed to distinguish, for reimbursement purposes, between "medical direction" and "supervision".

"Supervision" is a general activity, primarily concerned with monitoring performance of the anesthetists, with significantly diminished direct involvement of the anesthesiologist in delivery of services to the patient. "Medical direction" includes substantial direct involvement of the anesthesiologist in each anesthesia procedure.

Under the NPRM provisions, an anesthesiologist's services would meet our definition of "medical direction" and qualify for charge reimbursement if the anesthesiologist:

- Performs a pre-anesthetic examination and evaluation;
- Prescribes the anesthesia plan;
- Personally participates in the most demanding procedures in the anesthesia plan, including induction and emergence;
- Ensures that any procedures in the anesthesia plan that he or she does not perform are performed by a qualified individual;
- Monitors the course of anesthesia administration at frequent intervals;
- Remains physically present and available for immediate diagnosis and treatment of emergencies;
- Provides indicated postanesthesia care; and
- Does not perform any other services personally while he or she is directing those procedures.

The NPRM criteria for "medical direction" also included a provision that, to qualify for reasonable charge reimbursement, a physician must direct no more than two concurrent procedures. This was intended to establish specific criteria for determining that a physician's involvement in each service was adequate to justify treating the services as physician services to individual patients, and thus warrant payment on a reasonable charge basis.

Although the other criteria were generally not criticized by commenters, the provision limiting concurrent services to two was strongly criticized. A few commenters were critical of the entire approach, on various medical or economic bases, but they offered no viable suggestions to otherwise implement the distinction between physician services to providers and patients, while making adequate allowance for current physician distribution and practice patterns. Far more commenters found the general concept acceptable, but suggested increasing the number of allowed concurrent procedures to four or more.

It is clear that when a physician is supervising a large number of services that are actually being furnished by other individuals, that the services should not be considered to be "personally rendered" in accordance with section 1887(a)(1)(A). We must establish some dividing line, such as between "medical direction" and "supervision" in order to implement the statute. We have consulted a number of experts and professionals, and, on the basis of our experience and discussions, we believe there is a consensus among anesthesiologists, including the American Society of Anesthesiologists (ASA), that at some point involvement in concurrent procedures diminishes a physician's involvement to the point that it should not be considered a physician's service to an individual patient.

Many of the anesthesiologists and non-physician anesthetists who commented on the NPRM stated that we should allow more than two concurrent procedures. Most frequently, commenters suggested that we allow four, rather than two. A few commenters suggested larger numbers, some even preferring a variable number, to be adjusted in view of physician competence or patient condition. A variable number was clearly beyond our technical ability to impose or administer, and we early determined allowing more than four concurrent procedures would have severely tested the general consensus.

We reviewed the arguments for allowing either two or four concurrent procedures very carefully. It is clear that on some grounds two is preferable, particularly in consideration of the statutory distinction we are making. However, it has been rightly pointed out to us that larger numbers are common practice, especially in areas underserved by anesthesiologists. Allowing four would be widely acceptable, and would result only in minor changes from current practice. We believe that to routinely allow four concurrent anesthesia procedures to be reimbursed on a reasonable charge basis would not greatly compromise the criteria we are establishing to implement the statutory distinction between a physician's service rendered to a individual patient and a physician's service of general benefit to patients. Therefore, we have decided to revise the requirements proposed in the NPRM, in view of the predominant opinion expressed by commenters.

These final regulations specify that if an anesthesiologist meets the other conditions for charge payment but supervises more than four anesthesia procedures concurrently, the anesthesiologist's services are considered supervisory (as opposed to medical direction) services furnished to the provider in which the procedures are performed. The provider will be paid for the allowable costs of those services on a reasonable cost basis by the intermediary. Reimbursement to the

provider for those services of the anesthesiologist is subject to the RCE limits.

Comment: The ASA pointed out that while limiting the number of concurrent anesthesia procedures a physician may medically direct (and for which he or she may receive reasonable charge payment) may be appropriate in surgical cases, exceptions should be made for medical emergencies and obstetrical patients in labor.

Response: We do not expect that a physician who is directing the administration of anesthesia to four surgical patients would be involved *routinely* in furnishing any additional services to other patients. However, addressing an emergency of short duration in the immediate area, or administering an epidural or caudal anesthetic to ease labor pain, or periodic, rather than continuous monitoring of an obstetrical patient, would not substantially diminish the scope of control exercised by the physician in directing the administration of anesthesia to the surgical patients. However, the carriers will periodically review hospital records to ensure that such circumstances do not occur frequently, are of short duration and do not constitute a diminution of the physician's involvement in the surgical procedure. Any questions regarding diminution of the physician's involvement in surgical care will be resolved by the carrier's medical staff.

Comment: The American Association of Nurse Anesthetists (AANA) was especially concerned that the limitation of concurrent procedures reimbursable on a charge basis not be linked to presumptions about the quality of anesthesia services furnish by non-physician anesthetists under a physician's general supervision.

Response: The distinction we are making is between physician services to providers and individuals, not between good and bad anesthesia services. Anesthesia administered by non-physician anesthetist is a covered service, reimbursable on a reasonable cost basis whenever it is not included in reimbursement for a physician's service on a charge basis. Therefore the criteria for "medical direction" should not be interpreted as standards of practice or standards of quality, but rather as a description of those elements of common medical practice that are expected to be present when a physician has significant involvement with an individual patient.

Comment: The AANA also commented that the proposed rule did not distinguish clearly enough between "medical direction" and "supervision" with respect to anesthesia services. The association pointed out that the only distinction made in the proposed rule between the two sets of circumstances is the number of concurrent procedures.

Response: In the case of more than four concurrent procedures, where the services of the physician are classified as supervision rather than direction, the physician is not required to "personally participate in the most demanding procedures in the anesthesia plan, including induction and emergence" (§ 405.555(a)(1)(iii)). Therefore, § 405.552(b) has been modified to indicate that where the anesthesiologists' services are supervisory (more than four concurrent procedures), subparagraphs (iii) and (vii) of paragraph (a)(1) may be met through subparagraph (iv), i.e., ensuring that a qualified individual performs any procedures in which the physician does not personally participate.

Comment: One commenter pointed out that the NPRM did not discuss payment for personal performance by a physician of a single anesthesia procedure.

Response: We believe that the NPRM was sufficiently clear that such a service would be reimbursable on a reasonable charge basis as a physician's service to an individual patient (47 FR 43588). We were concerned to make provision for circumstances that required special and explicit treatment. The proposed § 405.552(a) was unambiguous in this matter.

Comment: Legislation considered by the Congress in 1979 (S. 505), provided for payment of anesthesia services in a manner similar to the proposed regulations, but Congress did not enact those provisions. Some commenters questioned whether, in view of this congressional decision, HCFA has authority to adopt these provisions, particularly the provision allowing reasonable charge reimbursement only if the anesthesiologist were directing no more than two concurrent anesthesia procedures.

Response: The Secretary has the authority to determine which services are properly covered under Part A and which under Part B of Medicare. This authority is inherent in the authority granted the Secretary to implement the Medicare statute. (See sections 1102 and 1871 of the Act.) In addition, section 1887(a)(1) of the Act, which these regulations implement, requires the Secretary to establish criteria that distinguish physician services to individual patients reimbursable on a reasonable charge basis from physician services to the provider. Furthermore, the legislative history of section 1887 reflects an intention that the Secretary develop specific conditions, appropriate to particular physician specialties, for determining when a physician's involvement in a patient care service is sufficient to justify treating it as a physician's service to an individual patient reimbursable on a reasonable charge basis. (S. Rep. 97-494, page 22.) In addition, the failure of Congress to enact S. 505 does not mean that Congress determined that the Secretary does not have this authority or that Congress opposes this policy. It merely indicates that Congress took no actions to require the Secretary to do what he has discretion to do on his own.

Comment: The ASA suggested that the performance of certain routine tasks not reflected in our proposed criteria, such as receiving patients entering the operating suite for the next surgery, checking on or discharging patients in the recovery room and handling scheduling matters, could be appropriately undertaken by a physician while directing concurrent procedures.

Response: We agree that a physician may appropriately receive patients entering the operating suite for the next surgery while directing concurrent anesthesia procedures. However, checking or discharging patients in the recovery room and handling scheduling matters is not compatible with our reimbursing the physician on a reasonable charge basis for directing concurrent anesthesia procedures. The time devoted to such activities potentially can be extensive and would diminish the degree of involvement in the concurrent care beyond levels acceptable for purposes of reasonable charge reimbursement.

Comment: The ASA pointed out that in some instances one member of a group practice of anesthesiologists may perform a pre-anesthetic examination of patients scheduled for surgery the following day, and another anesthesiologist actually may perform or medically direct the procedures. They asked whether this form of practice would constitute a physician service to a Medicare patient.

Response: Yes, if the anesthesiologists are in group practice. However, a physician member of the group would have to perform all of the component parts of the anesthesia services; they could not be performed, for example, by an anesthesiology resident. Also, the medical record must specifically show that the services were furnished and identify the physician(s) who furnished them.

Comment: Proposed section 405.552 of the NPRM stipulates that the carrier would reimburse a physician for

concurrent anesthesiology procedures furnished to patients in a provider on a reasonable charge basis if certain conditions were met (§§ 405.552 and 405.550(b)). However, if the physician were involved in more than the allowed number of procedures concurrently, it is not clear from either the NPRM preamble or regulations text whether Medicare would recognize for reasonable charge payment *all* of the physician services provided by the anesthesiologist up to and including induction of the patient, or if those services would also be considered "physician services to the provider".

Response: All of the reasonable and necessary services personally furnished by a physician, up to and including induction of the patient, qualify for reasonable charge reimbursement by the carrier. Only those services furnished during the period of time subsequent to induction of the patient (when more than four concurrent procedures are performed) are considered physician services to the provider, payable to the hospital on a reasonable cost basis by the intermediary.

C. Use of CRNAs Employed by Providers

To better separate payment for provider and physicians' services, we will adjust the amount of charge payment for physician services in which a CRNA or AA delivers anesthesia to take into account whether the CRNA or AA is employed by the provider or the physicians. This adjustment is needed to take into account the costs of compensating the CRNAs or AAs that are borne by the hospital. We will continue to pay the physician on the basis of reasonable charges for the professional services furnished to an individual patient, including the concurrent direction of not more than four CRNAs.

Currently, most anesthesiologists base their charges for patient services on a combination of procedure-specific unit values plus units for factors such as time. These units are generally drawn from studies of the relative values of medical and surgical services, by groups such as the Blue Shield Association. Where anesthesiologists base their charges on this method, the Medicare carriers use the same method to determine reasonable charges for anesthesiology services.

Under this method, a physician's charge for a particular service is constructed by:

- Determining the base value units for the specific procedure performed; and
- Adding time units representing the period from the time beginning when the anesthesiologist prepares the patient for induction, and ending when the anesthesiologist is no longer in personal attendance on the patient.

The sum is then multiplied by a conversion factor representing the physician's customary charge for a unit of professional service. The resulting dollar figure is the physician's actual charge for the service. Each time unit generally represents a 15 minute interval per patient. For example, if a physician devotes 90 minutes to a normal patient undergoing a procedure with a base value of 3, the physician's charge would be nine (3 base units+6 time units) times that physician's conversion factor.

Under these regulations, we will allow reasonable charge payment for physician-directed anesthesia services furnished by no more than four provider-employed CRNAs or AAs by calculating the procedure unit values plus no more than one time unit for each half hour, or fraction thereof, devoted to a given procedure. We require the anesthesiologist (or other entity legally entitled to bill for the services) to state on the billing form or on the claim for payment whether the CRNA or AAs was employed by the physician, and whether no more than four concurrent procedures were furnished by CRNAs or AAs under the physician's direction. If the physician (or other billing entity) affirms that both conditions were met, the carrier will pay on a reasonable charge basis for the administration of anesthesia at the usual rate. If the physician did not employ the CRNA or AA, the carrier will pay reasonable charges determined at the adjusted rate. In both cases, the procedure-specific values of the base units will be the same. Only the time-unit component of the charge will be adjusted if the physician did not employ the CRNA or AA. Neither the "shared servant" nor the "borrowed servant" doctrines would affect the use of adjusted reasonable charge standards in these cases. We wish to make clear that we would pay the physician on the basis of one time unit for each 15 minute interval or fraction thereof, only if the CRNA or AA is the actual employee of the physician. If a CRNA is an independent contractor, then he or she would seek payment through the provider, not the physician or the Medicare patient.

Comment: The proposed rules assumed that a CRNA would be employed by either a hospital or a physician. However, many CRNAs are independent contractors who do not have an employment relationship with either a hospital or a physician. How can these CRNAs be reimbursed for their services?

Response: If a CRNA is an independent contractor, the CRNA should charge the hospital for services he or she furnishes to Medicare beneficiaries. The hospital may be reimbursed for these services on a reasonable cost basis. For Medicare reimbursement purposes, the CRNA may not directly bill either the Medicare beneficiary or the beneficiary's carrier.

Comment: Several commenters, including the AANA, suggested that the final regulations provide that an anesthesiologist be permitted to contract with a CRNA, rather than employ one, and be paid an unadjusted reasonable charge for anesthesia services furnished with the CRNA.

Response: We have not accepted this suggestion. Our current policy permits a physician to include in his or her charge a charge for a service furnished by a nonphysician employee. When there is an employer-employee relationship, the employee's services are covered "incident to" the physician's services. The test used is the common law definition of employer-employee relationship. This test is applied to section 1861(s)(1) of the Social Security Act, the "incident to" provision, which permits charges for services of kinds commonly furnished in physicians' offices to be included in physicians' bills. If an anesthesiologist subcontracts with a certified registered nurse anesthetist, who is actually an independent contractor, the relationship would not constitute an employer-employee relationship for purposes of the "incident to" provision. In addition, as explained elsewhere in this preamble, neither the "share servant" nor the "borrowed servant" doctrines apply.

Comment: Some commenters asked whether the final regulations would consider the anesthetist to be an employee of the anesthesiologist for purposes of allowing a larger number of time units where in fact both the anesthetist and the anesthesiologist are employed by a professional corporation.

Response: Yes, if the "professional corporation" consists of a group practice of physicians who are compensated for their services in the provider solely by that corporation. However, if the organization is a "professional service corporation" or other organization established to bill for services of physicians who are compensated by a hospital or other entity such as a medical school, the anesthetists would not be considered to be employees of the physician.

Comment: The ASA points out that, in some States, physicians use 10 or 12 minute time units rather than the 15-minute unit measure mandated for use by the proposed section 42 CFR 405.553(b). They ask whether Medicare carriers in these States will adjust reimbursement accordingly.

Response: Yes, The Medicare carriers will adjust the customary and prevailing charge screens applicable for anesthesia services when they implement this rule. In making this adjustment, the carriers will ensure that in a 1-hour period the value of four 15-minute intervals will not be less than would have been allowed if the hour had consisted of five 12-minute intervals or six 10-minute intervals.

Comment: Some commenters pointed out that some anesthesiologists do not construct their charges by the method described in the NPRM. They asked how these rules would be applied to anesthesiologists who do not presently charge on the basis of base and time units.

Response: Physicians may determine their charges in any way they wish. However, except for those physicians in the State of Texas, it has, generally, been the practice of physicians who furnish anesthesia services to determine their charges using base and time units. These rules establish the method that all Medicare carriers will use to determine reasonable charges for anesthesiologists' services, regardless of how physicians determine their actual charges.

X. Radiology Services

A. Identifying Physician Radiology Services

In the field of radiology, there are particular difficulties in determining which services furnished in a radiology department constitute physician services to individual patients and may be reimbursed on a reasonable charge basis. These difficulties arise in determining whether services "ordinarily require performance by a physician". Many routine radiological services are commonly performed by qualified technical personnel, although they may on some occasions also be performed by a physician.

In the case of radiology services furnished in a physician's private office or another nonprovider setting, this distinction is unimportant for Medicare reimbursement purposes, since all payments are made to the radiologist on a Part B reasonable charge basis, and are calculated in part on the basis of the prevailing charges for similar services of other radiologists in the locality. However, because provider services (in this case, services commonly furnished by nonphysician technical personnel) must be paid for on a reasonable cost basis, identifying physician radiology services is important in the case of radiology services furnished in providers.

Under these regulations, only services that meet our criteria for reasonable charge payment will be classified as physician services and paid for on a reasonable charge basis from the Part B Trust Fund. Activities that ordinarily do not requirement performance by a physician will be classified as provider services and be paid for on a reasonable cost basis.

Comment: Some commenters asked us to give examples of services which do not qualify as physicians' services reimbursable on a reasonable charge basis mainly because they are performed by nonphysicians.

Response: Supervision and administration of a hospital radiology department as well as the technical procedures involved in the taking of an X-ray do not qualify as physician's services reimbursable on a reasonable charge basis. Further examples of such services are: disposing of radiation waste, and radiobioassay and nuclides radiobioassay tests when furnished in a radiology department.

B. Level of Payment for Radiology Services

Under these regulations, a carrier will determine payment for radiology services furnished in a provider using, where feasible, prevailing charge screens that reflect charges for similar services furnished in provider settings. In addition, physicians' charges for each radiology service furnished in a provider will be subject to a special test of reasonableness, expressed as a percentage of the prevailing charge for that service used for the office-based setting. Specifically, the reasonable charge determined for a physician radiology service furnished in a provider may not exceed 40 percent of prevailing charge established for the same procedure furnished in an office setting. We believe that this will assure that the payment level for radiology services furnished in the provider is reasonable and related to the component of charges for services furnished in an office setting that is attributable the physician's own services to individual patients.

Comment: In connection with the 40 percent test for radiology services contained in the proposed section 405.555, what does the term "* * * similar services furnished in a nonprovider setting * * *" refer to?

Response: The carrier will determine which services are subject to the 40 percent test of reasonableness according to its procedure terminology and coding system. Radiology services identified as those generally furnished in physicians' offices and clinics in the area would be subject to the additional test of reasonableness when furnished in a hospital setting.

Comment: Wood, Lucksinger and Epstein, a major law firm involved in representing providers and provider-based physicians, says that hospital radiologists have certain overhead expenses and that the 40 percent test of reasonableness assumes they have none.

Response: The 40 percent test of reasonableness does not reflect an assumption that hospital radiologists bear no overhead. Rather, it reflects differences we estimate exist between overhead in hospital and office practices. The 40 percent allowance includes the usual expenses of direct-billing radiologist, e.g., malpractice insurance, billing and collection services, etc. It does not need to be adjusted further.

Comment: The proposed rule states that the reasonable charge for the physician's inhospital radiology services not exceed 40 percent of the prevailing charge for similar services performed in physicians' offices. Instead of using a fixed percentage rule, couldn't percentages be developed by the carrier for each procedure on an individual locality basis?

Response: When the proposed rule was published in the Federal Register, we specifically requested interested parties to submit data to support other, possibly more refined methods, of determining the inherent reasonableness of charges for inhospital physicians' radiology services. A number of groups and individuals suggested that the 40 percent test was inappropriately restrictive. We also have received the results of a preliminary HCFA study of 15 hospitals in three different regions that indicates that the 40 percent test may be unreasonably liberal. We continue to believe that the data we discussed in the NPRM indicate that the level of this limit is reasonable. However, we also believe we should continue to study the issue to determine whether the level of the test should be changed. If additional statistically valid information is obtained, we may propose further refinements in this test of reasonableness. In this regard, we again invite the public, including professional organizations, to develop data that would be helpful for this

purpose. We wish to emphasize, however, that the purpose of this and the other Part B charge limitations we are imposing is to limit Medicare Part B charge payments to what is reasonable.

Comment: The American College of Radiology (ACR) challenged the 40 percent test of reasonableness because they indicate that total hospital costs are higher than total office costs.

Response: It is not the cost of the radiology services that is at issue; it is the reasonable charge for the interpretation. Even though hospital costs for the technical components of a service may be higher than the costs for similar services furnished in a non-hospital office, Medicare's liability for interpretation should be the same because the service furnished by the physicians in interpreting the result of the test is the same.

Comment: The proposed section 405.555(c) states that special rules for determining reasonable charges for radiology services will apply to services furnished in a "* * * hospital radiology department or any other setting that is part of a provider * * *." What criteria are used to determine if a particular setting is "part of a provider?"

Response: Generally, a department or facility is part of a provider if it:

- Is located in the provider, or is operated under the supervision of the provider or the provider's medical staff; and
- Serves the provider's patients.

The purpose of determining whether the facility or department is part of a provider is to ensure that reimbursement is made from the proper trust funds. If the facility is a department of the provider, the overhead costs and operating expenses may be reimbursed only on a reasonable cost basis to the provider. Only charges for the physicians' services may be billed and reimbursed under Part B.

XI. Pathology Services

A. Differentiating Physician and Provider Services: Anatomical Pathology

The laboratory services received by provider patients can be classified either as anatomical pathology services, or as clinical pathology services. Anatomical pathology generally requires examination of body tissue, fluid or cells by the pathologist (or another physician functioning in the capacity of a pathologist) or other direct participation by the pathologist in the performance of the service. In the NPRM, we described anatomical pathology services as generally falling in three subcategories:

- Histopathology (gross and microscopic examination of organ tissue or bone);
- Cytopathology (examination of fluid or cells, including cytogenetics, but generally excluding hematology); and
- Oral pathology.

Since anatomical pathology services are personally furnished for an individual by a physician, ordinarily require performance by a physician, and contribute to the diagnosis of an individual patient's condition, these services are classified under Medicare as physician services, and are paid for on a reasonable charge basis under Medicare Part B, under both existing regulations and these revised regulations.

Comment: Autopsies are considered anatomic pathology services. Does this mean Medicare will pay under Part B on a reasonable charge basis for these services?

Response: While autopsies may be classified as anatomical pathology services, they are not covered under Medicare as physicians' services to patients, since the beneficiary is deceased. An autopsy does not contribute to the diagnosis or treatment of an individual patient's condition. However, the costs of these services are allowable for purposes of determining reasonable cost reimbursement for provider services.

B. Differentiating Physician and Provider Services: Clinical Laboratory Services

Clinical laboratory services generally include microbiological, serological, chemical, hematological, biophysical, cytological, immunohematological, and pathological examinations performed on material derived from the human body. These services are performed to provide information for the diagnosis, prevention, or treatment of a disease, or for assessment of a medical condition, and are performed both in independent laboratories and in hospital laboratories. Most clinical laboratory services are routinely performed by nonphysicians, such as medical technologists, laboratory technicians or, in the case of some tests, by automated laboratory equipment, and do not require performance by a physician.

In regard to this matter, the American Society of Medical Technology points out in its comments on our proposed rule: "* * * that even the accreditation rules used by the College of American Pathologists (CAP) for its laboratory inspection and accreditation program also clearly permit independent clinical laboratories to be directed by non-physician personnel."

In support, they quote Standard III of CAP's accreditation program, which states in part:

> The director of an independent laboratory shall be a physician with training and experience in pathology, or a clinical scientist with adequate training and experience in clinical laboratory work who meets the requirements of a laboratory director under the Clinical Laboratoy Improvement Act of 1967.

To the extent that clinical laboratory services do not ordinarily require performance by a physician, our existing regulations, at 42 CFR 405.483(a), have prohibited paying for them on a Part B reasonable charge basis. However, those regulations have not been implemented uniformly, and carriers in some areas have improperly paid Part B reasonable charges for clinical pathology services to provider patients. As discussed in section IV. Above, we attempted, through a notice published on March 11, 1980, to establish uniform implementation and preclude payment on a reasonable charge basis for all clinical pathology services furnished in providers to provider patients.

We have reconsidered this position and are now revising our regulations to specify that under certain conditions Medicare will pay Part B reasonable charges for some clinical laboratory services. The rules governing payment for laboratory services apply to all such services furnished in the provider, including, for example, a pulmonary function department. Under these regulations, the carrier will pay for clinical laboratory services on a charge basis only if the services are personally furnished for an individual patient by a physician, ordinarily require performance by a physician, and directly contribute to the diagnosis or treatment of an individual patient.

The regulations list the following as physician laboratory services that we recognize as meeting the above criteria and, therefore, as reimbursable on a reasonable charge basis:

- Anatomical pathology services;
- Services performed by a pathologist in personal administration of test devices, isotopes, or other materials to an individual patient; and
- Consultations that meet certain criteria.

The last two items on this list include those clinical laboratory services that would meet our tests for payment on the basis of reasonable charges.

Comment: The CAP asserts that every clinical pathology procedure for every patient depends on the professional medical services performed by the

pathologist. They claim that these services are "personally rendered" by the pathologist and "contribute to the diagnosis or treatment" of each individual patient for whom a laboratory test is performed. More specifically, they claim that the pathologist establishes ranges of normalcy for each clinical procedure and must be prepared to analyze results and consult with the attending physician. In addition, as a physician, the pathologist evaluates and prescribes procedures and equipment, professionally directs the laboratory and verifies test results.

Response: Section 1887 requires the Secretary to determine in regulations those services of a physician that constitute professional medical services, that are personally rendered for an individual patient by a physician, and that may be reimbursed on a reasonable charge basis under Part B.

The services for which the commenter seeks reasonable charge payment are specific clinical laboratory tests. Each test has a code number for identification, and when the carrier is billed, the test is so identified. The items billed, that is, the coded services, are rarely "personally rendered" by the physician. The tests are run by technologists, often using automated equipment.

The laboratory physician is required to do nothing with regard to a specific test. He does not order the test, perform the test, or interpret the results; he does nothing for the individual patient that he would not have done if that specific patient had not been admitted to the hospital. Direction, administration, quality control activities, setting standards, and similar activities are services furnished by both physician and nonphysician laboratory directors. Such services, in themselves, do not require performance by a physician.

The services that are "personally rendered" by the laboratory physicians are not the individual tests. The personal services include establishing ranges of normalcy, supervising employees, ordering equipment, establishing quality control procedures, and, in some instances, analysis of results and the discussion of procedures and results with patients' attending physicians. These services also are furnished by both physician and nonphysician laboratory directors and do not require performance by a physician in person. Even though a physician may direct the laboratory and furnish the indicated services, it is not necessary for a physician to do so.

Further, these activities are not done for individual patients, but are professional services rendered for the general benefit of patients. These are administration and supervision of the laboratory department. They are done for the general benefit of all patients utilizing the laboratory. Only discussions with attending physicians and analysis of results may present involvement of the laboratory physician in activities for an individual patient sufficient to qualify as physicians' services reimbursable on a reasonable charge basis. These qualify when they are part of necessary medical consultations.

Comment: If a hospital pathologist continued to bill separately for all clinical laboratory services furnished to non-Medicare patients and received reimbursement from the hospital for such services to Medicare patients, would the compensation received from the hospital be considered to be for services to Medicare and non-Medicare patients?

Response: No. If the hospital reimburses a physician solely for services to Medicare patients, the hospital's reasonable cost for these services is totally a Medicare cost.

Comment: Will the final regulations provide for the carriers to grant equity adjustments to customary and prevailing charge profiles for the pathologist's anatomical pathology and consultative pathology services?

Response: Equity adjustments to customary charges for a pathologist's services will be made by carriers on the same basis as adjustments are made for other physicians. Equity adjustments are not made to prevailing charges.

Comment: One commenter informed us of its belief that some hospital laboratory physicians have made efforts to have hospital rules on laboratory services revised to require attending physicians to request a consultation from a laboratory physician on each patient's laboratory services. This is intended to result in those services being reimbursable on a reasonable charge basis.

Response: These rules specify how and to what extent Medicare will pay for laboratory services furnished in provider settings. They are not subject to modifications by hospital or medical staff rules, nor by State or local law or regulation. Such attempts to circumvent these rules may be made, but we do not expect them to be widespread. To be a covered service, a laboratory consultation must be medically necessary. A significant change in practice pattern, or a difference between otherwise comparable hospitals, would be cause for close review.

Comment: The same commenter also reported allegations that some physicians would seek to evade these rules through misrepresentation of their services.

Response: When instances of misrepresentation are reported to us, we will investigate and take appropriate action.

If it later seems that this problematic practice has increased in response to these regulations, we will initiate tighter review procedures.

Comment: Some commenters suggest that we should allow a physician or entity that incurs the cost of operating a laboratory on a hospital's premises to be reimbursed on a reasonable charge basis for all diagnostic laboratory services furnished by that laboratory to hospital patients, as we do an independent laboratory.

Response: An independent laboratory may bill Part B directly for any laboratory services it is certified to perform for Medicare patients. The Medicare regulations in 42 CFR Part 405, Subpart M, specify the conditions for coverage of services of independent laboratories. In particular, the regulations of 42 CFR 405.1310(a)(1) provide that a laboratory that is located in a hospital and serves the hospital's patients is not an independent laboratory. Thus, a laboratory of this type is not an independent laboratory for Medicare purposes merely because a physician (or other entity) assumes all the costs of operating the laboratory, leases only space from the hospital, and also serves community patients. On the contrary, it is considered a hospital laboratory. Since it is a hospital laboratory, the costs incurred to operate it, and to furnish services to hospital patients, are hospital costs and Medicare reimbursement is on a reasonable cost basis notwithstanding the lease arrangement.

Comment: A number of commenters have indicated that we should permit laboratories in hospitals to be certified as independent laboratories. As such, they could bill for all the services they furnish on a charge basis.

Response: We do not concur. The regulations at 42 CFR 405.1310 state, in pertinent part:

(a) *Independent Laboratory.* An independent laboratory performing diagnostic tests means one which is independent both of the attending physician's office and of a hospital which meets at least the requirement specified in section 1861(e) of the Act to qualify for payment for emergency hospital services under section 1814(d) of the Act. A laboratory which: (1) Is located in a hospital which meets at least the

requirements specified in 1861(e) of the Act to qualify for emergency hospital services under 1814(d) of the Act or, if outside the hospital, is operated under the supervision of the hospital or its organized medical staff, and (2) serves the hospital's patients, is not an independent laboratory. (42 CFR 405.1310)

We will ask our carriers and intermediaries to assure that reimbursement is made appropriately for laboratory services furnished in both independent and hospital laboratory settings.

C. Criteria for Identifying Pathology Consultations Reimbursable on a Reasonable Charge Basis

In the NPRM, we described pathology consultations that would be reimbursable on a reasonable charge basis as consultations, including those in connection with clinical pathology services, that—

- Are requested by the patient's attending physician;
- Relate to a test result that lies outside the normal range established by the laboratory;
- Result in a written narrative report; and
- Require the exercise of medical judgment by the pathologist.

Our intent in proposing these criteria was twofold. First, section 1861(q) of the Act explicitly recognizes consultations as physicians' services to individual patients reimbursable on a reasonable charge basis. Therefore, we wish to ensure that consultations are paid for on the appropriate basis from the correct trust fund. Second, although our past practice for reimbursing consultations has presented no problem in regard to most physician specialties, we recognize that our changes in reimbursement policy for physician laboratory services to specifically allow payment on a reasonable charge basis for these consultations raises problems in distinguishing pathology consultations reimbursable on a reasonable charge basis. We must be careful to avoid permitting laboratory reports to be described routinely as "consultations".

Comment: Many pathologists, in commenting, described situations in which a test result had stimulated the pathologist to initiate contact with a patient's attending physician. They asked whether an allowance would be made in the final regulations to recognize as clinical consultations these consultations that are initiated by the pathologist.

Response: No. Laboratory personnel, including the director, are expected from time to time to contact a patient's attending physician to report the result of individual tests or to suggest additional testing. This is a routine activity that is undertaken by both physician and nonphysician laboratory directors. It does not constitute a clinical consultation. However, if, in the course of such a contact, the attending physician requested a consultation from the pathologist, and if that consultation met the other criteria in the regulations and was properly documented, it would be reimbursable on a reasonable charge basis. The requirement that the attending physician initiate the consultation is consistent with our longstanding policy on consultations.

Comment: Many pathologists criticized our proposed provision limiting consultations to situations in which a test result "lies outside the normal range", and suggested that the final rules recognize as "consultations" instances where the test result may be "normal" but the result is inconsistent with other diagnostic tests or the patient's overall clinical evaluation.

Response: We agree with this comment and have revised the final regulations to reflect it. This section now provides that a consultative pathology service must "relate to a test result that lies outside the clinically significant normal or expected range in view of the condition of the patient." This would include clinically significant changes of test results within a normal range.

Accordingly, the patient's attending physician (or a consulting physician who has ordered tests as part of his or her consultation), may request a consultation with the laboratory physician even if an individual test is within normal limits, but is inconsistent with the results of other diagnostic studies or the patient's overall clinical evaluation. The basis for requesting the consultation in any case would be that the attending physician is not able to make or confirm a diagnosis, and needs the assistance of the specialist's medical judgment. In light of this, we expect that claims for Part B reasonable charge payment for consultations will be limited to those occasions that clearly require the exercise of serious medical judgment by pathologist in a particular case. Patient's physicians are responsible for ensuring that all consultations ordered are medically necessary. A consultation would not include those discussions, such as discussions between an attending physician and the laboratory physician regarding additional testing or questions regarding the meaning of specific test. These do not meet our criteria for physicians' services to individual patients, nor have these services traditionally been billed to patients as discrete physicians' services. We believe we are correct in our view that being available for informal discussions of tests is among the responsibilities of the laboratory director in his or her capacity as director, and that such discussions occur whether the laboratory director is a physician or nonphysician.

Comment: Some commenters suggested that, instead of defining clinical consultations for which reasonable charges would be paid, it would be preferable for HCFA to develop a list of those laboratory procedures that could be reimbursed on a reasonable charge basis.

Response: We do not believe that certain clinical laboratory procedures require personal performance by a physician, apart from personal administration of materials to patients. There is no consensus that certain procedures require a physician to run the test. As for interpretation of test results, generally, any clinical laboratory test may be interpreted by a patient's attending physician, if that physician is familiar with it. However, new tests are constantly developed and adopted, and attending physicians may require assistance from the laboratory director to determine the meaning of tests. Instruction concerning tests is a general responsibility of laboratory directors, and occurs whether the director is a physician or a nonphysician.

In addition, we are recognizing reimbursement on a reasonable charge basis for consultations. This will meet the needs of attending physicians for medical assistance in interpreting new or unfamiliar tests, and relating these to the conditions of individual patients. Determinations by carrier medical staff as to the appropriateness of consultations allows consideration of local patterns of practice and test adoption.

Further, there is a lack of consensus even among pathologists, as to whether a given test requires performance by a physician. Even if we agreed that there were certain procedures that require this, it would not be possible to maintain a listing of such tests, due to variations between providers and localities in adopting tests. As a result, any uniform listing would of necessity disregard many local practices. The updating problem would be immense, both in adding new tests promptly, so as to avoid inadvertently failing to cover them appropriately, and in deleting other tests, which due to increased familiarity of attending physicians, or technological improvements in laboratory procedure,

no longer require performance by a physician. We believe that any listing would have to be constructed using the same essential criteria we have included in our regulations. By establishing these regulatory criteria, we are able to avoid the administrative difficulties of developing and updating such a listing.

XII. Implementation and Interaction With Other Regulations

A. Effective Date and Implementation

These final regulations generally will be effective for services physicians furnish in providers on or after May 31, 1983. However, as discussed above, § 405.550(e), affecting agreements under which physicians (or other entities) assume some or all of the operating costs of a provider department, contains provisions indicating that it will not be applied until June 30, 1983, for lease agreements established on or after July 1, 1980, and until March 2, 1985, for agreements established before that date.

B. Interaction With Other Regulations

1. *Hospital Cost Limits and Rate of Increase Targets.* On September 30, 1982, HCFA published two documents implementing section 101 of Pub. L. 97–248. These documents were "Medicare Hospital Reimbursement Reforms: Limitations on Reimbursable Costs and the Rate of Hospital Cost Increases" (47 FR 43282), and "Schedule of Limits on Hospital Inpatient Operating Costs for Cost Reporting Periods Beginning on or after October 1, 1982" (47 FR 43296). These documents implemented controls on both the maximum reimbursable amount for hospital inpatient operating costs, calculated on a per discharge basis, and the amount of annual increase of these same costs that would be recognized for Medicare reimbursement purposes.

Comment: A number of commenters, including several of the major associations such as The American Hospital Association, expressed concern that the additional costs a hospital incurs as a result of Part A reimbursement for services provided to a hospital by pathologists and other physicians could cause the hospital to exceed the cost limits and the rate-of-increase ceiling.

Response: We are aware that this condition may arise to the extent these costs are not included in either the cost data used to establish the cost limits or in the hospital's base year costs used to determine the target amount. However, we believe that section 101 of Pub. L. 97–248, and the current regulations at 42 CFR 405.460 and 42 CFR 405.463 which implement the legislation, address this concern. Specifically, 405.460(h) of the regulations provides that HCFA may adjust the amount of a hospital's inpatient operating costs to take into account factors which could result in a significant distortion in the operating costs of inpatient hospital services. Section 405.463(h) provides for a similar adjustment with respect to the rate-of-increase provision in order to take into account distortions either in a hospital's base period or a period subject to the rate-of-increase limit. While those regulations mainly contemplate situations where hospital actions result in a lowering of costs, the adjustments could be applied in any circumstances where costs are distorted. It should also be noted that a number of exceptions are provided under both the expanded cost limits and the rate-of-increase control provisions.

We believe that the cost limit and target rate of increase regulations permit us to make exceptions or adjustments, as appropriate, to account for any increase in costs that a hospital may incur as a result of the changes mandated by the new regulations on payment of physicians services furnished in institutional providers of services. An adjustment or an exception to account for increased costs would, of course, depend on the extent to which the costs are reasonable, attributable to the circumstances specified, separately identified by the hospital, and verified by the intermediary.

2. *Regulations prohibiting recognition of payments under certain percentage arrangements.* Section 109 of Pub. L. 97–248 added paragraph (b) to section 1887 of the Act, established by section 108 of Pub. L. 97–248. Section 1887 prohibits recognition, except as specified in section 1887(b)(2) of the Act, of certain percentage arrangements for purposes of determining Medicare reimbursement on a reasonable cost basis. This provision could be applied to percentage-based physician compensation (for services to providers that benefit patients generally) if reasonable compensation equivalent limits are not applied to those costs in accordance with section 1887(a)(2)(B). However, since these final regulations do establish RCE limits for such physician services to providers, we will continue to recognize the costs of compensation determined on a percentage basis for such services. The regulations that we are currently developing to implement section 1887 will, therefore, not be applied to reimbursement for physicians' services to providers in these circumstances.

3. *Regulations on Access to Books, Documents, and Records of Sub-contractors.* On December 30, 1982, HCFA published new final rules implementing section 952 of the Omnibus Reconciliation Act of 1980 (Pub. L. 96–499). The document was "Medicare Program; Access to Books, Documents and Records of Subcontractors" (47 FR 56280). Section 952 amended section 1861(v)(i) of the Act by adding a new paragraph (I). The new provision requires that, in order for the costs of services furnished under a contract between a provider and subcontractor to be included as reasonable costs for Medicare reimbursement purposes, the contract (if its costs or value over a 12-month period is $10,000 or more) must contain a clause allowing the Secretary of the HHS and the Comptroller General to have access, upon request, to the contract, and to the books, documents, and records of the subcontractor that are necessary to verify the costs of services furnished under the contract. Those regulations, however, do not indicate how reasonable costs will be determined by intermediaries. Rather, they describe the criteria and procedures the Department would use to obtain access to affected books, documents, and records.

Our October 1, 1982 NPRM contained a provision stating that where a physician or other entity enters into a lease arrangement with a provider, the intermediary will reimburse the provider, to the extent the provider incurs a cost, on a reasonable cost basis for the costs associated with producing these services, including overhead, supply, and equipment costs, and the costs of employing nonphysician personnel. The physician or other entity will make its books and records available to the provider and the intermediary.

As discussed above, we are retaining this provision in these final regulations because our regulations describe how our contractors will determine proper program payments under lease arrangements and access to the books and records of the leasing entity or the leasing physician is necessary to the determination of reasonable cost.

If we deleted these provisions and instead relied only on the provisions of section 1861(v)(1)(I), our objective would not be achieved.

XIII. Other Required Information

A. Reporting and Recordkeeping Requirements and Burden

1. Section 405.481 of these regulations contains information collection requirements that are subject to OMB review under section 3504(h) of the Paperwork Reduction Act of 1980 (Pub.

L. 96-511). As required by the Act, we sent these sections to OBM for review and comment. We received no OBM comments in the 60 days following publication, and have now submitted a copy of this final rule to OMB for their review of the information collection requirements.

Under § 405.481(g), a provider is required to retain each allocation agreement, and the time records or other documentation on which the agreement was based, for a period of at least four years following the close of the cost reporting period to which the allocation applies. In addition, the provider must report the physician's time allocation data to the intermediary or carrier on an annual basis.

The allocation agreement and reporting required by this section have been approved by OMB, under existing regulations, under approval number 0938-0179. We are developing a new HCFA form to replace the current forms used to collect this data, which are intermediary forms approved under the contractor information collection category. The new HCFA form will also be submitted to OMB for review and approval.

2. In applying for an exception to the RCE limits, a provider must document its problems in recruiting or maintaining physicians, its efforts in recruitment, and the basis for the revised RCE level it is requesting.

3. In submitting a claim for payment, an anesthesiologist (or a physician functioning in the capacity of an anesthesiologist) is required to indicate on the claim form: (i) Whether (and how many) other anesthesia services were furnished at the same time; and (ii) whether the anesthesia service was furnished by a CRNA employed by the physician.

4. Since we are eliminating the HCFA-1554 claim form, the services which would have been claimed on that form have to be claimed on the HCFA-1500 (or under combined billing using either the HCFA-1453 or HCFA-1483, if we do not also eliminate that billing method). Providers and physicians switching from the HCFA-1554 to combined billing will not experience any greater burden; their reporting burden will be reduced. However, the HCFA-1500 does require significantly greater information than the HCFA-1554 in that services furnished must be separately identified, and physicians (and providers who act as billing agents for physicians) may find the use of the HCFA-1500 more burdensome.

5. We are also proposing to eliminate combined billing, using forms HCFA-1453 and HCFA-1483. If we implement this proposal, all the services currently billed on the HCFA-1554 and by combined billing will be billed on the HCFA-1500. Because this form requires more information, and the number of separate billings would be increased substantially, the reporting burden on physicians (and providers who act as billing agents for physicians) would be increased.

B. Other Changes

The following regulations text includes minor changes not discussed in this preamble. These changes are not substantive. They concern mainly titles, coding, and authority citations, and are needed to conform these rules to other amendments of the Medicare regulations in separate Federal Register documents.

C. Impact Analyses

Appendix I, which is printed immediately following the text of the regulations, sets forth our analyses of the projected impact and effect on small businesses of these regulations.

D. Public Comments

We invite comments on new issues raised in this document that were not addressed in the NPRM published September 30, 1982. In particular, we request comments on our proposal to eliminate combined billing, and on the delayed implementation of § 405.550(e), concerning lease arrangements. Because of the large number of comments we receive, we cannot acknowledge or respond to them individually.

These final regulations have already been published as an NPRM, and we have responded to comments received on the proposed rules in this document. Therefore, in preparing forthcoming documents related to these regulations, we do not expect to respond a second time to comments to which we have already appropriately responded in this document. However, we will respond to comments on new issues raised by the preamble of these final regulations in an appropriate future Federal Register publication.

List of Subjects in 42 CFR Part 405

Administrative practice and procedure, Certification of compliance, Clinics, Contracts (Agreements), End-Stage Renal Disease (ESRD), Health care, Health facilities, Health maintenance organizations (HMO), Health professions, Health suppliers, Home health agencies, Hospitals, Inpatients, Kidney diseases, Laboratories, Medicare, Nursing homes, Onsite surveys, Outpatient providers, Reporting requirements, Rural areas, X-rays.

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

42 CFR Part 405 is amended as set forth below:

1. The title and §§ 405.480 to 405.482 of the table of contents of Subpart D, are revised and §§ 405.483–405.488 are removed as follows:

* * * * *

Subpart D—Principles of Reimbursement for Providers, Outpatient Dialysis, and Services Furnished by Physicians in Institutional Providers

* * * * *

405.480 Payment for services of physicians to providers: General rules.
405.481 Allocation of physician compensation costs.
405.482 Limits on compensation for services of physicians in providers.

2. The authority citation for Subpart D is revised to read as follows:

Authority: Secs. 1102, 1814(b), 1815, 1833(a), 1861(v), 1871, 1881, 1886, and 1887 of the Social Security Act as amended (42 U.S.C. 1302, 1395f(b), 1395g 1395l(e), 1395x(v), 1395hh, 1395rr, 1395ww, and 1395xx).

3. In Subpart D, the title of the subpart and §§ 405.480 through 405.482 are revised, and §§ 405.483 through 405.488 are removed, as follows:

Subpart D—Principles of Reimbursement for Providers, Outpatient Dialysis, and Services Furnished by Physicians in Institutional Providers

* * * * *

§ 405.480 Payment for services of physicians to providers: General rules.

(a) *Allowable Costs.* Except as specified otherwise in §§ 405.486, 405.485, or 405.486, costs a provider incurs for services of physicians are allowable only if the following conditions are met:

(1) The services do not meet the conditions in § 405.556(b) regarding reasonable charge reimbursement for services of physicians to an individual patient of a provider;

(2) The services do not include physician availability services, except for reasonable availability services furnished for emergency rooms;

(3) The provider has incurred a cost for salary or other compensation it furnished the physician for the services; and

(4) The costs incurred by the provider for the services meet the requirements in § 405.451 regarding costs related to patient care.

(b) *Allocation of costs.* In determining its costs of services that meet the conditions for payment in paragraph (a) of this section, the provider must follow the rules in § 405.481 regarding allocation of physician compensation costs.

(c) *Limits on allowable costs.* In determining its payments to a provider for the costs of services that meet the conditions for payment in paragraph (a) of this section, the intermediary must apply the limits on compensation set forth in § 405.482.

§ 405.481 Allocation of physician compensation costs.

(a) *Definition.* For purposes of this subpart, "physician compensation costs" means monetary payments, fringe benefits, deferred compensation and any other items of value (excluding office space or billing and collection services), a provider or other organization furnishes a physician in return for the physician's services. Other organizations are entities related to the provider within the meaning of 42 CFR 405.427, or entities that furnish services for the provider "under arrangements" within the meaning of the Act.

(b) *General rule on allocation of physician compensation costs.* Except as provided in paragraph (d) of this section, each provider that incurs physician compensation costs must allocate those costs, in proportion to the percentage of total time that is spent in furnishing each category of services, between:

(1) Physician services to the provider (as described in § 405.480);

(2) Physician services to patients (as described in § 405.550); and

(3) Activities of the physician, such as funded research, that are not reimbursable under either Part A or Part B of Medicare.

(c) *Allowable physician compensation costs.* Only costs allocated to reimbursable physician services to the provider (as described in § 405.480) are allowable costs to the provider under this subpart.

(d) *Allocation of all compensation to services to the provider.* Generally, the total physician compensation received by a physician will be allocated among all services furnished by the physician, unless:

(1) The provider certifies that the compensation is attributable solely to the physician's services to the provider; and

(2) The physician bills all of his or her patients for the physician services he or she furnishes to those patients and personally receives the payment from such billings. If returned directly or indirectly to the provider or an organization related to the provider within the meaning of § 405.427, these payments are not compensation for physician services to the provider.

(e) *Assumed allocation of all compensation to patient services.* If the provider and physician agree to accept the assumed allocation of all the physician's services to direct services to individual patients as described under § 405.550(b), a written allocation agreement is not required.

(f) *Determination and payment of allowable physician compensation costs.* (1) Except as provided under paragraph (e) of this section, the intermediary will reimburse the provider for these costs only if:

(i) The provider submits to the intermediary a written allocation agreement between the provider and the physician that specifies the respective amounts of time the physician spends in furnishing physician services to the provider, physician services to patients, and services that are not reimbursable under either Part A or Part B of Medicare; and

(iii) The compensation is reasonable in terms of the time devoted to these services.

(2) In the absence of a written allocation agreement, the intermediary will assume, for purposes of determining reasonable costs of the provider, that 100 percent of the physician's compensation cost is allocated to services to patients as specified in paragraph (b)(2) of this section.

(g) *Recordkeeping requirements.* Except for services furnished in accordance with the assumed allocation under paragraph (e) of this section, each provider that claims payment for services of physicians under this subpart must:

(1) Maintain the time records or other information it used to allocate physician compensation in a form that permits the information to be validated by the intermediary or the carrier;

(2) Report the information on which the physician compensation allocation is based to the intermediary or the carrier on an annual basis, and promptly notify the intermediary or carrier of any revisions to the compensation allocation; and

(3) Retain each physician compensation allocation, and the information on which it is based, for at least four years after the end of each cost reporting period to which the allocation applies.

§ 405.482 Limits on compensation for services of physicians in providers.

(a) *Compensation to be limited.* HCFA will establish limits on the amount of compensation paid to physicians by providers that will be recognized as reasonable in determining the amount of reimbursement for physician services to providers, as described in § 405.480(a). Compensation that a physician receives for activities that may not be paid for under either Part A or Part B of Medicare will not be considered in applying these limits.

(b) *Methodology for establishing limits.* HCFA will establish a methodology for determining reasonable annual compensation equivalents, considering average physician incomes by specialty and type of location, to the extent possible using the best available data.

(c) *Application of limits.* If the level of compensation exceeds the limits established under paragraph (b) of this section, Medicare payment will be based on the level established by the limits.

(d) *Adjustment to the limits.* The intermediary may adjust limits established under paragraph (b) of this section to account for costs incurred by the physician or the provider related to malpractice insurance, professional memberships, and continuing medical education.

(1) For the costs of membership in professional societies and continuing medical education, the intermediary may adjust the limit by the lesser of:

(i) The actual cost incurred by the provider or the physician for these activities; or

(ii) 5 percent of the appropriate limit.

(2) For the cost of malpractice expenses incurred by either the provider or the physician, the intermediary may adjust the reasonable compensation limit by the cost of the malpractice insurance expense related to the physician's service to provider patients.

(e) *Exception to limits.* An intermediary may grant a provider an exception to the limits established under paragraph (b) of this section only if the provider can demonstrate to the intermediary that it is unable to recruit or maintain an adequate number of physicians at a compensation level within those limits.

(f) *Notification of changes in methodologies and payment limits.* (1) Before the start of a cost reporting period to which limits established under this section will be applied, HCFA will publish a notice in the **Federal Register** that sets forth the amount of the limits

and explains how the limits were calculated.

(2) If HCFA proposes to revise the methodology by which payment limits under this section are established, HCFA will publish a notice, with opportunity for public comment, to that effect in the **Federal Register**. The notice would explain the proposed basis for setting limits, specify the limits that would result, and state the date of implementation of the limits.

(3) Revised limits updated by applying the most recent economic index data without revision of the limit methodology will be published in a notice in the **Federal Register** without prior publication of a proposal or public comment period.

§§ 405.483–405.488 [Removed]

4. The table of contents of Subpart E is amended by adding new §§ 405.550–405.557, and a center heading immediately preceding them, as follows:

Subpart E—Criteria for Determination of Reasonable Charges; Reimbursement for Services of Hospital Interns, Residents, and Supervisory Physicians

* * * * *

Services of Physicians in Providers

Sec.

405.550 Conditions for payment of charges for physician services to patients in providers: General provisions.
405.551 Reasonable charges for physician services in providers: General provisions.
405.552 Conditions for payment of charges: Concurrent anesthesiology services.
405.553 Reasonable charges for anesthesiology services.
405.554 Conditions for payment of charges: Radiology services.
405.555 Reasonable charges for radiology services.
405.556 Conditions for payment of charges: Physician laboratory services.
405.557 Reasonable charges for physician laboratory services.

* * * * *

5. The authority citation for subpart E is revised to read as follows:

Authority: Secs. 1102, 1832, 1833(a), 1842(b), 1861(b), 1861(v), 1871, 1881, and 1887 of the Social Security Act, as amended (42 U.S.C. 1302, 1395k, 1395l(a), 1395u(b), 1395x(b), 1395x(v), 1395hh, 1395rr and 1395xx).

6. In Subpart E, §§ 405.550 through 405.557, and a center heading immediately preceding them, are added to read as follows:

* * * * *

Services of Physicians in Providers

405.550 Conditions for payment of charges for physician services to patients in providers: General provisions.

(a) *Scope.* This section implements section 1887(a)(1) of the Act by providing general conditions that must be met in order for services furnished by physicians in providers to be paid for on the basis of reasonable charges under this subpart. Section 405.551 sets forth general requirements for determining the amounts of payment for services that meet the conditions of this section. Sections 405.552 through 405.557 set forth additional conditions for payment and rules for determining reasonable charges for physician services in the specialities of anesthesiology, radiology, and pathology (laboratory services).

(b) *Conditions for payment for services of physicians to provider patients.* The carrier will pay for services of physicians to patients of providers on a reasonable charge basis only if the following requirements are met:

(1) The services are personally furnished for an individual patient by a physician;

(2) The services contribute directly to the diagnosis or treatment of an individual patient;

(3) The services ordinarily require performance by a physician; and

(4) In the case of anesthesiology, radiology, or laboratory services, the additional requirements in §§ 405.552, 405.554, or 405.556 must be met.

(c) *Services of physicians to providers.* If a physician furnishes services in a provider that do not meet the requirements in paragraph (b) of this section but are related to the provision of patient care by the provider, the intermediary will pay for those services, if otherwise covered, under the rules in §§ 405.480 and 405.481 on reasonable cost payment for physician services to providers.

(d) *Effect of billing charges for physician services to a provider* (1) If services performed by a physician may be paid for under the reasonable cost rules in §§ 405.480 and 405–481, neither the provider nor physician may seek charge payment for the carrier, beneficiary, or another insurer.

(2) The carrier will not pay on a reasonable charge basis for services furnished by a physician to an individual patient that do not meet the conditions in §§ 405.552, 405.554, and 405.556.

(3) If the physician, the provider, or another entity bills the carrier or the beneficiary for physician services to the provider, as described in section § 405.480(a), the provider in which and to which the services were furnished may be considered to have violated its provider participation agreement, and that agreement may be terminated. See Part 489 of this chapter for rules governing provider agreements.

(e) *Effect of physician's assumption of operating costs.* (1) *Rules on payment.* If a physician or other entity enters into an agreement (such as a lease or concession) with a provider, under which the physician (or entity) assumes some or all of the operating costs of the provider department in which the physician furnishes physician services in the provider, the following rules apply:

(i) The carrier will make reasonable charge payments only for a physician's services to an individual patient.

(ii) The intermediary will reimburse the provider, to the extent the provider incurs a cost, on a reasonable cost basis for the costs associated with producing these services, including overhead, supply, and equipment costs, and the costs of employing nonphysician personnel.

(iii) The physician (or other entity) must make its books and records available to the provider and the intermediary as necessary to verify the nature and extent of the costs of the services furnished by the physician (or other entity).

(2) *Date of application.* (i) For services furnished under agreements entered into before July 1, 1966, the rules in paragraph (e)(1) of this section are applicable March 2, 1985.

(ii) For services furnished under agreements entered into on or after July 1, 1966, the rules in paragraph (e)(1) of this section are applicable June 30, 1983.

§ 405.551 Reasonable charges for physician services in providers: General provisions.

(a) *Scope.* The carrier determines reasonable charges for physican services to patients in providers in accordance with the general rules governing reasonable charge payment in §§ 405.501 through 405.508, except as provided in the following paragraphs of this sections.

(b) *Application in certain settings.* (1) *Teaching hospitals.* In determining the amount of payment for physician services to individual patients in a teaching hospital, the carrier applies the rules in § 405.521 in addition to those in this section.

(2) *Hospital-based ESRD facilities.* In determining the amount of payment for physician services to individual patients furnished in a hospital-based end-stage

renal disease (ESRD) facility certified under Subpart U of this Part, the carrier will apply the rules in § 405.542 instead of those in this section.

(c) *Customary and prevailing charges for physician services in provider settings.* (1) The carrier will calculate customary and prevailing charges for physician services furnished to individual patients in providers, in accordance with the general rules in §§ 405.501 through 405.508, separating, when appropriate, charges for physician services furnished in provider-based practices and physician services furnished in office-based practices.

(2) The carrier will apply the appropriate prevailing charge screens in determining reasonable charges for physician services, considering the setting.

(d) *Compensation-related charges.* In developing customary charges for physician services furnished in providers by physicians compensated by the provider or a related organization for those services, the carrier will establish a schedule of charges related to that part of the physician's compensation that is allocated to physician services to individual patients under § 405.481. (In a teaching hospital, compensation-related charges may be based on payments made, to the physician for services furnished to patients in the hospital, by a political subdivision, university, or medical school, irrespectively of whether it is a related organization.) The carrier generally will use the compensation paid to the physician during the hospital's most recently ended cost reporting period for this purpose. If this information is unavailable from the intermediary, the intermediary will make a reasonable estimate of a fair compensation amount based on what is paid for similar services in another hospital.

(2) The carrier develops compensation-related charges on an item-by-item basis, considering the frequency with which the various services are furnished, and the relative values assigned to each service in a relative value study.

(3) The intermediary may pay the provider, for physicians' services to an individual patient, on the basis of a single per diem, per visit, or other time-related rate, if the provider, or the particular department in which the services are furnished, has a uniform all-inclusive rate for services to patients.

(e) *Change of agreements.* If a physician who has been compensated by or through a provider (or other entity) for physician services to individual patients ends his or her compensation agreement and instead bills all patients, or their insurers, directly for his or her services, the carrier will determine the physician's customary charges on the basis of the former compensation agreement until the carrier has accumulated charge data from at least 3 months of the calendar year preceding the annual reasonable charge update. However, if a physician terminates a direct billing arrangement and enters into a compensation agreement with a provider, the carrier will determine compensation-related customary charges in accordance with paragraph (d) of this section except that during the first year, the total payments made on the basis of the compensation-related charges may not exceed what total payment would have been under the physician's former direct billing practice.

(f) *Rules for certain specialties.* In determining the amount of payment for anesthesiology or radiology services furnished by a physician to an individual patient, the carrier will apply the rules in this section and in §§ 405.553 and 405.555 in addition to the general rules governing reasonable charges at §§ 405.501 through 405.508.

§ 405.552 Conditions for payment of charges: Concurrent anesthesiology services.

(a) *Direction of concurrent procedures.* The carrier will reimburse a physician for concurrent anesthesiology services furnished to patients in a provider on a reasonable charge basis only if the services meet the conditions for reasonable charge payment in § 405.550(b) and the following additional conditions are met:

(1) For each patient, the physician—

(i) Performs a pre-anesthetic examination and evaluation;

(ii) Prescribes the anesthesia plan;

(iii) Personally participates in the most demanding procedures in the anesthesia plan, including induction and emergence;

(iv) Ensures that any procedures in the anesthesia plan that he or she does not perform are performed by a qualified individual;

(v) Monitors the course of anesthesia administration at frequent intervals;

(vi) Remains physically present and available for immediate diagnosis and treatment of emergencies; and

(vii) Provides indicated postanesthesia care.

(2) The physician directs no more than four anesthesia procedures concurrently, and does not perform any other services while he or she is directing the concurrent procedures.

(b) *Supervision of more than four procedures concurrently.*—If the physician is involved in furnishing more than four procedures concurrently, or is performing other services while directing the concurrent procedures, the concurrent anesthesia services are physician services to the provider in which the procedures are performed. In such cases, the physician is not required to meet the criteria of paragraphs (a)(1)(iii) and (vii) of this section personally, but must ensure that a qualified individual performs any procedure in which the physician does not personally participate. In these cases, the intermediary will pay for the services under the rules in §§ 405.480 and 405.481 on reasonable cost payment for physician services to providers.

§ 405.553 Reasonable charges for anesthesiology services.

(a) *General rule.*—In determining reasonable charge payment for anesthesiology services that meet the conditions in § 405.552(a), the carrier will follow the rules in paragraph (b) or (c) of this section.

(b) *Anesthetist employed by anesthesiologist.*—(1) If the anesthetist who administers anesthesia under the direction of the anesthesiologist is employed by the anesthesiologist, the carrier will determine the amount of payment for the services under the reasonable charge rules for physician services in providers in § 405.551 and the general reasonable charge rules in §§ 405.501 through 405.508.

(2) In determining reasonable charges for these anesthesia services, the carrier will allow for no more than one time unit for each 15 minute interval, or fraction thereof, beginning from the time the anesthetist begins to prepare the patient for induction of anesthesia, and ending when the patient may be safely placed under post-operative supervision and the anesthetist is no longer in personal attendance.

(3) If a physician constructs his or her charges using time units of other than 15 minutes, the carrier will adjust the customary and prevailing charge screens to ensure that in a one-hour period the value of four 15-minute intervals will not be less than would have been allowed if the entire hour had consisted of intervals of another length, such as five 12-minute intervals or six 10-minute intervals.

(c) *Anesthetist not employed by anesthesiologist.*—If the anesthetist who administers anesthesia under the direction of the anesthesiologist is not employed by the anesthesiologist, the carrier will determine reasonable

charges for the services by allowing no more than one time unit for each 30 minute interval, or fraction thereof, beginning from the time the anesthetist begins to prepare the patient for induction of anesthesia, and ending when the patient may be safely placed under post-operative supervision and the anesthetist is no longer in personal attendance.

§ 405.554 Conditions for payment of charges: Radiology services.

(a) *Services to patients.*—The carrier will reimburse radiology services furnished by a physician to an individual patient on a reasonable charge basis only if the services meet the conditions for reasonable charge payment in § 405.550(b) and are identifiable, direct, and discrete diagnostic or therapeutic services to an individual patient, such as interpretation of X-ray plates, angiograms, myelograms, pyelograms, or ultrasound procedures.

(b) *Services to providers.*—The carrier will not pay on a reasonable charge basis for physician services to the provider (for example, administrative or supervisory services) or for provider services needed to produce the X-ray films or other items that are interpreted by the radiologist. However, allowable costs for such services will be paid to the provider by the intermediary. (See § 405.480 for provider costs, and § 405.551(e)(2) for costs borne by a physician, such as under a lease or concession agreement.)

§ 405.555 Reasonable charges for radiology services.

(a) *General rule.*—In determining payment for radiology services that meet the conditions for payment of charges in § 405.554, the carrier will follow the rules in paragraph (b) or (c) of this section.

(b) *Services not furnished in providers.*—If the services are furnished in a radiologist's office, a freestanding radiology clinic, or any other setting that is not part of a provider, the carrier will determine the amount of payment for the services under the general reasonable charge rules in §§ 405.501 through 405.508.

(c) *Services furnished in providers.*—If the services are furnished in a hospital radiology department or any other setting that is part of a provider, the following rules apply:

(1) The carrier will determine the amount of payment under the reasonable charge rules for physician services in providers in § 405.551 and the general reasonable charge rules in §§ 405.501 through 405.508.

(2) The carrier may not reimburse a physician for a radiology service furnished in a provider an amount that exceeds 40 percent of the prevailing charge for a similar service furnished in a nonprovider setting.

§ 405.556 Conditions for payment of charges: Physician laboratory services.

(a) *Physician laboratory services.*—The carrier will reimburse laboratory services furnished by a physician to an individual inpatient on a reasonable charge basis only if the services meet the conditions for reasonable charge payment in § 405.550(b) and are—

(1) Anatomical pathology services;

(2) Consultative pathology services that meet the requirements in paragraph (b) of this section; or

(3) Services performed by a physician in personal administration of test devices, isotopes, or other materials to an individual patient.

(b) *Consultative pathology services.* For purposes of this section, consultative pathology services must—

(1) Be requested by the patient's attending physician;

(2) Relate to a test result that lies outside the clinically significant normal or expected range in view of the condition of the patient;

(3) Result in a written narrative report included in the patient's medical record; and

(4) Require the exercise of medical judgment by the consultant physician.

§ 405.557 Reasonable charges for physician laboratory services.

The carrier will reimburse a physician for laboratory services that meet the conditions for reasonable charge payment in § 405.556(a) under the reasonable charge rules for physician services in providers in § 405.551 and the general reasonable charges rules in §§ 405.501 through 405.508.

(Catalog of Federal Domestic Assistance Program No. 13.773, Medicare-Hospital Insurance Program; No. 13.774, Medicare-Supplementary Medical Insurance Program)

I. Introduction/Summary

The following analysis examines the expected effect of these rules. It considers the reductions in projected program expenditures, the benefits and costs experienced by affected parties, and the impact on small entities. In addition, we describe several possible alternative means of accomplishing the objectives of the proposal. This analysis should be read in conjunction with the preamble to these rules.

We believe that physicians furnishing radiology, anesthesiology, and pathology services will be the most heavily affected by the implementation of these regulations. However, Medicare hospitals, skilled nursing facilities,

comprehensive outpatient rehabilitation facilities, and physicians (including those in specialties other than radiology, anesthesiology, and pathology) who provide professional services to those providers will also be affected, although not significantly.

The aggregate projected effects on Medicare expenditures of the provisions discussed in this analysis are as follows:

PATHOLOGY, RADIOLOGY, AND ANESTHESIOLOGY SERVICES PROJECTED CHANGE IN EXPENDITURES

[In millions]

Fiscal year	Part A	Part B	Net savings
1983	$16	−$45	−$61
1984	60	−179	−119
1985	69	−184	−115
1986	74	−182	−108
1987	87	−260	−116
1988	100	−285	−135

This regulatory impact analysis differs somewhat from the analysis that accompanied the proposed regulations. Some of these differences resulted from the elimination of the proposed RCE limits on physician services to individual patients, the increase from two to four in the number of concurrent procedures an anesthesiologist may supervise and still receive reasonable charge reimbursement, and the inclusion of the effects of the proposed elimination of combined billing. In addition, we revised our cost estimates to reflect a different projected effective date of May 1, 1983, revised economic assumptions (e.g., expected inflation in Medical care costs), and more recent program data. Because of these changes, it is not meaningful to compare these estimates with previously published estimates.

We also have included responses to selected comments on the initial analysis.

We wish to note that while the provisions of these regulations that deal with services under lease agreements have delayed effective dates, we expect only a relatively small number of providers and physicians to be affected by these provisions. To simplify the preparation of these estimates, we assumed a single effective date for all provisions. Because of the limited impact of the provisions with delayed effective dates, we do not believe this assumption will significantly affect the accuracy of the estimates.

We also wish to note that the effective date of most provisions will be 90 days after publication. However, the actual publication date could not be known at the time that this analysis was prepared. Therefore, we assumed that the regulations would be published by February 1, 1983, and would be effective by May 1, 1983. However, a difference of several days between the projected and actual effective dates will not have a significant effect on our estimates.

In addition to the projected reductions in program expenditures, we expect that in the long term these regulations may result in minimal reductions in claims processing costs resulting from a net reduction in claims volume. However, in the short term we expect these savings to be more than offset by increased costs associated with the implementation of these regulations. These costs include the costs of modifying carrier claims processing systems and of processing erroneously submitted claims, and higher average claims processing costs. To the extent that these regulations do not result in the elimination or decreased use of combined billing, additional claims processing volume reductions would be realized and claims processing cost savings would be increased.

Because we cannot accurately quantify all of these factors, we cannot estimate the savings in administrative costs. (We provided estimates of administrative savings in the initial regulatory impact analysis, but because they did not include all of these factors, they did not actually reflect the impact of these final regulations.)

Our analysis projects that the benefits of these regulations will exceed their costs. Further, with the exception of pathologists, our analysis indicates that the projected effect of these regulations on physicians and institutional providers is not significant, considering the size of revenue reductions relative to their total revenues.

II. Purpose of Analysis

A. Executive Order 12291

Executive order 12291 requires that a regulatory impact analysis be performed on any major rule. A "major rule" is defined as one which would:

- Result in annual effect on the national economy of $100 million or more;
- Result in a major increase in costs or prices for consumers, any industries, any governmental agencies, or any geographic regions; or
- Have significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or import markets.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act requires that a regulatory flexibility analysis be prepared unless the regulation would not have a significant impact on a substantial number of small entities. For purposes of the Regulatory Flexibility Act, small entities are:

- Small businesses, defined as small business concerns under the Small Business Act;
- Small organizations, defined as not-for-profit enterprises which are independently owned and operated and not dominant in their field; or,
- Small governmental jurisdictions, defined as jurisdictions of less than fifty thousand population.

C. Discussion

These regulations will affect program expenditures for certain physicians' services. We estimate expenditures for those services furnished will be nearly $1.3 billion and nearly $1.5 billion in fiscal year 1983 in fiscal year 1984, excluding the effect of these regulations. Our projections show that implementation of these provisions will reduce expenditures by $119 million in fiscal year 1984 and could produce annual program savings of $135 million by fiscal year 1988. We believe these regulations will have effects in fiscal year 1984 that will meet the criteria for determining that a regulatory impact analysis is required. Further, the significant impact these regulations are expected to have on pathologists indicate that a regulatory flexibility analysis is also required. Therefore, to meet the requirement of E.O. 12291 and the Regulatory Flexibility Act, we prepared this analysis.

III. Nature of Problem

Studies have shown that some physicians who provide services to hospitals or hospital patients receive very high compensation relative to the value of the services provided or the income received by other physicians.

For example, a September 24, 1980 report by the Office of the Inspector General (Audit Control No. 06-02001) states that:

- Average fiscal year 1978 compensation per full-time equivalent radiologist in one Louisiana hospital reached $306,802.
- Average cost of compensation to pathologists in audited hospitals per patient day in fiscal year 1978 ranged from $2.72 to $13.15.
- At some hospitals, over a two-year period, compensation to pathologists increased by 102 percent.

compensation to radiologists 74 percent and compensation to anesthesiologists by 111 percent.

The report concluded that: "There were extreme variations in the amounts of compensation paid hospital-based specialists at hospitals of similar size, type, and location. While some of these variations may be explained by differences in the scope of services rendered and the intensity of care, our analysis showed that most of the variations are the result of the widely differing compensation agreements."

In a HCFA working paper, "A Methodology for Determination of Reasonable FTE Compensation for Hospital-Based Physicians" (#OR–32; revised December 1982) Cantwell and Sobaski projected annual compensation in calendar 1983 for physicians in metropolitan areas over 1,000,000 population, based on American Medical Association data. (See Table I in the preamble of these regulations.) The mean projected compensation for all physicians was $97,100. However, anesthesiologists' mean compensation was $169,700; pathologists' mean compensation was $118,200; and radiologists' mean compensation was $123,400. The only other specialties with mean compensation higher than the mean for all physicians were surgery at $113,900 and ob-gyn at $107,600.

We believe that there are several factors which account for the relatively high compensation of physicians who provide services to hospitals and hospital patients:

(1) There are barriers to competition. Hospitals that compensate physicians have had insufficient incentive to constrain the costs of this compensation, since retrospective cost reimbursement covers the portions of those costs attributable to services furnished to Medicare beneficiaries. Further, patients frequently are not aware of the degree of personal involvement in the provision of services for which they have been charged.

(2) Some of these physicians charge amounts for their services that, while apparently competitive with the charges of other physicians for similar services furnished in offices, are unreasonable considering the lower costs experienced by physicians practicing in hospitals. Physicians whose practices are based in hospitals either may bill for their services on a fee-for-service basis, or may seek compensation through the hospital under salary and percentage compensation arrangements. Regardless of the method of billing or compensation, hospitals often pay much of the overhead and equipment costs associated with the services of physicians providing services in hospitals. Many of these physicians charge fees lower than those of physicians providing services in offices, whose revenue from charges must cover overhead and equipment costs. However, not all of the savings associated with lower overhead are passed along to the consumer. Thus, fee-for-service billing by physicians who do not fully reflect their reduced overhead costs in their charges increases the amounts consumers (including the Medicare program and Medicare beneficiaries, to the extent they are responsible for coinsurance amounts and reasonable charge reductions) must pay for the services of these physicians.

(3) Physicians providing services in hospitals provide services to hospitals as well as to patients, such as administrative and quality control activities. Other examples of such services would include pathologists who supervise the performance of routine laboratory tests and anesthesiologists who supervise the administration of anesthesia by certified registered nurse anesthetists. This contributes to two problems. First, under Medicare, physicians' services to individual patients must be paid for on the basis of reasonable charges, while physicians' services to hospitals must be paid for on a reasonable cost basis. Therefore, even when a hospital and physician view the physician's compensation as a whole, for purposes of Medicare reimbursement, we need to have an adequate mechanism for allocating this compensation to different types of services. Second, our experience shows that there have been many instances in which services furnished by hospital personnel have been billed for as physicians' services, as if a supervising physician had furnished the services personally. As a result, we sometimes pay for these services twice: Once to the hospital for the costs of the technical personnel and other inputs involved in producing the services, and a second time to the supervising physician.

(4) Because physicians compensated by hospitals may use three different billing methods, it is administratively difficult to determine their prevailing charges, and to determine whether charges are reasonable.

IV. Regulations

These regulations deal with the problem of compensation to physicians providing services in hospitals by making some fundamental changes in reimbursement for their services. (These regulations also apply to services provided by physicians in skilled nursing facilities and comprehensive rehabilitation outpatient facilities. Although this ensures consistency in reimbursement principles for all types of institutional providers, we are not aware at this time of problems in physician compensation practices in skilled nursing facilities or comprehensive outpatient rehabilitation facilities. Further, our data primarily reflects physician services furnished in hospitals. Therefore, we are limiting our analysis to physicians providing services in hospitals.)

These regulations will:

- Establish prospective reasonable compensation equivalent (PCE) limits, adjusted by specialty and location, on the amount of physician compensation we consider reasonable in determining Medicare payments for physician services to providers. (We will allow exceptions to the compensation limits for providers unable to recruit physicians at a cost below the established limit levels.)
- Establish specific conditions for services performed by physicians to be considered services to individual patients (as opposed to services to hospitals), which may be paid on a charge basis, as well as rules for determining the amounts of reasonable charge payments for certain specialized medical services, as follows:

—Radiology services—apply a special test of reasonableness to physicians' charges to account for the differences between services furnished in offices, where the physician incurs overhead costs, and services furnished in a provider, where the provider bears much of those costs.

—Anesthesiology services—allow reasonable charge payment for a physician's services only when the physician directs no more than four concurrent anesthesia procedures; adjust reasonable charges when services are furnished by a nurse anesthetist employed by the provider.

—Pathology services—specify those pathology services that are considered to meet the conditions for reasonable charge payment as "physicians' services", excluding clinical laboratory services that do not require performance by a physician in person.

—Other services—provide that when physician services are furnished through a leased department, only "physicians' services" may be paid for on a reasonable charge basis, and that the costs of the nonphysician inputs must be paid through the provider on a reasonable cost basis.

- Eliminate a billing form (HCFA–1554), used by providers to bill for

physicians' services, and propose to eliminate combined billing, which has permitted providers to include charges for certain physicians' services to individual patients on billing forms HCFA–1453 and HCFA–1483. These billing methods do not permit our carriers and intermediaries to make the comparisons necessary to determine reasonable charges. (Although combined billing has not yet been eliminated, since this is only proposed in the preamble to these regulations, our cost estimates are based on the assumption that we will proceed to eliminate combined billing effective with the implementation of the other provisions of these regulations.)

V. Benefits and Costs of Provisions Affecting Pathology Services

A. Introduction

Some pathologists are now paid a salary or other aggregate compensation by hospitals. This salary or aggregate compensation may include payment for services to individual patients and for services benefiting the hospital. With the physician's authorization, the hospital may use combined billing. Under this billing method, the hospital bills the intermediary a single charge for departmental services which does not differentiate the physician's services to patients from hospital services. Alternatively, the hospital may submit bills for physician services to patients to the carrier and bills for hospital services to the intermediary. Pathologists not paid a salary or other aggregate compensation for their services to individual patients may bill the carrier or the beneficiary directly for those services. Some pathologists have been billing a physician's fee (usually a small amount) for each service, whether or not it actually requires personal performance by a physician. Their customary practice has been to charge these relatively small amounts for all services, instead of charging larger amounts only in those instances in which they are actually involved in the service. These regulations make it clear that this practice violates our rules.

These regulations will result in most clinical laboratory services being reimbursed as hospital services from the Part A trust fund. This will reduce the reimbursement to pathologists from Medicare and from Medicare beneficiaries on the basis of charges, and increase reimbursement to providers on a cost basis, subject to the application of the RCE limits.

B. Benefits and Costs

1. *Benefits.*

a. The regulations will limit Federal reimbursment to hospitals for the costs of compensating pathologists for services to the hospital. The Federal savings related to the provision of services to hospitals by pathologists will be the difference, if any, between the compensation the pathologists have been receiving for those services and the appropriate RCE limits as set by these regulations, times the proportion of Medicare patients in the hospital, less the increase in expenditures resulting from decreased beneficiary coinsurance.

b. Federal savings described in the preceding paragraph will be reduced to the extent that pathologists direct hospital business to independent laboratories, thereby decreasing the services performed in hospitals which will be subject to these provisions.

c. These regulations, by requiring reimbursement to hospitals on a cost basis for many pathologists' services, instead of by separate claims submitted to Medicare, will reduce Federal costs to process these claims.

d. Effective October 1, 1982, Medicare payment for physicians' services to hospital inpatients furnished by physicians in the field of pathology, which are covered under Part B, was reduced from 100 percent to 80 percent of the reasonable charge. Part A reimbursement for these services remains 100 percent of reasonable costs for hospital inpatients and 80 percent of reasonable costs for hospital outpatients. For services formerly reimbursed as services to patients which these regulations define as services to hospitals, Medicare beneficiaries will benefit by avoiding paying the 20 percent coinsurance and, for claims which would have been unassigned, the difference between actual charge and the amount Medicare would have considered a reasonable charge.

2. *Costs.*

a. We believe these regulations may result in the reduction of the compensation that some pathologists would otherwise be paid by hospitals. However, to the extent that a hospital chooses to compensate pathologists more than the applicable RCE limits set by these regulations, revenues of the hospital will be reduced instead. The total revenue reduction for pathologists and hospitals combined will be an amount similar to the Federal savings described in paragraph 1.a. above.

b. We estimate that carriers will have implementation costs for modifying systems to identify erroneously submitted claims for services to hospitals, for processing erroneously submitted HCFA–1500s and HCFA–1554s, for processing claims erroneously submitted by beneficiaries, and for developing screens to enable them to determine the reasonableness of claims for those clinical laboratory and consultation services reimbursable on a charge basis. Also, carriers will have ongoing costs for maintaining these new screens.

c. Because we consider that many payments being made to physicians for clinical laboratory tests would be inappropriate under these regulations, we estimate these regulations will increase Federal costs by an amount significantly less than the reduction in beneficiary copayment described in paragraph 1.d., above.

C. Discussion

Of all hospital-based physicians, pathologists are now most likely to be paid a salary or other aggregate compensation. Further, our regulations classify the majority of pathology services as services to hospitals, rather than services to patients. Therefore payments for most pathology services will be subject to the RCE limits set under these regulations.

We project that these regulations will have the following effects on program expenditures for pathology services furnished in providers:

PATHOLOGY SERVICES PROJECTED CHANGE IN EXPENDITURES

[In millions]

Fiscal year	Part A	Part B	NHI savings
1983	$1	$−21	$−20
1984	3	−77	−74
1985	0	−59	−59
1986	−4	−39	−43
1987	−3	−40	−43
1988	−2	−47	−49

These program savings will result in a corresponding, but somewhat greater, reduction in physician revenues from pathology services. The reduction will be somewhat greater because the figures in this table include increased Federal expenditures for amounts that formerly would have been reimbursed through the coinsurance paid by Medicare beneficiaries. According to American Medical Association (AMA) data, there are approximately 11,000 hospital-based pathologists. We project that the average fiscal year 1984 net income for pathologists will be $125,000. Based on projected program savings, we estimate that these regulations will reduce the average pathologist's income by 5.4 percent. We expect that very high-earning pathologists may be most strongly affected, and that many

physicians of average or lower income will experience no revenue reductions.

VI. Benefits and Costs of Provisions Affecting Radiology Services

A. Introduction

Some radiologists are now paid a salary or other aggregate compensation by hospitals. This salary or aggregate compensation may include payment for services to patients and for services benefiting the hospital. With the physician's authorization, the hospital may use combined billing. Under this billing method, the hospital bills the intermediary a single charge which does not differentiate physician services to patients from hospital services.

Alternatively, the hospital may submit bills for physician services to individual patients to the carrier and bills for hospital services to the intermediary. Radiologists not paid a salary or other aggregate compensation for their services to patients bill the carrier directly for these services.

B. Benefits and Costs

1. *Benefits.*

a. These regulations will reduce Federal reimbursement on a charge basis for radiology services furnished to individual patients in a provider setting. For radiologists using fee-for-service billing, the Federal savings with respect to any radiologist's service will be the difference, if any, between the amount of the radiologist's charge now considered reasonable under Medicare and 40 percent of the prevailing charge for the same procedure in an office setting.

b. These regulations will also limit Federal reimbursement to hospitals for the costs of compensating radiologists for services to the hospital. The Federal savings related to the provision of services to hospitals by radiologists will be the difference, if any, between the compensation the radiologists have been receiving for these services and the appropriate RCE limits set by these regulations, multiplied by the proportion of Medicare patients in the hospital.

c. Effective October 1, 1982, Medicare payment for physicians' services to hospital inpatients furnished by physicians in the field of radiology, which are covered under Part B, was reduced from 100 percent to 80 percent of the reasonable charge. (Part A reimbursement for these services remains 100 percent of reasonable costs.) For any services formerly reimbursed as services to patients which these regulations will define as services to hospitals, Medicare beneficiaries will benefit by avoiding paying the 20 percent co-insurance and, for claims which would have been unassigned, the difference between the actual charge and the amount Medicare would have considered a reasonable charge.

2. *Costs.*

a. These regulations will reduce revenues of radiologists by an amount identical to the Federal savings described in paragraph 1.a. above.

b. We believe that the regulations will reduce the compensation that some radiologists would otherwise be paid by hospitals. However, to the extent that a hospital chooses to compensate radiologists at levels higher than the applicable RCE limits set by these regulations, revenues of the hospital will be reduced instead. The total reduction of revenues of hospitals and radiologists will be an amount similar to the Federal savings described in paragraph 1.b. above.

c. We estimate that carriers will have implementation costs for developing screens to enable them to limit reimbursement to 40 percent of the prevailing charge for the same procedure in an office setting. Also, carriers will have ongoing costs for maintaining these screens.

C. Discussion

Radiologists generally use fee-for-service billing rather than be paid a salary or other aggregate compensation. However, we expect the RCE limits to affect the portion of salary or other aggregate compensation related to services to providers for the minority of radiologists who are compensated on this basis. We expect significant increases in the amounts paid for services radiologists furnished to providers. Currently, few radiologists are paid by providers for their administrative and quality control activities. Rather, they receive their income primarily from charges for services furnished to individual patients. We expect that the reductions in physician revenue resulting from the 40 percent test of reasonableness will cause these radiologists to seek to enter compensation agreements with providers, under which they would be paid for the services they furnish the providers. Payment to the providers for the costs of this compensation would be subject to the RCE limits.

We project that these regulations will have the following effects on program expenditures for radiology services furnished in providers:

RADIOLOGY SERVICES—PROJECTED CHANGE IN EXPENDITURES

(In millions)

Fiscal year	Part A	Part B	Net savings
1983	30	$-11	$-5
1984	35	-44	-11
1985	42	-55	-13
1986	47	-62	-15
1987	54	-70	-16
1988	61	-80	-19

These program savings may be reflected in a corresponding reduction in physician revenues from radiology services. However, we believe that most physicians will not be significantly affected. According to AMA data, there are approximately 19,850 hospital-based radiologists. We project that the average fiscal year 1984 net income for radiologists will be $131,000. Based on projected program savings, we estimate that these regulations will reduce the average radiologist's income by only 0.8 percent. We expect that the small proportion of very high-earning radiologists will be most strongly affected, and that many physicians of average or lower income will experience no revenue reductions.

VII. Benefits and Costs of Provisions Affecting Anesthesiology Services

A. Introduction

Some anesthesiologists are now paid a salary or other aggregate compensation by hospitals. Other anesthesiologists bill patients on a fee-for-service basis.

The regulations will result in some anesthesiology services that are now reimbursed on a Part B reasonable charge basis being reimbursed as hospital services from the Part A trust fund. This will reduce the reimbursement to anesthesiologists from Medicare and Medicare beneficiaries on a charge basis, and increase reimbursement to providers on a cost basis, subject to the application of the RCE limits.

B. Benefits and Costs

1. *Benefits.*

a. These regulations will limit Federal reimbursement for anesthesiology services. The Federal savings related to the provision of services to hospitals by anesthesiologists will be the difference, if any, between the total amount paid on a fee-for-service basis and the aggregate RCE limits set by this regulation, multiplied by the proportion of Medicare patients in the hospital, less the increase in expenditures resulting from decreased beneficiary co-insurance.

b. For any procedure billed on a fee-for-service basis in which the anesthesiologist directed a nurse anesthetist employed by a hospital, the Federal savings, if any, will be the difference between the anesthesiologist's fee and the fee which would have been charged if each time unit used to construct the charge represented each half-hour, or fraction thereof, of duration of the procedure. (Each time unit would generally represent 15 minutes without this regulation.)

c. For services formerly reimbursed as services to patients which these regulations will define as services to hospitals, Medicare beneficiaries will benefit by avoiding paying the 20 percent co-insurance and, for claims which would have been unassigned, the difference between actual charge and the amount Medicare would have considered reasonable.

d. To the extent that anesthesiologists do not continue to supervise more than four procedures concurrently, patient anesthesia risk will be reduced due to the more intensive professional supervision of the procedure.

2. *Costs.*

a. By requiring certain services to be reimbursed as services to the provider, and, in addition, subjecting such costs to the provider to the RCE limits, we believe these regulations will reduce the revenues that some anesthesiologists would otherwise receive for services to Medicare beneficiaries. However, to the extent that a hospital chooses to compensate anesthesiologists more than the applicable RCE limits set by these regulations, revenues of the hospital will be reduced instead. The total reduction of revenues of hospitals and anesthesiologists will be an amount similar to the Federal savings described above in paragraph 1.a.

b. The regulations will also reduce revenues of anesthesiologists by an amount equal to the Federal savings described in paragraph 1.b. above.

c. These regulations will increase Federal costs by an amount similar to the reduction in beneficiary copayment described in paragraph 1.c. above.

d. We estimate that carriers will have implementation costs for modifying their systems to accommodate additional data on the employment of nurse anesthetists and for developing screens for determining the reasonableness of charges based on employment of nurse anesthetists. Also, carriers will have ongoing costs for maintaining these screens.

e. We are requiring additional reporting on our billing forms relating to the number of concurrent procedures and the employment status of nonphysician anesthetists. This will increase the burden and costs of billing for physicians and for providers that act as their billing agents.

C. Public Comments on Benefits and Costs of Anesthesiology Provisions

Comment: Some commenters suggested that there is insufficient evidence that more intensive supervision by anesthesiologists reduces risk.

Response: We agree that the point at which less intensive supervision results in unacceptable increased risk has not been conclusively demonstrated. However, the provision limiting the number of concurrent services reimbursable on a reasonable charge basis is being adopted primarily for reimbursement, not quality of care, purposes. We are not prohibiting anesthesiologists from continuing to supervise more than a certain number of concurrent procedures.

Nurse anesthetists are not currently accepted as independent practitioners (with concomitant billing privileges) and it is commonly accepted, admittedly not without dissent, that supervision of an anesthetist by a qualified anesthesiologist affords some reduction of risk, as compared to an absence of such supervision. In our view, there is no time during an entire procedure in which risk-creating complications cannot develop. Therefore, despite the best efforts of the anesthesiologist, for any procedure for which he or she is not continuously present, there is a chance that he or she will be absent during a time his or her presence could reduce risk. Although an anesthesiologist supervising a number of concurrent procedures would clearly attempt to be present during the riskiest part of each procedure, the greater the number of procedures being supervised concurrently, the greater the chance of an unanticipated complication occurring. We conclude that more intensive physician involvement generally reduces risk, although the significance of the reduction cannot be quantified.

Comment: One commenter stated that anesthesiologists were likely to attempt to offer solely services defined as physician services to individual patients under these regulations, i.e., that anesthesiologists would generally cease to supervise more than the specified number of nurse anesthetists concurrently. In our initial regulatory impact analysis, we stated that, to the extent anesthesiologists did not continue to supervise more than two procedures concurrently, their reduced productivity might result in delays in providing medical services requiring anesthesia. The commenter identified several additional possible short-term effects. On the one hand, the commenter suggested that anesthesiologists might provide less intensive supervision of some patients (especially non-Medicare patients) in order to assure that they comply with the definition of patient services by providing more intensive supervision of other procedures. On the other hand, the commenter also suggested that if scheduling difficulties were too great, anesthesiologists could decide to provide services only to non-Medicare patients, leaving unsupervised nurse anesthetists to care for Medicare beneficiaries. The commenter suggested that in the long term behavioral changes resulting from these regulations would, by substituting more intensive supervision for less intensive supervision, increase the demand for anesthesiologists and, as a result, increase the cost of their services. The commenter concluded that, rather than implement our definition of patient services, we should revise billing procedures to limit reimbursement based on the intensity of supervision.

Response: We do not believe that anesthesiologists will change their behavior significantly in response to these regulations. In general, a producer will be indifferent between two purchasers of a product at identical prices. Therefore, at identical prices, anesthesiologists should be indifferent to receiving reimbursement from a patient or from a hospital. (Actually, these regulations distinguish services to patients from services to hospitals. However, since an anesthesiologist may choose to provide either type of service, the anesthesiologist should remain indifferent.)

We believe the apparent preference of some anesthesiologists for providing services to patients is because hospitals are in general more prudent purchasers of these services than patients. Clearly, only hospitals can be aware of the actual average intensity of supervision provided by anesthesiologists. By establishing a limit on the number of concurrent procedures an anesthesiologist may perform and still bill patients, we also limit the additional income anesthesiologists can realize by not reflecting the intensity of supervision in their charges to patients. Under these circumstances, we expect anesthesiologists to accept reimbursement from hospitals, since the incentive to seek reimbursement from patients will no longer exist. With their acceptance of hospital reimbursement,

demand for anesthesiologists will not increase.

D. Discussion

Compared to radiologists and pathologists, anesthesiologists are more likely to use fee-for-service billing. We believe the Federal savings generated by this regulation will stem primarily from reducing reimbursement if a nurse anesthetist not employed by the anesthesiologist is used.

We project that these regulations will have the following effects on program expenditures for anesthesiology services furnished in providers:

ANESTHESIOLOGY SERVICES PROJECTED CHANGE IN EXPENDITURES

(In millions)

Fiscal year	Part A	Part B	Net savings
1983	$5	$−13	$−8
1984	22	−56	−34
1985	25	−70	−44
1986	31	−91	−60
1987	36	−93	−57
1988	41	−108	−67

These program savings will result in a corresponding, but somewhat greater, reduction in physician revenues from anesthesiology services. The reduction will be somewhat greater because the figures in this table include increased Federal expenditures for amounts that formerly would have been reimbursed through the coinsurance paid by Medicare beneficiaries. However, we believe that most physicians will not be significantly affected. According to AMA data, there are approximately 14,400 hospital-based anesthesiologists. We project that the average fiscal year 1984 net income for anesthesiologists will be $110,500. Based on projected program savings, we estimate that these regulations will reduce the average anesthesiologist income by 2.1 percent. We expect that the small proportion of very high-earning anesthesiologists will be most strongly affected, and that many physicians of average or lower income will experience no revenue reductions.

VIII. Benefits and Costs of Provisions Affecting Other Specialties

A. Introduction

Some physicians other than those in the specialties of pathology, radiology, and anesthesiology provide services to hospitals. Reimbursement for these services will also be affected by the RCE limits.

B. Benefits and Costs

1. *Benefits.* The regulations will limit Federal reimbursement to hospitals for the costs of compensating these physicians for services to the hospital. The Federal savings in any hospital will be the difference, if any, between the compensation these physicians have been receiving for those services and the appropriate RCE limits set by these regulations, multiplied by the proportion of Medicare patients in the hospital.

2. *Costs.* The regulations will reduce revenues of hospitals by an amount equal to the Federal savings described in the preceding paragraph, and may, as a result, reduce the compensation these hospitals choose to pay to physicians.

C. Discussion

HCFA does not have data on the amounts hospitals pay to physicians other than those in the specialties of pathology, radiology, and anesthesiology for services to hospitals. (The physician income data on which the RCE limits are based do not identify the sources of the income, and therefore cannot be used to estimate hospitals' payments to physicians.) Therefore, we cannot quantitatively estimate the costs and benefits of these provisions of the regulations. However, we do not believe the effect of these provisions will be significant.

IX. Benefits and Costs of Provisions Affecting Billing Procedures

A. Introduction

These regulations eliminate use of the HCFA–1554 billing form, and propose to eliminate combined billing using the HCFA–1453 and HCFA–1483. The HCFA–1554 was used by hospitals to submit claims to carriers for services provided to patients by physicians compensated for these services by the hospital. The HCFA–1554 did not require itemized billing. Combined billing has been used by providers to include charges for certain physician services, especially radiology and pathology services, on the provider's bill. Charges billed by this method have not been subjected to customary and prevailing charge screens.

B. Benefits

1. We believe elimination of the HCFA–1554 will assist us in assuring that hospitals do not receive reimbursement for the services of compensated physicians in excess of the compensation. Because we do not have data on the extent to which this now occurs, we can not quantify the benefits of this provision. However, we believe that this practice would become more prevalent as a response to other provisions of these regulations.

2. We believe that elimination of combined billing will enable us to test the reasonableness of all charges for physicians' services furnished to Medicare beneficiaries. This will avoid creating incentives for physicians to shift to combined billing to escape the effects of carrier charge reductions using customary and prevailing charge screens.

C. Costs

1. We expect that hospitals will, to the extent they have been receiving reimbursement for services of compensated physicians that exceeds the compensation, experience a loss of revenue. As noted in item IX.B.1., we are not able to quantify this revenue loss.

2. We estimate that carriers and intermediaries will have implementation costs for obtaining necessary data and that carriers will have implementation costs for developing compensation-related charge screens.

3. We estimate that carriers will have additional ongoing costs for maintaining and using these screens, increased costs due to the higher average cost to process the HCFA–1500 compared to the HCFA–1554, and increased costs for processing claims formerly included in combined billing.

These ongoing costs would vary depending on whether or not we eliminate combined billing. If we do not eliminate combined billing, we expect that these costs would be significantly higher, since maintaining parallel optional billing methods entails the additional costs of changes between billing methods, and the additional recordkeeping necessary to ensure that such changes do not result in unreasonable levels of payment.

4. The HCFA–1500 requires more detailed information than either the HCFA–1554 or the forms used for combined billing. The increase in the number of separate claims filed on the HCFA–1500 will result in added reporting burden and cost for physicians, and for providers that act as their billing agents.

X. Net Benefits

A. Quantifiable Net Benefits

As discussed above, the initial effect of these regulations will result in a variety of reductions in Medicare spending, which to some extent will be offset by corresponding reductions in hospital and physician revenues. In the near term, therefore, these changes will have no net effect on the economy as a whole.

B. Non-Quantifiable Net Benefits

Although most of the quantifiable benefits of these regulations will be offset by equivalent costs, several other net benefits can be identified.

1. These regulations will better assure that Medicare reimbursement is limited to the reasonable costs of hospitals and reasonable charges of physicians as required by the Medicare statute.

2. These regulations will provide disincentives for continued high inflation in the cost of services of hospital-based physicians. Hospitals will not be reimbursed for unreasonable costs of services provided to them by these physicians. This will increase their motivation to negotiate reasonable compensation arrangements. Further, the regulation will result in a clearer definition in the nature of services to individual patients for which hospital-based physicians may charge. This will facilitate comparison by consumers and increase the degree to which hospital-based physicians are subject to marketplace forces.

3. In the long term, these regulations will reduce, but not significantly, Medicare claims processing costs.

4. The regulations, by defining more clearly what are services to hospitals and what are services to patients, will provide for the continued integrity of the Part A and Part B trust funds.

5. A reduction in Medicare expenditures will also improve the integrity of the trust funds.

6. A reduction in Federal expenditures in the near term will reduce the Federal deficit, with associated benefits to the economy.

XI. Effect on Small Entities

A. Magnitude of Medicare Reimbursement Reductions

Although these regulations will affect many hospitals and physicians, the net effect on particular entities will usually be quite small. The expected fiscal year 1984 net program savings of $119 million must be considered in comparison to the total reimbursement to pathologists, radiologists, and anesthesiologists, which is nearly $1.3 billion per year. Similarly, the shift of payment from a charge to a cost basis, which is expected to increase Part A expenditures by $60 million in fiscal year 1984, must be seen in relation to total Part A payments, which will exceed $20 billion that year. Thus, though the absolute value of the projected savings may seem large, they are not substantial when viewed as a proportion of the total costs of these programs.

B. Effect on Physicians

For purposes of the Regulatory Flexibility Act, we consider all self-employed physicians to be small entities. (Physicians providing services to hospitals commonly consider themselves independent contractors, not employees.) We believe that these regulations will have a significant effect on only a small number of self-employed physicians. Pathologists will be most strongly affected.

First, available data show that mean compensation for hospital-based physicians is considerably higher than median compensation. Because a small number of physicians have dramatically high incomes, skewing the average, the majority of these physicians earn less than the average. We expect that these regulations will primarily affect the small group of high-earning physicians. For physicians now providing services on a charge basis which these regulations define as services to hospitals, the effect of these regulations will depend on the compensation they negotiate with the hospitals to which they provide these services.

Second, as discussed above, we have made estimates of fiscal year 1984 income of pathologists, radiologists, and anesthesiologists, and projected the amount by which our expected program savings will reduce the average revenue of certain specialist physicians. (Note again that average income is significantly above median income for these physician groups, so that the majority of physicians will be affected by even lesser amounts.) These estimates and projected effects are as follows:

Specialty	Net income	Estimated program savings as percent of income
Pathology	$125,000	5.4
Radiology	$131,000	0.8
Anesthesiology	$119,000	2.1

C. Effect on Hospitals

For purposes of the Regulatory Flexibility Act, we consider all non-profit hospitals and most for-profit hospitals to be small entities. We estimate that these regulations will have a significant impact on only a small number of these hospitals.

As explained in the preceding section, most physicians earn less than the limits set by this regulation. Further, these regulations will limit reimbursement to a hospital for the costs of services provided by physicians to it only if the mean salary or aggregate compensation to physicians in a department in the hospital exceeded the limits. Finally, there is an exception to the limits for hospitals which can show they were unable to obtain the services of needed physicians at compensation levels less than the limits.

D. Public Comments on Effect of Regulations on Employment of Nurse Anesthetists

Comment: Some commenters objected to our failure to consider the effects of these regulations on the employment of nurse anesthetists.

Response: Since nurse anesthetists are employees, not independent health professionals, we do not consider them to be small entities for purposes of the analysis requirements of the Regulatory Flexibility Act. However, as explained earlier, we do not expect these regulations to result in significant changes in the behavior of anesthesiologists. It follows from this that there will not be significant changes in the employment of nurse anesthetists.

XII. Alternative Options Considered

A. Anesthesiology

1. We considered requiring that a physician personally perform all anesthesiology services to be covered as physician's services, instead of allowing physicians to bill for medical direction of up to four CRNAs as physicians' services. We rejected this option because it could be detrimental to those hospitals in which the majority of anesthesia services are furnished by CRNAs. If it were chosen, many anesthesiologists might be less inclined to function as supervisors of CRNAs, and could choose to provide only Part B covered services, thereby providing less supervision and direction to patients who continue to receive anesthesia services from CRNAs.

2. In deciding to cover medical direction as a physician's service when an anesthesiologist provides concurrent medical direction to more than four CRNAs, we considered reimbursing each service at a lesser level. This option is similar to the one recommended in the NPRM, except for the number of CRNAs to be directed and the reduction in reimbursement. We rejected this option because it would be administratively complex to implement and monitor.

3. We also gave consideration to covering concurrent medical direction of up to two CRNAs as a physician's Part B

service while allowing cost reimbursement for supervising additional CRNAs at the same time. We rejected this option because it would be difficult to monitor and prevent fraud and abuse if the physician is receiving payments from Part A and Part B for simultaneously supervising and directing the services of CRNAs.

B. Radiology

1. We considered reimbursing radiologists under Part B only for services to patients, not allowing payment for supervisory or administrative services. We rejected this option because it would not recognize legitimate hospital costs when the physician furnishes services to the hospital for which he or she is compensated.

2. We considered allowing the current array of lease agreements. Most lease agreements, however, currently allow the radiologist to bill for both services to patients and services to the hospital. We rejected this option because we would still be unable to determine if the component of the charge relating to patients services was reasonable. Further, we would be unable to determine whether our payment for the resource inputs exceeds actual costs.

C. Pathology

1. An option we reviewed was to cover physicians' services under Part B, but to not allow additional reimbursement for supervisory and administrative services on a reasonable cost basis. We rejected this option because it is not consistent with the current practice of medicine and would result in a decrease in quality of care.

2. We considered proposing that laboratory services obtained for hospital inpatients from an outside laboratory always be provided "under arrangements" under section 1861(w)(1) of the Social Security Act. HCFA would pay the hospital the latter's reasonable cost for the laboratory services obtained "under arrangements", which would be the lesser of the amount billed to the hospital by the supplier, the amount paid by the hospital, or 100 percent of the prevailing charge for similar services reimbursed on a charge basis. The beneficiary is not subject to the 20 percent Part B coinsurance for services furnished "under arrangements". We rejected this option because we do not believe that we have sufficiently clear statutory authority to impose such a requirement. Therefore, we decided to review this proposal separately, and possibly to seek statutory changes in support of it, instead of including it in these regulations.

Appendix II—Geographic Area Classifications for RCE Limits

As discussed in the preamble, we are adjusting the reasonable compensation equivalent (RCE) limits to account for differences in salary levels by location, as well as by specialty. In our methodology for establishing limits, and in the limits as set forth in Table I, we have classified geographic areas into three types: non-metropolitan, metropolitan areas with less than one million population, and metropolitan areas with greater than one million population. The following table identifies by type of location the geographic areas affected, enabling providers, physicians, Medicare fiscal intermediaries and carriers, and other members of the public to determine which RCE limit level will apply in specific areas. Table IV lists all Standard Metropolitan Statistical Areas (SMSAs) and potential SMSAs[1] and their constituent counties, and identifies whether their population is less than or greater than one million. Potential SMSAs are designated by asterisks in Table IV. All counties not lised in Table IV, and all other affected U.S. possessions and territories not part of a State, are considered non-metropolitan areas.

Comments: A number of commenters noted that the table of SMSAs published with the NPRM differed substantially from the table published with the most recent hospital cost limits (47 FR 43298; September 30, 1982). Others identified omissions and the need for corrections.

Response: We have corrected this table using the best and most recent data available. It now includes all SMSAs used for the hospital cost limit schedules, as well as potential SMSAs as incorporated in the AMA/PSP data base. However, various sources for population size differ, and population estimates change over time. Any provider that believes it is disadvantaged by this table of geographic area classifications may submit more recent data to its intermediary. The intermediary may, on the basis of this data, use a revised area classification, provided only that it uses the same classification for all providers in an area.

[1] A potential SMSA is one that does not meet all the requirements of the Office of Statistical Policy and Standards of the U.S. Department of Commerce, but which is considered a prime candidate to achieve SMSA status in the near future. The SMSA compositions and potential SMSA designations are based on those used by the American Medical Association (AMA) in its Periodic Survey of Physicians.

Part III

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Surface Mining and Reclamation Operations Under A Federal Program for the State of North Carolina

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 933

Surface Mining and Reclamation Operations Under a Federal Program for the State of North Carolina

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) of the Department of the Interior proposes a Federal program for regulation of coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands in North Carolina. This includes surface effects of underground coal mining. This proposed program is necessary in order to regulate surface coal mining activities in the absence of a State program.

DATES: Written comments must be received not later than 5:00 p.m. on May 2, 1983 at the address below. A public hearing will be held on April 4, 1983. Requests to testify at the hearing should be received by March 30, 1983. If commenters request a hearing date later than that set, the hearing may be rescheduled; any new date will be announced by a notice in the Federal Register.

ADDRESSES: Written comments must be mailed or hand-delivered to: Administrative Record R&I—29, Tennessee Field Office, Office of Surface Mining, 530 Gay Street, SW, Knoxville, Tennessee 37902.

The public hearing on the proposed program will be held at the Holiday Inn, Highway 421, Sanford, North Carolina, beginning at 8:00 p.m.

FOR FURTHER INFORMATION CONTACT: James M. Kress, Office of Surface Mining, Branch of Regulatory Programs, Room 222, 1951 Constitution Avenue, NW., Washington, D.C. 20240. Telephone: (202) 343–5866. James A. Curry, Tennessee Field Office, Office of Surface Mining, Knoxville, Tennessee, (615) 673–4504.

SUPPLEMENTARY INFORMATION:

Availability of Copies

Copies of the proposed program are available for inspection and may be obtained at the OSM office listed above in "ADDRESSES."

Public Comment Period

The comment period on the proposed program will extend until May 2, 1983. All written comments must be received at the location above under "ADDRESSES" by close of business on that date.

All written comments received, a transcript of the public hearing, summaries of meetings held at the request of any person or organization to receive advice or recommendations concerning the proposed program with representatives of OSM, and other documents comprising the administrative record on the Federal program for North Carolina will be made available for public review during regular business hours at the location listed above.

OSM appreciates any and all comments on the proposal, but those that would be most useful should be as specific as possible, focus on the issues of this proposed rulemaking, and provide reasons for any recommendations. OSM will not consider comments that do not pertain to the issues in this proposal. Nor can OSM ensure consideration of written comments received after the comment period ends or those delivered to an address other than that specified.

Public Hearing

A public hearing on the proposed program will be held at the time and location listed above to hear all those who wish to testify. The hearing may be cancelled if, by March 30, 1983, no person has expressed interest in presenting testimony.

Individual testimony at the hearing will be limited to 15 minutes. The hearing will be transcribed. Filing of a written statement at the time of giving oral testimony would be helpful and would facilitate the job of the court reporter. Submission of written statements in advance of the hearing would greatly assist OSM officials who will attend the hearing. Advance submissions will give these officials an opportunity to consider appropriate questions which could be asked for clarification or to request more specific information from the person testifying. The public hearing will continue until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak and wish to do so will be heard following the scheduled speakers. The hearing will end after all persons scheduled to testify and persons present in the audience who wish to speak have been heard. Persons not scheduled to testify, but wishing to do so, assume the risk of having the public hearing adjourned unless they are present in the audience at the time all scheduled speakers have been heard.

Background

Under Section 504(a) of the Surface Mining Control and Reclamation Act of 1977 (the Act), Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*, the Secretary of the Interior (the Secretary) is required to promulgate a Federal program within 34 months after passage of the Act if a State fails to submit a program to assume responsibility for regulating surface mining activities, fails to resubmit a program within 60 days of disapproval, or fails at any time to implement, enforce, or maintain an approved State program.

North Carolina has identifiable coal reserves, but has not submitted a program to the Secretary to obtain primary regulatory responsibility. The Director, therefore, has decided to propose this Federal program for North Carolina.

This decision does not necessarily imply any expectation of imminent mining in North Carolina. It instead recognizes that the Act prohibits coal exploration or surface coal mining in States which do not have either an approved State program or a fully promulgated Federal program. Accordingly, OSM believes it prudent to put the required regulatory framework into place so that any future coal exploration or mining may be conducted in North Carolina legally, without unnecessary delay, and in an environmentally sound manner.

Once a decision is made that a Federal program is necessary for a State, the Secretary must make several determinations before promulgating a program. Section 504(a) of the Act requires that in implementing a Federal program the Secretary take into consideration the nature of the State's terrain, climate, biological, chemical, and other relevant physical conditions. This requirement is also found in the regulations, 30 CFR 736.22(a)(1). The Act (§ 505(b)) and the regulations (§ 736.23(b)) also provide that if a State has more stringent land use and environmental laws or regulations, they shall not be construed to be inconsistent with the Act or the Secretary's regulations. If the State's laws or regulations establish more stringent standards regulating surface mining control and reclamation procedures than those found in the Act or the Secretary's regulations, or if the State regulates or protects an aspect of the environment affected by surface mining operations which neither the Act nor the Secretary's regulations protect, then those State standards are specifically preserved. Thus, the Secretary believes

that the requirements of Section 505(b) can best be met by identifying North Carolina laws and regulations which impose equivalent or more stringent environmental controls and by listing them in § 933.700(e).

Also, in promulgating a program for a State, Section 504(g) specifies that any State statutes or regulations which regulate surface mining and reclamation operations subject to the Act will be superseded and preempted by the Federal program to the extent that they interfere with the achievement of the purposes and requirements of the Act and the Federal program. This provision is reinforced by Section 505(a) of the Act, which states that only those State laws and regulations which are inconsistent with the Act and its implementing regulations shall be superseded by the Federal program. Thus, State statutes and rules regulating the same activities as those covered by the Federal law and regulations and which interfere with achievement of the purposes of the Act must be identified and preempted by OSM.

Finally, a Federal program, according to Section 504(h) of the Act, must include a process for coordinating the review and issuance of surface mining permits with other Federal or State permits applicable to the proposed operation. The Federal statutes with which the surface mining permitting process must be coordinated are set out in 30 CFR 736.22(c). State statutes for which a permit is required must be identified in the process of promulgating a Federal program, and the Federal program must provide for coordination with the review and issuance procedures required by those statutes.

Federal programs are based on the Secretary's permanent program regulations: 30 CFR Subchapters A, F, G, J, K, L, and M. The permanent program regulations establish procedures and performance standards under the Act and form the benchmark for State programs. In order for a State to have a program approved by the Secretary, Section 503(a)(7) requires that the State's rules and regulations be consistent with the Secretary's regulations.

The parts of the permanent program regulations that must be included in a Federal program are listed at 30 CFR 736.22(b). They include general requirements and definitions (Parts 700 and 701), the exemption for coal extraction incident to government-financed highway or other construction (Part 707), the designation of lands unsuitable for surface mining (Parts 760, 761, 762, and 764), permits and permit applications (Subchapter G), reclamation bonding (Subchapter J), performance standards (Subchapter K), inspection and enforcement (Parts 842, 843 and 845), and blaster training and certification (Subchapter M). In addition, the provisions in the permanent regulations on protection of employees (Subchapter P) and restrictions on financial interests (Part 706) are applicable to Federal employees who perform functions or duties under the Act.

The rules for the permanent program are found in 30 CFR Parts 700–707 and 730–865. Part 705 was published October 20, 1977 (42 FR 58080). Parts 795 and 865 (originally Part 830) were published December 13, 1977 (42 FR 62639). The other permanent program regulations were published at 44 FR 15323–15463 (March 13, 1979). Subchapter M was published on December 12, 1980 (45 FR 82098). Corrections were published at 44 FR 15485 (March 14, 1979); 44 FR 53507–53509 (September 14, 1979); 44 FR 66195 (November 19, 1979); 45 FR 26001 (April 16, 1980); 45 FR 37818 (June 5, 1980); and 45 FR 47424 (July 15, 1980). Amendments to the rules have been published at 44 FR 60969 (October 22, 1979) as corrected at 44 FR 75143 (December 19, 1979); at 44 FR 77440–77447 (December 31, 1979); 45 FR 2826–2829 (January 11, 1980); 45 FR 25998–26001 (April 16, 1980); 45 FR 33926–33927 (May 20, 1980); 45 FR 39446–39447 (June 10, 1980); 45 FR 52306–52324 (August 6, 1980); 45 FR 52375 (August 7, 1980); 45 FR 58780–58786 (September 4, 1980); and 45 FR 76932 (November 20, 1980); 46 FR 37232 (July 17, 1981); 46 FR 41702 (August 17, 1981); 46 FR 47720 (September 29, 1981); 46 FR 53376 (October 28, 1981); 46 FR 59934 (December 7, 1981); 47 FR 32942 (July 30, 1982); 47 FR 33431 (August 2, 1982); 47 FR 35620 (August 16, 1982); and 47 FR 38486 (August 31, 1982); 47 FR 44942 (October 12, 1982); 47 FR 47212 (October 22, 1982); 47 FR 51316 (November 13, 1982); 48 FR 1166 (January 10, 1983); and 48 FR 2266 (January 18, 1983).

Representatives of industry, two States and several environmental groups challenged the permanent regulatory program in the U.S. District Court for the District of Columbia. These suits were consolidated and heard in a single lawsuit entitled *In re: Permanent Surface Mining Regulation Litigation* (Civil Action No. 79–1144). In response to the arguments raised in the challenges, the Secretary voluntarily suspended several permanent program regulations. These suspensions were announced in the Federal Register on November 27, 1979 (44 FR 67942); December 31, 1979 (44 FR 77447–77455); January 30, 1980 (45 FR 6913); and August 4, 1980 (45 FR 51547–51550). In two opinions the Court remanded certain other regulations which had been challenged in the lawsuit. These opinions were issued on February 26, 1980, and May 16, 1980. Many of the issues decided by the District Court have been appealed to the Court of Appeals for the District of Columbia Circuit. *In re: Permanent Surface Mining Regulation Litigation*, Nos. 80–1610, 80–1611, 80–1612, 80–1613, and 80–1623. The Appeals are presently pending before the appellate court.

North Carolina Federal Program

As mentioned above, when promulgating a Federal program for a State, the Secretary is required by Section 504(a) of the Act to take into consideration the nature of the terrain, climate, biological, chemical, and other relevant physical conditions of that State. OSM has reviewed North Carolina laws and regulations to determine whether they suggest that special provisions may be necessary or appropriate based on special terrain or other physical conditions in the State. The results of the review are found under the section below entitled "Detailed Discussion." OSM solicits comments on special provisions that should be promulgated and the basis for those provisions.

Pursuant to Section 504(a), the Secretary becomes the regulatory authority when a Federal program is implemented for a State. OSM's permanent program regulations contain references to "the regulatory authority" and to "The State regulatory authority," which mean the Secretary when a Federal program for a State is involved. Section 701(22) of the Act. The Office of Surface Mining is delegated all of the Secretary's authority for implementing, maintaining and enforcing a Federal program. This proposed program for North Carolina would not change these responsibilities.

Explanation of Cross-Referencing

In the general notice of intent to promulgate Federal programs of May 16, 1980 (45 FR 32228), OSM stated that each Federal program would be specific to the particular State and would implement the permanent program procedures and environmental protection provisions of the Act (45 FR at 32229). However, except for changes to incorporate more stringent State environmental protection standards, to list other State laws requiring permits for which coordination is required, and to recognize unique or unusual physical conditions affecting surface coal mining and reclamation in a State, OSM

believes that few changes are needed in the permanent program regulations for any particular State for which a Federal program must be promulgated.

In January, 1981, the Secretary directed that the Department review all existing regulations in order to eliminate those which are burdensome, excessive and unnecessary. Review of the permanent program regulations was initiated and may result in a large scale revision of them. See semi-annual Calendar of Federal Regulations notice of rule review and revision, 47 FR 1700 (January 13, 1982). See also, e.g., revisions of OSM's bonding regulations, 30 CFR Subchapter J, 46 FR 45082 (September 9, 1981) and OSM's inspection and enforcement regulations, 30 CFR Parts 842, 843, and 845, 47 FR 35620 (August 16, 1982).

In order to take advantage of the results which revision of the permanent program regulations will achieve, OSM proposes to develop and promulgate this Federal program in the following manner. Rather than repeating the full text of the permanent regulations which are being revised, there would be a cross-reference to the permanent program regulations. For example, criteria for the designation of lands unsuitable for surface coal mining would be provided by the statement that "Part 762 of this Chapter * * * shall apply to surface coal mine operations" (see proposed § 933.762). One effect of the proposed cross-referencing to the permanent program regulations would be that as the permanent program regulations are revised, this Federal program would be similarly revised. Over time, all of the permanent program regulations will undergo review and many will be revised. No separate rulemaking would be undertaken or necessary for revision of this program if the cross-referencing alternative becomes effective, unless OSM determined that special conditions were necessary for a particular State. A notice appeared in the Federal Register on July 13, 1982, 47 FR 30267, advising the public that any change in a permanent program rule would also result in a corresponding change in all Federal programs, absent special conditions. The notice invited comments on necessary modifications to accommodate unique or unusual aspects of surface mining in any State so that the final permanent program rule would be tailored for each State's Federal program as necessary.

The promulgation of this cross-referencing program would not result in any modification of the substance of OSM's permanent program rules. Where specific provisions are needed for an individual State's Federal program which are different from the permanent program regulations, a separate paragraph is proposed to be added to the appropriate section of that State's Federal program. Cross-referencing to the permanent program rules may also be used in the promulgation of other Federal programs. Public comment on the cross-referencing method as it affects other Federal programs, however, should be directed to each of those rulemaking notices.

Several provisions of the permanent program regulations are already applicable and need not be cross-referenced here because they were fully promulgated for application to all regulatory programs. Those provisions are 30 CFR Chapter VII, Subchapter P—Protection of Employees; Part 706—Restrictions on Financial Interests of Federal Employees; and Part 769—Petition Process for Designation of Federal Lands Unsuitable for Surface Coal Mining. (30 CFR Part 764—Designating Lands Unsuitable for Surface Coal Mining would be included in the North Carolina Federal program by a cross-reference under § 933.764, to provide a petition process on non-Federal and non-Indian lands in that State.)

With regard to the bonding regulations (Subchapter J), only Part 800 is proposed to be cross-referenced because OSM has proposed to revise Subchapter J to include just one part, Part 800. 46 FR 45082 (September 9, 1981) (proposed).

Content and Organization of the Program

The content and organization of the proposed Federal program for North Carolina would generally follow the permanent program regulations. But, as discussed above, instead of the full text appearing, each section of this proposed program would only include reference to the pertinent permanent program regulation. Sections 933.700 (e) and (f) respectively list State statutes that are more stringent than, and those that are inconsistent with, the Act. Where specific provisions are needed for any proposed Federal program for a State which are different from the permanent program regulations, a separate paragraph is proposed to be added to the appropriate section.

Detailed Discussion

In order to fulfill the Secretary's obligation under Section 504(a) of the Act to take into consideration the nature of the terrain, climate, biological, chemical, and other relevant physical conditions in each State, OSM has reviewed North Carolina laws and regulations. OSM is of the opinion that there are statutes which, in certain circumstances, impose more stringent environmental controls than are provided for under the Act or the Federal regulations. Section 933.700(e) of the proposed Federal program for North Carolina lists the North Carolina laws which OSM has tentatively identified as setting more stringent land use and environmental controls for surface mining. Those more stringent North Carolina statutes are summarized as follows:

(a) North Carolina General Statute (NCGS) 74–51, concerning conditions under which a mining permit may be granted, contains provisions which are not found in the Act or the Federal regulations. The North Carolina Department of Natural Resources and Community Development may deny a permit for a mining operation which will have a significantly adverse effect on the purposes of a publicly owned park, forest, or recreation area. OSM proposes to alter the following sections as they apply to this Part 933: 30 CFR 761.11(c) would be amended by adding the phrase "forest, recreation area," after the phrase "publicly owned park," 30 CFR 761.12(f)(1) would be amended by adding the phrase "forest, recreation area," after the phrase "public park," and 30 CFR 780.31 and 784.17 would be amended by adding, "forest, or recreation areas" after the phrase "public parks."

NCGS 74–51 also provides that permit approval may be conditioned on a "requirement of visual screening, vegetative or otherwise, so as to screen the view of the operation from public highways, public parks, or residential areas where the Department finds such screening to be feasible and desirable." As these sections are more stringent, OSM proposes to add to §§ 780.31 and 784.17 paragraphs requiring that mining operations visible from public parks, public highways, or residential areas include in the plan of operations, measures to be taken to screen the operation from the view of public parks, public highways, or residential areas or reasons why such screening measures are either not feasible or not desirable.

(b) North Carolina mining laws and regulations apply to mining operations affecting an area greater than one acre, while the Act applies to those mining operations affecting an area greater than two acres, § 528(2). To the extent that North Carolina mining law and regulations apply to coal mining operations not regulated by the Surface

Mining Control and Reclamation Act, they would not be preempted by this Federal program for North Carolina. Also, the mining of peat, an activity which is to commence in the State, is not subject to regulation under the Surface Mining Control and Reclamation Act. It may, however, be subject to regulation under the State's mining laws and regulations because it includes the mining of substances other than those minerals listed. NCGS 74–49(6). Regulation of peat mining under the North Carolina Mining Act of the 1971 would not interfere with achievement of the purposes of the Federal Act.

(c) Dam Safety Law of 1967, NCGS 143–215.23 through 143–215.37, and Title 15 North Carolina Administrative Code, Subchapter 2K, Dam Safety, include requirements for certification and inspection of water impoundments and diversions.

(d) Geophysical Exploration regulations, Title 15, North Carolina Administrative Code, Subchapter 5C, applies to any coal exploration involving the use of explosives.

In accordance with 30 CFR 736.23, OSM believes that those North Carolina statutes and rules listed in Section 933.700(f) of the proposed Federal program interfere with the attainment of the goals and purposes of the Act and the permanent program rules thereunder. Thus, OSM proposes that the following North Carolina statutes and rules be preempted and superseded when the proposed Federal program takes effect:

(a) North Carolina Mining Act of 1971 (NCGS 74–46 through 74–68) insofar as it applies to the surface coal mining operations affecting more than two acres. North Carolina law would continue to apply to the mining of minerals and substances other than coal, and to coal mining operations which affect two acres or less.

(b) Title 15 North Carolina Administrative Code, Subchapters 5A, 5B, and 5F, Mining and Mineral Resources insofar as they apply to surface coal mining operations already more than two acres. These regulations would continue to apply to the mining of minerals and substances other than coal and to coal mining operations that affect two acres or less.

These North Carolina laws and regulations represent the main body of North Carolina law relating to the exploration and surface mining of minerals and the reclamation of mined land. The North Carolina Department of Natural Resources and Community Development and the North Carolina Mining Commission have statutory responsibility for administering and enforcing the laws and rules pertaining to surface mining. To a limited extent, North Carolina requires the reclamation of surface mined lands. A close review of these North Carolina statutes and rules indicates that they are not consistent with the Act or the Federal permanent program rules and that they interfere with the attainment of the goals and purposes of the Act. Thus, OSM proposes that the North Carolina statutes and rules described above no longer be applicable to the regulation of coal exploration, surface coal mining operations or the reclamation of surface coal mined lands in North Carolina, except as they pertain to operations affecting two acres or less or which otherwise are not regulated by the Surface Mining Control and Reclamation Act.

Paragraph (g) of § 933.700 authorizes the Secretary to grant a limited variance from the performance standards of the permanent program rules based on a showing by a permit applicant or permittee that compliance with a particular performance standard is not necessary due to the unique nature of North Carolinia terrain, climate, biological, chemical, or other relevant physical conditions. This provision gives effect to Section 504(a) which directs the Secretary to take into consideration, in promulgating a Federal program for a State, the aforementioned physical characteristics. In promulgating Federal programs for a State, the Secretary reviews State laws to determine whether any would interfere with achievement of the purposes of a Federal program and must be superseded and whether any establish more stringent standards for environmental protection and must be preserved. The presumption is that State laws are a reflection of the particular environmental conditions in the State. There may, however, be conditions present which are not specifically covered by State law, but which must be deferred to pursuant to the requirement in Section 504(a). Paragraph (g) authorizes the Secretary to do so. The variance that may be granted must be shown by a permit applicant to be based on the special environmental conditions not found in any other State in order to be granted. It is not a general variance authorization. Congress did not provide for a general variance from standards set in the Act. Congress was concerned that States not be allowed to grant variances from Federally-set minimum standards. This variance would be granted by the Secretary through OSM and would be tied to unique or special environmental conditions found in a State for which a Federal program is promulgated.

To coordinate the Federal program permitting process under the Act with the permitting requirements imposed by other Federal statutes and those of North Carolina § 933.770, the proposed Federal program tentatively identifies the various permits, statutes, and rules which may, expressly or impliedly, impact on coal exploration and surface coal mining and reclamation under the proposed Federal program. The following permits, statutes, and rules are pertinent and are listed in § 933.770.

(a) NCGS 143–211 through 143–215.114 set forth requirements for the protection of air and water resources. (1) A permit is required from the Environmental Management Commission of the Department of Natural Resources and Community Development for any outlet into the waters of the State, pursuant to NCGS 143–215.1. (2) A permit may be required by the local government authority for any obstruction to a floodway pursuant to NCGS 143–215.57. (3) The Dam Safety Act, NCGS 143–215.23 through 143–215.37 and Dam Safety Regulations, Title 15, North Carolina Administrative Code, Subchapter 2K, require that notice be provided to the Department of Natural Resources and Community Development at least ten days prior to the construction of any dam and that a certificate of approval of the dam, if necessary, be obtained from the Department in accordance with NCGS 143–215.26 and Title 15, Subchapter 2K. (4) An air pollution control permit may be required pursuant to NCGS 143–215.108. (5) Mining operations must maintain air and water quality reporting systems as required by NCGS 143–215.63 through 143–215.69.

(b) The Coastal Area Management Act, NCGS 113A–100 through 113A–128, requires a permit from the Secretary of Natural Resources and Community Development for a mining operation in any area of environmental concern designated pursuant to this Act.

(c) A permit is required for dredging or for filling in or about estuarine water on State-owned lakes, in accordance with the provisions of NCGS 113–229. The obstruction of navigable water is regulated by NCGS 76–40 and 76–41.

(d) Mining operations must comply with any applicable land use regulations adopted in a soil conservation district pursuant to Section 139–9 of the Soil Conservation District Law, NCGS 139–1 *et seq.*

(e) NCGS 153A–128 requires compliance with any county ordinance or regulation concerning the possession,

storage, use or conveyance of explosives. NCGS 14–248.1 regulates the sale, delivery and storage of explosives and imposes criminal sanctions for violations of the statute. NCGS 14–50 through 14–50.1 impose criminal sanctions for the improper use of explosives.

(f) Title 15, North Carolina Administrative Code, Subchapter 5C, Geophysical Exploration, requires a permit for all coal exploration involving the use of explosives.

(g) NCGS 14–284.2 prohibits the dumping of toxic substances without a permit and imposes criminal sanctions for violations.

Other North Carolina laws with which compliance is required but which do not require a permit or license have not been listed. No decision has been made as to whether they are more stringent than standards in the Federal permanent program regulations or whether they interfere with achievement of the purpose of the Federal Act and regulations. However, public comment is invited on whether they should be so identified.

NCGS 113.265 prohibits the obstruction, pollution or diminution of the natural flow of water through a fish hatchery. NCGS 113.293 prohibits the obstruction of rivers and creeks in a manner preventing the passage of fish. Pursuant to NCGS 113.263, the Wildlife Resource Commission may inspect proposals and specifications for dams having an adverse impact upon fish within the State. Mining operations using pesticides must comply with the Pesticide Control Law, NCGS 143–434 through 143–441.

Mining operations must comply with NCGS 136–90 through 136–95 concerning obstruction and drainage of State highways and public roads. Mining operations must comply with any applicable county noise regulations issued pursuant to NCGS 153A–133. Any person desiring to mine mineral deposits on State lands under a body of water must comply with Title 15, North Carolina Administrative Code, Subchapter 5E.

OMB Review

The recordkeeping and reporting requirements of the proposed rule are the same as those of the permanent program regulations which have been approved by the Office of Management and Budget under 44 U.S.C. 3507. Although this rule would contain information and recordkeeping requirements, OSM anticipates less than ten respondents. Under the Paperwork Reduction Act, clearance of information collection forms is required only when ten or more respondents are expected. If in the future the number of respondents appear to be increasing, the proper forms, if they differ from those already approved, will be submitted to the Office of Management and Budget with accompanying notices in the **Federal Register**, in accordance with the requirements of 44 U.S.C. Chapter 35.

Other Information

OSM has examined these proposed rules according to the criteria of Executive Order 12291 (46 FR 13193, February 19, 1981) and determined that they do not constitute a major rule. There would be no major economic impact through adoption of this rule because it would affect only a small number of mining operations.

OSM has examined these proposed rules pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, and determined that they will not have a significant impact on a substantial number of small entities.

Section 702(d) of the Act provides that promulgation of a Federal program shall not constitute a major Federal action under the National Environmental Policy Act, 42 U.S.C. 4332. Thus, no Environmental Assessment is required for this rulemaking.

Coal mining, Intergovernmental relations, Surface mining, Underground mining, Reporting requirements.

Drafting Information

These regulations were drafted by Courtney W. Shea, Office of the Solicitor and James M. Kress, Branch of Regulatory Programs, Office of Surface Mining.

Daniel N. Miller, Jr.,

Assistant Secretary, Energy and Minerals.

February 3, 1983.

OSM proposes to amend 30 CFR Chapter VII by adding Part 933 to read as follows:

PART 933—NORTH CAROLINA

Sec.

933.700 North Carolina Federal Program.
933.701 General.
933.707 Exemption for coal extraction incident to Government-financed highway or other construction.
933.761 Areas designated unsuitable for surface coal mining by Act of Congress.
933.762 Criteria for designating areas as unsuitable for surface coal mining operations.
933.764 Process for designating areas unsuitable for surface coal mining operations.
933.770 General requirements for permit and exploration procedures.
933.771 General requirements for permits and permit applications.
933.776 General requirements for coal exploration.
933.778 Surface mining permit applications—minimum requirements for legal, financial, compliance, and related information.
933.779 Surface mining permit applications—minimum requirements for information on environmental resources.
933.780 Surface mining permit applications—minimum requirements for reclamation and operations plan.
933.782 Underground mining permit applications—minimum requirements for legal, financial, compliance, and related information.
933.783 Underground mining permit applications—minimum requirements for information on environmental resources.
933.784 Underground mining applications—minimum requirements for reclamation and operation plan.
933.785 Requirements for permits for special categories of mining.
933.786 Reviews, public participation, and approval or disapproval of permit applications and permit terms and conditions.
933.787 Administrative and judicial review of decisions on permit applications.
933.788 Permit review, revisions, and renewals, and transfer, sale, and assignment of rights granted under permits.
933.795 Small operator assistance.
933.800 General requirements for bonding of surface coal mining and reclamation operations.
933.815 Performance standards—coal exploration.
933.816 Performance standards—surface mining activities.
933.817 Performance standards—underground mining.
933.818 Special performance standards—concurrent surface and underground mining.
933.823 Special performance standards—operations on prime farmland.
933.824 Special performance standards—mountaintop removal.
933.826 Special performance standards—operations on steep slopes.
933.827 Special performance standards—coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.
933.828 Special performance standards—in situ processing.
933.842 Federal inspections.
933.843 Federal enforcement.
933.845 Civil penalties.
933.850 Blaster training and certification.

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.*, 91 Stat. 445 *et seq.*

§ 933.700 North Carolina Federal Program.

(a) This part contains all rules that are applicable to surface coal mining operations in North Carolina which have been adopted under the Surface

Mining Control and Reclamation Act of 1977.

(b) The rules in this part cross-reference pertinent parts of the permanent program regulations in this chapter. The full text of a rule is in the permanent program rule cited under the relevant section of the North Carolina Federal program.

(c) The rules in this part apply to all surface coal mining operations in North Carolina conducted on non-Federal and non-Indian lands. The rules in Subchapter D of this chapter apply to operations on Federal lands in North Carolina.

(d) The information collection requirements contained in this part do not require approval by the Office of Management and Budget under 44 U.S.C. 3507 because there are fewer than ten respondents annually.

(e) The following provisions of North Carolina laws and regulations provide, where applicable, for more stringent environmental control and regulation of some aspects of surface coal mining operations than do the provisions of the Act and the regulations in this chapter. Therefore, pursuant to Section 505(b) of the Act, they shall not be construed to be inconsistent with the Act unless in a particular instance the rules in this chapter are found by OSM to establish more stringent environmental controls.

(1) North Carolina General Statute (NCGS) 74–51, concerning conditions under which a mining permit may be granted, authorizes the North Carolina Department of Natural Resources and Community Development to deny a permit for a mining operation which will have a significantly adverse effect on the purposes of a publicly owned park, forest, or recreation area and may condition permit approval on a requirement of visual screening, vegetative or otherwise, so as to screen the view of the operation from public highways, public parks, or residential areas where the Department finds such screening to be feasible and desirable, or determines that such screening measures are either not feasible or not desirable.

(2) North Carolina mining laws and regulations apply to mining operations affecting an area greater than one acre. To the extent that North Carolina mining law and regulations apply to coal mining operations not regulated by the Surface Mining Control and Reclamation Act, they are not preempted by this Federal program for North Carolina.

(3) North Carolina Dam Safety Law of 1967, North Carolina General Statutes (NCGS) 143–215.23 through 143–215.37.

(4) Geophysical Exploration regulations, Title 15, North Carolina Administrative Code, Subchapter 5C, applies to any coal exploration involving the use of explosives.

(f) The following are North Carolina laws and regulations that generally interfere with the achievement of the purposes and requirements of the Act and are, in accordance with Section 504(g) of the Act, preempted and superseded to the extent that they regulate coal exploration or surface coal mining and reclamation operations. Other North Carolina laws may in an individual situation interfere with the purposes and achievements of the Act, and may be preempted and superseded as they affect a particular coal exploration or surface mining operation by publication of the notice to that effect in the Federal Register.

(1) North Carolina Mining Act of 1971, as amended, NCGS 74–46 through 74–68, except for the extent that the Mining Act is preserved as provided in paragraph (e) of this section.

(2) Title 15, North Carolina Administrative Code, Subchapters 5A, 5B, and 5F Mining and Mineral Resources, except to the extent that regulations are perceived as provided in paragraph (e) of this section.

(g) The Secretary may grant a limited variance from the performance standards of §§ 933.800 through 933.828 of this Part if the applicant for coal exploration approval or a surface mining permit submitted pursuant to §§ 933.770 through 933.788 of this Part can demonstrate in the application that: (1) Such variance is necessary because of the unique nature of the State's terrain, climate, biological, chemical, or other relevant physical conditions; and (2) that the proposed alternative will achieve equal or greater environmental protection than does the performance requirement from which the variance is requested.

§ 933.701 General.

Sections 700.5, 700.11, 700.12, 700.13, 700.14, 700.15 and Part 701 of this chapter shall apply to surface coal mining and reclamation operations in North Carolina.

§ 933.707 Exemption for coal extraction incident to Government-financed highway or other construction.

Part 707 of this chapter, Exemption for Coal Extraction Incident to Government-Financed Highway or Other Construction, shall apply to surface coal mining and reclamation operations.

§ 933.761 Areas designated unsuitable for surface coal mining by act of Congress.

Part 761 of this chapter, Areas Designated Unsuitable for Coal Mining by Act of Congress, with the exception of §§ 761.11(c) and 761.12(f)(1), shall apply to surface coal mining and reclamation operations, beginning one year after the effective date of this program. For the purposes of Part 933, the following §§ 761.11(c) and 761.12(f)(1) shall replace the existing §§ 761.11(c) and 761.12(f)(1).

(c) On any lands which will adversely affect any publicly owned park, forest, recreation area, or any places included on, or eligible for listing on, the National Register of Historic Places, unless approved jointly by the regulatory authority and the Federal, State, or local agency with jurisdiction over the park, forest, recreation area, or places;

(f)(1) Where the proposed surface coal mining operation may adversely affect any public park, forest, recreation area, or any places included on, or eligible for listing on, the National Register of Historic Places, the regulatory authority shall transmit to the Federal, State, or local agencies with jurisdiction over, or a statutory or regulatory responsibility for, the park, forest, recreation area, or historic place a copy of the completed permit application containing the following:

(i) A request for that agency's approval or disapproval of the operators;

(ii) A notice to the appropriate agency that it must respond within 30 days from receipt of the request.

§ 933.762 Criteria for designating areas as unsuitable for surface coal mining operations.

Part 762 of this chapter, Criteria for Designating Areas Unsuitable for Surface Coal Mining Operations, shall apply to surface coal mining and reclamation operations.

§ 933.764 Process for designating areas unsuitable for surface coal mining operations.

Part 764 of this chapter, State Processes for Designating Areas Unsuitable for Surface Coal Mining Operations, pertaining to petitioning, initial processing, hearing requirements, decisions, data base inventory systems, public information, and regulatory responsibilities shall apply to surface coal mining and reclamation operations beginning one year after the effective date of this program.

§ 933.770 General requirements for permits and exploration procedures.

(a) Part 770 of this chapter, General Requirements for Permit Systems Under State Programs, shall apply to coal exploration and surface coal mining and reclamation operations.

(b) The Secretary shall coordinate, to the extent practicable, the issuance of the following permits, leases and/or certificates required by the State of North Carolina: water discharge permit (NCGS 143–215.1); water use permits in a capacity use area (NCGS 143–215.5); an approval of dam construction (NCGS 143–215.108); an air pollution control permit (NCGS 143–215.26, Title 15, North Carolina Administrative Code, Subchapter 2K); air and water quality reporting systems (NCGS 143–215.63—143–215.69); a geophysical exploration permit (Title 15, North Carolina Administrative Code, Subchapter 5C); a development permit for operations in an area of environmental concern designated pursuant to the Coastal Area Management Act (NCGS 113A–100—113A–128); a dredging or filling permit issued by the Department of Natural Resources and Environmental Protection (NCGS 113–229); a permit for dumping of toxic substances (NCGS 14–284.2); compliance with any applicable land use regulations adopted in a soil conservation district (NCGS 139–9); and compliance with any county ordinance regarding explosives (NCGS 153A–128).

(c) No person shall be granted a permit to conduct exploration which results in the removal of more than 250 tons of coal or shall conduct surface coal mining unless that person has acquired all required permits, leases, and/or certificates listed in paragraph (b) of this section.

§ 93.771 General requirements for permits and permit applications.

(a) Part 771 of this chapter, General Requirements for Permits and Permit Applications, shall apply to any person who makes application for a permit to conduct surface coal mining and reclamation operations.

(b) A person who wishes to conduct new surface coal mining and reclamation operations or who wishes a revision of his permit shall file a complete application at least 12 months prior to the date upon which permit issuance or revision is desired, and shall pay to the Secretary a permit fee in accordance with Section 736.25 of this chapter.

§ 933.776 General requirements for coal exploration.

(a) Part 776 of this chapter, General Requirements for Coal Exploration, shall apply to any person who conducts or seeks to conduct coal exploration operations.

(b) OMS shall make every effort to act on an exploration application within 60 days of receipt or such longer time as may be reasonable under the circumstances. If additional time is needed, OSM shall notify the applicant that the application is being reviewed, but that more time is necessary to complete such review, setting forth the reasons and the additional time that is needed.

§ 933.778 Surface mining permit application—minimum requirements for legal, financial, compliance and related information.

Part 778 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Legal, Financial, Compliance, and Related Information, shall apply to any person who makes application for a permit to conduct surface mining and reclamation operations.

§ 933.779 Surface mining permit applications—minimum requirements for information on environmental resources.

Part 779 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Information on Environmental Resources, shall apply to any person who makes application to conduct surface coal mining and reclamation operations.

§ 933.780 Surface mining permit applications—minimum requirements for reclamation and operation plan.

Part 780 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Reclamation and Operation Plan, shall apply to any person who make application to conduct surface coal mining and reclamation operations, except that for the purpose of Part 933, the paragraph in § 780.31 shall be replaced by the following two paragraphs:

(a) For any public parks, forest, or recreation areas, or historic places that may be adversely affected by the proposed operations, each plan shall describe the measures to be used to minimize or prevent these impacts and to obtain approval of the regulatory authority and other agencies as required in 30 CFR 761.12(f).

(b) Each application for an operation which will be visible from any public park, public highway, or residential area shall include measures to be taken to screen the operation from the view of public parks, public highways and residential areas, or shall set forth the reasons why such screening measures are either not feasible or not desirable.

§ 933.782 Underground mining permit applications—minimum requirements for legal, financial, compliance, and related information.

Part 782 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Legal, Financial, Compliance, and Related Information, shall apply to any person who makes application for a permit to conduct underground coal mining operations.

§ 933.783 Underground mining permit applications—minimum requirements for information on environmental resources.

Part 783 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Information on Environmental Resources, shall apply to any person who submits an application to conduct underground coal mining operations.

§ 933.784 Underground mining permit applications—minimum requirements for reclamation and operation plan.

Part 784 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Reclamation and Operation Plan, shall apply to any person who makes application to conduct underground coal mining except that for the purposes of Part 933, the paragraph in § 784.17 shall be replaced by the following two paragraphs:

(a) For any public parks, forest, or recreation areas, or historic places that may be adversely affected by the proposed operation, each plan shall describe the measures to be used to minimize or prevent these impacts and to obtain approval of the regulatory authority and other agencies as required in 30 CFR 761.12(f).

(b) Each application for an operation which will be visible from any public park, public highway, or residential area shall include measures to be taken to screen the operation from the view of public parks, public highways and residential areas, or shall set forth the reasons why such screening measures are either not feasible or not desirable.

§ 933.785 Requirements for permits for special categories of mining.

Part 785 of this chapter, Requirements for Permits for Special Categories of Mining, shall apply to each person who makes application for a permit to conduct certain categories of surface coal mining and reclamation operations as specified therein.

§ 933.786 Review, public participation, and approval or disapproval of permit applications and permit terms and conditions.

Part 786 of this chapter, Review, Public Participation, and Approval or Disapproval of Permit Applications and Permit Terms and Conditions, shall apply to the review of applications made by any person for surface coal mining and reclamation operations.

§ 933.787 Administrative and judicial review of decisions on permit applications.

Decisions on permit applications shall be subject to administrative and judicial review in accordance with Part 787 of this chapter and Sections 520, 525 and 526 of the Act.

§ 933.788 Permit reviews, revisions, and renewals, and transfer, sale, and assignment of rights granted under permits.

Part 788 of this chapter, Permit Reviews, Revisions, and Renewals, and Transfer, Sale, and Assignment of Rights Granted Under Permits, shall apply to review, revision, and renewal of permits for surface coal mine operations, and to transfer, sale, and assignment of rights granted under permits.

§ 933.795 Small operator assistance.

Part 795 of this chapter, Small Operator Assistance, shall apply to any person making application for assistance under the small operator assistance program.

§ 933.800 General requirements for bonding of surface coal mining and reclamation operations.

Part 800 of this chapter, General Requirements for Bonding of Surface Coal Mining and Reclamation Operations Under Regulatory Programs, shall apply to all surface coal mining and reclamation operations.

§ 933.815 Performance standards—coal exploration.

Part 815 of this chapter, Permanent Program Performance Standards—Coal Exploration, shall apply to any person conducting coal exploration operations.

§ 933.816 Performance standards—surface mining activities.

Part 816 of this chapter, Permanent Program Performance Standards—Surface Mining Activities, shall apply to any person who conducts surface coal mining and reclamation operations.

§ 933.817 Performance standards—underground mining activities.

Part 817 of this chapter, Permanent Program Performance Standards—Underground Mining Activities, shall apply to any person who conducts underground coal mining operations.

§ 933.818 Special performance standards—concurrent surface and underground mining.

Part 818 of this chapter, Special Permanent Program Performance Standards—Concurrent Surface and Underground Mining, shall apply to any person who conducts combined surface and underground coal mining operations.

§ 933.819 Special performance standards—auger mining.

Part 819 of this chapter, Special Permanent Program Performance Standards—Auger Mining, shall apply to any person who conducts surface coal mining operations which include auger mining.

§ 993.823 Special performance standards—operations on prime farmland.

Part 823 of this chapter, Special Permanent Program Performance Standards—Operations on Prime Farmland, shall apply to any person who conducts surface coal mining and reclamation operations on prime farmlands.

§ 933.824 Special performance standards—mountaintop removal.

Part 824 of this chapter, Special Permanent Program Performance Standards—Mountaintop Removal, shall apply to any person who conducts surface coal mining operations constituting mountaintop removal mining.

§ 933.826 Special performance standards—operations on steep slopes.

Part 826 of this chapter, Special Permanent Program Performance Standards—Operations on Steep Slopes, shall apply to any person who conducts surface coal mining and reclamation operations on steep slopes.

§ 933.827 Special performance standards—coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.

Part 827 of this chapter, Special Permanent Program Performance Standards—Coal Processing Plants and Support Facilities Not Located at or Near Minesite or Not Within the Permit Area for a Mine, shall apply to any person who conducts surface coal mining and reclamation operations which include the operation of coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.

§ 933.828 Special performance standards—In situ processing.

Part 828 of this chapter, Special Permanent Program Performance Standards—In Situ Processing, shall apply to any person who conducts in situ processing activities.

§ 933.842 Federal inspections.

(a) Part 828 of this chapter, Federal Inspections, shall apply to all exploration and surface coal mining and reclamation operations.

(b) OSM will furnish a copy of any inspection report written pursuant to this part to the North Carolina Department of Natural Resources and Community Development upon request.

§ 933.843 Federal enforcement.

(a) Part 843 of this chapter, Federal Enforcement, shall apply when enforcement action is required for violations on surface coal mining and reclamation operations.

(b) OSM will furnish a copy of each enforcement action and order to show cause issued pursuant to this part to the North Carolina Department of Natural Resources and Community Development upon request.

§ 933.845 Civil penalties.

Part 845 of this chapter, Civil Penalties, shall apply when civil penalties are assessed for violations on surface coal mining and reclamation operations.

§ 933.850 Blaster training and certification.

Part 850 of this chapter, Program for Blaster Training and Certification, shall apply to any person who conducts coal exploration or surface coal mining operations.

Part IV

Department of Health and Human Services

Office of Human Development Services

Grants for State and Community Programs on Aging and to Indian Tribes for Supportive and Nutritional Services; Notice of Proposed Rulemaking

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

45 CFR Parts 1321 and 1328

Grants for State and Community Programs on Aging and to Indian Tribes for Supportive and Nutritional Services

AGENCY: Office of Human Development Services (HDS), HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Administration on Aging (AoA), in the Office of Human Development Services, proposes new and revised regulations. The bases for these are the passage of the Older Americans Act Amendments of 1981 and the Department's commitment to regulatory reform.

These proposed rules supplement Titles III and VI of the Act by establishing the following requirements and procedures:

- Under Title III:

—Submission of State plans
—Designation of planning and service areas, including designation of additional planning and service areas (PSA) in a single State planning and service area

- Under Title VI:

—Submission of application
—Designation of service area

- Under both Titles

—Service requirements
—Hearing procedures

DATE: Comments must be received on or before May 2, 1983.

ADDRESSES: Address comments in writing to Commissioner on Aging, Administration on Aging, Room 4639 HHS North Building, 330 Independence Avenue, SW., Washington, D.C. 20201. Agencies and organizations are requested to submit comments in duplicate. Beginning two weeks from today, the public may review the comments submitted in response to this notice in Room 4639, HHS North Building, 330 Independence Avenue, SW., Washington, D.C. 20201, between the hours of 9 a.m. and 4 p.m. Monday through Friday except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Floyd Godfrey, (202) 472–3042

or

Anita Shalit, (202) 245–0641.

SUPPLEMENTARY INFORMATION:

Background

1. *History of Program.*—The Older American Act was first enacted in 1965. On December 29, 1981, the President signed the Older American Act Amendments of 1981, Pub. L. 97–115. The Act was amended nine times between 1965 and 1981.

As first enacted, the Act authorized funding under Title III to support in each State a State Agency on Aging. Title III also provided funds for each State agency to initiate local community projects to provide social services to older persons. In fiscal year 1966, the total appropriation under the Act was $7.5 million.

In 1972, a new Title VII was enacted which authorized funds for local community projects to provide nutrition services to the elderly. The projects were designed to provide older persons aged 60 and older with at least one hot nutritious meal five or more days a week. Emphasis in the projects was placed on service to older persons with greatest economic need, and on reducing the isolation of old age.

A second major change occurred in 1973. The amendments revised the Title III State Grant Program by requiring the State agency to: (1) Divide the entire State into planning and service areas, (2) determine in which areas an area plan would be developed, and (3) designate an area agency on aging to develop and administer the plan in each area. The 1973 amendments also added a new Title V to the Act which authorized the Commissioner to make grants directly to local community agencies to pay part of the cost of the construction, acquisition, renovation, alteration, or initial staffing of facilities for use as multipurpose senior centers.

The 1975 amendments specified that priority services be provided under State plans: access, in-home services, and legal services. These amendments also added a new section 303(b)(3)(A) to the Act. This section authorized the Commissioner to withhold a portion of a State's allotment and to grant it directly to an Indian tribe if he or she determined that the State had failed to provide benefits to older Indians that were equivalent to those provided to non-indian older persons and that the Indians would be better served by a direct grant. This provision was never used.

The 1978 amendments consolidated under Title III the social services, nutrition services, and multipurpose senior center programs formerly authorized under Titles III, V and VII. This consolidation was designed to eliminate duplicative and overlapping functions that had been conducted under each Title. It also reemphasized the concept of a single focal point for service delivery within each community. The 1978 amendments enacted a new Title VI, a new direct grant program to Indian tribal organizations for older Indians.

2. *1981 Amendments.*—The 1981 amendments made several technical amendments to the Act and reinforced the basic direction established under the 1978 amendments. The new amendments also made several significant changes in both the Title III and Title VI programs. Most of the changes expand the capacity of State/area agencies and tribal organizations through increased administrative flexibility.

Title III

State and area plans.—The 1981 amendments provide States with greater flexibility in the development and submission of State plans. The amendments require that States submit to the Commissioner a plan for a two, three, or four year period as determined by the State agency, with such annual revisions as are necessary. Previously, three year State plans were required.

Long-Term Care Facilities.—Under section 302 of the Act, the definition of long-term care facilities subject to the Title III State ombudsman program is expanded to include any category of institutions regulated by a State pursuant to the provisions of section 1616(e) of the Social Security Act, also known as the Keys Amendment.

Balance of State Designation.—Any State designated as a single planning and service area prior to October 1, 1980 has the option of designating one or more additional planning and service areas within the State and, at the same time, continuing to function as the area agency for the balance of the State.

Priority services.—Each area agency must expend an "adequate proportion," rather than 50 percent, of its Part B supportive services allotment for access, in-home and legal services. The State agency has the responsibility for determining what constitutes "adequate proportion" and may waive the requirement for expending an "adequate proportion" of an area agency's Part B allotment for these services if the area agency demonstrates that the services being provided in the planning and service area for any specific category of service are sufficient to meet the need.

Meals for handicapped non-elderly and volunteers.—Nutrition services may be made available to the handicapped or disabled non-elderly individuals who reside in housing facilities occupied primarily by the elderly at which congregate nutrition services are provided. In addition, meals may be

offered to individuals providing volunteer services during meal hours on the same basis as meals are provided to older persons.

Nutrition services contributions.—Nutrition services contributions may be used to increase the number of meals served by a project, to facilitate access to meals, and to provide other supportive services directly related to nutrition services. In the past, contributions could be used only to increase the number of meals served.

20 percent transfer between Part B supportive services and Part C nutrition services.—A State may elect to transfer up to 20 percent of the funds appropriated for any fiscal year between the Part B and Part C programs for use as the State considers appropriate. The State shall notify the Commissioner of any such transfer.

Former Title VII projects.—All nutrition services contracts awarded after September 30, 1982 must be awarded through competitive processes. When there is no evidence of improved quality of services and cost effectiveness by another bidder, preference shall be given to the provider who received funds under Title VII of the Act as of September 30, 1978.

Title VI

Eligibility for services.—Eligibility for Title VI supportive and nutritional services has been changed from "Indians who are aged 60 and older" to "older Indians." However, the tribal organization must continue to represent at least 75 individuals who are 60 years of age or older in order to be eligible to receive a Title VI grant.

Legal and ombudsman services.—Legal and ombudsman services are no longer mandated under Title VI. However, each Title VI applicant that proposes to provide these services must assure that such services will be substantially in compliance with the requirements for legal and ombudsman services under Title III.

Evaluation of projects.—The prior requirement that evaluation of Title VI projects must be done by nonprofit private organizations has been amended to remove any mention of the type of organization which must conduct the evaluation.

Withholding and realloting Title III funds.—The former section 604(d) provided that, whenever the Commissioner approved an application to a tribal organization under Title VI, the Commissioner was required to withhold from the Title III allotment of the State an amount attributable to the older Indians to be served under the approved Title VI grant who were also counted for the purpose of determining the State's allotment under Title III. The Commissioner was required to reallot the sums withheld in accordance with the provisions of section 304(b). The 1981 amendments repealed section 604(d).

3. *Development of proposed Titles III and VI regulations.*—These proposed rules revise the current Title III and Title VI regulations, published March 31, 1980, and July 18, 1980, respectively, and incorporate appropriate provisions necessary to implement the 1981 Amendments to the Older Americans Act. Since the proposed rules supplement rather than repeat the Act, they shoud be reviewed in conjunction with the appropriate sections of the Act. Where applicable, we have referenced the appropriate section of the Act in these regulations.

In conjunction with the Administration's effort to reduce regulatory burden and to provide States and area agencies with greater flexibility to respond to the needs of their respective populations, the Department established several rulemaking principles to be applied in the development of regulations.

These principles are as follows:

- Consistency with Congressional intent;
- Non-duplication of clearly established statutory provisions;
- Elimination of regulatory provisions which do not serve a compelling Federal interest;
- Maximum flexibility to State, local and tribal governments;
- Elimination of fraud, abuse, waste and inefficiency; and
- Cost containment.

These principles provided the structural framework used by the Administration on Aging in developing the proposed rules to implement the 1981 Amendments to the Act.

The application of these principles to the current Title III and Title VI regulations resulted in the reduction of the combined Titles III and VI regulations from 134 sections to 42 sections for a total of 92 sections removed. Of the 92 sections removed, 62 were removed because they substantially repeat the statute and 30 were removed to provide States and Indian tribes with greater flexibility in the development and operation of Older Americans Act programs. Thirty sections under Title III and twelve sections under Title VI were maintained or revised either to provide flexibility or protect a compelling Federal interest. The result is a significantly abbreviated set of proposed rules which give States and tribal organizations broad authority and responsibility for administering programs under the OAA. Through the comment process we hope to identify any additional statutory provisions that should be addressed either in final regulations or future program guidance.

Because these proposed regulations involve extensive redesignation, revisions and deletions, we have based the format of the preamble on the 1978 regulations. State and local administrators, practitioners and others working with the field of aging are, through experience, familiar with the old format. The following table shows the transition from the old regulation to the proposed rules. It outlines whether a subsection has been removed, revised, or redesignated.

REDESIGNATION TABLE.—TITLE III—45 CFR PART 1321

Current section	Proposed action	New section
Subpart A	No change	
1321.1	Revised	
1321.3	do	
1321.5	do

Section by Section Discussion of the Major Changes of the NPRM

Title III

Subpart A—Introduction

Subpart A summarizes the purpose of Title III as set forth in 301(a) of the Act. We would retain § 1321.1 because the Administrative Procedure Act, 5 U.S.C. 553(c) requires a basis and purpose statement in regulations, and this section provides a convenient implementation of this requirement. This subpart also contains definitions of terms not in the statute as well as applicability of other regulations.

In § 1321.3, *Definitions*, we would remove those terms which are defined in the statute including area agency, Administration on Aging, Commissioner, community focal point for service delivery, comprehensive and coordinated system, Indian tribal organization, Indian tribe, long-term care facility, nonprofit, planning and service area, reservation, State, State agency and unit of general purpose local government.

We propose to set forth those definitions formerly codified in other sections of the Title III regulations including administrative action and altering, renovating and constructing of multipurpose senior centers. The definition of altering or renovating would be revised to limit such activities to no more than double the square footage of the original facility and all physical improvements. We would retain the definitions of greatest economic and social need because the terms are widely accepted by the aging network and practitioners.

Their common usage forms the basis for comparability of data nationwide. Minor technical changes are proposed in other definitions for purposes of clarification.

In § 1321.5, *Applicability of other regulations*, we have proposed to add 45 CFR Part 16, Procedures of the Departmental Grant Appeals Board. Also, we have proposed to add 45 CFR Part 100, Intergovernmental Review of Department of Health and Human Services Programs and Activities which was published as an NPRM (48 FR 3140, January 24, 1983) and is scheduled for publication as final on or before April 30, 1983. Part 100: (1) Proposes a new intergovernmental consultation system to replace the consultation system developed under the Office of Management and Budget Circular A–95 as it applies to HHS programs; and (2) provides States the opportunity to simplify, consolidate or substitute State plans for Federally required State plans. The area agencies' responsibilities under A–95 had been included under 45 CFR 1321.67(b) which is being deleted. Part 100 implements Executive Order 12372, Intergovernmental Review of Federal Programs (47 FR 30959, originally published on July 16, 1982).

Subpart B—State Agency Designation, Organization, and Functions

Subpart B, as constituted in the regulations of March 31, 1980, would be removed. Section 1321.11, *Designation and functions of the State agency*, would be removed because it duplicates section 305(a) of the statute. Section 1321.13, *Organization of State agency*, § 1321.15(a), *State agency administration*, and §1321.17, *Staffing*, would be removed to provide States with greater flexibility to organize and administer the Title III program. Although States have discretion regarding organization and administration of the program, we expect that States will continue to have an administrative structure which is visible and responsive to the needs of the States' elderly population. We believe that the development and communication of written policies and functional statements will facilitate this. We propose therefore, to revise and redesignate §§ 1321.15(b) and (c) relative to development of written policies and a functional statement. These regulations would be incorporated in the new Subpart B, as § 1321.15.

We propose to make technical revisions in section 1321.19, *Confidentiality and disclosure of State agency information*. This section would be redesignated section 1321.19 under the new Subpart B. We would retain confidentiality requirements to assure continued applicability to all Title III activities and to clarify the State's responsibility for the development of confidentiality procedures.

Subpart C—The State Plan

Sections 1321.21, *What is a State plan* and 1321.33, *Approval or disapproval of a State plan and plan amendments*, would be removed because they are duplicated either in the statute or other Title III regulatory sections. Section 1321.23, *Duration and format of the State plan*, would be revised to permit States to use a State plan format of their own choice. This section would be redesignated § 1321.8. Section 1321.37, *Effective dates and expenditures under an approved State plan or amendment*, would be retained in § 1321.8.

Section 1321.29, *Development and review of the State plan and plan amendments*, would also be removed in the interest of providing States with greater management flexibility. Currently, § 1321.29 requires consultation with area agencies on the State plan, public hearings and State plan review by the State advisory council. These provisions implement section 307(a)(1) of the statute requiring that the State plan be based on area plans and section 305(a)(2)(B) of the statute requiring that the State agency take into account the views of recipients of supportive and nutrition services in development and administration of the State plan. The Administration on Aging continues to emphasize the importance of these statutory functions; however, we would propose to leave to State discretion the methods of implementing these provisions.

In § 1321.25, *Content of the State plan*, we propose to remove those provisions that duplicate sections 305 and 307 of the statute and requirements that are

addressed elsewhere in the regulations. It is now § 1321.9. Section 1321.25(d)(3) would be revised by removing the provisions concerning non-Federal support for services and the advisory role of older persons because they are adequately addressed in the statute. The remaining provisions of § 1321.25(d)(3) would be included as State plan assurances.

In § 1321.25, we would revise the requirement to document the designation of the State agency. We would include as a State plan requirement the indentification by the State of the single State agency that has been designated to develop and administer the plan. This provision implements the statutory requirement of section 305(a) that the State designate a State agendy "in accordance with the regulations of the Commissioner." We would retain State plan information requirements pertaining to program objectives, resource allocation plan, and identification of planning and service area boundaries. In addition, we woud include a series of assurances which are essential requirements for State participation in the Title III program. These information requirements and assurances represent the basic program and administrative framework for the development and operation of the State's Title III program. We believe that these State plan components are necessary for effective program administration and as a vehicle for communicating the State's Title III agenda to the public. Older people, especially, need to be kept informed and have a right to know about programs affecting them, and the State Plan becomes the central public document through which they obtain this knowledge.

This Notice of Proposed Rulemaking does not solicit comments on the new State plan assurance recently published in the **Federal Register** regarding funding of program development and coordination activities as costs of supportive services. Since this new assurance is not affected by passage of the 1981 Amendments to the Act and was recently subject to public comment prior to publication as a final rule, it is considered duplication to republish the rule for public comment at this time. The recently published rule remains in effect and will be retained as a State plan assurance in the final Title III regulations.

We did consider proposing to add a new assurance in § 1321.9(e)(6) which would require the State through its Chief Executive Officer or designee to certify to the Commissioner on Aging that it is in compliance with the requirements of the Keys Amendment, section 1616(e) of the Social Security Act, and implementing regulations at 45 CFR Part 1397. However, after careful analyses and considerable review within the Department, we have decided not to include Key's Amendment requirements under these regulations. In addition, 45 CFR Part 1397 will be revised and published separately from Older Americans Act regulations.

In § 1321.27, now § 1321.11, we propose to remove the requirements concerning plan amendments due to statutory changes or judicial actions. Plan amendments would automatically be required in those circumstances, and our regulation is accordingly not necessary. The provision requiring amendments when there is a change in the designation of the State agency would be retained. Amendments are also required for changes in assurances. We proposed to remove the amendment requirements regarding changes in Statewide program objectives. We concluded that such amendments would be unreasonable since State plans may be in effect for periods of up to 4 years and are expected to change in response to changes in area plans and Statewide needs assessments. We would not retain the amendment requirements regarding changes in PSA designations because the Administration on Aging does not approve planning and service area boundaries.

We propose to require States to notify the Commissioner if the State plan is amended and to submit the amended portion of the plan. However, if the State proposes to amend the plan to change the State agency designation or assurances, this amendment must be submitted to the Commissioner for approval.

Section 1321.31, *Submission of the State plan and plan amendments to the Commissioner for approval,* and § 1321.35, *How a State agency is notified,* would be retained and revised to allow the governor to have a designee sign the plan and receive notifications from the Commissioner. These sections have been redesignated § 1321.13 and 1321.15 respectively.

Finally, we proposed to add two new sections to the new State plan Subpart. Section 1321.8, *State plan information and duration,* allows the State to collect information for the plan in any manner and to decide on the duration of the plan. We think that this will provide States with greater flexibility and reduces the paperwork burden. Section 1321.10, *Public participation on State plan development,* reemphasizes the need to consider the views of all older individuals in developing State plans.

Subpart D—State Agency Responsibilities

Section 1321.41, *Advocacy responsibilities: general,* and § 1321.45, *Service delivery systems responsibilities: general,* would be removed from the regulations because they are substantially duplicated in sections 305 and 307 of the statute or in these proposed regulations.

Except for the definition of "Administrative Action," § 1321.43, *Long-term care ombudsman program,* would be removed from the regulations because it duplicates the provisions of section 307(a)(12) of the statute. The definition of "Administrative Action" would include a minor technical revision and be a part of § 1321.3, *Definitions.*

Section 1321.47, *State advisory council on aging,* would be removed. Section 305(a)(2)(B) of the statute is sufficiently clear regarding requirements for obtaining the views of recipients of supportive and nutrition services in connection with matters involving the development and administration of the State plan. However, we think that this requirement is so important that we propose to retain the requirement in § 1321.10, *Public participation in State plan development,* requirement States to obtain the view of older persons. Rather than prescribing specific methods and procedures for obtaining these views, we proposed to allow States flexibility to use the methods and procedures they find most effective. However, we believe that the designation and active involvement of State advisory councils on aging, comprised of significant numbers of older persons, continues to be one of the most effective means of obtaining these views.

Section 1321. 49, *Intrastate funding formula,* would be revised and is now the new § 1321.21. We would delete from regulations those funding formula criteria that are included in section 305(a) of the statute. We propose to eliminate the regulatory provision requiring that an identical base be provided to each area agency in order to give States greater flexibility in the development of a formula. Formerly, § 1321.49 also included the statutory provision of section 307(a)(3)(B) requiring allocation to rural areas in the State of at least 105 percent of the amount spent under Titles III, V and VII of the Act for services in rural areas in Fiscal Year 1978. This provision would not be mentioned in these new regulations because the statute clearly requires its implementation. Inclusion in

the intrastate funding formula criteria is implicit since all Title III funds must be allocated to area agencies based on such a formula. Finally, the new regulations would retain in § 1321.24 the requirement that the intrastate funding formula reflect consideration of older persons in greatest social or economic need. Emphasis on older persons in greatest social or economic need is a major component of the Title III program that is not elsewhere addressed in the statute or regulations in connection with the intrastate funding formula.

Section 1321.51, *State agency hearings*, would be removed in the proposed regulations. Section 307(a)(5) of the statute clearly provides that the State agency will afford an opportunity for a hearing upon request to any area agency, any service provider, or any applicant to provide services. Specific hearing procedures are eliminated from the proposed regulations to provide each State with flexibility to use those hearing procedures it deems most appropriate.

Section 1321.55, *Appeal to the Commissioner;* § 1321.57, *Intrastate planning and service area;* and, § 1321.59, *Single State planning and service area*, would be revised to delete those provisions which are included in sections 305 and 308 of the statute. We are proposing to revise the remaining portions of these sections. They are now §§ 1321.29, 1321.31 and 1321.33.

These revised sections are based on section 305 of the Act. Section 305(b)(1) requires a State agency to give an opportunity for a hearing, on application, to any unit of general purpose local government with a population of 100,000 or more that applies for designation as a planning and service area. Section 305(b)(4) requires the Commissioner to give an opportunity for a hearing to any unit, region, area, or Indian reservation that is denied designation as a planning and service area by the State. States that elect to apply to the Commissioner to request designation as an interstate planning and service area under section 305(b)(3), to request continued single planning and service area designation under section 305(a)(1)(E), or to designate one or more additional planning and service areas under section 305(b)(5) must, also, meet the hearing requirements in sections 305(b)(1) and 305(b)(4) of the Act.

Except for those States that have been approved to function as a single planning and service area, all States have designated planning and service areas, as required in section 305(a)(1)(E) of the Act. Therefore, we do not anticipate that a great number of States will want to change planning and service area designations, nor do we encourage such changes. However, the statute contains a clear preference for division into planning and service areas, and grants appeal rights to applicants for planning and service designation. We believe that these statutory provisions cannot be meaningfully implemented unless the State's decision to continue its present division or its present designation as a single planning and service area State, or to apply for balance of State designation, is subject to some scrutiny and challenge by local entities that would like to apply for planning and service designation. We are requiring, pursuant to the statutory provision in section 305(a)(1)(E), that States be divided in accordance with guidelines issued by the Commissioner, that the procedures for application and approval or denial of planning and service area designations be completed prior to final approval of the State's request for continued single planning and service area, or interstate planning and service area designation. We anticipate that these policies will avert major interruptions in the implementation of State and area activities under approved plans. These proposed regulations would require State agencies to follow policies which would complete the hearing requirements for denial of planning and service area designation to general purpose local government and other entities specified under section 305(b)(1) and 305(b)(4) of the Act before the submission of a State plan or plan amendments. Upon request from an applicant whose request for planning and service area designation has been denied by a State, the Commissioner would hold a hearing and approve or disapprove the decision of a State agency within 60 days of the applicant's request for a hearing. At the same time the Commissioner would also make a decision with respect to the State's application for continued single planning and service area or interstate planning and service area designation. Once the Commissioner has made a decision, the State would incorporate that decision in the next State plan it develops. The revised §§ 1321.27 through 1321.33 should be reviewed in conjunction with the revised § 1321.7 of the regulations. Section 1321.7 would require State agencies to notify the Commissioner of their intention either to maintain or amend planning and service area boundaries before State plan submission and to submit details of their proposal to the general public (including older persons, government officials, and the aging services network). Sections 1321.27 through 1321.33 would be retained to clarify those administrative and procedural requirements contained in section 305(b) of the Act.

We think that most State agencies will not have to carry out these procedural requirements. The procedure would terminate and no further action on the part of the State would be required if no applications are received by a State agency after the State's notification to the Commissioner; a State agency approves an application after receiving it; an applicant does not appeal a State agency denial; a State agency approves an application after an appeal; or an applicant does not appeal a State hearing denial to the Commissioner.

Subpart E—Area Agency Designation, Organization, Functions

Subpart E would be removed from the Title III regulations in its entirety. Section 1321.61, *Designation and functions of area agencies*, and § 1321.63, *Types of agencies that may be an area agency*, would be removed specifically because they largely duplicate provisions in sections 305 and 306 of the statute and to provide greater State flexibility. Although we have removed the specific requirement for preference to Indian tribal organizations because it is not required by the statute, we emphasize that tribal organizations are considered general purpose local governments and as such, are entitled to consideration for area agency designation.

Section 1321.65, *Organization of the area agency;* § 1321.67, *Area agency procedures* and § 1321.69, *Staffing*, would be removed in the interest of providing States with flexibility to prescribe administrative procedures in these areas. However, we emphasize the continued importance of these issues and strongly encourage States to address them in the development of policies as prescribed in the proposed Title III regulations, § 1321.15, *State agency administration.*

Subpart F—The Area Plan

This Subpart from § 1321.71 through § 1321.83 would be deleted either because the provisions are adequately addressed in the statute or to give States greater flexibility in Statewide program management. Section 1321.85, *Withdrawal of area agency designation and continuity of services*, would be retained in the new § 1321.25 with technical changes and a revision in § 1321.85(d). This revision gives the Commissioner discretion to extend the period of time in which a State must designate an area agency.

Subpart G—Area Agency Responsibilities

This subpart would be eliminated in its entirety. Area agencies would be given flexibility to determine composition of their advisory councils within the categories of older individuals, their representatives, local officials, and the general public. However, we believe that area agencies will recognize the extensive and important contributions of older people in designating their advisory councils.

Subpart H—Service Requirements

Section 1321.107, *Outreach, training and coordination requirements;* § 1321.115, *Advisory role to service providers of older persons;* and § 1321.135, *Funding and use requirements* would be deleted from the Title III regulations in the interest of giving States greater flexibility to provide area agencies and service providers with appropriate guidance in these areas.

The following sections would be deleted from the Title III regulations because they duplicate provisions of the statute: § 1321.125, *Federal labor standards;* § 1321.129, *Length of use of an acquired or constructed facility;* § 1321.131, *Special conditions for acquiring by purchase or constructing a facility;* § 1321.133, *Prohibition on sectarian use of a facility,* § 1321.137, *Recapture of payments for acquired or constructed facilities;* and § 1321.171, *Transportation agreements.*

Section 1321.101, *State agency approval of area agency subgrants or contracts*, would be revised. Section 1321.101(a) which prohibits prior State agency review of area agency subgrants or contracts with public or private nonprofit agencies or organizations would be retained as § 1321.35 because we believe a uniform Federal requirement is necessary to preserve the statutory authority of area agencies.

The first part of § 1321.101(b) regarding prior State agency approval of proposed area agency contracts with profitmaking organizations would be deleted because it duplicates section 212 of the statute. It should be noted that the part of § 1321.101(b) that requires profitmaking organizations to demonstrate clear superiority is no longer in effect because Congress removed this provision when it revised the former section 213 of the statute under the Omnibus Budget Reconciliation Act of 1981 (section 606(c), Pub. L. 97–35).

Section 1321.103, *Direct provision of services by State and area agencies*, would also be deleted from the new regulations. We are proposing to remove regulations implementing the statutory restriction at section 307(a)(10) of the Act on direct service delivery by State and area agencies. We added those requirements to the regulations when nutrition services were consolidated under Title III and when we had reason to believe that Federal regulation was necessary to ensure that direct delivery would be the exception rather than the rule, and that services under the Act would be furnished to the extent possible by private providers rather than by Title III administrative agencies. It is now almost two and one half years since those regulations were published. We believe that in most cases this principle has been firmly established, and that States have adopted procedures to restrict direct delivery carefully. Since section 307(a)(10) provides that the State agency must judge when direct delivery is necessary to assure an adequate supply, we believe that it is now appropriate for us to eliminate uniform Federal requirements in this area. We are, therefore, proposing to leave to the judgment of the State agency which criteria to use with respect to direct delivery.

By removing this section, we would also be deleting the definitions for "effectively and efficiency," the tests for adequate supply of services, and the requirement for the provision of services funded under other programs to provide States with flexibility in these areas. In order to assure adherence to the intent of this statutory provision, we want to emphasize the importance of State established criteria governing the direct provision of services.

Section 1321.105, *Licensure and safety requirements*, would be revised and included in a new § 1321.26, *Statewide licensure and safety requirements*, applicable to the provision of all services would be included as an assurance in the proposed § 1321.9, *Content of State plan.*

Section 1321.109, *Preference for older persons with greatest economic or social need*, would be replaced by § 1321.37. The provision requiring preference to older persons in greatest economic or social need and the prohibition on use of means tests in the delivery of services would be incorporated as assurances in the proposed § 1321.9, *Content of State plan.* Methods that can be used to meet the preference requirement, such as location of services, would be deleted as regulatory requirements. States may wish to communicate these and other methods to area agencies and service providers in the process of providing guidance on the provision and location of services. We would retain the prohibition against means testing because the legislative history of the Act has consistently stressed that is congressional intent that no means tests be imposed, and because it has been our consistent policy that income screening may not be used to deny or limit receipt of services under the Act.

Section 1321.111, *Contributions for services under the area plan*, would be retained as § 1321.9 as an assurance with technical revisions. This section would be retained in order to emphasize the need to increase program income, especially during this time of diminished resources. At the same time, it is important to assure that contributions by participants are voluntary and not required, either implicitly or explicitly, as a condition for receiving services.

Section 1321.113, *Maintenance of non-Federal support for services*, would be removed. States have responsibility for meeting their non-Federal maintenance of effort requirements. The manner in which they do so, is a State option, and removal of this section provides flexibility for individual States to develop the most appropriate way.

Section 1321.121, *Multipurpose senior centers*, would be deleted except for the definitions of "altering" or "renovating" and "construction" which would be included in § 1321.3, *Definitions.* The remainder of this section would be eliminated because it duplicates provisions of section 307(a)(14) and section 321(b) of the statute. We would retain § 1321.123(a), which requires compliance with applicable State and local building codes, etc., for the same reason that we would require compliance with any State and local standards for other services: to help ensure the protection for Title III participants of safety requirements that a State has decided are appropriate. We would retain § 1321.123(d) because it specifies the manner in which the State meets the statutory requirement of consultation with the Department of Housing and Urban Development on the technical adequacy of proposed senior center alterations or renovations. Section 1321.123(a) and 1321.123(d) are retained in § 1321.26.

In § 1321.41 which concerns the provision of home delivered nutrition services, we would delete all of those provisions which are duplicated in the statute. In addition, we would eliminate all regulatory material regarding congregate meals in the interest of providing States with greater flexibility. We think that States have successfully operated congregate nutrition services

programs for a number of years. Therefore, we believe that a combination of this experience and the State's promulgation of proper and efficient policies and procedures for delivery of congregate nutrition services will negate the need for continued Federal regulation in this area.

With respect to the furnishing of home delivered nutrition services, section 337 of the Act states that the Commissioner, in consultation with a variety of organizations, shall develop minimum criteria of efficiency and quality for the furnishing of home delivered meal services. In accordance with this statutory requirement, we developed a series of regulatory provisions for eligibility, selection of nutrition services providers, and other special requirements. We are proposing to retain these requirements, but not to impose additional ones, because our experience has not indicated that additional requirements are necessary.

In § 1321.151, *Legal services*, we propose to remove all provisions which duplicate sections 302(4) and 307(a)(15) of the Act. We would retain in the proposed regulations those standards for grantee selection that must be promulgated by the Commissioner pursuant to section 307(a)(15)(B) of the Act. In compliance with the provisions of section 307(a)(15)(ii), we propose to retain specific restrictions and regulations promulgated under the Legal Services Corporation Act. We would make them applicable by adapting the appropriate Parts of 45 CFR Chapter 1600. In order to assure consistent application of the Legal Services Corporation Act regulations, we propose that all provisions of the enumerated Parts be adapted.

We have adapted all of Parts 1604, 1608, 1609 and 1612. Specifically, these Parts would revise existing Title III regulatory requirements as follows:

A. Part 1604

- Compensated outside practice of law is permitted when the attorney is newly employed and has a professional responsibility to close cases from a previous law practice, is acting pursuant to an appointment under a court rule or practice of equal applicability to all attorneys in the jurisdiction, and remits to the provider all compensation received.
- Section 1604.2 defines an attorney as a person who is employed full-time in legal assistance activities.

B. Part 1608

- No provider or employee shall use a political test or qualification in making a decision, taking an action or performing a function.
- No provider or employee shall contribute or make available Older Americans Act funds, personnel or equipment to any political party, campaign, ballot measure, initiative or referendum.
- No attorney shall engage in any political activity or any activity to provide voters with transportation to the polls.

C. Part 1609

- Fee-generating cases may be accepted by the provider in cases rejected by local attorneys, emergency circumstances, and appointment by the court.
- Fees may be charged and accepted when awarded or approved by the court.
- Out of pocket costs and expenses associated with recovery of damages, other than statutory benefits, may be accepted if the client agrees and the case meets requirements for accepting fee-generating cases.
- A provider may require clients to pay court costs if the court determines that the client is not a pauper. A provider may also accept fees in a case that was initiated prior to the adoption of this part or when acting as co-counsel with a private attorney.

D. Part 1612

- The area agency on aging shall have the authority to suspend or terminate financial assistance to a provider who fails to insure that its employees refrain from activities prohibited by the Older Americans Act of Part 1612 of this Title.
- Older Americans Act funds cannot be used by legal service providers to influence executive or administrative orders or regulations of a Federal, State or local agency.
- A provider shall advise employees of their legal responsibilities, establish procedures for determining violations and establish policies for determining sanctions.
- The provider shall consult with the area agency on aging before suspending or terminating an employee for violation of legal services regulations.

It should be noted that on November 8, 1982, the Legal Services Corporation issued proposed rules containing revisions to Part 1600. It is our intent to adapt appropriate subparts of the final Legal Services Corporation Act regulations. Finally, we would retain the regulatory provision which allows a legal services provider to ask about an older person's financial circumstances as a part of the process of providing legal advice.

Section 1321.161, *Information and referral services*, would be removed from the regulations entirely. All of these provisions are duplicated in the statute except for that relating to confidentiality in the provision of information and referral services. We propose to include a State plan assurance which requires confidentiality of information about older persons in the delivery of all services, including information and referral in § 1321.9, which was § 1321.25.

Subpart I—Fiscal Requirements

The following sections would be deleted from the Title III regulations because they are adequately addressed in the statute: § 1321.181, *Allotments and grants to States;* § 1321.183, *Area agency allotments;* § 1321.193, *Allowable use of funds for State and area plan administration;* § 1321.195, *Additional funds for State plan administration;* § 1321.197, *Obligation and reallotment;* § 1321.199, *Federal financial participation;* § 1321.201, *Non-Federal share requirements*, § 1321.203, *Source of non-Federal share*, § 1321.205 *State agency maintenance of effort;* and § 1321.213, *Federal reviews and audits.*

Section 1321.185, *Expenditures in rural areas*, would be removed from the regulations. The provision requiring that the State agency annually spent in rural areas at least 105 percent of the amount spend for services to older persons during fiscal year 1978 is adequately addressed in the statute. The definition of "rural area" would be removed from the Title III regulations in order to permit States to establish a definition which appropriately reflects the specific and unique characteristics of its population density and geography.

Section 1321.187, *Fifty percent priority service requirement*, would be deleted from the regulations. Congress changed the requirement that area agencies must spend at least 50 percent of their Part B allotment for activities associated with access, in-home, and legal services. Section 306(a)(2) of the statute now provides greater flexibility to States and requires that each area plan provide assurances that an adequate proportion of the Part B allotment be expended for delivery of these services and that some funds be expended in each category of service. The statute retains in section 306(b) the State agency option to grant a waiver in any category of service if the area agency demonstrates that sufficient services are being provided. Since this option is clearly specified in the statute, we have not provided for it in the proposed regulations. The former § 1321.187(b) of the Title III regulations

required that States develop criteria that an area agency must satisfy in order to obtain a waiver. Although this would no longer be stated in regulatory form, we continue to believe that this is an appropriate responsibility of the State agency.

Section 1321.189, *Long-term care ombudsman program,* would be deleted from the Title III regulations because it is adquately addressed in section 304(d)(1)(B) and section 307(a)(18) of the statute. Section 307(a)(18) retains the provision that a State use annually at least one percent of its Part B allotment, or $20,000, whichever is greater, for carrying out the ombudsman program. However, it should also be noted that section 304(d)(1)(B) provides States with greater flexibility by allowing States to determine an additional amount of Part B funds for this purpose. We propose not to provide States with regulatory guidance on amounts considered to be adequate for the ombudsman program. We think that States should give significant attention to long-term care issues in the State and make every effort to allocate amounts which enable the ombudsman program to operate effectively.

We propose to revise § 1321.191, *Transfer between congregate and home-delivered nutrition services funds under the State plan,* to allow States the flexibility to transfer from one allotment to the other 20 percent or less, rather than the 15 percent or less previously allowed under this section. This change is consistent with the statutory provision in section 308(b)(6) which permits a State to transfer not more than 20 percent of its annual allotments between programs under part B and part C of Title III. The remainder of this section would be retained and be redesignated § 1321.23.

We propose to retain the provisions of § 1321.207, *Restriction on delegation of authority to other agencies,* and redesignate these provisions under § 1321.21 of the proposed regulations. We think it is necessary to continue to clarify that State and area agencies are precluded from joint funding under the Act except for transportation as authorized under section 306(c) of the Act, or except where they are the lead agencies. The statute requires that State and area agencies be the sole agencies for awarding and administering funds under this part. Accordingly, State and area agencies may not delegate this authority to another agency. Sections 1321.215 through 1321.223 provide information about various Federal reviews and audits. This material would be deleted from the Title III regulations because it is adequately addressed in OMB Circular A–102.

Subpart J—Hearings Procedures for State Agencies

We propose to substitute the present Subpart J with the existing 45 CFR Part 213. Part 213 contains the rules of procedure for hearings under other State plan programs administered by the Department. We are proposing this change in the interest of ensuring that States are subject, to the extent possible, to uniform hearing procedures under the various State plan programs administered by the Department. It is in the new § 1321.45. In order to conform to existing Title III standards, we have retained or substituted Title III program specific language, as appropriate. Section 1321.265, *When a decision is effective;* § 1321.267, *How the State may appeal;* and § 1321.269, *How the Commissioner may reallot the State's withheld payments* have been retained.

Section by Section Discussion of the Major Changes in Title VI

We would retain § 1328.1 because the Administrative Procedure Act, 5 U.S.C. section 553(c) requires a basis and purpose statement in regulations, and this section provides a convenient implementation of that requirement.

The following provisions would be deleted from the Title VI regulations because they are adequately addressed in the statute and/or appropriate guidance is provided in the Title III regulations: § 1328.23, *Ombudsman services;* § 1328.29, *What senior center activities may be funded;* § 1328.33, *Use requirements;* § 1328.37, *Surplus education facilities from the Bureau of Indian Affairs;* § 1328.47, *Application disapproval;* and § 1328.51, *Prohibition on consideration of program benefits as personal income.*

Section 1328.11, *Advisory Council,* would be deleted from the Title VI regulations in the interest of providing tribal organizations with greater flexibility to administer the title VI program in accordance with the unique needs and other characteristics of the tribe's older population. Section 1328.39, *Preapplication requirements,* and § 1328.41, *Determination of eligibility,* would be deleted because our administrative experience indicates these requirements are not appropriate for an ongoing program.

Section 1328.7, *Tribal organization eligibility,* would be deleted from the regulations because the provisions are adequately addressed in the statute except for § 1328.7(a)(3) (i) and (ii). These provisions require that a tribal organization document its ability to deliver supportive and nutrition services to older persons and that the tribal organization has effectively administered supportive and nutrition services within the last 3 years. These provisions would be retained in § 1328.19.

Tribal Organization Requirements

Section 1328.9 would be removed. Paragraph (a), as indicated above, defines the concept of a "service area" and is now included in § 1328.3, *Definitions.*

Paragraph (k) which concerns providing opportunities to older Indians to contribute to the cost of services is now incorporated in § 1328.9, *Contributions.* Paragraphs (l) and (m) address confidentiality issues and would be included in a redesignated § 1328.7, *Confidentiality and disclosure of information.* It is proposed, also, that those requirements for outreach and coordination be deleted to provide flexibility and the prohibition against means testing be moved to the section on application requirements as an assurance. In the current regulations these requirements are specified in paragraph (g), (h) and (t). All other paragraphs of § 1328.9 would be removed either to provide greater tribal flexibility or because they duplicate statutory or other regulatory provisions.

General Services Requirements

Section 1328.19, *General services requirements* would be removed from the regulations. Section 1328.19(a), which requires that the tribal organization ensure that all activities funded are provided in compliance with the requirements of this part and other applicable regulations, is contained in the standard OMB application. The remaining provisions of this section would be deleted to provide tribal organizations with greater flexibility to administer the Title VI program. We want to emphasize that tribal organizations continue to have a responsibility to assure preferences required under section 7(b) of the Indian Self-Determination and Education Assistance Act.

Definitions

We propose to delete from the regulations the definitions for "Commissioner," "legal services," "long-term care facility" and "State agency" because they duplicate provisions of either Title III or Title VI of the statute. The definition of "nonprofit" would be deleted because it is not necessary for implementation of the Title VI regulations. The definitions of "Indian

tribe," "Indian reservation," and "tribal organization" would be retained; they differ from the definitions in section 102(6) of the Act in that the Title VI definition is limited to federally recognized tribes and reservations. The definitions of "altering" or "renovating" and "acquiring" as used with regard to multi-purpose senior centers are redesignated from § 1328.31 of the Title VI regulations to § 1328.3. The definition of an "older Indian" is revised to reflect the deletion of a specific age requirement in section 603 of the statute. The definition of "service area" would be expanded to incorporate § 1328.9(a) of the current Title VI regulations which provides clarifying information about the concept of a "service area" under the Title VI program.

Applicability of Other Regulations

We propose to add to the list Part 80 and Part 81 which concern non-discrimination requirements.

Contributions

Section 1328.13 would be retained as § 1328.9 to assure that grantees continue to use these criteria for the collection, safeguarding and use of participant contributions. The proposed section includes some minor technical changes which conform with the Title III statutory revisions relative to nutrition services contributions.

Prohibition Against Supplantation

Section 1328.15 would be retained as § 1328.11 without change. This provision is retained to assure that Older Americans Act funds are used for the purpose of expanding services to older Indians.

Required and Optional Services

Section 1328.17 would be significantly condensed and is now § 1328.13. Paragraph (a) would be deleted because the statute clearly states that delivery of nutrition services and information and referral services are required. Further, the statute is clear that legal services and ombudsman services are optional activities that the tribe may conduct in accordance with the needs of its older population. In addition, paragraph (b) would be deleted because we do not think that this list of optional services is comprehensive enough to reflect all the services that may be necessary for the welfare of older Indians.

In revising § 1328.11, therefore, we proposed to provide language which permits tribes to deliver any supportive services deemed appropriate by the tribe, based on the needs assessment. Finally, paragraph (c) would be deleted from the regulations because requirements for needs assessment are adequately addressed in section 604(a)(1) of the Act.

Nutrition Services

Section 1328.21 would be revised as § 1328.15 Paragraph (b) concerning food requirements for all nutrition services providers and paragraph (c) concerning type and frequency of meals served would be deleted to give tribes greater flexibility in the provision of nutrition services. Paragraph (a), eligibility of the spouses of older Indians for receiving nutrition services; paragraph (d) USDA assistance for nutrition services; and paragraph (e) food stamps would be revised and retained in order to clarify applicability of these provisions to the Title VI program. We also refer to the Title III provisions regarding nutrition services to non-elderly handicapped Indians who reside in housing facilities for the elderly and to individuals providing volunteer services during meal hours. These provisions would be included in the Title VI regulations to assure clear understanding of their applicability to Title VI.

Legal Services

Section 1328.23 would be removed because the Act no longer mandates that tribal organizations provide legal services. However, tribal organizations have the option of providing legal services substantially in compliance with the requirements under the Title III regulations. If a tribal organization decides to provide legal services under its Title VI grant, we would require that legal services providers comply fully with the Legal Services Corporation regulations and restrictions proposed under Title III, since we believe that full compliance with these provisions is appropriate for all legal services funded under the Act. We would require only substantial compliance with the standards for selection of legal services providers because we believe full compliance may not be feasible for some tribal organizations that want to provide legal services.

Information and referral

Section 1328.25 would be revised as § 1328.17. Paragraph (a) is deleted because it is adequately addressed in the statute. Paragraph (b) which concerns provision of information and referral services in the principal language spoken by older Indians would be removed from section 1328.25. It is proposed for inclusion in section 1328.19 as a general application assurance for all supportive and nutrition services. Paragraphs (c), (d) and (e) would be retained as § 1328.17 with minor technical revisions.

Definitions

Section 1328.31 would be deleted from the Title VI regulations. However, it is proposed that the definitions of "altering" or "renovating" and "acquiring" be included in § 1328.3, *Definitions.*

Health and safety requirements

Section 1328.35 would be deleted from Title VI regulations. However, we propose to include health and safety requirements under proposed § 1328.13, *Optional services,* and § 1328.19, *Application requirements.*

Application requirements

Section 1328.43 would be revised as § 1328.19 to delete those subsections that are contained in the standard application format approved by the Office of Management and Budget and those that substantially repeat the statute. We propose to delete these subsections to provide tribes with greater flexibility in administering the Title VI programs and to reduce the paperwork burden. We propose to retain and incorporate in § 1328.17 those requirements that establish a basic framework for developing a Title VI application, as follows: program objectives; a geographic description of service area boundaries; documentation of tribal organization ability to deliver supportive and nutrition services; assurances on methods to ensure that eligible participants do not receive Title III services, the tribe represents at least 75 older Indians, compliance with applicable State and local licensure requirements and, where possible, the use of staff fluent in the language spoken by the participants; a tribal resolution which authorizes application for a Title VI grant; and the signature of the principal tribal official.

Application Approval

Section 1328.45, now § 1328.21, would be revised to delete paragraph (a). The provisions in paragraph (a) repeat the requirements in 45 CFR Part 74, previously referenced under § 1328.3 of this part. The provisions in paragraphs (b) and (c) would be retained to clarify the difference between Title VI grant awards and formula grant awards under Title III.

Hearing procedures

Section 1328.49 would be retained as § 1328.23, with minor technical revisions. We propose to retain these hearing rules and procedures in accord

with the requirements of section 604(d)(3) of the Act, which require the Commissioner to establish regulations governing hearings on denial of application. However, a hearing decision by or on behalf of the Commissioner, under this part, does not preclude an applicant from exerting its appeal rights under 45 CFR Part 16, after a decision has been given.

Impact Analysis

Executive Order 12291

The Secretary has determined, in accordance with Executive Order 12291, that this proposed rule does not constitute a major rule because it will not: have an annual effect on the economy of $100 million or more; result in major increase in costs or process for consumers, any industries, any governmental agency or any geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or import markets.

Regulatory Flexibility Act of 1980

The Regulatory Flexibility Act of 1980, Pub. L. 96–354, requires that an agency prepare a regulatory flexibility analysis for a proposed or final rule if the rule would have a significant economic impact on a substantial number of "small entities," i.e. small businesses, small non-profit organizations, or small governmental jurisdictions.

Although actual delivery of services may be provided in some circumstances by proprietary, public and not-for-profit agencies or organziations under contract to the State agency, the responsibility for meeting the requirements of these regulations is on the State agencies, which are not "small entities" within the meaning of the Act. This proposed rule will impose no significant burdens on States or other affected parties and will provide flexibility to States in implementing the provisions of the Act. For these reasons, the Secretary hereby certifies that these regulations will not have a significant impact on a substantial number of small entities.

Recordkeeping and Reporting Requirements

Sections 1321.7–1321.13 and 1328.19 of this proposed rule contain information collection requirements. As required by Section 3504(h) of the Paperwork Reduction Act of 1980, we have submitted a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of these information collection requirements. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs OMB, New Executive Office Building (Room 3208), Washington, D.C. 20503, Attn: Desk officer for HHS.

List of Subjects

45 CFR Part 1321

Administrative practice and procedure, Aged, Grant programs—social programs, Nutrition, Reporting and recordkeeping requirements.

45 CFR Part 1328

Administrative practice and procedure, Aged, Grant programs—Indians, Grant programs—social programs, Indians, Reporting and recordkeeping requirements, Supplemental Security Income (SSI).

(Catalog of Federal Domestic Assistance Program Numbers: 13.633 Special Progams for Aging, Title III Parts A and B—Grants on Aging; 13.635 Special Programs for Aging, Title III Part C—Nutrition Services); (13.655 Special Programs for Aging—Title VI—Grants for Indian Tribes)

Dated: January 17, 1983.

Lennie-Marie P. Tolliver,

Commissioner on Aging.

Approved: January 19, 1983.

Dorcas R. Hardy,

Assistant Secretary for Human Development Services.

Approved January 26, 1983.

Richard S. Schweiker,

Secretary of Health and Human Services.

Accordingly, for the reasons set forth in the preamble we propose to amend 45 CFR Chapter XIII, as follows:

1. In Subchapter C, Part 1321 is revised to read as follows:

PART 1321—GRANTS TO STATE AND COMMUNITY PROGRAMS ON AGING

Subpart A—Introduction

Sec.

1321.1 Basis and purpose of part.
1321.3 Definitions.
1321.5 Applicability of other regulations.

Subpart B—The State plan

1321.7 Amendment of planning and service areas.
1321.8 Duration, format and effective date of the State plan.
1321.9 Content of State plan.
1321.10 Public participation in State plan development.
1321.11 Amendments to the State plan.
1321.13 Submission of a State plan to the Commissioner for approval.
1321.15 Notification of State plan approval.
1321.17 State agency administration.
1321.19 Confidentiality and disclosure of information.

Subpart C—State Agency Responsibility

1321.21 Restriction on delegation of authority to other agencies.
1321.23 Transfer between congregate and home-delivered nutrition service allotments.
1321.24 Intrastate Funding formula.
1321.25 Withdrawal of area agency designation.
1321.26 Licensure and safety.
1321.27 Designation of planning and service areas.
1321.29 Appeal to Commissioner.
1321.31 Interstate planning and service area.
1321.33 Single State planning and service area.

Subpart D—Service Requirements

1321.35 Area agency subparts or contracts.
1321.37 Greatest economic or social need preference.
1321.39 Service contributions.
1321.41 Home-delivered nutrition services.
1321.43 Legal services.

Subpart E—Hearing Procedures for State Agencies

1321.45 Scope.
1321.47 When a decision is effective.
1321.49 How the State may appeal.
1321.51 How the Commissioner may reallot the State's withheld payments.

Authority: Title III of the Older Americans Act (42 U.S.C. 3021 through 3030g).

Subpart A—Introduction

§ 1321.1 Basis and purpose of part.

(a) This part prescribes requirements State agencies must meet to receive grants to develop comprehensive and coordinated systems for the delivery of supportive and nutrition services under Title III of the Older Americans Act, as amended (Act). These requirements include—

(1) Designation and responsibilities of State agencies;

(2) State plans and amendments;

(3) Services delivery; and

(4) Hearing procedures for applicants for planning and services area designation.

(b) The requirements of this part are based on Title III of the Act. Title III provides for formula grants to State agencies on aging under approved State plans for the development of comprehensive and coordinated systems for the delivery to older persons of supportive services, including multipurpose senior centers, and nutrition services. Each State agency designates planning and service areas in the State, and makes a subgrant or contract under an approved area plan to one area agency in each planning and

service area. Area agencies in turn make subgrants or contracts to service providers.

§ 1321.3 Definitions.

"Act" means the Older Americans Act of 1965 as amended.

"Administrative action," as used in section 307(a)(12)(A) of the Act with respect to the investigation and resolution of complaints under long-term care ombudsman programs, means any action or decision made by an owner, employee, or agent of a long-term care facility, or by a government agency, which affects the provision of service to residents covered under the long term care program.

"Altering" or "renovating," as used in section 307(a)(14) of the Act with respect to multipurpose senior centers, means making modifications to or in connection with an existing facility which are necessary for its effective use as a center. These may include renovation, repair, or expansion which is not in excess of double the square footage of the original facility and all physical improvements.

"Constructing," as used in section 307(a)(14) of the Act with respect to multipurpose senior centers, means building a new facility, including the costs of land acquisition and architectural and engineering fees.

"Department" means the Department of Health and Human Services.

"Fiscal year," as used in section 303 and 304 of the Act with respect to authorization of appropriations, uses of funds and allotment, and Federal share, means the Federal Fiscal Year.

"Greatest economic need," as used in section 305(a)(2)(E) and elsewhere in the Act with respect to the provision of services to older individuals, means the need resulting from an income level at or below the poverty line revised each year by the Secretary of the Department of Health and Human Services.

"Greatest social need," as used in section 305(a)(2)(E) and elsewhere in the Act with respect to the provision of services to older individuals, means the need caused by non-economic factors which include physical and mental disabilities, language barriers, cultural or social isolation including that caused by racial or ethnic status (for example Black, Hispanic, American Indian, and Asian American) which may restrict an individual's ability to perform normal daily tasks or which threaten his or her capacity to live independently.

"Human services," as used in § 1321.33(a)(1) of this Part, with respect to criteria for designation of a statewide planning and service area, means social, health, or welfare services.

"Means test," as used in the provision of services, means the use of an older person's income or resources to deny or limit that person's receipt of services under this part.

"Multipurpose senior center," as used in section 321(b) of the Older Americans Act with respect to grants to States under State plants approved under section 307, means a community or neighborhood facility for the organization and provision of a broad spectrum of services including health, social, nutritional, and educational services, and a facility for recreational and group activities for older persons.

"Reservation," as used in section 305(b)(4) of the Older Americans Act with respect to the designation of planning and service areas, means any federally or State recognized Indian tribe's reservation, pueblo, or colony, including reservations in Oklahoma, Alaskan Native regions established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688), and Indian allotments.

"Service provider," as used in section 306(a)(1) of the Older Americans Act with respect to the provision of supportive and nutrition services, means an entity that is awarded a subgrant or contract from an area agency to provide services under the area plan.

§ 1321.5 Applicability of other regulations.

The following regulations apply to all activities under this Part:

(a) Title 45 of the Code of Federal Regulations:

(1) Part 100—Intergovernmental Review of Department of Health and Human Service Programs and Activities. (This Part was published as an NPRM (48 FR 3140, January 24, 1983) in accordance with Executive Order 12372 (47 FR 30959, July 16, 1982) and is scheduled for publication as final on or before April 30, 1983.)

(2) Part 16—Procedures of the Departmental Grant Appeals Board;

(3) Part 74—Administration of Grants, except Subpart N;

(4) Part 80—Nondiscrimination Under Programs Receiving Federal Assistance through the Department of Health and Human Services: Effectuation of Title VI of the Civil Rights Act of 1964;

(5) Part 81—Practice and Procedures for Hearings under Part 80;

(6) Part 84—Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving Benefits from Federal Financial Participation; and

(7) Part 90—Nondiscrimination on the Basis of Age.

(b) Title 5, CFR Part 900, Subpart F.

Subpart B—The State Plan

§ 1321.7 Amendment of planning and service areas.

Prior to the Commissioner's final approval of a State plan, under these regulations, the following requirements must be completed:

(a) A notice of intent either to maintain or amend the designation of existing planning and service area geographic boundaries must be received by the Commissioner before the submission of the State plan.

(b) A State agency must submit to the general public (including older persons, government officials, and the aging services network) the details of the State's intention to maintain or amend the designation of existing planning and service area boundaries, at least 30 days following the notice of intent to the Commissioner.

§ 1321.8 Duration, format and effective date of the State plan.

A State may use its own judgment as to the format to use for the plan, how to collect information for the plan, and whether the plan will remain in effect for two, three, or four years.

(a) An approved State plan or amendment becomes effective on the date designated by the Commissioner.

(b) An agency may not make expenditures under a new plan or amendment until it is approved.

§ 1321.9 Content of State plan.

To receive a grant under this part, a State must have an approved State plan as prescribed in section 307 of the Act. In addition, to meeting the requirements of section 307, a State plan must include:

(a) Identification by the State of the single State agency that has been designated to develop and administer the plan.

(b) Statewide program objectives to implement the service delivery requirements under Title III of the Act and any objectives established by the Commissioner through the rulemaking process.

(c) A resource allocation plan indicating the proposed use of all Title III funds directly administered by a State agency, and the distribution of Title III funds to each planning and service area.

(d) Identification of the geographic boundaries of each planning and service area.

(e) Each of the assurances required in sections 305 and 307 of the Act, and provisions that the State meets each of the requirements under §§ 1321.5 through 1321.43 of this part, and the

following assurances as prescribed by the Commissioner:

(1) Preference is given to older persons in greatest social or economic need in the provision of services under the plan;

(2) Procedures to ensure that all services under this part are provided without use of any means tests;

(3) All services provided under Title III meet any existing State and local licensure and safety requirements for the provision of those services; and

(4) Older persons are provided opportunities to contribute voluntarily to the cost of services.

1321.10 Public participation in State plan development.

The State must consider the views of older persons in developing its State plan.

§ 1321.11 Amendments to the State plan.

If the State intends to amend any provision of its plan required under § 1321.9 (a) and (e), it must submit its proposed amendment to the Commissioner for approval. If the State changes any of the provisions of its plan required under §§ 1321.9(b) through 1321.9(d), it shall amend the plan and notify the Commissioner. A State need submit only the amended portions of the plan.

§ 1321.13 Submission of a State plan to the Commissioner for approval.

Each State plan must be signed by the Governor or his/her designee and submitted to the Commissioner to be considered for approval at least 45 calendar days before the proposed effective date of the plan.

§ 1321.15 Notification of State plan approval.

(a) The Commissioner approves a State plan by notifying the Governor or his/her designee in writing.

(b) When the Commissioner proposes to disapprove a State plan, the Commissioner notifies the Governor in writing, giving the reasons for the proposed disapproval, and informs the agency that it has 60 days to request a hearing on the proposed disapproval following the procedures specified in Subpart E.

§ 1321.17 State agency administration.

(a) A State agency must have and follow written policies to carry out its activities under this part at the State and area level. A State agency must keep its policies current, and revise them as necessary.

(b) A State must have on file for review a functional statement of the manner in which an agency performs all of its functions under this part.

§ 1321.19 Confidentiality and disclosure of information.

(a) A State agency must have procedures to protect the confidentiality of information about older persons collected in the delivery of services. The procedures must ensure that no information about an older person, or obtained from an older person by a service provider or the State or area agencies, is disclosed by the provider or agency in a form that identifies the person without the informed consent of the person or of his or her legal representative, unless the disclosure is required by court order, or for program monitoring by authorized Federal, State, or local monitoring agencies.

(b) A State agency is not required to disclose those types of information or documents that are exempt from disclosure by a Federal agency under the Federal Freedom of Information Act, 5 U.S.C. 552.

Subpart C—State Agency Responsibility

§ 1321.21 Restriction on delegation of authority to other agencies.

A State or area agency may not delegate to another agency the authority to award or administer funds under this part.

§ 1321.23 Transfer between congregate and home-delivered nutrition service allotments.

(a) A State agency may, without the approval of the Commissioner, transfer between allotments up to 20 percent of a State's separate allotments for congregate and home-delivered nutrition services.

(b) A State agency may apply to the Commissioner to transfer from one allotment to the other a portion exceeding 20 percent of a State's separate allotments for congregate and home-delivered nutrition services. A State agency must:

(1) Specify the percent which a State agency proposes to transfer from one allotment to the other;

(2) Specify whether the proposed transfer is for the entire period of a State plan or a portion of a plan period; and

(3) Specify the purpose of the proposed transfer.

§ 1321.24 Intrastate funding formula.

The State agency, after consultation with all area agencies in the State, must develop and use an intrastate funding formula for the allocation of funds to area agencies under this part. The formula must reflect the proportion among the planning and service areas of persons age 60 and over in greatest economic or social need. The State agency must review and update its formula as often as a new State plan is submitted for approval.

§ 1321.25 Withdrawal of area agency designation.

(a) In carrying out section 305 of the Act, a State must withdraw the area agency designation whenever it, after reasonable notice and opportunity for a hearing, finds that—

(1) An area agency does not meet the requirements of this part;

(2) An area plan or plan amendment is not approved; or

(3) There is substantial failure in the provisions or administration of an approved area plan to comply with any provision of the Act or of this part.

(b) If a State agency withdraws an area agency's designation under paragraph (a) of this section it must—

(1) Provide a plan for the continuity of services in the affected planning and service area; and

(2) Designate a new area agency in the planning and service area in a timely manner.

(c) If necessary to ensure continuity of services in a planning and service area, the State agency may, for a period up to 180 days after its final decision to withdraw designation of an area agency—

(1) Perform the responsibilities of the area agency; or

(2) Assign the responsibilities of the area agency to another agency in the planning and service area.

(d) The Commissioner may extend the 180 day period if a State agency—

(1) Notifies the Commissioner in writing of its action under (c);

(2) Requests an extension; and

(3) Demonstrates to the satisfaction of the Commissioner a need for the extension.

§ 1321.26 Licensure and safety.

The State must ensure: (a) That, in making awards for multipurpose senior center activities, the area agency will ensure that the facility complies with all applicable State and local health, fire, safety, building, zoning and sanitation laws, ordinances or codes.

(b) The technical adequacy of any proposed alteration or renovation of a multipurpose senior center assisted under this part, by requiring that any alteration or renovation of a multipurpose senior center that affects the load bearing members of the facility

is structurally sound and complies with all applicable local or State ordinances, laws, or building codes. In absence of these codes, the State agency must assure compliance with Chapter 23 of the Uniform Building Code, or Chapter 12 of the Standard Building Code.

§ 1321.27 Designation of planning and service areas.

(a) In designating planning and service areas, a State agency must meet all the requirements in § 1321.7.

(b) Any unit of general purpose local government, region within a State recognized for areawide planning, metropolitan area, or Indian reservation may make application to the State agency to be designated as a planning and service area, in accordance with State agency procedures.

(c) A State agency must approve or disapprove any application submitted under paragraph (b) of this section.

(d) Any applicant under paragraph (b) of this section whose application for designation as a planning and service area is denied by a State agency, may appeal the denial to the State agency, under procedures specified by the State agency.

(e) If the State denies an applicant for designation as a planning and service area under paragraph (b), the State must provide a hearing on the denial of the application, if requested by the applicant, as well as issue a written decision.

§ 1321.29 Appeal to Commissioner.

This section sets forth the procedures the Commissioner follows for providing hearings to applicants for designation as a planning and service area, under § 1321.27(b), whose application is denied by the State agency.

(a) Any applicant for designation as a planning and service area under § 1321.27(b) whose application is denied, and who has been provided a hearing and a written decision by the State agency, may appeal the denial to the Commissioner in writing within 30 days following receipt of a State's hearing decision.

(b) The Commissioner holds a hearing, and issues a written decision, within 60 days following receipt of an applicant's written request to appeal the State agency hearing decision to deny the applicant's request under § 1321.27(b).

(c) When the Commissioner receives an appeal, the Commissioner requests the State Agency to submit:

(1) A copy of the applicant's application for designation as a planning and service area;

(2) A copy of the written decision of the State; and

(3) Any other relevant information the Commissioner may require.

(d) The procedures for the appeal consist of—

(1) Prior written notice to the applicant and the State agency of the date, time and location of the hearing;

(2) The required attendance of the head of the State agency or designated representatives;

(3) An opportunity for the applicant to be represented by counsel or other representative; and

(4) An opportunity for the applicant to be heard in person and to present documentary evidence.

(e) The Commissioner may—

(1) Deny the appeal and uphold the decision of a State agency;

(2) Uphold the appeal and require a State agency to designate the applicant as a planning and service area; or

(3) Take other appropriate action, including negotiating between the parties or remanding the appeal to the State agency after initial findings.

(f) The Commissioner upholds the decision of the State agency if it followed the procedures specified in § 1321.27, and the hearing decision is not manifestly inconsistent with the purposes of this part.

(g) The Commissioner's decision to uphold the decision of a State agency does not extend beyond the period of the approved State plan.

§ 1321.31 Interstate planning and service area.

(a) Before requesting permission of the Commissioner to designate an interstate planning and service area, the Governor of each State must execute a written agreement that specifies the State agency proposed to have lead responsibility for administering the programs within the interstate planning and service area and lists the conditions, agreed upon by each State, governing the administration of the interstate planning and service area.

(b) The lead State must request permission of the Commissioner to designate an interstate planning and service area.

(c) The lead State must submit the request together with a copy of the agreement as part of its State plan or as an amendment to its State plan.

(d) Prior to the Commissioner's approval for States to designate an interstate planning and service area, all applicable requirements and procedures in §§ 1321.7, 1321.27, and 1321.29 of this part, must be met.

(e) If the request is approved, the Commissioner increases the allotment of the State with lead responsibility for administering the programs within the area and reduces the allotment(s) of the State(s) without lead responsibility by one of these methods:

(1) Reallotment of funds in proportion to the number of individuals age 60 and over for that portion of the interstate planning and service area located in the State without lead responsibility; or

(2) Reallotment of funds based on the intrastate funding formula of the State(s) without lead responsibility.

§ 1321.33 Single State planning and service area.

(a) The Commissioner approves the application of a State which was, on or before October 1, 1980, a single planning and service area, to continue as a single planning and service area if the State agency demonstrates that:

(1) The State is not already divided for purposes of planning and administering human services; or

(2) The State is so small or rural that the purposes of this part would be impeded if the State were divided into planning and service areas; and

(3) The State agency has the capacity to carry out the responsibilities of an area agency, as specified in the Act.

(b) Prior to the Commissioner's approval for a State to continue as a single planning and service area, all the requirements and procedures in §§ 1321.7, 1321.27, and 1321.29 must be met.

(c) If the Commissioner approves a State's application under paragraph (a) of this section:

(1) The Commissioner notifies the State agency to develop a single State planning and service Area Plan which meets the requirements of sections 306 and 307 of the Act.

(2) A State agency must meet all the State and area agency function requirements specified in the Act.

(d) If the Commissioner denies the application because a State fails to meet the criteria or requirements set forth in paragraphs (a) or (b) of this section, the Commissioner notifies the State that it must follow procedures in section 305(A)(1)(E) of the Act to divide the State into planning and service areas.

Subpart D—Service Requirements

§ 1321.35 Area agency subgrants or contracts.

The State agency may not require the area agency to submit to it for prior review or approval any proposed subgrants or contracts with public or private nonprofit agencies or organizations.

§ 1321.37 Greatest economic or social need preference.

Each area agency on aging must establish priorities and methods for serving older persons with greatest economic or social need. Such methods may include location of services and specialization in the types of services most needed by these groups to meet this requirement. However, means tests may not be used.

§ 1321.39 Service contributions.

This section applies to the requirements and procedures for collecting contributions.

(a) Each service provider must:

(1) Provide each older person with an opportunity to contribute voluntarily to the cost of the service;

(2) Protect the privacy of each older person with respect to his or her contribution;

(3) Establish appropriate procedures to safeguard and account for all contributions;

(4) Use all supportive services contributions only to expand the services provided under this part; and

(5) Use all nutrition services contributions only to expand services as provided under section 307(a)(13)(C)(ii) of the Act.

(b) Each service provider may develop a suggested contribution schedule for services provided under this part. In developing a contribution schedule, the provider must consider the income ranges of older persons in the community and the provider's other source of income. However, means tests may not be used.

(c) A service provider that receives funds under this part may not deny any older person a service because the older person will not or cannot contribute the cost of the service.

§ 1321.41 Home-delivered nutrition services.

The area agency may award home-delivered nutrition services funds under this part to provide meals and other nutrition services as follows:

(a) Eligibility—

(1) A person age 60 or over who is homebound by reason of illness, incapacitating disability, or is otherwise isolated, is eligible to receive a home delivered meal;

(2) The spouse of the older person, regardless of age or condition, may receive a home-delivered meal if, according to criteria determined by the area agency, receipt of the meal is in the best interest of the homebound older person.

(b) Selection of home-delivered meals providers—

(1) The area agency may make awards for home-delivered nutrition services to a provider that furnishes either or both congregate or home delivered nutrition services.

(2) The area agency, to the extent feasible, must give preference in making awards for home-delivered nutrition services to providers that meet the requirements of section 307(a)(13)(H) of the Act.

(c) Each provider must:

(1) With the consent of the older person, or his or her representative, bring to the attention of appropriate officials for follow-up, conditions or circumstances which place the older person or the household in imminent danger;

(2) Where feasible and appropriate, make arrangements for the availability of meals to older persons in weather related emergencies;

(3) Assist participants in taking advantage of benefits under other programs.

§ 1321.43 Legal services.

This section applies to conditions legal service providers must meet to provide legal services under section 307(a)(15) of the Act.

(a) The area agency must award funds to the legal services provider(s) that most fully meet the standards in this subsection. The legal services provider(s) must—

(1) Have staff with expertise in specific areas of law affecting older persons in economic or social need, for example, public benefits, institutionalization and alternatives to institutionalization;

(2) Demonstrate the capacity to provide effective administrative and judicial representation in the areas of law affecting older persons with economic or social need;

(3) Demonstrate the capacity to provide support to other advocacy efforts, for example, the long-term care ombudsman program;

(4) Demonstrate the capacity to deliver legal services to institutionalized, isolated, and homebound older individuals effectively; and

(5) Demonstrate the capacity to provide legal services in the principal language spoken by clients in areas where a significant number of clients do not speak English as their principal language.

(b) Under the Older Americans Act and these implementing regulations, each legal service provider and its attorneys and employees must comply with the following regulations promulgated under the Legal Services Corporation Act. This paragraph (b) explains how HHS proposes to adapt regulations in 45 CFR Chapter XVI. If HHS publishes a rule, the adapted text will be codified and published in full in this subchapter.

(1) 45 CFR Part 1604—Outside Practice of Law, except that: (i) In § 1604.1, "Act" is replaced by "Older Americans Act."

(ii) In § 1604.2, "recipient" is replaced by "provider" and "the Corporation" is replaced by "Older Americans Act funds."

(2) 45 CFR Part 1608—Prohibited Political Activities, except that:

(i) "Corporation" in § 1608.1 and § 1608.2 is replaced by "Older Americans Act".

(ii) "recipient" in § 1608.2 and § 1608.3 is replaced by "provider".

(iii) Section 1608.3(a) shall read: "No provider shall use any political test or qualification in making any decision, taking any action, of performing any function under the Older Americans Act". Section 1608.3(b) shall read: "No provider shall contribute or make available Older Americans Act funds, or any personnel or equipment . . . referendum".

(iv) In § 1608.4(a) "Corporation or a" is deleted and "recipient" is replaced by "provider".

(v) As first used in § 1608.4(b), "Corporation" is replaced by "Older Americans Act." "Corporation of a" is deleted and "recipient" is replaced by "provider".

(vi) In § 1608.5 "Act" is replaced by "Older Americans Act", "Corporation" is replaced by "area agency on aging" and "recipient" is replaced by "provider".

(vii) In § 1608.6 "Act" is replaced by "Older Americans Act".

(3) 45 CFR Part 1609—Fee-Generating Cases, except that: (i) "recipient" is replaced by "provider" in all sections.

(ii) "Corporation" in § 1609.3 is replaced by "Older Americans Act".

(iii) "Act" in § 1609.5(a)(2) is replaced by "Older Americans Act", and "Corporation" is replaced by "area agency on aging".

(4) 45 CFR Part 1612—Restriction on Certain Activities, except that:

(i) "recipient" is replaced by "provider".

(ii) "Corporation" in § 1612.1(b) is replaced by "Older Americans Act".

(iii) "Act" in § 1612.2 is replaced by "Older Americans Act". "Corporation" in § 1612.2(b)(1)(iii) is replaced by the word "these".

(iv) "Corporation" in § 1612.4(a) is replaced by "Older Americans Act". In § 1612.4(a)(3) "Act" is replaced by

"Older Americans Act" and "Corporation" is replaced by "area agency on aging". Corporation in § 1012.4(d)(3) is replaced by "area agency on aging".

(v) "Area agency on aging" replaces "Corporation" in § 1012.5(a) shall read: "The area agency on aging shall have authority in accordance with its procedures": (references to Part 1000 and Part 1623 of these regulations are stricken). In § 1012.5(b), the phrase "consistent with the notice and hearing requirements of section 1011 of the Act", is stricken. In § 1012.5(b)(3), "General Counsel of the Corporation" is replaced with "area agency on aging".

(c) A legal service provider may not require an older person to disclose information about income or resources as a condition for providing legal services under this part.

(d) A legal service provider may ask about the person's financial circumstances as a part of the process of providing legal advice, counseling and representation, or for the purpose of identifying additional resources and benefits for which an older person may be eligible.

(e) Nothing in this section is intended to prohibit an attorney or staff attorney from providing any form of legal assistance to an eligible client, or to interfere with the fulfillment of any attorney's professional responsibilities to a client.

Subpart E—Hearing Procedures for State Agencies

§ 1321.45 Scope.

(a) Hearing procedures for State plan disapproval, as provided for in section 307(c) and section 307(d) of the Act are subject to the provisions of 45 CFR Part 213 with the following exceptions:

(1) Section 213.1(a); § 213.32(d); and § 231.33 do not apply.

(2) Reference to SRS Hearing Clerk shall be read to mean HDS Hearing Clerk.

(3) References to Administrator shall be read to mean Commissioner on Aging.

(b) Instead of the scope described in § 213.1(a), hearing procedures described in this subpart apply to nature and opportunity for a hearing on:

(1) Disapproval of a State plan or amendment;

(2) Determination that a State agency does not meet the requirements of this part;

(3) Determination that there is a failure in the provisions or the administration of an approved plan to comply substantially with Federal requirements.

§ 1321.47 When a decision is effective.

(a) The Commissioner's decision specifies the effective date for AoA's reduction and witholding of the State's grant. This effective date may not be earlier than the date of the Commissioner's decision or later than the first day of the next calendar quarter.

(b) The decision remains in effect unless reversed or stayed on judicial appeal, or until the agency or the plan is changed to meet all Federal requirements, except that the Commissioner may modify or set aside his or her decision before the record of the proceedings under this subpart is filed in court.

§ 1321.49 How the State may appeal.

A State may appeal to the U.S. Court of Appeals which has jurisdiction in the State the final decision of the Commissioner disapproving the State plan or plan amendment, finding noncompliance, or finding that a State agency does not meet the requirements of this part. The State must file the appeal within 30 days of the Commisioner's final decision.

§ 1321.51 How the Commissioner may reallot the State's withheld payments.

The Commissioner disburses funds withheld from the State directly to any public or nonprofit private organization or agency, or political subdivision of the State, that has the authority and capacity to carry out the functions of the State agency and submits a State plan which meets the requirements of this part and which contains an agreement to meet the non-federal share requirements.

2. In Subchapter C, Part 1328 is revised to read as follows:

PART 1328—GRANTS TO INDIAN TRIBES FOR SUPPORTIVE AND NUTRITIONAL SERVICES

Sec.

1328.1 Basis and purpose of part.
1328.3 Definitions.
1328.5 Applicability of other regulations.
1328.7 Confidentiality and disclosure of information.
1328.9 Contributions.
1328.11 Prohibition against supplantation.
1328.13 Optional services.
1328.15 Nutrition services.
1328.17 Information and referral.
1328.19 Application requirements.
1328.21 Application approval.
1328.23 Hearing procedures.

Authority: Title VI of the Older Americans Act (42 U.S.C. 3057).

§ 1328.1 Basis and purpose of part.

This part implements Title VI of the Older Americans Act, as amended, by establishing the requirements that an Indian tribal organization must meet in order to receive a grant to provide supportive and nutrition services to older Indians and to acquire, alter, or renovate a facility for use as an Indian multipurpose senior center. This part also prescribes application and hearing requirements and procedures for these grants.

§ 1328.3 Definitions.

"Acquiring," as used in section 307(a)(14) of the Act, means obtaining ownership of an existing facility in fee simple or by lease for 10 years or more for use as a multipurpose senior center.

"Act" means the Older Americans Act of 1965, as amended.

"Altering" or "renovating," as used in section 307(a)(14) of the Act with respect to multipurpose senior centers, means making modifications to or in connection with an existing facility which are necessary for its effective use as a center. These may include renovation, repair, or expansion which is not in excess of double the square footage of the original facility and all physical improvements.

"Budget period," as used in § 1328.19 of this part, means the intervals of time into which a period of assistance (project period) is divided for budgetary and funding purposes.

"Department," means the Department of Health and Human Services.

"Indian reservation," means the reservation of any Federally recognized Indian tribe, including any band, nation, pueblo, or rancheria, any former reservation in Oklahoma, any community on non-trust land under the jurisdiction of an Indian tribe, including a band, nation, pueblo, or rancheria, with allotted lands or lands subject to a restriction against alienation imposed by the United States, and Alaskan Native regions established, pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688).

"Indian tribe," means any Indian tribe, band, nation, or organized group or community, including any Alaska Native Village, regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement act (85 Stat. 688) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians (25 U.S.C. 450b).

"Means test," as used in the provision of services, means the use of an older Indian's income or resources to deny or limit that person receipt of services under this part.

"Older Indians," as used in § 1328.9 and elsewhere in this part, means those individuals who have attained the minimum age as identified by the tribe for services under section 603 of the Act.

"Project period," as used in § 1328.19 of this part, means the total time for which a project is approved for support, including any extensions.

"Service area," as used in § 1328.9(b) and elsewhere in this part, means that geographic area approved by the Commissioner in which the tribal organization provides supportive and nutritional services to older Indians residing there. A service area may include all or part of the reservation and any portion of a county or counties which have a common boundary with the reservation. A service area may also include a non-contiguous area is the designation of such an area will further the purpose of the Act and will provide for more effective administration of the program by the tribal organization.

"Service provider," means any entity that is awarded a subgrant or contract from a tribal organization to provide services under this part.

"Tribal organization," as used in § 1328.7 and elsewhere in this part, means the recognized governing body of any Indian tribe, or any legally established organization of Indians which is controlled, sanctioned or chartered by such governing body or which is democratically elected by the adult members of the Indian community to be served by such organization and which includes the maximum participation of Indians in all phases of its activities. Provided that in any case where a contract is let or grant made to an organization to perform services benefiting more than one Indian tribe, the approval of each Indian tribe shall be a prerequisite to the letting or making of the contract or grant. (25 U.S.C. 450b).

§ 1328.5 Applicability of other regulations.

The following regulations in Title 45 of the Code of Federal Regulations apply to all activities under this part:

(a) Part 16—Procedures of the Departmental Grant Appeals Board;

(b) Part 74—Administration of Grants, except subpart N;

(c) Part 75—Informal Grant Appeals Procedures;

(d) Part 80—Nondiscrimination Under Programs Receiving Federal Assistance through the Department of Health and Human Services: Effectuation of Title VI of the Civil Rights Act of 1964;

(e) Part 81—Practice and procedures for hearings under Part 80; and

(f) Part 84—Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving Benefits from Federal Financial Participation.

§ 1328.7 Confidentiality and disclosure of information.

A tribal organization must have confidentiality and disclosure procedures as follows:

(a) A tribal organization must have procedures to ensure that no information about an older Indian, or obtained from an older Indian by any provider of services is disclosed by the provider of such services in a form that identifies the person without the informed consent of the person or of his or her legal representative, unless the disclosure is required by court order, or for program monitoring by authorized Federal or tribal monitoring agencies.

(b) A tribal organization is not required to disclose those types of information or documents that are exempt from disclosure by a Federal agency under the Federal Freedom of Information Act, 5 U.S.C. 552.

§ 1328.9 Contributions.

(a) Each tribal organization must—

(1) Provide each older Indian with a free and voluntary opportunity to contribute to the cost of the service;

(2) Protect the privacy of each older Indian with respect to his or her contribution;

(3) Establish appropriate procedures to safeguard and account for all contributions;

(4) Use all supportive services contributions to expand the services provided under this part; and

(5) Use all nutrition services contributions only to expand services as provided under section 307(a)(13)(c)(ii) of the Act.

(b) Each tribal organization may develop a suggested contribution schedule for services provided under this part. In developing a contribution schedule, the tribal organization must consider the income ranges of older Indians in the service area and the tribal organization's other sources of income. However, means tests may not be used.

(c) A tribal organization that receives funds under this part may not deny any older Indian a service because the older Indian will not or cannot contribute to the cost of the service.

§ 1328.11 Prohibition against supplantation.

A tribal organization must ensure that the activities provided under a grant under this part will be in addition to, and not in substitution for, comparable activities provided without Federal assistance.

§ 1328.13 Optional services.

(a) A tribal organization may provide all the services mentioned under Part B, of the Older Americans Act, and any other supportive services that are necessary for the general welfare of older Indians.

(b) If an applicant elects to provide multipurpose senior center activities or uses any of the funds under this part for acquiring, altering or renovating a multipurpose senior center facility, it must comply with the following requirements:

(1) The tribal organization must comply with all applicable local health, fire, safety, building, zoning and sanitation laws, ordinances or codes.

(2) The tribal organization must assure the technical adequacy of any proposed alteration or renovation of a multipurpose senior center assisted under this part. The tribal organization assures technical adequacy by requiring that any alteration or renovation of a multipurpose senior center that affects the load bearing members of the facility is structurally sound and complies with all applicable local or State ordinances, laws, or building codes. In absence of these codes, the tribal organization must assure compliance with Chapter 23 of the Uniform Building Code, or Chapter 12 of the Standard Building Code.

(c) If an applicant elects to provide legal services, it must substantially comply with the requirements in § 1321.43(a) and legal services providers must comply fully with the requirements in § 1321.43(b).

§ 1328.15 Nutrition services.

(a) In addition to providing nutrition services to older Indians, a tribal organization may—

(1) Provide nutrition services to the spouses of older Indians;

(2) Provide nutrition services to non-elderly handicapped or disabled Indians who reside in housing facilities occupied primarily by the elderly, at which congregate nutrition services are provided; and

(3) Offer a meal, on the same basis as meals are provided to older Indians, to individuals providing volunteer services during meal hours.

(b) Each tribal organization is entitled to receive cash payments in lieu of donated foods for all or any portion of its entitlement available under section 311(a)(4) of the Act.

(1) To receive cash or commodities, the tribal organization must have an agreement to be a distributing agency with the U.S. Department of Agriculture's Food and Nutrition Service (FNS).

(2) The tribal organization must comply with the requirements of 7 CFR Part 250 General Regulations and Policies-Food Distribution, for participation in USDA programs.

(c) Where applicable, the tribal organization must work with agencies responsible for administering other programs to facilitate participation of older Indians.

§ 1328.17 Information and referral.

A tribal organizations must—

(a) Establish or have a list of all services that are available to older Indians in the service area.

(b) Maintain a list of services needed or requested by the older Indians; and

(c) Provide assistance to older Indians to help them take advantage of available services.

§ 1328.19 Application requirements.

A tribal organization must have an approved application. The application must be submitted as prescribed in section 604 of the Act and in accordance with the Commissioner's instructions for the specified project and budget periods. The application must provide for—

(a) Program objectives, as set forth in section 604(a)(5) of the Act, and any objectives established by the Commissioner;

(b) A description of the geographic boundaries of the service area proposed by the tribal organization;

(c) Documentation of the ability of the tribal organization to deliver supportive and nutrition services to older Indians, or documentation that the tribal organization has effectively administered supportive and nutrition services within the last 3 years;

(d) Assurances as prescribed by the Commissioner, including assurances that—

(1) A tribal organization has methods and procedures to ensure that older Indians represented under the grant do not receive services under Part 1321 for the period of the grant;

(2) A tribal organization represents at least 75 individuals who have attained 60 years of age or older;

(3) A tribal organization will comply with all applicable State and local licensure and safety requirements for the provision of those services;

(4) If a substantial number of the older Indians residing in the service area are of limited English-speaking ability, the tribal organization will utilize the services of workers who are fluent in the language spoken by a predominant number of older Indians;

(5) Procedures to ensure that all services under this part are provided without use of any means tests; and

(6) A tribal organization will comply with all requirements set forth in §§ 1328.7 through 1328.17.

(e) A tribal resolution(s) authorizing the tribal organization to apply for a grant under this part; and

(f) Signature by the principal official of the tribe.

§ 1328.21 Application approval.

Approval of any application under section 604(e) of the Act, shall not commit the Commissioner in any way to make additional, supplemental, continuation, or other awards with respect to any approved or portion thereof.

§ 1328.23 Hearing procedures.

In meeting the requirements of section 604(d)(3) of the Act, if the Commissioner disapproves an application from an eligible tribal organization, the tribal organization may file a written request for a hearing with the Commissioner.

(a) The request must be postmarked or delivered in person within 30 days of the date of the disapproval notice. If it requests a hearing, the tribal organization must submit to the Commissioner, as part of the request, a full written response to each objection specified in the notice of disapproval, including the pertinent facts and reasons in support of its response, and any and all documentation to support its position. Service of the request must also be made on the individual(s) designated by the Commissioner to represent him or her.

(b) The Administration on Aging will have the opportunity to respond within 30 days to the merits of the tribal organization's request.

(c) The Commissioner notifies the tribal organization in writing of the date, time and place for the hearing.

(d) The hearing procedures include the right of the tribal organization to—

(1) A hearing before the Commissioner or an official designated by the Commissioner;

(2) Be heard in person or to be represented by counsel, at no expense to the Administration on Aging;

(3) Present written evidence prior to and at the hearing, and present oral evidence at the hearing if the Commissioner or designated official decides that oral evidence is necessary for the proper resolution of the issues involved, and

(4) Have the staff directly responsible for reviewing the application either present at the hearing, or have a deposition from the staff, whichever the Commissioner or designated official decides.

(e) The Commissioner or designated official conducts a fair and impartial hearing, takes all necessary action to avoid delay and to maintain order and has all powers necessary to these ends.

(f) Formal rules of evidence do not apply to the hearings.

(g) The official hearing transcript together with all papers, documents, exhibits, and requests filed in the proceedings, including rulings, constitutes the record for decision.

(h) After consideration of the record, the Commissioner or designated official issues a written decision, based on the record, which sets forth the reasons for the decision and the evidence on which it was based. The decision is issued within 60 days of the date of the hearing, constitutes the final administrative action on the matter and is promptly mailed to the tribal organization.

(i) Either the tribal organization or the staff of the Administration on Aging may request for good cause an extension of any of the time limits specified in this section.

Department of the Interior

Office of the Secretary

Onshore Minerals Management; Regulations and Notice of Transfer of Functions

DEPARTMENT OF THE INTERIOR

Office of the Secretary

30 CFR Parts 200, 211, 221, 226, 231, 270, 271, and 290

Transfer of Responsibility and Authority

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of transfer of functions.

SUMMARY: On December 3, 1982, the Secretary of the Interior issued an order transferring all onshore minerals management functions of the Minerals Management Service (MMS), not relating to royalty management, to the Bureau of Land Management (BLM). Those functions are governed by the regulations cited above. They are now the responsibility of the BLM and until the regulations can be adequately modified to reflect this change they will be administered by and through the Director, Bureau of Land Management, with regard to onshore minerals management other than royalty management activities. Otherwise all actions and authorities shall continue under the regulations and operating procedures as written.

FOR FURTHER INFORMATION CONTACT: George F. Brown, Deputy Associate Director, Onshore Minerals Operations, (703) 860–6483, or Dale E. Zimmerman, Assistant to the Deputy Director for Energy and Minerals Resources, (202) 343–4437.

SUPPLEMENTARY INFORMATION: On December 3, 1982, the Secretary of the Interior issued Order No. 3087. This Order was amended on February 7, 1983, and is published elsewhere in this issue of the **Federal Register**. The order as amended consolidates all onshore minerals management functions on Federal and Indian lands, in the Bureau of Land Management. The elements of the rules which relate to royalty management are not transferred and remain the responsibility of the Minerals Management Service. The authorization is restated below. Because the onshore operating regulations of Title 30 CFR Chapter II, vest authority and responsibility in specifically designated officials of the Department and those officials no longer are located within the organization cited, this notice is necessary.

Until the operating portions of the above regulations are redesignated as rules administered by the Director, Bureau of Land Management, in Title 43 of the CFR, all functions, authorities and responsibilities will continue to be performed and enforced by the appropriate field personnel under the authorities cited in each Part and Secretarial Order 3087, as amended. On all matters relating to minerals management, except royalty management, reference to the Director in the cited regulations shall mean the Director, Bureau of Land Management, and reference to Assistant Secretary, Shall mean Assistant Secretary, Land and Water Resources. The regulations in Title 30 CFR will be redesignated and modified as expeditiously as possible.

Under the authority of 5 U.S.C. 301, effective December 3, 1982 the Directors, Bureau of Land Management and Minerals Management Service are each hereby authorized to administer the provision in Parts 200, 211, 221, 226, 231, 270, and 271, Title 30 of the Code of Federal Regulations which relate to their respective responsibilities as delegated in Order No. 3087, as amended. The Director, Bureau of Land Management is also authorized to administer Part 290 of Title 30 of the Code of Federal Regulations as it relates to appeals of non-royalty decisions pertaining to onshore Federal lands.

Dated: February 22, 1882.

Richard R. Hite,

Deputy Assistant Secretary of the Interior.

[FR Doc. 83–5240 Filed 3–1–83; 8:45 am]

BILLING CODE 4310–10–M

DEPARTMENT OF THE INTERIOR

Transfer of Minerals Management Functions

This notice is issued in accordance with the provisions of 5 U.S.C. 552(a)(1). On December 3, 1982 and February 7, 1983, the Secretary of the Interior issued orders which abolished the Minerals Management Board and consolidated the onshore minerals management functions of the Department. The orders effecting these changes are published in their entirety below.

Additional information may be obtained from Richard R. Hite, Deputy Assistant Secretary—Policy, Budget and Administration, Department of the Interior, Washington, D.C. 20240, telephone 202-343-4502.

Dated: February 22, 1983.

Richard R. Hite,

Deputy Assistant Secretary of the Interior.

Order No. 3087

Subject: Organizational Restructuring of the Department of the Interior Minerals Management Functions.

Section 1. *Purpose.* The purpose of this Order is to abolish the Minerals Management Board, to describe the permanent organizational placement of the Minerals Management Service (MMS) and to consolidate onshore minerals management functions. This organizational restructuring will consolidate minerals management functions to achieve management efficiencies and to integrate multiple land use responsibilities to permit comprehensive resource planning and management.

Section 2. *Authority.* This Order is issued in accordance with the authority provided by Section 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262).

Section 3. *Minerals Management Board.* The Minerals Management Board, established by Secretarial Order 3071, January 19, 1982, is abolished.

Section 4. *Organizational Placement.* The Minerals Management Service reports to the Assistant Secretary—Energy and Minerals, who exerises Secretarial direction and supervision over the MMS.

Section 5. *Transfer of Functions.* All functions related to royalty and mineral revenue management, including collection and distribution, within the Bureau of Land Management (BLM) are the responsibility of the MMS. All MMS onshore minerals management functions on non-Indian lands, including resource evaluation, approval of drilling permits and mining or production plans, inspection and enforcement, are transferred to the BLM. Those functions now performed by the MMS which are being transferred to the BLM will, in the case of their application to Indian lands, be similarly transferred from the MMS to the Bureau of Indian Affairs.

This Order does not change the responsibilities of the Office of Surface Mining Reclamation and Enforcement under the Surface Mining Control and Reclamation Act.

Section 6. *Revocation.* Secretarial Order No. 2948, dated October 6, 1972, Division of Responsibility Between the BLM and the USGS for Administration of the Mineral Leasing Laws—Onshore, is hereby revoked.

Section 7. *Administrative Provisions.* The Assistant Secretary—Policy, Budget and Administration, will take appropriate steps to effect the transfer of administrative and other functions, personnel, funds and property to implement the provisions of this Order.

Section 8. *Effective Date.* This Order is effective immediately. Its provisions will remain in effect until publication of the Departmental Manual or until it is amended, superseded or revoked, whichever occurs first. However, in the absence of the foregoing actions, the provisions of this Order will terminate and be considered obsolete on June 1, 1983.

Dated: December 3, 1982.

James G. Watt,

Secretary of the Interior.

Order No. 3087, Amendment No. 1

Subject: Organizational Restructuring of the Department of the Interior Minerals Management Functions.

Section 5 of the Secretary's Order No. 3087, dated December 3, 1982, is amended to read as follows:

"Sec. 5. *Transfer of Functions.* All functions related to royalty and mineral revenue management are the responsibility of the Minerals Management Service. Those collection and distribution functions within the Bureau of Land Management which are related to royalty and mineral revenue management are transferred to the Minerals Management Service. All Minerals Management Service onshore minerals management functions on Federal and Indian lands, including resource evaluation, approval of drilling permits and mining or production plans, inspection and enforcement, are transferred to the Bureau of Land Management.

"This Order does not change the responsibilities of the Office of Surface Mining Reclamation and Enforcement under the Surface Mining Control and Reclamation Act."

Dated: February 7, 1983.

Jim Watt,

Secretary of the Interior.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 43
Thursday, March 3, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 52

United States Standards for Grades of Orange Juice; Correction

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule; correction.

SUMMARY: This document corrects a portion of the USDA's amendment to the United States Standards for Grades of Orange Juice appearing on pages 55455–55463 in the **Federal Register** of December 10, 1982, with respect to soluble orange solids in sweetened canned orange juice and with respect to color in orange juice from concentrate.

EFFECTIVE DATE: March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Jennings, Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 447–6247.

SUPPLEMENTARY INFORMATION: This document corrects a portion of the USDA's amendment to the United States Standards for Grades of Orange Juice appearing on pages 55455–55463 in the **Federal Register** of December 10, 1982, with respect to soluble orange solids in sweetened canned orange juice and with respect to color in orange juice from concentrate. Errors appear in Table I and in Table VIII. Table I should not specify a minimum soluble orange solids requirement and Table VIII should specify different requirements under very good color and under good color.

PART 52—[AMENDED]

§ 52.1557 [Corrected]

Accordingly, Table I in the United States Standards for Grades of Orange Juice, § 52.1557, is corrected to remove "soluble orange solids, exclusive of sweetener (percent by weight of finished product): Minimum. 10.5 and 10.0." Table VIII of the standards is corrected to read:

Color	Very good. (Not as good as OJ 5 but much better than OJ 6).	Good. (Fails Grade A, but not off color)

These changes are made only to make corrections in the amendment. It has been determined that good cause is found, under the administrative procedure provision of 5 U.S.C. 533, that notice and other public procedure with respect to this correction are impracticable and unnecessary. Furthermore, good cause is found for making this correction effective upon publication in the **Federal Register.**

(Agricultural Marketing Act of 1946, Secs. 203, 205, 60 Stat. 1087, as amended, 1090, as amended (7 U.S.C. 1622, 1625)).

Done at Washington, D.C. on February 28, 1983.

Eddie F. Kimbrell,
Deputy Administrator, Commodity Services.

[FR Doc. 83-5436 Filed 3-2-83; 8:45 am]
BILLING CODE 3410-02-M

7 CFR Part 906

Oranges and Grapefruit Grown in Texas; Special Purpose Exemption

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim rule with request for comments.

SUMMARY: This interim rule permits handling of smaller size grapefruit for conversion into fresh juice under certain conditions including the requirements that such grapefruit pack 64 count in 7/10 bushel cartons and grade at least U.S. No. 1. Such action is designed to develop a fresh juice outlet for smaller size grapefruit.

DATES: Interim rule effective February 28, 1983, through March 31, 1983. Comments which are received by March 15, 1983, will be considered prior to issuance of a final rule to become effective April 1, 1983.

ADDRESS: Send two copies of comments to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This interim rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the Texas grapefruit crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This interim rule is issued under the marketing agreement, as amended, and Order No. 906, as amended (7 CFR Part 906), regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Texas Valley Citrus Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting or recordkeeping provisions that are included in this interim rule have been or will be submitted for approval to the Office of Management and Budget (OMB). They are not effective until OMB approval has been obtained.

This interim rule revises the administrative rules for Texas grapefruit (Subpart—Rules and Regulations), to permit the use of smaller sized grapefruit for fresh juice (juice prepared without pasteurization or preservative treatment). Under this marketing order, fresh grapefruit shipments are subject to minimum grade and size requirements. Under the order grapefruit used for fresh juice (fruit for conversion into juice without pasteurization or preservative treatment) are considered fresh shipments and therefore are subject to

the marketing order requirements. The interim rule would permit the use of smaller sized grapefruit for fresh juice, with appropriate safeguards. The objective of this action is to encourage use of Texas grapefruit for fresh (not pasteurized) juice. The Texas citrus industry is experiencing difficulty in marketing its grapefruit crop this season, particularly in the processing sector. Therefore, they are attempting to develop a new outlet for the fruit. The Texas Valley Citrus Committee met on January 25, 1983, and recommended this action.

It is found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date of this interim rule until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that the time intervening between the date when information upon which this interim rule is based became available and the time when this interim rule must become effective in order to effectuate the declared policy of the Act is insufficient. It is necessary to effectuate the declared purposes of the Act to make this interim rule effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 906

Marketing agreement and orders, Oranges, Grapefruit, Texas.

Therefore, Subpart—Rules and Regulations (§§ 906.120–906.151) are amended as follows (this interim rule expires March 31, 1983, and will not be published in the annual Code of Federal Regulations):

1. Section 906.120(b) is amended by revising the last sentence to read as follows:

§ 906.120 Fruit exempt from regulations.

* * * * *

(b) * * * Fruit for conversion into juice without pasteurization or preservative treatment, as herein described, shall be deemed fresh fruit and subject to all regulations under this part unless handled in accordance with § 906.124.

* * * * *

2. A new § 906.124 is added to read as follows:

§ 906.124 Grapefruit for fresh juice.

During the period February 28, 1983, through March 31, 1983, any handler may, without regard to § 906.40 and the regulations issued thereunder, handle grapefruit for conversion into juice without pasteurization or preservative treatment, under the following conditions:

(a) Grade, size, container, and inspection requirements:

(1) Such grapefruit shall grade at least U.S. No. 1.

(2) Such grapefruit shall be packed 64 count in 7/10 bushel cartons: *Provided,* That the diameter range shall be from 3 inches to 3⅝ inches.

(3) Such grapefruit shall meet pack requirements as specified in (a)(1)(ii) of § 906.340 (47 F.R. 56311): *Provided,* That such cartons shall be prominently marked with the words "For Juice Only" on both end panels of the carton in letters not less than ¾ inch high.

(4) Such grapefruit shall be shipped only if an appropriate inspection certificate has been issued for such fruit within 48 hours prior to the time of shipment.

(5) Such grapefruit shall be shipped by the handler directly to an approved juicer as provided in paragraph (b) of this section, and such grapefruit shall not be offered for resale or otherwise diverted into normal channels of trade for fresh fruit, and shall be used only for conversion into juice.

(6) *Terms:* The term U.S. No. 1 shall mean the same as in the U.S. Standards for Grades of Grapefruit, Texas and States other than Florida, California, and Arizona, (7 CFR 51.620–51.653); and the term 7/10 bushel carton shall mean a closed fully telescopic fiberboard carton with inside dimensions of 16½ × 10¾ × 9½ inches, described in Freight Container Tariff 2G as container No. 6506.

(b) Reporting and recordkeeping requirements are as follows:

(1) *Approved Juicer.* Any person who desires to acquire 64 count grapefruit as an approved juicer shall, prior thereto, file an application with the committee on a form approved by it, which shall contain, but not be limited to, the following information: name and address of applicant; location of store or stores where conversion is to take place, approximate quantity of 64 count grapefruit to be used each month; a statement that the grapefruit will be used only for conversion into fresh juice at the store, and will not be resold or disposed of in fresh fruit channels; and agree to submit such reports as are required by the committee. Such application shall be investigated by the committee staff. After such investigation, the staff shall report its findings to the committee or to its delegated subcommittees. Based upon the staff report and other information, the committee, or its delegate, shall approve or disapprove the application and notify the applicant accordingly. If the application is approved, the applicant's name shall be placed on the list of approved juicers.

(2) *Certification by approved juicer.* Upon request of the committee, each approved juicer shall submit to the committee on or before the 10th day of each month a report of the 64 count grapefruit used during the preceding calendar month. Each report shall contain a certification to the United States Department of Agriculture and to the committee as to the truthfulness of the information shown therein.

(3) *Disqualification.* The committee or delegated subcommittee, may suspend or revoke permission to handle grapefruit as an approved juicer whenever a juicer uses grapefruit inconsistent with these provisions.

(4) *Diversion report.* (i) Each handler who ships 64 count grapefruit to approved juicers for conversion shall report to the committee on a diversion report the following: name and address of the juicer's place of business where the 64 count grapefruit was shipped; the net weight or container count of such grapefruit; truck license number or rail car initial and number; inspection certificate number; and such other information as the committee may require.

(ii) Each such handler shall prepare four copies of the diversion report and sign them. The original copy shall be submitted to the committee within seven days of shipment. One copy shall be retained by the handler. One copy shall be given to the party transporting the fruit who shall deliver it to the approved juicer. The approved juicer shall record on that copy of the diversion report the actual net weight or container count of 64 count grapefruit received and forward such copy to the committee office. One copy shall be submitted to the approved juicer along with the invoice.

(5) Handlers and approved juicers shall maintain records substantiating reports of the disposition of 64 count grapefruit filed with the committee and make such records available to authorized representatives of the committee at their business offices at any reasonable time during business hours. Records include copies of all applicable purchase orders, sales contracts, or disposition documents together with any other information which the committee may deem necessary to determine the disposition of 64 count grapefruit.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: February 28, 1983.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

---

7 CFR Part 907

[Navel Orange Reg. 568]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period March 4–March 10, 1983. Such action is needed to provide for orderly marketing of fresh navel oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: March 4, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION:

Findings

This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel orange crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This regulation is issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on September 21, 1982. The committee met again publicly on March 1, 1983 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified week. The committee reports the demand for navel oranges is light.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared policy of the Act to make this regulatory provision effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 907

Marketing agreements and orders, California, Arizona, Oranges (navel).

PART 907—[AMENDED]

1. Section 907.868 is added as follows:

§ 907.868 Navel orange regulation 568.

The quantities of navel oranges grown in California and Arizona which may be handled during the period March 4, 1983 through March 10, 1983, are established as follows:

(a) District 1: 1,300,000 cartons;
(b) District 2: Unlimited cartons;
(c) District 3: Unlimited cartons;
(d) District 4: Unlimited cartons.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 2, 1983.

D. S. Kuryloski,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Part 1944

Section 504 Rural Housing Loans and Grants

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) revises its regulation regarding Section 504 Rural Housing loans and grants to correct an error of omission. The intended effect of this revision is to make the program operable in areas where 50 percent of area median income is so low that loans cannot be authorized because there is no repayment ability. This revision will provide very-low-income families with assistance to substantially improve their living environment by removing health and safety hazards from their homes.

EFFECTIVE DATE: March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Nancy Monesson, Program Specialist, Farmers Home Administration, USDA, Room 5347, South Agriculture Building, 14th and Independence, SW., Washington, D.C. 20250, telephone (202) 382–1474.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1512–1 which implements Executive Order 12291, and has been designated nonmajor. This determination is based on the fact that there will be little, if any, increase in cost to the Government or to the borrowers affected by this regulation. The changes made will assure that very-low-income people, historically served by this program, and for whose benefit the program was designed, will not be excluded because of unintentionally restrictive language in the income eligibility requirements. This is accomplished by providing for a maximum income range for eligibility that does not go below $5,000.

The only alternative action considered was to make no change in the existing regulations, which has the effect of denying all 504 housing loans in areas where 50 percent of area median income is too low to repay a loan at one (1) percent.

FmHA has determined that an emergency situation exists which warrants publication without opportunity for a prior public comment period on this final action.

The Agency's inadvertent failure to include an adjustment in the maximum income eligibility requirement has created an undue hardship on very-low-income families. The correction will enable the Agency to continue to serve a large number of very-low-income families, excluded under the present regulation language, having no alternative means of making repairs to their homes to remove safety and health

hazards. For example: Families living in areas covered by Ponce, Puerto Rico, which includes 12 separate counties, are eligible only when their adjusted family incomes do not exceed $1,800 a year. The correction will permit the program to serve families in those areas having adjusted family incomes up to $5,000. Therefore, the decision to publish this revision as an emergency final rule without prior public comment has been determined to be in the best interest of the public.

Pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this emergency final rule are impracticable and contrary to the public interest; and good cause is found for making this emergency final rule effective less than 30 days after this document is published in the **Federal Register**.

This regulation does not directly affect any FmHA programs or projects which are subject to A–95 clearinghouse review. The Catalog of Federal Domestic Assistance program affected is: 10.417, Very Low-Income Housing Repair Loans and Grants.

This document has been reviewed in accordance with 7 CFR Part 1901, Subpart G, "Environmental Impact Statements." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Aged, Grant programs—housing and community development, Home improvement, Loan programs—housing and community development.

PART 1944—[AMENDED]

Therefore, Subpart J of Part 1944, Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

1. In § 1944.453, paragraph (l) is revised to read as follows:

§ 1944.453 Definitions.

* * * * *

(l) *Very low income.* An adjusted annual income that is 50 percent of median income for each designated area as set forth in Exhibit C to Subpart A of Part 1944 of this chapter, but not to exceed $11,500.

2. In § 1944.458, paragraph (a)(4) is revised to read as follows:

§ 1944.458 Eligibility requirements.

(a) * * *

(4) *Income.* The applicant must have an adjusted income less than that needed by a typical applicant in the area to repay a Section 502 loan with interest credit. The maximum adjusted income for eligibility is 50 percent of area median income as set forth in Exhibit C to Subpart A of Part 1944 of this chapter, or $5,000, whichever is greater, but is not to exceed $11,500.

* * * * *

(42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70)

Dated: January 7, 1983.

Michael E. Brunner,

Acting Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 238

Contracts With Transportation Lines; Addition of Rich International Airways, Inc.

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule adds Rich International Airways, Inc. to the list of carriers which have entered into agreements with the Service to guarantee the passage through the United States in immediate and continuous transit of aliens destined to foreign countries.

EFFECTIVE DATE: February 18, 1983.

FOR FURTHER INFORMATION CONTACT: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 Eye Street, NW., Washington, D.C. 20536, Telephone: (202) 633–3048.

SUPPLEMENTARY INFORMATION: This amendment to 8 CFR 238.3 is published pursuant to 5 U.S.C. 552. The Commissioner of Immigration and Naturalization Service entered into an agreement with Rich International Airways, Inc. on February 18, 1983 to guarantee passage through the United States in immediate and continuous transit of aliens destined to foreign countries.

The agreement provides for the waiver of certain documentary requirements and facilitates the air travel of passengers on international flights while passing through the United States.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary because the amendment merely makes an editorial change to the listing of transportational lines.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that the rule will not have a significant impact on a substantial number of small entities.

This order constitutes a notice to the public under 5 U.S.C. 552 and is not a rule within the definition of section 1(a) of E.O. 12291.

List of Subjects in 8 CFR Part 238

Airlines, Aliens, Government contracts, Travel, Travel restriction.

Accordingly, 8 CFR Part 238 is amended as follows:

PART 238—CONTRACTS WITH TRANSPORTATION LINES

§ 238.3 [Amended]

In § 238.3 *Aliens in immediate and continuous transit*, the listing of transportation lines in paragraph (b) *Signatory lines* is amended by: Adding in alphabetical sequence, "Rich International Airways, Inc.".

(Sec. 103, 66 Stat. 173 (8 U.S.C. 1103); 238, 66 Stat. 202 (8 U.S.C. 1228))

Dated: February 25, 1983.

Perry A. Rivkind,

Associate Commissioner for Management, Immigration and Naturalization Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 21

[Docket No. 12553; Amdt. No. 1 to Special Conditions No. 23–48–WE–15]

Special Conditions; Piper PA–60 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions.

SUMMARY: This amendment to Special Conditions No. 23–48–WE–15 permits their application to Piper Aircraft Corporation (Piper) Models PA–60–601P, PA–60–602P, and PA–60–700P airplanes as well as future derivative PA–60 pressurized airplanes. The FAA has determined that these Special Conditions, originally developed for pressurized Aerostar Model 600/601 airplanes when the Type Certificate

(TC) was held by Ted Smith Associates, are also applicable to the aforementioned airplanes as well as future derivative PA-60 airplanes. The amendment will allow future PA-60 derivative airplanes to be added to the TC without revising the Special Condition document.

EFFECTIVE DATE: April 4, 1983.

FOR FURTHER INFORMATION CONTACT: William L. Olson, Aerospace Engineer, Aircraft Certification Division, 601 East 12th Street, Room 1656, Federal Office Building, Kansas City, Missouri 64106; Telephone (816) 374-5688.

SUPPLEMENTARY INFORMATION:

Type Certification Basis

The certification basis for the Piper Model PA-60-601P airplane is as follows: Part 23 of the Federal Aviation Regulations (FAR), effective February 1, 1965 through Amendment 23-6, effective August 1, 1967; Amendment 23-7 § 23.1091, effective August 13, 1969; Amendment 23-14 §§ 23.929 and 23.1419, effective November 19, 1973; Amendment 23-18 §§ 23.1093 and 23.1193, effective March 17, 1977; Amendment 23-23 § 23.1416, effective December 1, 1978; Part 36 of the FAR, effective December 1, 1969 through Amendment 36-9; Special Federal Aviation Regulation (SFAR) 27, effective February 1, 1974; and Special Conditions No. 23-48-WE-15.

The certification basis for the Piper Model PA-60-602P airplane includes all applicable requirements of the Model PA-60-601P airplane and the following: Amendment 23-7 § 23.1041, effective August 13, 1969 and Amendment 23-21 § 23.1043, effective January 6, 1978.

The certification basis for the Piper Model PA-60-700P airplane includes all applicable airworthiness requirements of the Model PA-60-602P airplane and the following: Amendment 23-7 §§ 23.207, 23.909, and 23.1527, effective August 13, 1969; Amendment 23-14 §§ 23.201, 23.203, 23.205 and 23.435, effective November 19, 1973; Amendment 23-17 § 232.1143, effective February 1, 1977; Amendment 23-18 § 23.901, effective March 17, 1977; Amendment 23-20 §§ 23.1301 and 23.1351, effective September 1, 1977; Amendment 23-21 § 23.1047, effective January 6, 1978; Part 36 of the FAR effective December 1, 1969, through Amendment 36-12; Special Conditions No. 23-48-WE-15, Docket No. 12553, issued February 7, 1973, including Amendment No. 1.

Background

On November 5, 1980, the Piper Aircraft Corporation's Vero Beach Division, P.O. Box 1328, Vero Beach, Florida 32960, submitted an application to amend TC No. A17WE to add a new Model PA-60-700P airplane in the normal category. This new airplane, like its predecessor pressurized models, PA-60-601P and PA-60-602P, is a high-performance, turbocharged, twin-engine, mid-wing aircraft with seats for six occupants. The Model PA-60-700P differs from the PA-60-601P and PA-60-602P models in that engine power has been increased from 290 to 350 horsepower and maximum gross weight has been increased from 6000 to 6200 pounds.

TC No. A17WE, originally issued to Ted Smith Associates for the Aerostar Model 600, has been amended to include growth models and was eventually transferred to the Piper Vero Beach Division. In the development process, pressurization was added and Special Conditions were developed for the novel or unusual design features associated with an outward opening external cabin door. These Special Conditions, No. 23-48-WE-15, which were issued on February 7, 1973, provide a level of safety equivalent to that required by Part 23 of the FAR and were necessary because the applicable airworthiness regulations did not contain adequate or appropriate safety standards for such an outward opening cabin door on a pressurized airplane. The Special Conditions for type certification of the Piper PA-60-601P airplane are applicable to Piper Models PA-60-602P and PA-60-700P airplanes and other PA-60 series airplanes for the same novel or unusual features for which these Special Conditions were developed. Accordingly, this amendment extends the applicability status of Special Conditions No. 23-48-WE-15 to all pressurized Piper PA-60 series airplanes, as appropriate, to Type Certificate No. A17WE without revising the Special Condition document. This does not preclude the application of later amendments under the provisions of § 21.101(b)(1) of the FAR or the issuance of Special Conditions that may be necessary under the provisions of § 21.101(b)(2) of the FAR for future PA-60 series airplanes.

Coordination

The applicant and other interested persons have been given an opportunity to participate in the making of these Special Conditions. Notice No. SC-82-7-CE was published in the **Federal Register** on January 20, 1983, and no comments were received.

List of Subjects in 14 CFR Part 21

Aviation safety, Aircraft, Air transportation, Safety.

The Special Condition Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the FAA hereby amends Special Conditions No. 23-48-WE-15 which were issued on February 7, 1973 to Ted Smith Associates for type certification of the Aerostar Model 601P airplane under Type Certificate No. A17WE is hereby amended by amending its applicability to read as follows:

Special Conditions for the type certification of Piper PA-60 series airplanes under Type Certification No. A17WE.

(Sec. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and § 11.28 and § 11.29(b) of the Federal Aviation Regulations (14 CFR 11.28 and 11.29(b)).

Issued in Kansas City, Missouri, on February 23, 1983.

John E. Shaw,

Acting Director, Central Region.

[FR Doc. 83-5287 Filed 3-3-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 83-NM-05-AD; Amdt. 39-4577]

Airworthiness Directives; Boeing Models 707/720/727/737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This document revises an existing Airworthiness Directive (AD) which requires the installation of a leading edge position aural warning system on Boeing Model 707/720/727/737 Series airplanes, on or before March 31, 1983. This revision makes two changes to the AD: (1) Modifications that have been found acceptable are listed, and (2) the compliance time for the Models 727 and 737 airplanes is being extended to December 26, 1983, provided the cockpit procedure described herein is adopted.

DATE: Effective March 7, 1983.

ADDRESSES: The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Gary D. Lium, Systems & Equipment Branch, ANM-130S, Seattle Aircraft

Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2500. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: AD 80-22-12, Amendment 39-3951 (45 FR 70230, October 23, 1980), requires the installation of leading edge device logic which will provide aural warning when the leading edge devices have not been extended prior to takeoff. This AD applies to Boeing Model 707/720/727/737 series airplanes and requires that the modification be completed on or before March 31, 1983. Recently, the Air Transport Association of America (ATA) petitioned the FAA for an alternate compliance date for this AD, to allow operators additional time to complete the required modifications on 727 and 737 series airplanes. This request was made for the following reasons:

1. Late delivery of Boeing service bulletins and modification kits prevented some airlines from accomplishing the modification during regularly scheduled maintenance visits. Accomplishment of the modification by March 31, 1983, would require substantial down-time, resulting in loss of public service and revenue to the airlines.

2. Revision of the AD will eliminate the need for numerous individual airline petitions for extension and would make the alternate compliance available to all 727 and 737 operators.

Extension of the compliance time would be predicated on the adoption of a cockpit procedure, prior to takeoff, which would assure that the leading edge devices are in the proper position. This new procedure, described below, would accomplish the same result in the interim as the airplane modification, and thus provide an equivalent level of safety during the additional time period prior to the modification. The cockpit procedure described for the Models 727 and 737 is not possible for the Models 707 and 720 because these airplanes are not equipped with a leading edge device annunciator panel, and therefore, these airplanes are not included within the extension.

Since this revision provides additional information and grants an extension in compliance time, it is clarifying and relieving in nature, and imposes no additional burden on any person. Therefore, notice and public procedure hereon are unnecessary, and the amendment may be made effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by revising AD 80-22-12, Amendment 39-3951 (45 FR 70230, October 23, 1980), to read as follows:

Boeing: Applies to Model 707, 720, 727, and 737 series airplanes certificated in all categories. Compliance time as follows: To assure the flight crew has positive warning when the leading edge devices are not extended for takeoff, accomplish the following unless already accomplished:

A. On or before March 31, 1983, except as provided for in paragraph C., below, install leading edge device logic that will provide aural warning when the leading edge devices have not been extended prior to takeoff in accordance with the following:

(1) (For Boeing 707/720 Series Airplanes) Boeing Service Bulletin No. 3404, Revision 2, dated January 21, 1983, or other previous or subsequent FAA approved revisions.

(2) (For Boeing 727 Series Airplanes) Boeing Service Bulletin No. 727-31-50, Revision 1, dated January 15, 1982, or other previous or subsequent FAA approved revisions.

(3) (For Boeing 737 Series Airplanes) Boeing Service Bulletin No. 737-31-1038, Revision 3, dated October 29, 1982, or other previous or subsequent FAA approved revisions.

B. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. This modification may be delayed until December 26, 1983, for the Model 727 and 737 series airplanes, provided the following cockpit checklist procedure, as implemented by each operator, is FAA approved by the appropriate Principal Operations Inspector: "The Leading Edge Device (LED) annunciator panel must be observed and must indicate proper leading edge device position prior to each takeoff."

D. Modification of the airplane in accordance with paragraph A or B, above, constitutes terminating action for this AD. Once the modification is completed, the special cockpit procedure described in paragraph C, above, may be discontinued.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington 98108.

This amendment becomes effective March 7, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this document involves an amendment that is clarifying and relieving in nature and does not impose any additional burden on any person. Therefore: (1) It is not major under Executive Order 12291 (46 FR 13193; February 19, 1981), and (2) it is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Because its anticipated impact is so minimal, it does not warrant preparation of a regulatory evaluation. I certify that it will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act because it involves few, if any, small entities.

Issued in Seattle, Washington, on February 18, 1983.

David E. Jones,

Acting Director, Northwest Mountain Region.

[FR Doc. 83-5125 Filed 3-2-83; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 82-NM-112-AD; Amdt. 39-4578]

Airworthiness Directives; British Aerospace BAC 1-11 200 and 400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) applicable to British Aerospace BAC 1-11 200 and 400 series airplanes that would require inspection for cracks and repair, as necessary, of the windshield glazing frame. Cracks have been found in several airplanes with as low as 22,000 hours time in service. If left unrepaired, these cracks could lead to failure of the adjacent fuselage frame and loss of cabin pressurization.

DATE: Effective April 4, 1983.

ADDRESSES: The service bulletin specified in this AD may be obtained upon request to British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, D.C. 20041, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aircraft Certification Branch, ANM-150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway

South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: The Civil Aviation Authority of the United Kingdom has classified British Aerospace BAC 1–11 Alert Service Bulletin 53–A–PM5425, Issue 3, as mandatory. A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring inspections and repairs, if necessary, of the windshield glazing frame was published in the **Federal Register** on January 9, 1978. The comment period closed on February 24, 1978. Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to all comments received. U.S. Air provided comments as follows:

1. All U.S. Air BAC 1–11 aircraft are being inspected every "B" check (approximately 1,125 landings). To preclude special scheduling and an unjustifiable economic impact on the current inspection program, the repetitive inspection frequency should be 1,200 landings;

2. The proposed AD does not provide credit for all previous repetitive inspections; and

3. U.S. Air has issued an Engineering Order to accomplish BAC Service Bulletin 53–PM–5525. This modification reinforces the lower frame segment across the windshield center-post. The proposed AD does not consider this modification for terminating the repetitive inspections.

The FAA concurs that the repetitive inspection interval may be increased to 1,200 landings without jeopardizing safety, and credit should be given for previously accomplished inspections and modifications. These items have been incorporated into the AD.

It is estimated that 50 airplanes will be affected by this AD, that it will take approximately 200 manhours per airplane to accomplish the required inspections and modifications, and that the average labor cost will be $35 per manhour. Repair parts are estimated at $6,000 per airplane. Based on these figures, the total cost impact of this AD is estimated to be $650,000. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act would be affected.

After review of the available data, including the above comments, the FAA has determined that air safety and the public interest require the adoption of the proposed amendment with the changes previously noted.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

British Aerospace: Applies to BAC 1–11 200 and 400 series airplanes, certified in all categories. Compliance is required as indicated, unless already accomplished. to detect cracking of the windshield glazing frame and prevent possible failure of the adjacent fuselage frame, accomplish the following:

A. For airplanes that have accumulated less than 25,000 total landings on the effective date of this AD, comply with the following:

1. Prior to the accumulation of 15,000 landings or within the next 500 landings after the effective date of this AD, whichever occurs later, unless accomplished within the previous 2,000 landings, visually inspect the windshield glazing frame for cracks internally and externally in accordance with the instructions contained in paragraph 4 entitled "Guidance to Operators" of British Aerospace Alert Service Bulletin 53–A–PM5425, Issue 3, dated February 20, 1978 (hereinafter referred to as the service bulletin).

2. Repeat the inspection specified in paragraph A.1 of this AD at intervals not to exceed 2,500 landings from the last inspection until 25,000 landings are accumulated and thereafter comply with the inspection interval specified in paragraph B of this AD.

B. For airplanes that have accumulated 25,000 landings or more on the effective date of this AD, inspect the area in accordance with paragraph 4 entitled "Guidance to Operators" of the service bulletin within the next 400 landings after the effective date of this AD, unless accomplished within the last 800 landings, and thereafter continue to inspect the area at intervals not to exceed 1,200 landings from the last inspection.

C. If cracks are found during any inspection required by this AD that do not extend forward of the cutouts for the windshield wiper shafts, accomplish the repair modification specified in BAC Modification PM2857, Part (a).

1. Within the next 750 landings after discovery of the cracks on airplanes with less than 25,000 landings at the time of the inspection.

2. Within the next 250 landings after discovery of the cracks on airplanes with 25,000 or more landings at the time of the inspection.

D. If cracks are found during any inspection required by this AD that extend forward of the cutouts for the windshield wiper shafts (refer to Figure 1 of the service bulletin), accomplish the repair modification specified in BAC Modification PM2857, Part (a), prior to further flight.

E. Incorporation of BAC Modification PM2857, Part (a), or PM3346 or PM5525 eliminates the repetitive inspection requirement of this AD and constitutes terminating action.

F. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

G. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

H. For the purpose of complying with this AD, subject to acceptance by the assigned FAA Maintenance Inspector, the number of landings may be determined by dividing each airplane's time in service by the operator's fleet average from takeoff to landing for the airplane type.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

This amendment becomes effective April 4, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). It is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities since it involves few, if any, small entities. A final evaluation has been prepared for this regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Seattle, Washington, on February 18, 1983.

David E. Jones,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 83–ASO–9]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Alteration of Control Zone and Transition Area, Moultrie, Georgia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Moultrie, Georgia, control zone and transition area by correcting the geographical coordinates of the airport and the name of the airport. No change in airspace is intended by this action.

DATES: Effective Date: 0901 G.m.t., April 14, 1983. Comments must be received on or before April 1, 1983.

ADDRESSES: Send comments on the rule in the triplicate to: Federal Aviation Administration, Manager, Airspace and Procedures Branch, ASO–530, Air Traffic Division, P.O. Box 20636, Atlanta, GA 30320. The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, GA 30344, telephone (404) 763–7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320; telephone (404) 763–7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves technical corrections to the description of the control zone and transition area and, was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 and § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to correct the geographical coordinates of Moultrie Municipal Airport and to correct the name of the airport upon which controlled airspace is predicated. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were republished in Advisory Circular AC 70–3A dated January 3, 1983. Under the circumstances presented, the FAA concludes that there is a need for a regulation to properly list the geographical coordinates of the airport and to correct the name of Moultrie-Thomasville Airport to Moultrie Municipal Airport so that the description of the control zone will be technically correct. The corrections are so minor and nonsubstantive, I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone, Transition area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 and § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) are further amended, effective 0901 G.m.t., April 14, 1983, as follows:

Moultrie Municipal Airport, GA—Revised

By amending 71.171 in the description of the Moultrie, GA, control zone by deleting the words, "* * * Moultrie-Thomasville Airport (lat. 31°04'58"N., long. 83°48'15"W.) * * *", and substituting for them the words, "* * * Moultrie Municipal Airport (Lat. 31°05'05" N., Long. 83°48'12"W.) * * *".

By amending 71.181 in the description of the Moultrie, GA, transition area by deleting the words, "* * * Moultrie-Thomasville Airport (lat. 31°04'58" N., long. 83°48'15" W.) * * *", and substituting for them the words, "* * * Moultrie Municipal Airport (Lat. 31°05'05" N., Long. 83°48'12" W.) * * *".

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on February 14, 1983.

Jonathan Howe,

Director, Southern Region.

BILLING CODE 4910–13–M

14 CFR Part 71

[Airspace Docket No. 82–AGL–25]

Alteration of Transition Area and Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: The nature of this Federal action redescribes both the control zone and transition area designated for Brainerd, Minnnesota. The intended effect of this action is to accommodate a new NDB Runway 23 instrument approach procedure while, at the same time, returning some designated airspace to a non-controlled status. Also, it ensures segregation of aircraft using instrument approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions.

EFFECTIVE DATE: April 14, 1983.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL–530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694–7360.

SUPPLEMENTARY INFORMATION: The development of an NDB Runway 23 approach procedure for Brainerd-Crow Wing County Airport requires that the current designated airspace for Brainerd, Minnesota, be altered to ensure the procedure is contained within controlled airspace, although the minimum descent altitude for the procedure may be established below the floor of the 700 foot controlled airspace. During the review for the alteration, it was noted that current procedures at Brainerd-Crow Wing County Airport do not require all of the designated airspace in effect. This action returns designated airspace to a non-controlled status involving two main areas approximately 6 miles by 6 miles in size. One area is located northwest of Brainerd-Crow Wing and the other is southeast of Brainerd-Crow Wing. Both areas extend approximately from the 8 mile radius to the 14 mile radius of Brainerd-Crow Wing County Airport.

Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

History

On page 57497 of the Federal Register dated December 27, 1982, the FAA

proposed to amend §§ 71.171 and 71.181 of the Federal Aviation Regulations (14 CFR Part 71) so as to alter the control zone and transition area airspace near Brainerd, Minnesota. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rulemaking.

Except for editorial changes, this amendment is the same as that proposed in the notice. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were published in Advisory Circular AC 70-3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, §§ 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) are amended, effective 0901 G.m.t., April 14, 1983, as follows:

Brainerd, MN

Within a 5-mile radius of Brainerd-Crow Wing County Airport (latitude 46°23'52" N, longitude 94°08'12" W.); within 2 miles each side of the Brainerd Runway 23 localizer course extending from the 5-mile radius zone to 5.5 miles northeast of the airport. This control zone will be effective during the specific dates and times established in advance by a Notice to Airmen and continuously published in the Airport/Facility Directory.

Brainerd, MN

That airspace extending upward from 700 feet above the surface within a 8.5-mile radius of the Brainerd-Crow Wing County Airport (latitude 46°23'52" N, longitude 94°08'12" W.).

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655)) and 14 CFR 11.69).

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It is certified that this—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on February [illegible], 1983.

Monte R. Belger,

Acting Director, Great Lakes Region.

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis

15 CFR Part 806

Benchmark Survey of U.S. Direct Investment Abroad—1982

AGENCY: Bureau of Economic Analysis, Commerce.

ACTION: Final rule.

SUMMARY: This action amends the rules to provide for the conduct of a statistical survey, the BE-10, Benchmark Survey of U.S. Direct Investment Abroad—1982, as required by the International Investment Survey Act of 1976.

EFFECTIVE DATE: These rules are effective March 3, 1983.

ADDRESS: The forms will be mailed to prospective respondents during the first two weeks of March, 1983; persons subject to the reporting requirements who have not received forms by the end of March, should request forms by writing to International Investment Division (BE-50), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20230 or by calling (202) 523-0632 during office hours—7:30 a.m. to 4:00 p.m. Washington, D.C. time.

FOR FURTHER INFORMATION CONTACT: For information concerning the rules, contact George R. Kruer, International Investment Division (BE-50), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20230, (202) 523-0657.

SUPPLEMENTARY INFORMATION: The International Investment Survey Act of 1976, 22 U.S.C. 3101-3108, requires that a benchmark survey of U.S. direct investment abroad be conducted covering 1982. The last such survey covered 1977.

In the September 30, 1982 Federal Register, Volume 47, No. 190, (47 FR 43074) the Bureau of Economic Analysis (BEA) published a notice of proposed rulemaking soliciting written public comments on the proposed rules and the draft report forms. Simultaneously, the draft report forms and associated instructions were submitted to the Office of Management and Budget (OMB) for approval pursuant to the Paperwork Reduction Act. Meetings were held with interested parties under OMB auspices. All comments received in the meetings and in writing to both OMB and BEA were considered in preparing the final rules and final report forms. Numerous changes were made to the report forms to effect a substantial reduction in the reporting burden and to increase the usefulness of the data. However, the changes did not result in any substantive changes to the proposed rules in preparing these final rules. The change in the definition of "U.S. Reporter," as contained in the final rule, is for clarification purposes only and is not intended to change the scope of the definition.

The OMB number for the approved BE-10 survey is 0608-0049, and the expiration date is 12/31/83.

BEA has determined that these final rule changes are not "major" under Executive Order 12291. The public use burden will be undertaken within the Department of Commerce proposed FY 1983 Information Collection Budget ceiling.

Regulatory Flexibility Act—The provisions of the Regulatory Flexibility Act relating to preparation of a regulatory flexibility analysis were not applicable to the rule changes because the changes will not have a significant economic impact on a substantial number of small entities. The exemption level, as approved, will eliminate reporting for most small businesses.

Accordingly, the General Counsel, Department of Commerce, has certified under provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that these rule changes will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 15 CFR Part 806

Economic statistics, Foreign investment in the United States, Penalties, Reporting requirements, United States investments abroad.

(5 U.S.C. 301, 22 U.S.C. 3101-3108, and Executive Order 11961)

Part 806 is therefore modified as set forth below.

George Jaszi,

Director, Bureau of Economic Analysis.

PART 806—[AMENDED]

15 CFR Part 806 is amended as follows:

1. In § 806.14(a), paragraph (2) is revised to read as follows:

§ 806.14 U.S. direct investment abroad.

(a) *Specific definitions.*

* * * * *

(2) "U.S. Reporter" means the U.S. person which has direct investment in a

foreign business enterprise, including a branch. If the U.S. person is an incorporated business enterprise, the U.S. Reporter is the fully consolidated U.S. domestic enterprise consisting of (i) the U.S. corporation whose voting securities are not owned more than 50 percent by another U.S. corporation, and (ii) proceeding down each ownership chain from that U.S. corporation, any U.S. corporation (including Domestic International Sales Corporations) whose voting securities are more than 50 percent owned by the U.S. corporation above it.

* * * * *

2. Section 806.16 is revised to read as follows:

§ 806.16 Rules and regulations for BE–10, Benchmark Survey of U.S. Direct Investment Abroad—1982.

A BE–10, Benchmark Survey of U.S. Direct Investment Abroad, will be conducted covering 1982. All legal authorities, provisions, definitions, and requirements contained in § 806.1 through 806.13, 806.14 (a), (b), (c), (d) and (g)(2) are applicable to this Survey. Specific additional rules and regulations for the BE–10 Survey concerning who must report and forms required are given below.

(a) *Basic requirement*—A BE–10 report is required from every U.S. person having a foreign affiliate—that is, every U.S. person having direct or indirect ownership or control of at least 10 per centum of the voting stock of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise—at any time during the U.S. person's 1982 fiscal year. A business enterprise's 1982 fiscal year is the enterprise's financial reporting year that has an ending date in calendar year 1982. For a person that does not have a financial reporting year, or does not have a financial reporting year ending in calendar year 1982, its 1982 fiscal year is deemed to be the same as calendar year 1982. Reports are required even though the foreign business enterprise may have been established, acquired, seized, liquidated, sold, expropriated, or inactivated during FY 1982.

(b) *Form BE–10A (Report for U.S. Reporter).* (1) Filing—A completed Form BE–10A is required from each U.S. Reporter (see definition). Exception: When a U.S. business enterprise owns a foreign affiliate and the U.S. business enterprise is owned more than 50 per centum by a U.S. individual, the report should be filed by, and Form BE–10A data should be for, the business enterprise rather than the individual. Any direc transactions with, or positions in, the foreign affiliate by the individual must be included in the U.S. business enterprise's report.

(2) Partial exemption when all foreign affiliates are exempt—When there are foreign affiliates, but all are exempt from filing Form BE–10B, then only items 1 through 4 of Form BE–10A, and Form BE–10A SUPPLEMENT, which lists exempt foreign affiliates, must be completed and filed.

(3) Partial exemption based on type of U.S. Reporter—U.S. Reporters that are religious, charitable, or other nonprofit organizations and individuals who directly own a foreign affiliate are required to file Form BE–10A, completing in Part I (Identification of U.S. Reporter), only items 1, 2, 8, 9, and 12; the remaining items in Part I and all items in Part II (Financial and Operating Data of U.S. Reporter) need not be completed.

(c) *Form BE–10B (Report for Foreign Affiliate).* (1) Filing—A U.S. person is required to file one Form BE–10B for each foreign affiliate which is not exempt pursuant to (2) below. (Under those limited conditions where foreign affiliates may be consolidated, the consolidated entity is considered to be one foreign affiliate.) To determine whether, for purposes of reporting, a given foreign business enterprise is considered its foreign affiliate, a U.S. person should sum its percentages of voting ownership through all lines, or chains of ownership, direct and indirect. If the resulting sum is at least 10 percent, then the enterprise is the U.S. person's foreign affiliate and, unless otherwise exempt, must be reported. In the case of a line of indirect ownership, the U.S. person's percentage ownership in a given foreign business enterprise should be computed as its direct ownership percentage in the first foreign business enterprise in the chain, multiplied by that first enterprise's direct ownership percentage in the second enterprise in the chain, multiplied by the second enterprise's direct ownership percentage in the third enterprise in the chain, multiplied by the corresponding percentages for all other intervening enterprises in the chain, multiplied by the last intervening enterprise's direct ownership percentage in the given foreign business enterprise. To illustrate, suppose that the U.S. person owned 50 percent of foreign business enterprise A directly, and that A owned 75 percent of foreign business enterprise B that, in turn, owned 80 percent of foreign business enterprise C. Then the U.S. person's percentage of indirect ownership of B would be 37.5 percent (the product of the first two percentages), its indirect ownership of C would be 30 percent (the product of all three percentages), and B and C (as well as A) would be considered the U.S. person's foreign affiliates.

(2) Total exemption—A Form BE–10B need not be filed if the foreign affiliate's total assets, sales or gross operating revenues excluding sales taxes, and not income after provison for foreign income taxes, are each (i.e., all three are) less than $3,000,000.00 (positive or negative), and the foreign affiliate does not own another foreign affiliate for which a Form BE–10B must be filed. If the latter condition is not met, then Form BE–10B must be filed for the foreign affiliate holding the equity interest regardless of the value of its assets, sales, or net income. That is, all affiliates upward in a chain of ownership must be reported. An affiliate's receivables due from its parent may not be eliminated from total assets when applying the exemption criteria.

(3) Number of Forms BE–10B required—If two or more U.S. Reporters jointly own a foreign affiliate, directly or indirectly, each U.S. Reporter must submit a Form BE–10B for the affiliate. The U.S. Reporter having the highest percentage ownership (direct and indirect combined) in the foreign affiliate must file a Form BE–10B in which all Parts, including either Part IV or Part V as required, have been completed; and the other U.S. Reporter(s) must file a Form BE–10B in which only Part I, items 1 through 25, and Part III, if there is direct ownership or direct financial positions or transactions, have been completed. If the ownership percentages are the same, the U.S. Reporters must decide among themselves which one will submit the complete report.

(4) Foreign affiliate consolidation—In cases where the recordkeeping system of the foreign affiliates makes it impossible or extremely difficult to file a separate report for each foreign affiliate, a U.S. Reporter may consolidate affiliates in the same country when the following conditions apply:

(i) The affiliates are in the same BEA 3-digit industry, as defined in the *Direct Investment Industry and Foreign Trade Classifications Booklet;* or

(ii) The affiliates are integral parts of the same business operation. For example, if German affiliate A manufactures tires and a majority of its sales are to German affiliate B which produces autos, then affiliates A and B may be consolidated.

Under no circumstances may a U.S. Reporter consolidate foreign affiliates in different countries.

(d) *Relationship between Forms BE–10A and BE–10B.* The term "U.S. Reporter" as defined means the fullyy consolidated U.S. domestic enterprise; therefore, on Form BE–10B, when data on trade and financial relationships between the U.S. Reporter and the foreign affiliate are requested, the data must reflect the foreign affiliate's relationship with the entire U.S. enterprise, not merely with one division, operating unit, or part.

(e) *Specialized report forms for banks*—Specialized report forms have been adopted for banks (that is, for business enterprises over 50 percent of whose total revenues are generated by activities classified in DI industry code 600), because much of the information on banks' foreign activities which is requested on the standard forms is already being reported to other agencies of the Federal Government. The specialized report forms are designed to yield only such additional information as is deemed necessary. Use of specialized Forms BE–10A BANK and BE–10B BANK is at the discretion of BEA; in situations where their possible use is not clear-cut, permission must be secured from BEA in advance of filing.

(1) Form BE–10A BANK has been developed for reporting by a U.S. Reporter that is a bank or a bank holding company. It is not to be used by a U.S. Reporter that may technically be classified as a bank holding company because of an interest in a banking activity, but that has over 50 percent of it revenues generated by non-bank activities. (Activities of subsidiaries that may not be banks but that provide support to the parent company, such as real estate subsidiaries set up to hold the office building occupied by the parent company, are considered bank activities.)

(2) Form BE–10B BANK is for reporting of a foreign affiliate that is a bank and in which the U.S. Reporter holds a direct and/or indirect ownership interest. However, a foreign bank affiliate of the U.S. Reporter in which the U.S. Reporter holds only an indirect ownership interest of 50 percent or less is exempt from being reported on Form BE–10B BANK, but must be listed on Form BE–10A SUPPLEMENT. Incorporated foreign bank affiliates in which the U.S. Reporter holds a direct equity interest, or an indirect equity interest of more than 50 percent, must be separately reported. All branch banks of the U.S. Reporter in a given foreign country must be consolidated on one Form BE–10B BANK even if it is the Reporter's practice to report data for these branches separately on Federal Reserve Form FR105f or on Comptroller of the Currency Form CC7610–09.

(3) A U.S. Reporter that is a bank, but that has a nonbank foreign affiliate, must file a Form BE–10A BANK for itself and a standard Form BE–10B for the nonbank foreign affiliate.

(4) A U.S. reporter that is not a bank, but that has a bank foreign affiliate, must file a standard Form BE–10A for itself and a Form BE–10B BANK for the bank foreign affiliate.

(5) Banks located on U.S. military bases abroad and servicing base personnel are not considered "foreign" and a Form BE–10B BANK should *not* be filed for them.

(6) The specialized report forms, where their use is permitted, replace the standard forms, and the regulations and instructions should be so construed.

(f) *Due date*— BE–10 reports comprising both Form BE–10A and Form(s) BE–10B are due on the following dates:

June 30, 1983—U.S. Reporter required to file less than 20 Forms BE–10B

July 31, 1983—U.S. Reporter required ato file 20 to 99 Forms BE–10B

August 31, 1983—U.S. Reporter required to file 100 or more Forms BE–10B

(g) Inquiries concerning the BE–10 Survey should be directed to: Bureau of Economic Analysis (BE–50, SSB), U.S. Department of Commerce, Washington, D.C. 20230, or phone (202) 523–0632 during office hours—7:30 a.m. to 4:00 p.m. Washington, D.C. time

BILLING CODE 3510–25–M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket C–3103]

ConAgra, Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement requires an Omaha, Neb. manufacturer and seller of bakery and hard wheat flour, among other things, to timely divest seven specified flour production facilities to a Commission-approved buyer(s), capable of maintaining the facilities as competitive entities. Additionally, the order prohibits the company from acquiring, for a period of ten years, any interest in any flour milling plant in eleven western states without prior Commission approval.

DATE: Complaint and order issued February 16, 1983.[1]

FOR FURTHER INFORMATION CONTACT: FTC/C, Thomas J. Campbell, Washington, D.C. 20580. (202) 523–3601.

SUPPLEMENTARY INFORMATION: On Thursday, Aug. 12, 1982, there was published in the **Federal Register**, 47 FR 35004, a proposed consent agreement with analysis In the Matter of ConAgra, Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

Comments were filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Acquiring Corporate Stocks or Assets: § 13.5 Acquiring corporate stocks or assets; 13.5–20 Federal Trade Commission Act.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

The Final Order, including further order requiring report of compliance therewith, is as follows:

In the Matter of INDIANA FEDERATION OF DENTISTS, an unincorporated association. Docket No. 9118.

Final Order

This matter, having been heard by the Commission upon the appeal of respondent from the Initial Decision, and upon briefs and oral argument thereof and opposition thereto, and the Commission for the reasons stated in the accompanying Opinion having determined to deny the appeal of respondent Indiana Federation of Dentists.

It is ordered that the Initial Decision of the administrative law judge be adopted as Findings of Fact and Conclusions of Law except to the extent inconsistent with the accompanying Opinion. Other Findings of Fact and Conclusions of Law of the Commission are contained in the accompanying Opinion.

It is further ordered that the following Order to Cease and Desist is hereby entered.

I

It is ordered that the following definition shall apply in this Order: "third-party payer" means any entity that provides a program of reimbursement for dental health care services to employees or members of any other organization, and any person who provides evaluative services in connection with any such reimbursement program.

II

It is further ordered that respondent, its successors or assigns, and its officers and representatives shall cease and desist from engaging in any activity, course of conduct, practice, or policy that in whole or in part:

A. Requests, urges, recommends or suggests that dentists, or has the purpose or effect of requiring or organizing dentists to: (1) Refuse to submit radiographs or other pre-treatment or post-treatment reports, analyses, and materials in response to a third-party payer's request for use in benefit determination; or (2) refuse to deal in any particular way with any one or more third-party payers;

B. Compels, threatens, or coerces any third-party payer to operate or deal in any way in connection with dental health care benefits program; or

C. Has the purpose of causing or inducing consumers to choose dentists who do not cooperate with third-party payers, or influencing to any degree consumers' choice of dentists based on the degree or manner of non-cooperation between such dentists and any third-party payer or payers.

III

It is further ordered that nothing contained herein shall be deemed: (1) To prohibit members of IFD, acting individually and not at the encouragement or inducement of IFD, from dealing with third-party payers in the way each sees fit; or (2) to prohibit respondent from adopting *bona fide* guidelines concerning the exposure of dental patients to radiation.

IV

It is further ordered that, within thirty (30) days after this Order becomes final, respondent shall mail to each of its members a copy of the Commission Order in this matter, as well as a letter, in the form shown as "Appendix A" to this Order, advising that respondent has abandoned all policies, guidelines, principles, work rules and statements that directly or indirectly request, urge, recommend or suggest that dentists, or have the purpose or effect of requiring or organizing dentists to: (1) Refuse to submit radiographs or other pre-treatment or post-treatment reports, analyses, and materials in response to a third-party payer's request for use in benefit determination; or (2) refuse to deal in any particular way with any one or more third-party payers. The letter shall further advise that dentists are free to choose to deal with any such programs and payers in such manner as they decide individually. Respondent shall also mail a copy of the Order and the letter to every person who joins respondent within three (3) years of the date of service of this Order;

V

It is further ordered that, within sixty (60) days after service of this Order, and annually on the anniversary date of the original report, for each of the five (5) years thereafter, respondent shall file with the Commission a report in writing, setting forth in detail the manner and form in which it has complied with this Order.

It is further ordered that respondent shall notify the Commission at least thirty (30) days prior to any proposed change in it, such as dissolution or other action resulting in the emergence of a successor organization, which may affect compliance obligations arising out of this Order.

By the Commission, Commissioner Douglas not participating.

Issued: February 17, 1983.

Benjamin I. Berman,

Acting Secretary.

Appendix "A"

(Respondent's Letterhead)

Dear Doctor: As you may be aware, the Federal Trade Commission has issued an order against the Indiana Federation of Dentists. This order requires, in essence, that the Indiana Federation of Dentists cease and desist from certain activities that are concerned with dental health care benefits programs and cooperation by dentists with the administrators of such programs. The order also requires that you be sent a copy of the order and this letter.

You are hereby notified that the Indiana Federation of Dentists has abandoned all policies, guidelines, and principles that directly or indirectly request, urge, recommend or suggest that dentists, or have the purpose or effect of requiring or organizing dentists to: (1) refuse to submit radiographs or other pre-treatment or post-treatment reports, analyses, and materials in response to a third-party payer's request for use in benefit determination; or (2) refuse to deal in any particular way with any one or more third-party payers. You are further notified that you are free to choose to deal with any such payers and programs in such manner as you decide individually.

A copy of the FTC's order is enclosed.

Sincerely.

President

[Docket 9129]

Michigan State Medical Society; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission

ACTION: Final Order

SUMMARY: This Final Order, among other things, requires an East Lansing, Mich. medical society to cease from entering into agreements with its members to affect the amount, manner of calculating or terms of reimbursement for physical services; and to refrain from influencing its members to refuse to enter into any participation agreement not acceptable to the Society or its members; or to complete the claim forms used by any third-party payer. The Society is barred from entering, either on its own behalf or on behalf of its members, into any agreement with a third-party payer that concerns the amount, manner of calculation, or terms of reimbursement; and from influencing, by any means, a member's decision to accept or reject a participation agreement. The order also bars the association from engaging in any action having the effect of coercing, compelling or inducing a third-party payer to accept the position taken by the Society regarding the terms or conditions of a participation agreement. Additionally, the association is required to publish provisions of the order in a prescribed manner and to provide current and future members with a copy of the order.

DATES: Complaint issued July 27, 1979. Final Order issued February 17, 1983.[1]

FOR FURTHER INFORMATION CONTACT: FTC/CS–6, M. Elizabeth Gee, Washington, D.C. 20580. (202) 724–1303.

SUPPLEMENTARY INFORMATION: In the Matter of Michigan State Medical Society, a corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Coercing and Intimidating: § 13.350 Customers or prospective customers. Subpart—Combining or Conspiring: § 13.384 Combining or conspiring; § 13.395 To control marketing practices and conditions; § 13.410 To eliminate competition in conspirators' goods. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; § 13.533–20 Disclosures; § 13.533–40 Furnishing information to media.

Medical associations, Medical services, Physicians' agreements.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

The Final Order, including further order requiring report of compliance therewith, is as follows:

In the Matter of MICHIGAN STATE MEDICAL SOCIETY, a corporation. Docket No. 9129.

Final Order

This matter having been heard by the Commission upon the appeal of respondent from the Initial Decision, and upon briefs and oral argument in support thereof and in opposition thereto, and the Commission having determined for the reasons stated in the accompanying Opinion to deny the appeal of respondent:

It is ordered that the Initial Decision of the administrative law judge be adopted as the Findings of Fact and Conclusions of Law of the Commission, except to the extent inconsistent with the accompanying Opinion. Other Findings of Fact and Conclusions of Law of the Commission are contained in the accompanying Opinion.

It is further ordered that the following Order to Cease and Desist be, and it hereby is, entered.

I

It is ordered that for purposes of this order the following definitions shall apply:

A. "MSMS" means Michigan State Medical Society, its House of Delegates, Council, committees, officers, representatives, agents, employees, successors and assigns.

B. "Third-party payer" means any person, corporation, government agency or other entity which agrees to pay for or reimburse all or part of any expense for physicians' services incurred by another person or group of persons. "Third-party payer" includes, but is not limited to, Blue Cross and Blue Shield of Michigan, and Medicaid.

C. "Medicaid" means the program of health care for indigent persons created by Title XIX of the Social Security Act, entitled "Grants to States for Medical Assistance Programs," 42 U.S.C. 1396 *et seq.* (1976 & Supp. III 1979), including regulations, policies and procedures of Michigan that implement the program in Michigan.

D. "Reimbursement" means money paid by a third-party payer for physicians' services.

E. "Physician" means a doctor of medicine or of osteopathy.

F. "Participation agreement" means any agreement between a third-party payer and a physician in which the third-party payer agrees to pay the physician for the provision of physicians' services and in which the physician agrees to accept payment from the third-party payer for the provision of physicians' services.

II

It is further ordered that MSMS shall cease and desist from:

A. Entering into or attempting to enter into any agreement or understanding, either express or implied, with any MSMS members to affect or attempt to affect the amount, manner of calculating, or terms of reimbursement, including but not limited to, any agreement or understanding that:

1. Any MSMS members will cancel or refuse to enter into participation agreements;

2. Any MSMS members will refuse to complete claim forms used by any third-party payer;

3. MSMS can act on behalf of any members through proxy, power of attorney, or otherwise, to cancel or refuse to enter into any participation agreement; or

4. Any MSMS members will sign or enter into participation agreements only on terms acceptable to MSMS or to any other MSMS member.

B. Advocating, suggesting, urging, advising, inducing or recommending that any MSMS members engage in any action to affect or attempt to affect the amount, manner of calculating, or terms of reimbursement, including, but not limited to, advocating, suggesting, urging, advising, inducing or recommending that any MSMS members:

1. Cancel or refuse to enter into any participation agreement with any third-party payer;

2. Refuse to complete claim forms used by any third-party payer;

3. Agree to permit MSMS to act on behalf of any MSMS members through proxy, power of attorney, or otherwise, to cancel or refuse to enter into any participation agreement; or

4. Sign or enter participation agreements only on terms acceptable to MSMS or to any other MSMS member.

C. Entering into or attempting to enter into any agreement or understanding, either on its own behalf or as representative of any of its members, with any third-party payer concerning the amount, manner of calculating, or terms of reimbursement, or concerning the decision of any of its members jointly to accept or reject the terms or conditions of any participation agreement.

D. Making any express or implied threat of acts by any MSMS members, or engaging in any other acts, with the purpose or effect of coercing, compelling or inducing any third-party payer to accept a position taken by MSMS or any MSMS members concerning the amount, manner of calculating, or terms of reimbursement, or the terms or conditions of any participation agreement.

III

It is further ordered that this Order shall not be construed to prevent MSMS from:

A. Participating in professional peer review of fees charged by individual physicians in individual cases.

B. Exercising rights permitted under the First Amendment to the United States Constitution to petition any federal or state government executive agency or legislative body concerning legislation, rules or

[1] Copies of the Complaint, Initial Decision, Opinion of the Commission, Concurring Statement of Commissioner Pertschuk, Concurring Statement of Commissioner Bailey and the Final Order filed with the original document.

procedures, or to participate in any federal or state administrative or judicial proceeding.

C. Providing information or views, on its own behalf or on behalf of its members, to third party payers concerning any issue, including reimbursement.

IV

It is further ordered that MSMS:

A. Mail a copy of this Decision and Order to each of its component societies, each of its specialty sections, and a copy of the Order to each of its members within thirty days following service of this Order.

B. Publish this Order in an issue of *Michigan Medicine* published no later than 60 days after the date the Order is served, and in the first *Medigram* published after the Order is served. The Order shall be published in the same type size normally used for articles which are published in *Michigan Medicine* and in the *Medigram*.

C. For a period of three years, provide each new MSMS member with a copy of this Order at the time the member is accepted into membership.

D. Require, as a condition of affiliation with MSMS, that any component society or specialty section agree by action taken by its governing body to be bound by the provisions of Parts I–III of this Order.

V

It is further ordered that MSMS shall file a written report with the Commission within ninety days of the date of service of this Order, and annually on the anniversary date of the original report for each of the five years thereafter, and at such other times as the Commission may by written notice to MSMS require, setting forth in detail the manner and form in which it has complied with this Order.

It is further ordered that MSMS shall notify the Commission at least thirty days prior to any proposed change to itself, such as dissolution, assignment, or sale resulting in the emergence of a successor corporation or association, or any other change which may affect compliance with this Order.

By the Commission, Commissioner Douglas not participating.

Issued: February 17, 1983.

Benjamin I. Berman,

Acting Secretary.

Attachments: Concurring Statements of Commissioners Pertschuk and Bailey.

Concurring Statement of Commissioner Pertschuk

I agree fully with the Commission's opinion except that I join Commissioner Bailey in concluding that the conduct should have been judged *per se* unlawful. Because I believe a determination that a *per se* analysis should have been applied here is somewhat more difficult than in other cases, it may be useful to elaborate on how that determination should have been made.

In *Broadcast Music*,[1] the Supreme Court indicated that, once an arrangement has been identified as "price-fixing," it is *per se* unlawful; however, such a determination "will often, but not always, be a simple matter."[2] In that case, in fact, the Court found that a blanket licensing scheme in which composers agreed on a single price for use of all their compositions should not be condemned as unlawful *per se* even though it might be price-fixing in a "literal sense."[3] The rationale for inquiring about competitive effects under a rule of reason analysis was, in part, that there were tenable arguments that the arrangement could help competition because it amounted to a separate product that was not available to the entertainment media by offerings of individual composers.

In *Maricopa*[4] the Court examined an arrangement in which foundations for medical care, composed of competing physicians, adopted maximum fee schedules after consulting with local medical societies and submitting proposed schedules to a vote of the entire membership of the foundations. The foundations had arranged with approved insurers that the insurers would agree to pay any charges up to the approved maximums and that the member physicians would accept these reimbursement levels as payment in full. Unlike the licensing arrangement in *Broadcast Music*, however, the Court found that this arrangement offered no tenable arguments of procompetitive benefits. It did not amount to a new risk-sharing entity in competition with other insurers, but essentially was "an agreement among hundreds of competing doctors concerning the price at which each will offer his own services to a substantial number of consumers."[5]

Here we examine conduct by competing physicians which amounted to a threatened refusal to deal with health insurers unless reimbursement rates were fixed at particular levels. The most that can be said for MSMS' agreement was that, technically, it did not directly establish the fees that competing physicians charged, but only the fees that the insurers paid. Yet, because of the great importance of third party payments, not only in Michigan, but all across the country, reimbursement levels have become the cost central aspect of price in health care transactions. The novelty of medical price-fixing is that all of us who pay health insurance premiums or taxes are victims, not merely those who receive services.

There is not even an argument here that MSMS' conduct was aimed at establishing a new competitive entity or that the efforts to force insurers to pay uniform levels of fees across the state led to efficiencies in fee determination, as was half-heartedly proposed in *Maricopa*.[6] Thus, this case is actually much stronger than *Maricopa* in justifying *per se* condemnation of MSMS' attempt to force changes in reimbursement levels.

I do not quarrel with the Commission opinion's careful assessment of the nature of the commercial transactions here and a limited examination of proffered justifications. This analysis is a necessary predicate to concluding that the arrangement fits "into the horizontal price fixing mold."[7] Once that determination is made, however, as I believe it should have been, a conclusion that the conduct is unlawful *per se* necessarily follows.

Concurring Statement of Commissioner Bailey

If I could agree that price-fixing by medical doctors should be subject to a rule of reason analysis (Slip Op. at 34), I would agree completely with the majority opinion. I believe the analysis conducted in the opinion convincingly demonstrates that MSMS' fee-related concerted behavior cannot be justified as procompetitive or as having no conpetitive effects.

However, the Supreme Court has clearly and consistently told us that once it is determined that a collaboration fosters price-fixing, no examination of alleged procompetitive justifications for that behavior is warranted. Further, "the nature of [the collaborators'] occupation, standing alone, does not provide sanctuary from the Sherman Act * * *" *Goldfarb v. Virginia State Bar*, 421 U.S. 773, 787 (1975). Very recently, in *Arizona v. Maricopa County Medical Society*, 102 S. Ct. 2466 (1982), the Court applied this principle to a combination of competing physicians who were found to have engaged in maximum fee setting and unequivocally concluded that "the fact that doctors [were] parties to the price fixing agreement" could not change the analysis. 102 S. Ct. at 2475.

Here we are faced with collective actions that were intended to influence directly third party payments to physicians.[8] (Slip Op. 31)

[1] Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1 (1979).

[2] *Id.* at 9.

[3] *Id.* at 8.

[4] Arizona v. Maricopa Medical Society, 50 LW 4687 (June 15, 1982) (80-419).

[5] *Id.* at 4692.

[6] *Id.* at 4692.

[7] *Id.* at 4693. This limited examination is for the purpose of determining the essential nature of the restraint, not overall competitive effects and "[t]he scrutiny occasionally required must not merely subsume the rule of reason [citing *Professional Engineers*] or else we should apply the rule of reason from the start." *Broadcast Music* at 19, fn. 33.

[8] In my opinion, only in its claim that it fought reductions in Medicaid payments in order to preserve quality of care for low-income patients did respondent raise a colorable alternative explanation for its conduct. However, as the majority opinion clearly describes, the record will not support this assertion: MSMS' true purpose in threatening a

Because those payments represent the bulk of physicians' service fees, the doctors' united front had the potential to inhibit price and nonprice competition both among doctors and among insurance companies. (Slip Op. 33, 35) I do not see room in the long line of precedent on price-fixing for an artificial distinction between conduct which involves direct fee setting and conduct which tampers with the method of setting fees. Therefore I would not qualify the description of the conduct before us by saying it "approaches the kind of behavior that previously has been classified as *per se* illegal". (Slip Op. 34) I think such conduct must, under present law, be viewed as classic price fixing.

Any combination which tampers with price structures is engaged in an unlawful activity * * * to the extent that [members of the price-fixing group] raised, lowered or stabilized prices they would be directly interfering with the free play of market forces. *United States v. Socony Vacuum Oil Co.*, 310 U.S. 150, 218 (1940) *quoted in Maricopa*, 102 S. Ct. at 2474.

Therefore, I would have forgone inquiry into whether MSMS' fee-related collective activities had actual or potential offsetting benefits to competition.

[FR Doc. 83-5422 Filed 3-2-83; 8:45 am]

boycott of the program was to increase physician reimbursements. (Slip Op. 16–19) Therefore the Medicaid incidents must be characterized as merely another battle in respondent's long campaign against third party influence on doctors' pricing practices.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 282

[Docket No. RM79-14]

Incremental Pricing Regulations Implementing the Incremental Pricing Provision of the Natural Gas Policy Act of 1978; Order of the Director, OPPR of Publication of Incremental Pricing Acquisition Cost Thresholds Under Title II of the NGPA

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order prescribing incremental pricing thresholds.

SUMMARY: The Director of the Office of Pipeline and Producer Regulation is issuing the incremental pricing acquisition cost thresholds prescribed by Title II of the Natural Gas Policy Act and 18 CFR 282.304. The Act requires the Commission to compute and publish the threshold prices before the beginning of each month for which the figures apply. Any cost of natural gas above the applicable threshold is considered to be an incremental gas cost subject to incremental pricing surcharging.

EFFECTIVE DATE: March 1, 1983.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Williams, Federal Energy Regulatory Commission, 825 N. Capitol Street, NE., Washington, D.C. 20426; (202) 357–8500.

SUPPLEMENTARY INFORMATION:

Issued: February 25, 1983.

In the matter of publication of prescribed incremental pricing acquisition cost threshold of the NGPA of 1978; Docket No. RM79–14.

Section 203 of the NGPA requires that the Commission compute and make available incremental pricing acquisition cost threshold prices prescribed in Title II before the beginning of any month for which such figures apply.

Pursuant to that mandate and pursuant to § 375.307(1) of the Commission's regulations, delegating the publication of such prices to the Director of the Office of Pipeline and Producer Regulation, the incremental pricing acquisition cost threshold prices for the month of March 1983 is issued by the publication of a price table for the applicable month.

List of Subjects in 18 CFR Part 282.

Natural gas.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

BILLING CODE 6717-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 140

Reimbursement; Temporary Matching Fund Waiver

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: This emergency regulation prescribes procedures for a temporary waiver of State matching fund requirements as mandated by section 145 of the Surface Transportation Assistance Act of 1982 (STAA of 1982). Section 145 allows a State to request an increase in the Federal share (normally 75–80 percent) of the construction costs of a qualifying Federal-aid highway project based upon a certification by the Governor of that State that sufficient funds are not available to pay the cost of the non-Federal share of the project. The provisions permit a State to receive up to 100 percent Federal funds for a project for a period through September 30, 1984; thereby allowing States the necessary time to adjust funding levels in order to meet the recently expanded Federal-aid highway program.

EFFECTIVE DATE: This final rule is effective March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Harvey C. Wood, Chief, Federal/States Financial Management Branch, (202) 426-0563 or Mr. Frank L. Calhoun, Office of the Chief Counsel, (202) 426-0761, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: On January 6, 1983, the President signed into law the STAA of 1982 (Pub. L. 97-424, 96 Stat. 2097). Section 145 requires regulations to be established which would provide procedures under which a State may request a waiver of its normal share of the construction cost of a qualifying Federal-aid highway project provided the Governor of the State certifies that sufficient funds are not available to pay the cost of the non-Federal share of the project. The regulation provides for an available period for the waiver through September 30, 1984, as well as repayment procedures. Since the provisions of section 145 of the STAA of 1982 were effective on January 6, 1983 (enactment of the STAA of 1982), and current regulations do not provide for such a temporary waiver, immediate promulgation of this regulation is required. For these reasons, it has been determined that circumstances warrant the issuance of an emergency regulation so as to immediately implement section 145 of the STAA of 1982.

Discussion of Regulation

Section 140.301 Purpose.

This section states the purpose of Subpart A, which is to implement section 145 of the STAA of 1982.

Section 140.303 Applicability.

The increased Federal share will apply to qualifying projects, as defined in the regulations, which are authorized prior to September 30, 1984, as specified by the statute.

Section 140.305 Definitions.

This section defines "Governor" to clarify that this provision is applicable to Puerto Rico and the District of Columbia, as well as all fifty States.

The section takes the definition from the statute of "qualifying project." Title 23 U.S.C. 106(a) is the provision for approval of plans, specifications, and estimates and 23 U.S.C. 117 is the certification acceptance provision.

Section 104.307 Submission of Certification by Governor.

This section contains the statutory requirement for certification by the Governor which is the initial step in requesting an increased Federal share.

The format of the certification is not prescribed by this regulation thus providing the Governor with flexibility as to the type of certification best suiting the State's situation.

Section 140.309 Request and approval of increase in Federal share.

The second step in requesting an increasing Federal share takes place when the State highway agency submits a request for authorization to proceed with work (23 CFR 630.114). This section establishes the basic procedures for requesting an increase in the Federal share which vary little from the regular procedures for requesting Federal participation in a project.

The FHWA recognizes that some qualifying projects will not be completed prior to September 30, 1984, at which time the State will be required to match its share of projects costs. This section provides the State with an option to request an obligation of Federal funds, only on the increased Federal share, based on the amount of costs the State expects to incur prior to September 30, 1984, instead of the total project costs. The State is still required to fully obligate the regular Federal share. For example, the State requests 100 percent Federal participation on an Interstate project (normally 90 percent participation) with an estimated cost of $10,000,000. Federal funds of $9,000,000 must be obligated for the regular Federal share. If the State estimates that only 50 percent of the project costs will be incurred by September 30, 1984, it may request that only 50 percent of the increased Federal share amount be obligated. In this case, instead of obligating $1,000,000 of Federal funds on the increased Federal share, only $500,000 would be obligated. The State would still be reimbursed for 100 percent of project costs incurred until September 30, 1984.

Paragraph (b) of this section identifies the fund categories that are presently available for matching fund waiver requests. The States are asked, where possible, to limit requests for matching fund waivers to projects funded from these categories although qualifying projects funded from other categories will be approved with prior concurrence from the FHWA Office of Fiscal Services.

Paragraph (c) of this section requires a statement to be included on the project

agreement, PR–2, submitted by the State which establishes the Federal share and amount of Federal funds requested by the State. The statement also establishes that claims paid after September 30, 1984, shall be at the regular Federal pro rata share.

Paragraph (d) of this section allows the State to use its normal billing procedures to claim reimbursement for the increased Federal share. The State is required to pro rate the costs claimed to the regular Federal share, and the non-Federal share, if any. This is necessary for FHWA to account for the amount reimbursed on the increased Federal share.

Section 140.311 Limitations on amount for qualifying projects.

This section reiterates the statute establishing the maximum amounts that can be obligated on qualifying projects in each State.

For the State's convenience and public information, FHWA has computed the amounts specified by the law and they are included as Appendix A of this regulation.

Paragraph (c) of this section clarifies that the amount obligated on a qualifying project is the amount obligated on both the regular Federal share and the increased Federal share as stated in the law. This total amount will be charged against the limitation.

Section 140.313 Repayment of the increased Federal share.

This section reiterates the statute's requirements for repaying the increased Federal share. The States are required to advise FHWA by September 1, 1984, regarding its intentions for making repayment or having deductions made to its apportionments. This is necessary to allow sufficient administrative time for adjusting project records prior to September 30, 1984.

Paragraphs (b) through (e) of this section merely restate the statutory requirements of section 145 for repayment or deduction of apportionments and impose no additional administrative requirements.

The FHWA has determined that this document responds to an emergency situation and for the reasons stated, Executive Order 12291 does not apply and it is impracticable for the agency to follow the procedures of the regulatory policies and procedures of the Department of Transportation. Therefore, good cause exists for publication as a final rule without notice and opportunity for comment and without a 30-day delay in effective date.

The FHWA will prepare, as soon as practicable, a regulatory evaluation/ regulatory flexibility analysis. The evaluation will be available for inspection by contacting Mr. Harvey C. Wood at the address provided under the heading "For Further Information Contact."

In consideration of the foregoing, and under the authority of 23 U.S.C. 315; section 145, Surface Transportation Assistance Act of 1982, Pub. L. 97–424, 96 Stat. 2097 and 49 CFR 1.48(b), the FHWA is amending Part 140 of title 23, Code of Federal Regulations by adding thereto a new Subpart C, to read as set forth below.

List of Subjects in 23 CFR Part 140

Accounting, Highways and roads, Grant programs—transportation.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The coordination process provided in OMB Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs apply to this program.)

Issued: February 25, 1983.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

As added, Subpart C reads as follows:

PART 140—REIMBURSEMENT

Subpart C—Temporary Matching Fund Waiver

Sec.

140.301 Purpose.
140.303 Applicability.
140.305 Definitions.
140.307 Submission of certification by Governor.
140.309 Request and approval of increase in Federal share.
140.311 Limitations on amount for qualifying projects.
140.313 Repayment of the increased Federal share.
Appendix A—Maximum obligation amounts for matching fund waiver projects authorized prior to September 30, 1984.

Authority: Section 145, Pub. L. 97–424, 96 Stat. 2097; 23 U.S.C. 315; 49 CFR 1.48(b).

Subpart C—Temporary Matching Fund Waiver

§ 140.301 Purpose.

The purpose of this regulation is to prescribe procedures for administering section 145 of the Surface Transportation Assistance Act of 1982, providing for a temporary waiver of State matching fund requirements.

§ 140.303 Applicability.

The provisions of this subpart are applicable to qualifying projects as defined herein during the period January 6, 1983, and ending September 30, 1984.

§ 140.305 Definitions.

(a) As used in this subpart:

"Governor" means the Governor of any one of the fifty States, or Puerto Rico, and includes the Mayor of the District of Columbia.

"Qualifying project" means a project approved under 23 U.S.C. 106(a), or a project for which the United States becomes obligated to pay under 23 U.S.C. 117 for which the Governor has submitted a certification as set forth in this subpart.

"Increased Federal share" means the portion of the approved Federal share which is in excess of the regular Federal share that would have been approved if a matching fund waiver had not been requested.

§ 140.307 Submission of certification by Governor.

The Governor of the State shall submit a certification, in writing, to the Federal Highway Administration (FHWA) Division Administrator certifying that sufficient funds are not available to pay the cost of the non-Federal share of a qualifying project, taking into account all State and local funds that are available for obligation on Federal-aid highway projects. Funds encumbered or committed to other existing programs are considered unavailable for matching purposes.

§ 140.309 Request and approval of increase in Federal share.

(a) The State Highway agency (SHA) may submit a request in writing to the FHWA Division Administrator for an increase in the Federal share of a qualifying project up to and including 100 per centum at the time the SHA submits a request for an authorization to proceed with work under § 630.114 of this title. The request shall specify the amount of regular Federal funds and the amount of the increased Federal share desired. To maximize the obligation of Federal funds, the amount obligated for the increased Federal share may be based on the estimated costs to be incurred by the State before September 30, 1984, instead of the total estimated project costs. The FHWA letter of authorization to proceed with work shall set forth the approved pro rata share and the amount of Federal funds obligated.

(b) The State should, to the extent possible, limit requests for an increased Federal share to projects funded from the following major categories in order to simplify fiscal control:

Interstate
Interstate Discretionary
Interstate Resurfacing (4R)

Interstate Substitution (highway projects only)
Consolidated Primary
Rural Secondary
Urban System
Bridge Replacement and Rehabilitation
Rail-Highway Crossings
Hazard Elimination

Qualifying projects funded from other categories will be approved with prior concurrence from the FHWA, Office of Fiscal Services.

(c) The SHA in submitting the project agreement, Form PR–2, pursuant to § 630.304 of this title, shall include in it the following provision:

The Federal-aid participation is increased to ——— percent for reimbursement claims paid on or before September 30, 1984, in accordance with Pub. L. 97–424, section 145. The additional Federal funds requested total $———. Claims paid after September 30, 1984, shall be at the regular Federal pro rata share of ——— percent.

(d) The State may claim reimbursement for the increased Federal share as a part of its normal billing procedures. Participating costs incurred by the State on qualifying projects shall be charged on a pro rata basis to the regular Federal share, increased Federal share, and non-Federal share, if any.

§ 140.311 Limitations on amount for qualifying projects.

(a) The total amount which may be obligated for qualifying projects in any State under this subpart shall not be greater than the excess of (1) the sum of the amount of obligation authority distributed to the State for fiscal year 1983, plus the amount of the minimum allocation available to the State under 23 U.S.C. 157, if any, over (2) the amount of obligation authority distributed to the State for fiscal year 1982 under section 3(b) of the Federal-Aid Highway Act of 1981.

(b) The amounts determined under paragraph (a) of this section have been computed by the FHWA and set forth in Appendix A of this subpart.

(c) The total amount obligated on both the regular Federal share and the increased Federal share shall be charged to this limitation.

§ 140.313 Repayment of the increased Federal share.

(a) The State shall repay the amount of the increased Federal share made pursuant to this subpart on or before September 30, 1984. If such repayment is not made by the State, the FHWA shall make the deductions as provided in paragraph (b) of this section. The State shall advise the FHWA Division Administrator by September 1, 1984, regarding its intentions for making repayments or having deductions made to its apportionments.

(b) If the total amount of the increased Federal share is not repaid on or before September 30, 1984, deductions shall be made from the State's fiscal year 1985 and fiscal year 1986 apportionments which are made under 23 U.S.C. 104(b), excluding the apportionment for Interstate construction under 23 U.S.C. 104(b)(5)(A). The total amount deducted shall be the amount reimbursed to the State on the increased Federal share of all qualifying projects. In each of the fiscal years, one-half of the total deduction shall be made from these apportionments on a pro rata basis.

(c) The total amount deducted in accordance with paragraph (b) of this section shall be reapportioned to those States which did not receive an increased Federal share under this subpart and to those States which have made repayment under this section. These reapportioned funds shall be distributed by the FHWA in accordance with the apportionment formula established for the Federal-aid primary system in 23 U.S.C. 104(b)(1). The reapportioned amount shall supplement the States' primary system apportionments for fiscal years 1985 and 1986.

(d) The apportionments made on October 1, 1984, and October 1, 1985, shall subsequently be adjusted by the FHWA in order to reflect the deductions made under paragraph (b) of this section and the reapportionments made under paragraph (c) of this section.

(e) The FHWA shall deposit all repayments made by a State under paragraph (a) of this section to the Highway Trust Fund and shall credit the repayments to the appropriate apportionment accounts of the State.

BILLING CODE 4910-22-M

Coast Guard

33 CFR Part 100

[CGD11 CR-03-83]

Establishment of Special Local Regulations for "Parker Enduro"

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special local regulations are being adopted for the Parker Enduro Regatta on the Colorado River. This event will be held on 5 and 6 March 1983, at Lake Moovalya. The regulations are needed to provide for the safety of life on navigable waters during the event.

EFFECTIVE DATE: These regulations become effective on 5 March 1983, and terminate on 6 March 1983.

FOR FURTHER INFORMATION CONTACT: Lt N. M. Turner, Commander (bpa), Eleventh Coast Guard District, 400 Oceangate, Long Beach, California 90822, (213) 590–2213.

SUPPLEMENTARY INFORMATION: A notice of proposed rule making has not been

published for these regulations and they are being made effective in less than 30 days from the date of publication. There was not sufficient time to publish proposed rules in advance of the event or to provide for a delayed effective date.

Drafting Information: The principal individuals involved in drafting this rule are Lt Noris M. Turner, Chief, Boating and Public Affairs Branch, Eleventh Coast Guard District, and Lt Catherine M. Kelly, Project Attorney, Legal Office, Eleventh Coast Guard District.

Discussion of Regulations: Parker Area Chamber of Commerce "Parker Enduro Regatta" will be conducted beginning March 5, 1983, on the Colorado River at Lake Moovalya. This event will have 100 inboard/outboard jet boats 14- to 25-feet in length that could pose hazards to life. Vessels desiring to transit the regulated area may do so only with clearance from a patrolling law enforcement vessel or an event committee boat.

Evaluation: These regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be a major rule. This conclusion follows from the fact that the regulated area will be open for the passage of commercial vessels and can be opened periodically to recreational vessels.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended by adding the following section

§ 100.1103 Parker Area Chamber of Commerce/Parker Enduro.

(a) *Regulated Area.* The following regulated area will be closed intermittently to all vessel traffic from 11:30 AM to 4:30 PM on 5 March 1983 and from 8:00 AM to 3:30 PM on 6 March 1983: That portion of the Colorado River/Lake Moovalya Ah-Villa County Park/Roadrunner Resort to Approximately ½ mile south of Bluewater Marina.

(b) *Special Local Regulations.* (1) No vessels, other than participants, U.S. Coast Guard operated and employed small craft, public vessels, state and local law enforcement agencies and the sponsor's vessels shall enter the regulated area during the above hours, unless cleared for such entry by or through a patrolling law enforcement vessel, or an event committee boat.

(2) These regulations are temporary in nature and shall cease to be in effect or further enforced at the end of the period set forth.

(46 U.S.C. 454, 49 U.S.C. 1655(b)(1); 33 CFR 100.35; 49 CFR 1.46(b))

Dated: February 15, 1983.

A. P. Manning,

Rear Admiral, U.S. Coast Guard, Commander, Eleventh Coast Guard District.

BILLING CODE 4910-14-M

---

33 CFR Part 165

[COTP Hampton Roads, Va.; Regulation 83-04]

Safety Zone Regulations; Croatan Sound, N.C.

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard established a safety zone in Croatan Sound, North Carolina, in the vicinity of the US–64 bridge on February 11, 1982. This zone was established to prevent further damage to and the possible collapse of the US–64 bridge which was severely damaged by a collision with a tug and tow on November 5, 1982. Adverse weather conditions have delayed repairs to the bridge and make it necessary to continue the previously established safety zone beyond its original termination date of February 1, 1983. Entry into this zone is prohibited except as otherwise stated.

EFFECTIVE DATE: This regulation becomes effective on February 1, 1983. It terminates when repairs to the US–64 bridge are completed or March 15, 1983, whichever occurs first.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander W. K. Six, Chief, Port Operations Department, Coast Guard Marine Safety Office, Hampton Roads, Norfolk, Virginia 23510, (804) 441–3296.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation and it is being made effective in less than 30 days after **Federal Register** publication. Publishing a NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to safeguard the bridge, watercraft and their occupants.

Drafting Information: The drafter of this regulation is Lieutenant Commander W. K. Six, project officer for the Captain of the Port.

Discussion of Regulation: To prevent possible damage to watercraft, their occupants, and the US–64 bridge, no watercraft will be permitted to enter, remain in, moor in, or transit this safety zone unless specifically authorized by the Captain of the Port, Hampton Roads, Virginia. This action is necessary due to the heavy damage sustained by the bridge in a collision with a tug and tow. The sustained damage is of such a degree that another collision or excessive wake may cause the failure of the entire bridge structure. This rule is in response to a request by the North Carolina Department of Highways for Coast Guard assistance in precluding vessels from transiting the area.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

In consideration of the foregoing, Part 165 of title 33, Code of Federal Regulations, is amended by adding a new § 165.515 to read as follows:

§ 165.515 Safety zone: Croatan Sound, North Carolina.

(a) *Location.* The following area is a safety zone: The water under and one hundred yards on either side of the US–64 bridge over the Croatan Sound.

(b) *Regulations.* (1) In accordance with the general regulations in § 165.23 of this part. No person may enter or operate any tug and tow within this zone. No person may enter or operate any vessel through the channel span, or the two adjacent spans within this zone.

(33 U.S.C. 1225 and 1231; 49 CFR 1.46; 33 CFR 165.3)

Dated: February 1, 1983.

D. C. O'Donovan,

Captain, U.S. Coast Guard, Captain of the Port, Hampton Roads, U.S. Coast Guard.

[FR Doc. 83-5411 Filed 3-2-83; 8:45 am]

BILLING CODE 4910-14-M

PANAMA CANAL COMMISSION

35 CFR Parts 103, 113, 119, and 123

Revised Shipping and Navigation Rules for the Panama Canal; Correction

AGENCY: Panama Canal Commission.

ACTION: Final rule; correction.

SUMMARY: This document corrects the effective date contained in the final regulations implementing Revised Shipping Navigation Rules for the Panama Canal which were published February 15, 1983 (48 FR 6708).

FOR FURTHER INFORMATION CONTACT: Mr. Michael Rhode, Jr., Secretary, Panama Canal Commission, (202) 724–

0104, or Mr. Dwight A. McKabney, General Counsel, Panama Canal Commission, telephone in Balboa Heights, Republic of Panama, 52–7511.

SUPPLEMENTARY INFORMATION: Accordingly, the Panama Canal Commission is correcting 48 FR 6708 dated February 15, 1983 as follows:

"**EFFECTIVE DATE:** February 15, 1983:" is corrected to read "**EFFECTIVE DATE:** March 17, 1983."

Dated: February 24, 1983.

Michael Rhode, Jr.,

Secretary.

BILLING CODE 3640-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 6E1819/R527; PH-FRL 2316-4]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Dinoseb

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the pesticide dinoseb in or on the raw agricultural commodity lentils. The regulation to establish a maximum permissible level for residues of the pesticide in or on the commodity was requested, pursuant to a petition, by the Interregional Research Project No. 4 (IR–4).

EFFECTIVE DATE: March 3, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs, Emergency Response Section, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716 B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA. 22202, (703–557–1192).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule published in the **Federal Register** of February 2, 1983 (48 FR 4678) that announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 6E1819 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Stations of Idaho and Washington.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, proposed the establishment of a tolerance for residues of the pesticide dinoseb (2-*sec*-butyl-4,6-dinitrophenol) from application of its phenol or its readily hydrolyzable salts (alkanolamine salts, ammonium salt, or sodium salt) in or on the raw agricultural commodity lentils at 0.1 part per million (ppm).

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the notice of proposed rulemaking.

The pesticide is considered useful for the purpose for which the tolerance is sought. It is concluded that the tolerance would protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e))

Dated: February 24, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR 180.281 is revised to read as follows:

§ 180.281 Dinoseb; tolerances for residues.

Tolerances are established for residues of the herbicide, insecticide, and fungicide dinoseb (2-*sec*-butyl-4,6-dinitrophenol) from application of its phenol or its readily hydrolyzable salts (alkanolamine salts, ammonium salt, or sodium salt) in or on the following raw agricultural commodities:

GENERAL SERVICES ADMINISTRATION

41 CFR Parts 1-3, 1-7, 1-15

[FPR Amdt. 228]

Federal Procurement Regulations; Revisions to Negotiated Overhead Rate Clauses and Contract Cost Principles

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment revises a number of contract cost principles applicable to commercial organizations and several instructions regarding the use of contract clauses. Most of the revisions to the cost principles deal with accounting for unallowable costs and unallowable directly associated costs and are based on concept introduced in Cost Accounting Standard 405 and the Defense Acquisition Regulation (DAR). The revisions dealing with contract clauses are designed to achieve compatibility with earlier FPR changes. All revisions are intended to achieve substantial Government-wide uniformity in the treatment of contract costs.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: Philip G. Read, Director, Office of Federal Procurement Regulations, Office of Acquisition Policy (202-523-4755).

SUPPLEMENTARY INFORMATION: The contract cost principle revisions made in this amendment are summarized as follows:

(1) A new section on accounting for unallowable costs is added, the most significant provisions of which:

(a) Establish special identification requirements for unallowable costs and unallowable directly associated costs;

(b) Specify that unallowable costs be subject to the same accounting principles governing cost allocability as allowable costs;

(c) Set forth principles for satisfying the unallowable cost identification and visibility requirements; and

(d) Provide guidance concerning the determination and accounting treatment of unallowable directly associated costs.

(2) The cost principles dealing with bad debts, entertainment costs, interest and other financial costs, and professional and consultant service costs are revised to substitute the term "directly associated costs" for the term "related costs." This was done to conform the language of these cost principles to revised terminology introduced in the new section on accounting for unallowable costs (see paragraph (1), above).

(3) The cost principle on organization costs is revised to specifically exclude activities whose purpose is providing compensation from the ambit of unallowable organization costs.

List of Subjects

41 CFR Part 1-3

Cost accounting standards, Government procurement, Procurement by negotiation, Small purchases, Types of contracts.

41 CFR Part 1-7

41 CFR Part 1-15

Cost principles, Government procurement.

PART 1-3—PROCUREMENT BY NEGOTIATION

Subpart 1-3.7—Negotiated Overhead Rates

Section 1-3.704-1 is revised to read as follows:

§ 1-3.704-1 Contracts with concerns other than educational institutions.

Insert the following clause in contracts with concerns other than educational institutions when postdetermined negotiated overhead rates are to be used pursuant to this subpart.

Negotiated Overhead Rates—Postdetermined

(a) Notwithstanding the provisions of the clause of this contract entitled "Allowable Cost, Fixed Fee, and Payment,"[1] the allowable indirect costs under this contract shall be obtained by applying negotiated overhead rates to bases agreed upon by the parties, as specified below.

(b) The Contractor, as soon as possible but not later than ninety (90) days after the expiration of his fiscal year, or such other period as may be specified in the contract, shall submit to the Contracting Officer, with a copy to the cognizant audit activity, a proposed final overhead rate or rates for that period based on the Contractor's actual cost experience during that period, together with supporting cost data. Negotiation of overhead rates by the Contractor and the Contracting Officer shall be undertaken as promptly as practicable after receipt of the Contractor's proposal.

[1] The contracting agency may substitute the title of its own parallel clause when the title is other than "Allowable Cost, Fixed Fee, and Payment."

(c) Allowability of costs and acceptability of cost allocation methods shall be determined in accordance with[2] ——— as in effect on the date of this contract.

(d) The results of each negotiation shall be set forth in a modification of this contract, which shall specify (1) the agreed final rates, (2) the bases to which the rates apply, and (3) the periods for which the rates apply.

(e) Pending establishment of final overhead rates for any period, the Contractor shall be reimbursed either at negotiated provisional rates as provided in the contract, or at billing rates acceptable to the Contracting Officer, subject to appropriate adjustment when the final rates for that period are established. To prevent substantial over or under payment, and to apply either retroactively or prospectively: (1) Provisional rates may, at the request of either party, be revised by mutual agreement, and (2) billing rates may be adjusted at any time by the Contracting Officer. Any such revision of negotiated provisional rates provided in the contract shall be set forth in a modification to this contract.

(f) Any failure by the parties to agree on any final rates under this clause shall be considered a dispute concerning a question of fact for decision by the Contracting Officer within the meaning of the "Disputes" clause of this contract.

(End of clause)

PART 1-7—CONTRACT CLAUSES

Subpart 1-7.2—Cost-Reimbursement Type Supply Contracts

Section 1-7.203-9 is revised to read as follows:

§ 1-7.203-9 Negotiated overhead rates.

Insert the appropriate clause set forth in § 1-3.704 under the conditions prescribed therein.

Subpart 1-7.4—Cost Reimbursement Type Research and Development Contracts

Section 1-7.402-3 is amended to add paragraph (b)(7) as follows:

§ 1-7.402-3 Allowable cost, fee, and payment.

* * * * *

(b) * * *

[2] In paragraph (c), insert the reference which is appropriate to the agency: The appropriate subpart of Part 1-15 and, if applicable, the corresponding agency regulations, or any special "Allowable Cost" clause in the contract, which lists allowable and unallowable costs.

(7) In contracts with nonprofit organizations subject to the cost principles in Subpart 1–15.6, substitute Subpart 1–15.6 in paragraph (a)(1)(i) of prescribed in paragraph (a), of this section.

PART 1–15—CONTRACT COST PRINCIPLES AND PROCEDURES

The table of contents for Part 1–15 is amended to add one entry under Subpart 1–15.2 as follows:

Subpart 1–15.2—Contracts with Commercial Organizations

Sec.

* * * * *

1–15.201–6 Accounting for unallowable costs.

* * * * *

Subpart 1–15.2—Contracts With Commercial Organizations

1. Section 1–15.201–6 is added to read as follows:

§ 1–15.201–6 Accounting for unallowable costs.

(a) Costs that are expressly unallowable or mutually agreed to be unallowable, including mutually agreed to be unallowable directly associated costs, shall be identified and excluded from any billing, claim, or proposal applicable to a Government contract. This requirement may be satisfied by any form of cost identification which is adequate for purposes of contract cost determination and verification.

(b) Costs which specifically become designated as unallowable, or as unallowable directly associated costs of unallowable costs, as a result of a written decisions furnished by a contracting officer pursuant to contract disputes procedures, shall be identified if included in or used in the computation of any billing, claim, or proposal applicable to a Government contract. This identification requirement applies also to any costs incurred for the same purpose under like circumstances as the costs specifically identified as unallowable under either this paragraph or paragraph (a) of this section.

(c) All unallowable costs covered by paragraphs (a) and (b) of this section shall be subject to the same cost accounting principles governing cost allocability as allowable costs. In circumstances where these unallowable costs normally would be part of a regular indirect cost allocation base or bases, they shall remain in such base or bases.

(d) Where the total of the allocable and otherwise allowable costs exceeds a limitation-of-cost or ceiling-price provision in a contract, full direct and indirect cost allocation shall be made to the contract cost objective in accordance with established cost accounting practices and standards which regularly govern a given entity's allocations to Government contract cost objectives. In any determination of unallowable cost overrun, the amount thereof shall be identified in terms of the excess of allowable costs over the ceiling amount, rather than through specific identification of particular cost items or cost elements.

(e) The detail and depth of records required as backup support for proposals, billings, or claims shall be that which is adequate to establish and maintain visibility of identified unallowable costs (including directly associated costs), their accounting status in terms of their allocability to contract cost objectives, and the cost accounting treatment which has been accorded such costs. Adherence to this cost accounting principle does not require that allocation of unallowable costs to final cost objectives be made in the detailed cost accounting records. It does not require that unallowable costs be given appropriate consideration in any cost accounting determinations governing the content of allocation bases used for distributing indirect costs to cost objectives. Unallowable costs involved in the determination of rates used for standard costs, or for indirect cost proposals or billing, need be identified only at the time rates are proposed, established, revised, or adjusted.

(f)(1) A directly associated cost is any cost which is generated solely as a result of the incurrence of another cost, and which would not have been incurred had the other cost not been incurred. When an unallowable cost is incurred, its directly associated costs are also unallowable.

(2) If a directly associated cost is included in a cost pool which is allocated over a base that includes the unallowable cost with which it is associated, the direclty associated cost shall remain in the cost pool, Since the unallowable costs will attract its allocable share of costs from the cost pool, no further action is required to assure disallowance of the directly associated cost. In all other cases, the directly associated costs, if material in amount, must be purged from the cost pool as unallowable costs.

(3) In determining the materiality of a directly associated cost, consideration should be given to the significance of (i) the actual dollar amount, (ii) the cumulative effect of all directly associated costs in a cost pool, or (iii) the ultimate effect on the cost of Government contracts.

(4) Salary expenses of employees who participate in activities which generate unallowable costs shall be treated as directly associated costs to the extent of the time spent on the proscribed activity, provided the costs are material in accordance with paragraph (f)(3) of this section (except when such salary expenses are, themselves, unallowable). The time spent in proscribed activities should be compared to total time spent on company activities (estimated when actual time records are not available), to determine if the costs are material. Time spent by employees outside the normal working hours should not be considered except when it is evident that an employee engages so frequently in company activities during periods outside normal working hours as to indicate that such activities are a part of his regular duties.

(5) When a selected item of cost under § 1–15.205 provides that directly associated costs be unallowable, it is intended that such directly associated costs be unallowable only if determined to be material in amount in accordance with the criteria provided in paragraphs (f)(3) and (f)(4) of this section, except in those situations where allowance of any of the directly associated costs involved would be considered to be contrary to public policy.

2. Section 1–15.205–2 is revised to read as follows:

§ 1–15.205–2 Bad debts.

Bad debts, including losses (whether actual or estimated) arising from uncollectible customers' accounts and other claims, and any directly associated costs such as collection costs and legal costs, are unallowable.

3. Section 1–15.205–11 is revised to read as follows:

§ 1–15.205–11 Entertainment costs.

Costs of amusement; diversion; social activities; and any directly associated costs such as meals, lodging, rentals, transportation, and gratuities, are unallowable (but see § 1–15.205–10 and § 1–15.205–43).

4. Section 1–15.205–17 is revised to read as follows:

§ 1–15.205–17 Interest and other financial costs.

. Interest on borrowings (however represented), bond discounts, costs of financing and refinancing capital (net worth plus long-term liabilities), legal and professional fees paid in connection with the preparation of prospectuses, costs of preparation and issuance of

stock rights, and directly associated costs are unallowable except for interest assessed by State or local taxing authorities under the conditions set forth in § 1–15.205–41. (But see § 1–15.205–24.)

5. Section 1–15.205–23 is revised to read as follows:

§ 1–15.205–23

Organization costs.

(a) Except as provided in paragraph (b) of this section, expenditures in connection with (1) planning or executing the organization or reorganization of the corporate structure of a business, including mergers and acquisitions, or (2) raising capital (net worth plus long-term liabilities) are unallowable. Such expenditures include but are not limited to incorporation fees and costs of attorneys, accountants, brokers, promoters and organizers, management consultants, and investment counsellors, whether or not employees of the contractor. Unallowable "reorganization" costs include the cost of any change in the contractor's financial structure, excluding administrative costs of short-term borrowings for working capital, resulting in alterations in the rights and interests of security holders whether or not additional capital is raised.

(b) The cost of activities primarily designed for the purposes of providing compensation will not be considered organization costs subject to this section, but will be governed by § 1–15.205–6. These activities include the acquisition of stock for (1) executive bonuses, (2) employee savings plans, and (3) employee stock ownership plans.

6. Section 1–15.205–31 is amended to revise paragraph (d) to read as follows:

§ 1–15.205–31 Professional and consultant service costs—legal, accounting, engineering, and other.

* * * * *

(d) Costs of legal, accounting, and consulting services, and directly associated costs, incurred in connection with organization and reorganization, defense of antitrust suits, and the prosecution of claims against the Government, are unallowable. Costs of legal, accounting, and consulting services, and directly associated costs, incurred in connection with patent infringement litigation, are unallowable unless otherwise provided for in the contract. (Also see § 1–15.205–23.)

BILLING CODE 6820–61–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6353

[A–12828]

Arizona; Partial Revocation of Reclamation Project Withdrawals

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order will partially revoke six Executive orders and one Departmental order which withdrew certain lands in Arizona for the Hassayampa Project. This action will lift the withdrawals on 17,559.28 acres of public lands near Wickenburg, Arizona. Of this total, 17,046.00 acres would be opened to surface entry and 15,270.03 would be opened to mining. All lands affected by this order have been and will remain open to mineral leasing.

EFFECTIVE DATE: March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Mario L. Lopez, Arizona State Office, 602–261–4774.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Executive Orders dated July 25, 1941, March 27, 1943, April 7, 1944 (two orders), September 14, 1945, and July 3, 1946, and the Departmental order dated March 30, 1956, which withdrew lands for the Hassayampa Project, are hereby revoked insofar as they affect the following described lands:

Gila and Salt River Meridian

T. 5 N., R. 3 W.,
- Sec. 18, NW¼NE¼SE¼, S½NE¼SE¼, W½SE¼, SE¼SE¼;
- Sec. 19, lots 1, 2, W½NE¼, E½NW¼;
- Sec. 20, E½NE¼.

T. 9 N., R. 3 W.,
- Sec. 1, lot 4, SW¼NW¼, W½SW¼, SE¼SW¼;
- Sec. 2, lots 1, 2, S½NE¼, SE¼;

T. 8 N., R. 5 W.,
- Sec. 1, lots 1 to 7, inclusive, SW¼NE¼, S½NW¼, SW¼, W½SE¼;
- Sec. 9, all;
- Sec. 10, all;
- Sec. 11, all;
- Sec. 12, W½;
- Sec. 13, lots 1 to 4, inclusive, W½NE¼, W½;
- Sec. 14, N½, N½S½;
- Sec. 15, all;
- Sec. 23, NE¼NW¼, NW¼SW¼.

The area described contains 17,559.28 acres in Maricopa and Yavapai Counties.

2. At 10:00 a.m. on April 13, 1983, the unappropriated, unreserved public lands described in paragraph 1 shall be open to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10:00 a.m. on April 13, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. Of the lands described in paragraph 1, the surface estate of the following

lands has been conveyed out of Federal ownership. Therefore, these lands will not be open to the operation of the public land laws.

T. 5 N., R. 3 W.,
Sec. 18, NW¼NE¼SE¼, S½NE¼SE¼, W½SE¼, SE¼SE¼;
Sec. 19, lots 1, 2, W½NE¼, E½NW¼;
Sec. 20, E½NE¼.
T. 7 N., R. 4 W.,
Sec. 20, NE¼NW¼;
T. 8 N., R. 5 W.,
Sec. 14, W½NW¼NE¼NE¼;

The area described contains 513.28 acres in Maricopa and Yavapai Counties.

4. At 10:00 a.m. on April 13, 1983, the unappropriated, unreserved public lands described in paragraph 1 shall be open to the operation of the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law.

5. Of the lands described in paragraph 1, the following lands were restored to mineral entry by Restoration Orders dated November 12, 1954 and November 21, 1958:

T. 7 N., R. 4 W.,
Sec. 20, W½SW¼SW¼;
T. 8 N., R. 5 W.,
Sec. 1, lots 1 to 7, inclusive, SW¼NE¼, S½NW¼, SW¼, W½SE¼;
Sec. 11, N½, SW¼, NW¼SE¼;
Sec. 12, W½;
Sec. 13, lots 1 to 4, inclusive, W½NE¼, W½;
Sec. 14, E½NE¼, SW¼NE¼, NW¼NW¼, NE¼SW¼, N½SE¼.

The area described contains 2,289.25 acres in Maricopa and Yavapai Counties.

6. All lands described in this order have been and will continue to be open to applications and offers under the mineral leasing laws.

Inquiries concerning the public lands should be addressed to the Arizona State Director, Bureau of Land Management, U.S. Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Dated: February 22, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6354

[ORE-06396]

Oregon; Revocation of Stock Driveway Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes a public land order which withdrew certain lands for use as a stock driveway. This action will restore 1,025.17 acres of land to operation of the public land laws generally.

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Champ C. Vaughan, Jr., Oregon State Office, 503-231-6905.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order No. 1967 of September 1, 1959, which withdrew the following described public land for a stock driveway is hereby revoked:

Willamette Meridian

T. 33 S., R. 18 E.,
Sec. 7, E½NE¼, N½SW¼NE¼, and N½SE¼NW¼;
Sec. 8, W½NE¼, SE¼NE¼, and N½NW¼;
Sec. 9, lots 4 to 8, inclusive;
Sec. 10, W½SW¼, SE¼SW¼, and S½SE¼;
Sec. 13, N½S½ and SW¼SW¼;
Sec. 14, S½NW¼ and that portion of the NE¼SE¼ lying south of a line with the bearing of North 64°35' W., beginning 1,144 feet north of the Section corner common to sections 13, 14, 23, and 24;
Sec. 15, N½NE¼.

The area described contains approximately 1,025.17 acres in Lake County.

2. At 7:30 a.m., on April 13, 1983, the land will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. All valid applications received at or prior to 7:30 a.m., on April 13, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The land has been and continues to be open to applications and offers under the mineral leasing laws and to location under the United States mining laws.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Dated: February 22, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6355

[NM 42701-WR]

New Mexico; Revocation of Stock Driveway No. 58, New Mexico No. 7

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes a Secretarial order which withdrew 160 acres for a stock driveway. The land lies within the Carson National Forest and thus is subject only to such forms of surface use as may by law be made of national forest lands. However, the land remains closed to disposal by an existing powersite classification. It has been and will remain open to mining and mineral leasing.

EFFECTIVE DATE: March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Dolores Vigil, New Mexico State Office, 505-988-6538.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior, by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Secretarial Order of February 4, 1919, creating Stock Driveway No. 58, New Mexico No. 7, lying wholly within the Carson National Forest, is hereby revoked in its entirety:

New Mexico Principal Meridian

T. 24 N., R. 4 E.,
Sec. 4, W½W½.

The area described contains 160 acres in Rio Arriba County.

2. The land has been and will remain open to mining and mineral leasing, and also to such forms of surface use as may by law be made of national forest lands. However, Powersite Classification No. 371 will continue to close the land to disposal.

Inquiries concerning the lands should be addressed to Chief, Lands Unit, Bureau of Land Management, P.O. Box 1449, Santa Fe, New Mexico 87501.

Dated: February 22, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6357

[I-15303]

Idaho; Partial Revocation of Stock Driveway Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order partially revokes the Secretarial Order of June 19, 1922, affecting 1,547.37 acres of land withdrawn for stock driveway purposes. This action will restore the lands to

operation of the public land laws. The lands have been and will remain open to mining and mineral leasing.

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: William E. Ireland, Idaho State Office, 208–334–1597.

SUPPLEMENTARY INFORMATION: By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Secretarial Order of June 19, 1922, which withdrew public lands for use and designation as Stock Driveway No. 157, is hereby partially revoked as it affects the following described lands:

Boise Meridian, Idaho

T. 2 S., R. 38 E.,
Sec. 33, lots 4 and 5, W½SE¼.
T. 3 S., R. 38 E.,
Sec. 4, lots 7, 8 and 9.
T. 4 S., R. 39 E.,
Sec. 4, W½NE¼;
Sec. 21, NW¼;
Sec. 36, SE¼NW¼.
T. 5 S., R. 40 E.,
Sec. 1, S½SW¼;
Sec. 5, SW¼SW¼.
Sec. 6, SE¼SW¼,
Sec. 8, SW¼NE¼, N½NW¼, SE¼NW¼, N½SE¼, SE¼SE¼;
Sec. 11, SW¼NE¼, NE¼SW¼, S½SW¼, NW¼SE¼;
Sec. 12, NW¼;
Sec. 14, NW¼NW¼;
Sec. 15, N½NE¼, SW¼NE¼, S½NW¼.

The area described contains 1,547.37 acres in Bingham and Caribou Counties.

2. At 7:45 a.m. on April 13, 1983, the lands described in paragraph 1 will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and classifications, and the requirements of applicable law. All valid applications received at or prior to 7:45 a.m. on April 13, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. The lands have been and will remain open to the mining and mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Federal Building, Box 042, Boise, Idaho 83724.

Dated: February 22, 1983.

[CA 8193 WR]

California; Revocation of Stock Driveway Withdrawal No. 53

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes the remaining 40 acres of a withdrawal of land used for a stock driveway. It restores the land to operation of the public land laws generally. The land has been and remains open to mining and mineral leasing.

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Larry Weitzel, California State Office 916–484–4431.

SUPPLEMENTARY INFORMATION: By virture of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Secretary's Order of December 13, 1918, which withdrew lands for Stock Driveway Withdrawal No. 53 (California No. 3), is hereby revoked as to the remaining described land:

Mount Diablo Meridian

T. 22 N., R. 16 E.,
Sec. 10, SE¼NW¼.

The area described contains 40 acres in Plumas County.

2. At 10 a.m. on April 13, 1983, the land, shall be open to operation of the public land laws generally, subject to valid existing rights the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on April 13, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

The land has been and continues to be open to location under the mining laws and to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, Room E–2841, Federal Building, 2800 Cottage Way, Sacramento, California 95825.

Dated: February 22, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6359

[A–12885]

Arizona; Partial Revocation of Reclamation Project Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order partially revokes a Secretarial order which withdrew lands for the Colorado River Storage Project, Arizona. The affected lands total 3,828.51 acres for which the State of Arizona has filed an application under the State Indemnity Lieu Program. Consequently, the entire tract will remain closed to surface entry and mining. The lands have been and will remain open to mineral leasing until consummation of the transfer to the State.

EFFECTIVE DATE: March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Mario L. Lopez, Arizona State Office, 602–261–4774.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Managment Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Secretarial Order dated May 8, 1919, which withdrew lands for the Boulder Canyon Reservoir, Colorado River Storage Project, is hereby revoked insofar as it affects the following described lands:

Gila and Salt River Meridian

T. 29 N., R. 20 W.,
Sec. 6, lots 1 to 7, inclusive, S½NE¼, SE¼NW¼, E½SW¼, SE¼;
Sec. 7, lots 1 to 4, inclusive, E½, E½W½;
Sec. 18, lots 1 to 4, inclusive, E½, E½W½;
Sec. 19, lots 1 to 4, inclusive, E½, E½W½;
Sec. 30, lots 1 to 4, inclusive, E½, E½W½;
Sec. 31, lots 1 to 4, inclusive, E½, E½W½.

The areas described aggregate 3,828.51 acres in Mohave County.

2. All lands described in paragraph 1 have been classified for state selection purposes and will not be open to other appropriation under the public land laws, including the mining laws.

3. The lands have been and will remain open to applications and offers under the mineral leasing laws until consummation of the transfer to the State of Arizona.

Inquiries concerning the public lands should be addressed to the Arizona State Director, Bureau of Land Management, U.S. Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Dated: February 22, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6360

[R-4634]

California; Reservoir Site Restoration No. 48, Partial Revocation of Reservoir Site Reserve No. 17

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order partially revokes an Executive Order which withdrew national forest lands for Reservoir Site Reserve No. 17. The affected 3,581 acres remain withdrawn from mining by the Act of May 29, 1928, but will be opened to such other forms of disposition as may be made of national forest lands.

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Marie Getsman, California State Office, 916-484-4431.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Executive Order of June 8, 1926, which withdrew national forest lands for reservoir site purposes is hereby revoked insofar as it affects the following described lands:

San Bernardino Meridian

Angeles National Forest

T. 1 N., R. 9 W.,
- Sec. 6, SE¼SW¼;
- Sec. 7, SE¼SW¼NE¼, W½NE¼NW¼, and SW¼SE¼;
- Sec. 8, NW¼NW¼;
- Sec. 18, SE¼ of lot 1, lot 2, and SE¼NW¼.

T. 2 N., R. 9 W.,
- Sec. 19, N½, SW¼;
- Sec. 20, W½NE¼, SW¼NW¼ and NW¼SE¼;
- Sec. 21, SE¼NE¼;
- Sec. 22, N½SE¼SE¼, N½S½SE¼SE¼, and SE¼SE¼SE¼SE¼;
- Sec. 23, SW¼SW¼
- Sec. 25, N½, and N½S½;
- Sec. 26, lots 1, 2, 4 and 5, N½NE¼, S½SW¼NE¼, NE¼SE¼NE¼, E½NW¼ SE¼NE¼, S½SE¼NE¼, and S½SE¼NW¼.
- Sec. 27, lots 1 and 2, NE¼NE¼NE¼NE¼, SE¼NE¼, and W½NW¼;
- Sec. 28, lots 2 and 3, and S½N½;
- Sec. 29, S½NW¼;
- Sec. 30, S½NE¼, and E½NW¼.

T 2 N., R. 10 W.,
- Sec. 13, SE¼SW¼, and SW¼SE¼;
- Sec. 22, SE¼NE¼, and SE¼;
- Sec. 23, SW¼NE¼, S½NW¼, N½SW¼, and SE¼;
- Sec. 24, W½NE¼, SE¼NE¼, W½, and SE¼.

The above lands aggregate approximately 3,581 acres in Los Angeles County, California.

2. All of the lands remain withdrawn from location and entry under the mining laws under the Act of May 29, 1928, 45 Stat. 956; however, at 10 a.m. on April 13, 1983, the lands will be opened to such other forms of disposition as may be made of national forest lands. The lands have been and will remain open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, 2800 Cottage Way, Sacramento, California 95825.

Dated: February 22, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 73 and 74

Oversight of the Radio and TV Broadcast Rules

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This Order amends radio and TV broadcast station regulations in Volume III, Parts 73 and 74 of the rules of the FCC. Amendments are made to delete certain regulations, correct inaccurate rule texts, contemporize certain requirements and to execute editorial revisions as needed for purposes of clarity and ease of understanding.

DATE: Effective March 4, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Steve Crane, Mass Media Bureau, (202) 632-5414.

SUPPLEMENTARY INFORMATION:

List of Subjects

47 CFR Part 73

Radio broadcast.

47 CFR Part 74

Radio.

Order

Adopted: February 10, 1983.

Released: February 18, 1983.

In the Matter of Oversight of the Radio and TV Broadcast Rules.

1. In this *Order*, the Commission focuses its attention on the oversight of its radio and TV broadcast rules. Modifications are made herein to update, delete, clarify or correct broadcast regulations as described in the following amendment summaries:

(a) The Department of Communications, Government of Canada, has submitted to the FCC a revised version of its AM conductivity map ("Ground Conductivity Map," dated January 1980). This map replaces the "Provisional Ground Conductivity Map" dated June 1960. Groundwave studies for any AM application tendered to the FCC after January 1, 1983, which involve Canada, must be based on the January, 1980 "Ground Conductivity Map." References to the old Canadian map are made in Section 73.183(c) and Note 2 which follows it, and in this *Order* we make appropriate amendments in the rule text to reflect the change to the 1980 map.

A change is also made in Note 1 to § 73.183(c), deleting the statement that USA M3 ground conductivity maps may be obtained from the Superintendent of Documents, Government Printing Office. The GPO no longer offers M3 maps. (See appendix item 1.)

(b) In the Report and Order in the Low Power TV proceeding in BC Docket 78-253 the change adopted in § 73.3594(f) was inadvertently misstated. It is corrected via this *Order*. (See appendix item 2.)

(c) In § 73.3597, Procedures on transfer and assignment applications, there are a number of inaccuracies in the text. Separately the textual errors are not significant; however, collectively they provide good reason to modify and clarify the affected paragraphs. Such rewrite is accomplished herein. (See appendix item 3.)

(d) With the adoption of the Report and Order in General Docket 80-603, the Commission established policy pertaining to Direct Broadcast Satellites. This subject and pertinent citations are added to the Listing of Policies in Part 73. The listing is designated § 73.4091, Direct Broadcast Satellites. (See appendix item 4.)

(e) In Part 74, only Subpart D (Remote Pickup Broadcast Stations) and Subpart H (Low Power Auxiliary Stations) address the procedure to be followed by the licensee when operation of an auxiliary station is permanently discontinued. In Subparts D and H the licensee is directed to "forward the station license to the FCC in Washington, D.C. for cancellation."

Permanent discontinuance of operation is defined as "a station which is not operated for a period of one year. * * *" In Subparts E (Aural Broadcast STL and Intercity Relay Stations) and F (TV Auxiliary Broadcast Stations) no discontinuance procedures are stated. However, the permanent discontinuance of operation of the STL's and relay stations have, in the past, been noted and cancelled when, at license renewal time for the main stations, the licensee failed to apply for renewal of auxiliaries. (Failure to renew a remote pickup or low power auxiliary has also served the same "cancellation notice" function.)

Two minor complications have arisen which seriously weaken, at renewal time, this procedure:

The use of the new simplified renewal application, FCC Form 303–S, presumes renewal has been requested for the licensee's currently authorized auxiliary stations *unless specifically indicated to the contrary.* Lack of such "indication" guarantees renewal of the auxiliary. We believe that, inadvertently, the potential for retaining a no-longer-used auxiliary station is great under this system. Since the 303–S has no specific question regarding the licensee's application for auxiliary station renewal the procedure requires the licensee to request cancellation of the auxiliary authorization in a separate document filed with the Form 303–S. The potential for failing to overtly make this request is obvious.

Couple to this situation the extension of station license periods to 7 years and 5 years for radio and TV respectively, and the dormancy period for unused, but uncancelled, auxiliary licenses increases greatly.

As a result of the above, the FCC records no doubt show a much lower inventory of auxiliary frequencies to persons searching our records for such availabilities. Our records, very possibly, may reflect a greater channel usage than actually exists. To alleviate this potential for inaccuracy in channel usage (and provide an accurate inventory for those searching for frequencies), we duplicate the discontinuance of operation and license cancellation procedures of Subparts D and H in Subparts E (Aural STL) and Intercity Relay Stations) and F (TV Auxiliary Broadcast Stations). Licensees are herein directed, in §§ 74.532 and 74.632, to return the station license to FCC, Washington, D.C. if operation of the station is permanently discontinued. (See appendix items 5 and 6.)

(f) Subpart I of Part 74 contains the regulations pertaining to Instructional TV Fixed Service (ITFS). This service, at its inception, was called "Educational TV Fixed Station," and thereby was often confused with noncommercial educational television in Part 73. To clearly identify the services, the ITFS designation was made. The old terminology survives in 74.937(f) where reference is made to "* * * a new educational television fixed station. * * *" It is corrected to read ITFS herein. (See appendix item 7.)

(g) The following subject titles are corrected in the Alphabetical Index in Part 73:

Multiplex ownership: should read
Multiple ownership
Multiple subcarriers, Use of: should read
Multiplex subcarriers, Use of

(See appendix item 8.)

2. No substantive changes are made herein which impose additional burdens or remove provisions relied upon by licensees or the public. We conclude, for the reasons set forth above, that these revisions will serve the public interest.

3. These amendments are implemented by authority designated by the Commission to the Chief, Mass Media Bureau. Inasmuch as these amendments impose no additional burdens and raise no issue upon which comments would serve any useful purpose, prior notice of rulemaking, effective date provisions and public procedure thereon are unnecessary pursuant to the Administrative Procedure and Judicial Review Act provisions of 5 U.S.C. 553(b)(3)(B).

4. Since a general notice of proposed rulemaking is not required, the Regulatory Flexibility Act does not apply.

5. Therefore, It is ordered, That pursuant to Sections 4(i) 303(r) and 5(d)(1) of the Communciations Act of 1934, as amended, and §§ 0.71 and 0.283 of the Commission's Rules, Parts 73 and 74 of Volume III of the FCC Rules and Regulations are amended as set forth in the attached appendix, effective.

6. For further information on this *Order,* contact Steve Crane, (202) 632–5414, Mass Media Bureau.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 164, 303)

Federal Communications Commission.

Laurence E. Harris,

Chief, Mass Media Bureau.

Appendix

PART 73—[AMENDED]

1. In § 73.183, paragraph (c) and Notes 1 and 2 which follow it, are revised to read as follows:

§ 73.183 Groundwave signals.

* * * * *

(c) In all cases where measurements taken in accordance with the requirements are not available, the groundwave strength must be determined by means of the pertinent map of ground conductivity and the groundwave curves of field strength versus distance. The conductivity of a given terrain may be determined by measurements of any broadcast signal traversing the terrain involved. Figure M3 (see Note 1) shows the conductivity throughout the United States by general areas of reasonably uniform conductivity. When it is clear that only one conductivity value is involved, Figure R3 of § 73.190, which is a replica of Figure M3 and contained in these standards, may be used; in all other situations Figure M3 must be employed. It is recognized that in areas of limited size or over a particular path, the conductivity may vary widely from the values given; therefore, these maps are to be used only when accurate and acceptable measurements have not been made. (For determinations of interference and service requiring a knowledge of ground conductivities in Mexico, Annex XIV–C to the Agreement Between the United States of America and the United Mexican States Concerning Radio Broadcasting in the Standard Broadcasting Band (535–1605 kHz), Mexico, D.F., 1968, may be used. Similarly, for values of ground conductivity in Canada, a map issued by the Department of Communications, Government of Canada entitled "Ground Conductivity Map," dated January, 1980, may be used. Where different conductivities appear in the maps of two countries on opposite sides of the border, such differences are to be considered as real, even if they are not explained by geophysical cleavages. A uniform ground conductivity of 10 millimhos per meter may be assumed for Cuba.)

Note 1.—Figure R3 in § 73.190 is a replica of Figure M3. Figure M3, which is incorporated in these Standards by reference, was derived by indicating ground conductivity values in the United States on the United States Albers equal area projection map (based on standard parallels 29½° and 45½°; North American datum; scale 1/2,500,000).

Note 2.—Copies of "Ground Conductivity Map" may be obtained by contacting the Chief, Broadcast Applications Engineering Division, Department of Communications, 300 Slater Street, Ottawa, Ontario K1A 0C8, Canada. Cost is $100.00, Canadian. Remittance should be made by check or money order payable to Receiver General for Canada.

* * * * *

2. Section 73.3594 is amended by revising paragraph (f) as follows:

§ 73.3594 Local public notice of designation for hearing.

* * * * *

(f) When an application for a low power TV, TV translator, FM translator, or FM booster station which is subject to the provisions of § 73.3580 is designated for hearing, the applicant shall give notice of such designation as follows: Notice shall be given at least once during the 2-week period immediately following release of the FCC's order, specifying the time and place of the commencement of the hearing in a daily, weekly or biweekly publication having general circulation in the community or area to be served. However, if there is no publication of general circulation in the community or area to be served, the applicant shall determine an appropriate means of providing the required notice to the general public, such as posting in the local post office or other public place. The notice shall state:

* * * * *

3. Section 73.3597 is amended by revising paragraphs (c)(1)(i) and (ii), (d)(1) and (2), the introductory text of (d)(3), and (d)(3)(vi) and (4) as follows:

§ 73.3597 Procedures on transfer and assignment applications.

* * * * *

(c) (1) * * *.

(i) "Unbuilt station" refers to an AM, FM, or TV broadcast station or a low power TV station for which a construction permit is outstanding, and, regardless of the stage of physical completion, for which program tests have not commenced or, if required, been authorized.

(ii) "Seller" includes the assignor(s) of a construction permit for an unbuilt station, the transferor(s) of control of the holder of such construction permit, and any principal or such assignor(s) or transferor(s) who retains an interest in the permittee or acquires or reacquires such interest within 1 year after commencing program tests.

* * * * *

(d) (1) Whenever an agreement for the assignment of the construction permit of an unbuilt station or for the transfer of control of the permittee of an unbuilt station, or any arrangement or understanding incidental thereto, provides for the retention by the seller of any interest in the station, or for any other actual or potential benefit to the seller in the form of loans or otherwise, the question is raised as to whether the transaction involves actual or potential gain to the seller over and above the legitimate and prudent out-of-pocket expenses allowable under paragraph (c)(2) of this section. In such cases the FCC will designate the assignment or transfer applications for evidentiary hearing. However, a hearing is not mandatory in cases coming within (d)(2) below.

(2) It is not intended to forbid the seller to retain an equity interest in an unbuilt station which he is transferring or assigning if the seller obligates himself, for the period ending 1 year after commencing program tests, to provide that part of the total capital made available to the station, up to the end of that period, which is proportionate to the seller's equity share in the permittee, taking into account equity capital, loan capital, and guarantees of interest and amortization payments for loan capital provided by the seller before the transfer or assignment. This condition will be satisfied.

* * * * *

(3) In cases which are subject to the requirements of (d)(2)(i), (ii) and (iii) above:

* * * * *

(vi) The provisions of (d)(3)(iv) and (v) above shall cease to apply 1 year after commencing program tests.

(4) Applications subject to this paragraph (d) will, in any event, be designated for evidentiary hearing in any case where the agreements, arrangements or understandings with the seller provide for the seller's option to acquire equity in the station or to increase equity interests he retains at the time of the assignment or transfer of control. An evidentiary hearing will similarly be held in any case in which the assignee(s), transferee(s) or any of their principals, or any person in privity therewith, has an option to purchase all or part of the seller's retained or subsequently acquired equity interests in the station.

4. New § 73.4091 is added to the Policy listings in Subpart H, Part 73 to read as follows:

§ 73.4091 Direct broadcast satellites.

(a) See Report and Order, General Docket 80-603, FCC 82-285, adopted June 23, 1982. 90 FCC 2d 676; 47 FR 31555, July 21, 1982.

(b) See Memorandum Opinion and Order, FCC 82-427, adopted September 23, 1982. 91 FCC 2d

(c) See Memorandum Opinion and Order, FCC 82-498, adopted November 4, 1982. 91 FCC 2d

PART 74—[AMENDED]

5. Section 74.532 is amended by adding new paragraph (e) as follows:

§ 74.532 Licensing requirements.

* * * * *

(e) In case of permanent discontinuance of operation of a station licensed under this Subpart, the licensee shall forward the station license to the FCC, Washington, D.C., 20554, for cancellation. A station which is not operated for a period of one year is considered to have been permanently discontinued.

6. Section 74.632 is amended by adding new paragraph (f) as follows:

§ 74.632 Licensing requirements.

* * * * *

(f) In case of permanent discontinuance of operation of a station licensed under this Subpart, the licensee shall forward the station license to the FCC, Washington, D.C., 20554, for cancellation. A station which is not operated for a period of one year is considered to have been permanently discontinued.

7. Section 74.937 is amended by revising paragraph (f) to read as follows:

§ 74.937 Antennas.

* * * * *

(f) The power gain compared to an isotropic antenna and the directive properties of the transmitting and receiving antennas proposed to be employed, as well as the geometric distribution of the transmitting and receiving points, shall be supplied with each application for a new ITFS fixed station or for changes in the antenna facilities of an existing station.

8. The following subject titles in the alphabetical index of Part 73 are corrected as follows:

Multiplex ownership should read Multiple ownership.

Multiple subcarriers, Use of should read Multiplex subcarriers, Use of.

[FR Doc. 83-5128 Filed 3-2-83; 8:45 am]
BILLING CODE 6712-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. MC-96 (Sub-2)]

Passenger Broker Entry Control

AGENCY: Interstate Commerce Commission.

ACTION: Discontinuance of proceeding.

SUMMARY: The Commission is discontinuing this proceeding because the Bus Regulatory Reform Act of 1982 exempts passenger brokers from licensing requirements.

EFFECTIVE DATE: March 1, 1983.

FOR FURTHER INFORMATION CONTACT: Andrew L. Lyon (202) 275–7805, or Howell I. Sporn (202) 275–7691.

SUPPLEMENTARY INFORMATION: In this proceeding the Commission previously adopted rules: (1) Simplifying the procedure for obtaining a passenger broker license, (2) revising the Commission's regulations by increasing the passenger broker surety bond requirement, and (3) adding a consumer notice requirement. The decision adopting the rules appeared at 44 FR 70167, December 6, 1979, as corrected at 44 FR 74838, December 18, 1979.

The United States Court of Appeals for the District of Columbia Circuit stayed the decision and the adopted rules pending review. Upon completion of review and affirmance of the Commission's decision, the stay was lifted, thereby enabling the Commission to implement the rules. The Commission delayed implementation due to legislation pending in the Congress dealing with bus passenger operations and passenger brokers. No further action has been taken by the Commission.

The Bus Regulatory Reform Act of 1982 (Bus Act) was signed into law on September 20, 1982, and became effective November 19, 1982. Section 14 of the Bus Act exempts passenger brokers from licensing requirements and gives the Commission power to impose on passenger brokers such requirements for bonds or insurance or both as the Commission determines are needed. Consequently, the Commission no longer has authority to implement the application rules and the consumer notice requirement adopted in this proceeding. Accordingly, the rules adopted as a result of this proceeding which were codified at 49 CFR Parts 1045B and 1046 were removed in Ex Parte No. 55 (Sub-No. 56) (47 FR 53260, November 24, 1982). Also, implementation of the increased bond requirement is inappropriate as the Commission recently decided not to reinstitute any bond or insurance requirement for passenger brokers at this time, in Ex Parte No. MC–5 (Sub-No. 4), *Passenger Broker Surety Bonds or Insurance*, 133 M.C.C. 57 (1983).

This decision will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

This proceeding is discontinued.

This decision is issued pursuant to authority in 49 U.S.C. 10321 and 5 U.S.C. 553.

Decided: February 22, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83–5110 Filed 3–3–83; 8:45 am]

BILLING CODE 7035–01–M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 195

[Amdt. 195–26, Docket PS–72]

Transportation of Hazardous Liquids by Pipeline Retention of Radiographic Film

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: This final rule deletes the requirement in § 195.234(g) to retain radiographic film for 3 years after a line is placed in service and to map the location of the radiographed welds. The existing rule does not enhance safety but does impose a significant cost burden.

EFFECTIVE DATE: April 4, 1983.

ADDRESS: Copies of this amendment may be obtained from the Dockets Branch, Room 8426, Materials Transportation Bureau, U.S. Department of Transportation, 400 7th Street S.W., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT: Frank Robinson, 202–426–2392.

SUPPLEMENTARY INFORMATION: Under the requirements of § 195.234, at least 10 percent of the girth welds made daily on a pipeline must be nondestructively tested to determine the acceptability of the welds. In addition, 100 percent of the girth welds that are located in specified areas (where a defect might occur or a spill could have serious consequences) must be nondestructively tested. To assure compliance with these testing requirements, § 195.234(g) requires that a record be kept for 3 years of welds that have been nondestructively tested, showing, if practicable, the location of the weld, and including the developed film for welds tested by radiography. Besides serving as a check on compliance, MTB believes that the intent § 195.234(g) is that retained radiographs would be advantageous in analyzing any leak that might develop in a radiographed weld.

In addition to the § 195.234(g) requirement, § 195.266(a) requires that a complete record be kept for the life of the facility showing the total number of girth welds and the number nondestructively tested, including the number rejected and the disposition of each rejected weld.

Two persons petitioned MTB to delete the radiograph retention requirement from § 195.234(g). In a letter dated September 21, 1977 (Pet. 77–11), Consolidated X-Ray Service Corporation requested that § 195.234(g) be made identical to the comparable recordkeeping requirement for gas pipelines set forth in § 192.243(f), which does not require retention of radiographs, or the exact location of each weld. Consolidated argued that the requirement for gas pipelines should be sufficient for liquid pipelines, since the construction methods (i.e., materials used, welding practices, and inspection techniques) are the same for the two types of pipelines.

Consolidated also pointed out that although radiograph retention was initially proposed for inclusion in § 192.243(f) (35 FR 1112), it was deleted in the final rule (35 FR 13248) in favor of the current, more general requirement on grounds that the "retention of X-ray film would present a substantial clerical burden and will not prove too valuable in accident investigation."

Colonial Pipeline Company, by letter dated October 17, 1978, also requested that the requirement to retain weld radiographs be deleted from § 195.234(g). Colonial argued that the objective of radiographic inspection of girth welds is to control the quality of welding, and that this objective is met by immediately bringing any problems that are detected to the attention of the welders. Thus, Colonial concluded, a weld radiograph loses its usefulness after a weld is initially accepted or rejected. In further argument against the need to retain radiographs beyond their initial interpretation, Colonial argued that a record of film interpretation and subsequent disposition of the weld, combined with a metallurgical examination, would be sufficient to explain any weld failure that might occur. Colonial also said the burdens associated with radiograph retention (the clerical tasks of rolling, marking, transporting, and storing film as much as 132 inches in length) are costly, and the time spent by inspectors who perform these tasks reduces their effectiveness in visually inspecting and interpreting film of additional welds.

A notice of proposed rulemaking (NPRM) was published on October 4, 1982 (47 FR 43745), proposing to delete § 195.234(g) based on the information

contained in the petitions and other information given in the notice.

Twenty-one commenters responded to the notice: the American Petroleum Institute (API), the American Gas Association (AGA), the Interstate Natural Gas Association of America (INGAA), five gas pipeline companies, and thirteen liquid pipeline companies. All of the commenters supported the deletion of § 195.234(g). Additionally, at a meeting in Washington, D.C., on December 17, 1981, the Technical Hazardous Liquid Pipeline Safety Standards Committee (THLPSSC) supported deletion of the rule. The Committee report is available for public review and copying.

In view of the information contained in the petitions together with other information given in the notice, the support of the THLPSSC and the 21 commenters, the MTB believes that § 195.234(g) is unnecessary for pipeline safety and imposes a $3.20 million annual cost burden. For these reasons MTB deletes § 195.234(g) in this final rule.

Since this final rule will have a positive effect on the economy of less than $100 million a year, will result in a cost savings to consumers, industry, and government agencies, and no adverse effects are anticipated, the action is not "major" under Executive Order 12291 or "significant" under Department of Transportation procedures.

Based on the facts available concerning the impact of this rulemaking action, I certify pursuant to section 605 of the Regulatory Flexibility Act, that the action will not have a significant economic impact on a substantial number of small entities. Few, if any, small entities will be affected by this rule.

List of Subjects in 49 CFR Part 195

Pipeline safety, Girth welds, Nondestructive testing, Radiographic inspection, Radiographic film, Mapping girth welds, Recordkeeping, and Record retention period.

PART 195—[AMENDED]

§ 195.234 [Amended]

For reasons given above, 49 CFR Part 195 is amended by removing § 195.234(g).

(49 U.S.C. 2002; 49 CFR 1.53, and Appendix A to Part 1)

Issued in Washington, D.C. on February 24, 1983.

L. D. Santman,

Director, Materials Transportation Bureau.

Federal Highway Administration

49 CFR Part 387

[BMCS Docket No. MC-94-1; Amdt. No. 81-9]

Minimum Levels of Financial Responsibility for Motor Carriers; Technical Correction

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Technical correction to final rule.

SUMMARY: An emergency regulation which revised the existing minimum levels of financial responsibility requirements for motor carriers to implement provisions required by section 406 of the Surface Transportation Assistance Act of 1982 (STAA of 1982) was published in the **Federal Register** on February 7, 1983 (48 FR 5559). A technical correction is being made to the final rule which adds three commodities to the commodity transported column of both "Schedule of Limits" charts included in §§ 387.9 and 387.15 of 49 CFR. The three commodities were inadvertently omitted from the charts upon publication of the emergency regulation.

EFFECTIVE DATE: January 6, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Neill L. Thomas, Bureau of Motor Carrier Safety, 202-426-9767; or Mrs. Kathleen S. Markman, Office of the Chief Counsel, 202-426-0346, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m., ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: The final rule implementing the provisions required by section 406 of the STAA of 1982 (Pub. L. 97-424, 96 Stat. 2097) was published in the **Federal Register** on February 7, 1983 (48 FR 5559). In revising the charts showing the schedule of limits, any quantity of Class A or B explosives; any quantity of poison gas; or large quantity radioactive materials, were inadvertently omitted from paragraph (2), commodity transported column. Therefore, § 387.9 and § 387.15 are being amended to reinstate these commodities in paragraph (2) of both "Schedule of Limits" charts. For clarity and convenience, both charts are being reproduced in full and corrected.

The FHWA has determined that this document contains neither a major rule under Executive Order 12291 nor a significant regulation under the regulatory policies and procedures of the Department of Transportation. The economic impact, if any, anticipated as a result of this action is so minimal, a full regulatory evaluation is not required.

Under the criteria of the Regulatory Flexibility Act, it is certified that this rulemaking does not have a significant economic impact on a substantial number of small business entities.

Notice and opportunity for comment are not required under the regulatory policies and procedures of the DOT because it is not anticipated that such action would result in the receipt of useful information. Also, because the emergency final rule was effective January 6, 1983, these technical corrections are effective on January 6, 1983.

(Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety)

List of Subjects in 49 CFR Part 387

Hazardous materials transportation, Insurance, Motor carriers, Surety bonds.

(Sec. 406, Pub. L. 97-424, 96 Stat. 2097; 49 CFR 1.48 and 301.60)

Issued on: February 24, 1983.

Kenneth L. Pierson,

Director, Bureau of Motor Carrier Safety, Federal Highway Administration.

In consideration of the foregoing, the FHWA is amending Part 387 of title 49, Code of Federal Regulations, to read as set forth below.

PART 387—[AMENDED]

1. The "Schedule of Limits" chart in § 387.9, is amended to read as follows:

§ 387.9 Financial responsibility minimum levels.

* * * * * * *

SCHEDULE OF LIMITS

[Public liability]

Type of carriage*	Commodity transported	July 1, 1981	July 1, 1983
(1) For-hire (In interstate or foreign commerce)	Property (nonhazardous)	$500,000	$750,000
(2) For-hire and Private (In interstate, foreign, or intrastate commerce).	Hazardous substances, as defined in 49 CFR 171.8, liquefied compressed gas, or compressed gas transported in cargo tanks, portable tanks, or hopper-type vehicles with capacities in excess of 3,500 water gallons; or in bulk (any quantity) Class A or B explosives or poison gas; or large quantity radioactive materials as defined in 49 CFR 173.389.	1,000,000	5,000,000
(3) For-hire and Private (In interstate or foreign commerce: in any quantity) or (In intrastate commerce: in bulk only).	Oil listed in 49 CFR 172.101; hazardous waste, hazardous materials and hazardous substances defined in 49 CFR 171.8 and listed in 49 CFR 172.101, but not mentioned in (2) above or (4) below.	500,000	1,000,000
(4) For-hire and Private (In interstate or foreign commerce).	Any quantity of Class A or B explosives; any quantity of poison gas; or large quantity radioactive materials as defined in 49 CFR 173.389.	1,000,000	5,000,000

*NOTE.—The type of carriage listed under numbers (1), (2), and (3) apply to vehicles with a gross vehicle weight rating of 10,000 pounds or more. The type of carriage listed under number (4) applies to all vehicles with a gross vehicle weight rating of less than 10,000 pounds.

2. The "Schedule of Limits" chart in Illustration I of § 387.15 is amended to read as follows:

§ 387.15 Forms.

SCHEDULE OF LIMITS

[Public liability]

Type of carriage*	Commodity transported	July 1, 1981	July 1, 1983
(1) For-hire (In interstate or foreign commerce)	Property (nonhazardous)	$500,000	$750,000
(2) For-hire and Private (In interstate, foreign, or intrastate commerce).	Hazardous substances, as defined in 49 CFR 171.8, liquefied compressed gas, or compressed gas transported in cargo tanks, portable tanks, or hopper-type vehicles with capacities in excess of 3,500 water gallons; or in bulk (any quantity) Class A or B explosives or poison gas; or large quantity radioactive materials as defined in 49 CFR 173.389.	1,000,000	5,000,000
(3) For-hire and Private (In interstate or foreign commerce: in any quantity) or (In intrastate commerce: in bulk only).	Oil listed in 49 CFR 172.101; hazardous waste, hazardous materials and hazardous substances defined in 49 CFR 171.8 and listed in 49 CFR 172.101, but not mentioned in (2) above or (4) below.	500,000	1,000,000
(4) For-hire and Private (In interstate or foreign commerce).	Any quantity of Class A or B explosives; any quantity of poison gas; or large quantity radioactive materials as defined in 49 CFR 173.389.	1,000,000	5,000,000

*NOTE.—The type of carriage listed under numbers (1), (2), and (3) apply to vehicles with a gross vehicle weight rating of 10,000 pounds or more. The type of carriage listed under number (4) applies to all vehicles with a gross vehicle weight rating of less than 10,000 pounds.

Note.—This table showing the schedule of limits may appear at the bottom or on the reverse side of Form MCS–90.

[FR Doc. 83–5251 Filed 3–2–83; 8:45 am]

BILLING CODE 4910–22–M

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1201, 1207 and 1241

Indexing the Annual Operating Revenues of Railroads and Motor Carriers of Property

AGENCY: Interstate Commerce Commission.

ACTION: Rule related notice.

SUMMARY: The Interstate Commerce Commission has adopted a methodology for indexing gross annual operating revenues for railroads and motor carriers of property to eliminate the effects of inflation from the classification process. The Commission's price deflator formula will provide assurances that carriers are moved to a higher classification because of real business expansion, and not from inflationary consequences.

The annual average Railroad Freight Price Index will be used as the railroad deflator. The annual average Producer Price Index for all commodities will be used as the motor carrier deflator. Each index is developed by the Bureau of Labor Statistics. The base years for railroads and motor carriers are 1978 and 1980, respectively. The indexes and deflators are listed in the **SUPPLEMENTARY INFORMATION** section of this Notice.

DATE: Effective for carrier classifications beginning January 1, 1983.

ADDRESSES: Copies of this notice may be purchased by contacting: TS Infosystems, Inc., Room 2227, 12th and Constitution Ave., N.W., Washington, D.C. 20423; (202) 289–4357—D.C. Metropolitan Area, (800) 424–5403—toll free for outside D.C. area.

FOR FURTHER INFORMATION CONTACT: Leonardo A. Rodriguez or William G. Norris (202) 275–7448.

SUPPLEMENTARY INFORMATION: By Final Rule in Docket No. 38559, Railroad Classification Index, served and published in the **Federal Register** on January 20, 1983 (48 FR 2542) and Final Rule in Docket No. 38377, Indexing the Annual Operating Revenues of Motor Carriers of Property, served on October 7, 1982, and published in the **Federal Register** on October 12, 1982 (47 FR 44731), the Commission revised the method of classifying railroads and motor carriers of property for accounting and reporting purposes. The new methodology continues to classify carriers based on gross operating revenues. However, a price deflator formula was adopted to assess whether a carrier's gross operating revenue increases are caused by inflation or a real business expansion. Both Final Rules stated that the Commission would publish the deflators in the **Federal Register.** The deflators for 1980, 1981 and 1982 are:

	Railroads		Motor carriers of property	
	Railroad freight index		Producer prices index	
	Index	Deflator percent	Index	Deflator percent
1978	213.1			
1980	234.5	74.90	252.4	
1981	327.6	65.05	275.5	91.62
1982	351.4	60.64	291.0	88.82

Agatha L. Mergenovich,

Secretary.

Proposed Rules

Federal Register
Vol. 48, No. 43
Thursday, March 3, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1910 and 1944

Individual Credit Reports

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its regulations for the ordering and processing of individual credit reports by collecting a credit report fee from the applicant before credit reports are ordered rather than including a credit report fee as part of the loan. The amendment is needed to reduce unnecessary cost to the Government for credit reports obtained in conducting the credit investigation of individual applicants, their partners, cosigners, or individual members of associations. The intended effect of the action is to establish collection procedure which will reduce the costs to FmHA for this service without placing undue financial burden on the loan applicants.

DATE: Comments must be received on or before May 2, 1983.

ADDRESSES: Submit all written comments in duplicate to the Office of the Chief, Directives Management Branch, Farmers Home Administration, USDA, Room 6348, South Agriculture Building, 14th and Independence Avenue, SW., Washington D.C. 20250. All written comments made pursuant to this notice will be available for public inspection during regular hours at the above address.

FOR FURTHER INFORMATION CONTACT: Frank Colon, Deputy Director, Single Family Housing Processing Division, Farmers Home Administration, USDA, Room 5347, South Agriculture Building, 14th and Independence, SW, Washington, D.C 20250, telephone (202) 382-1462.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Secretary's Memorandum 1512–1 which implements Executive Order 12291, and has been determined "nonmajor" since the annual effect on the economy is less than $100 million and there will be no significant increase in cost or prices for consumers, individual industries, organizations, government agencies or geographic region There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets, since it does not affect FmHA loan eligibility or loan servicing requirements.

The FmHA program or projects which are affected by this regulation should be carried out in accordance with 7 CFR Part 3015, "Intergovernmental Review of the Department of Agriculture Programs and Activities."

The Catalog of Federal Domestic Assistance programs affected are:

CFDA No. and program title

10.404 Emergency Loans
10.405 Farm Labor Housing Loans and Grants
10.406 Farm Operating Loans
10.407 Farm Ownership Loans
10.408 Grazing Association Loans
10.409 Irrigation, Drainage, and Other Soil and Water Conservation Loans
10.410 Low to Moderate Income Housing Loans (Rural Housing Loans-Section 502-Insured)
10.413 Recreation Facility Loans
10.414 Resource Conservation and Development Loans
10.515 Rural Rental Housing Loans
10.416 Soil and Water Loans (SW Loans)
10.417 Very Low-Income Housing Repair Loans and Grants
10.419 Watershed Protection and Flood Prevention Loans
10.422 Business and Industrial Loans
10.428 Economic Emegency Loans
10.429 Above-Moderate Income Housing Loans (Guaranteed Rural Housing Loans)

This document has been reviewed in accordance with 7 CFR Part 1901, Subpart G, "Environmental Impact Statements." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Credit reports are obtained whenever the responsible FmHA official determines that the credit report information is needed to determine the eligibility of applicants. The reports are purchased from credit report companies under contract with the Government. The average contract price for Fiscal Year (FY) 82 was approximately $18.50 per basic report. However, this amount was increased by the cost of "supplemental" or "antecedent" reports when these were needed to complete the 2-year reporting period required in the contract. Payments for credit reports received are made by the FmHA Finance Office for monthly billings submitted by the contractors. Under the present FmHA regulations, to recover the cost of the reports, FmHA applicants, whose loans are approved, are charged a $12 fee per report.

The fee is deducted from the loan check at the Finance Office if only one report was ordered and received. If two or more reports were obtained or if no loan check is issued, as in the case of transfers and assumptions, the loan closing official collects at loan closing, $12 for each credit report obtained. The cost of credit reports for unsuccessful applicants is borne by FmHA. Credit reports obtained for servicing actions are charged to the loan account as a servicing expense. Under these authorities, the cost to FmHA for the credit report service during the last four fiscal years was as follows:

Fiscal year	Amount paid to contractors	Amount collected from borrowers	Expense incurred by FmHA
1978	$2,149,896	$778,512	$1,371,384
1979	2,329,745	922,045	1,407,700
1980	2,114,675	877,985	1,236,690
1981 [1]	2,532,545	747,551	1,784,994

[1] In FY-81, FmHA paid for a total of 156,000 reports at approximately $16.23 per report, and collected from borrowers for approximately 62,300 reports at $12 per report.

The loss to the Government in obtaining the credit report service is further discussed in an audit completed by the Office of the Inspector General in early 1982. It recommends that FmHA amend its regulations to require all loan applicants to pay a nonrefundable fee before credit reports are ordered, and increase the fee charged to the applicant to an amount sufficient to recover the

contracting charges for the reports. Based on the above, the following alternatives were considered in preparing this proposed rule:

Alternative 1.—Continue with present FmHA policies and procedures but increase the fee charged successful applicants to an amount comparable to the average cost of credit reports for the fiscal year. With this option, the amount recovered will be increased; however, there will be no recovery for funds invested by FmHA to purchase credit reports for unsuccessful applicants.

Alternative 2.—Collect the actual cost of credit reports obtained, at loan closing. The results of this option will be similar to those in option 1.

Alternative 3.—Collect from the loan applicant before a credit report is ordered, a fee comparable to the average cost of the credit report for the fiscal year except for Section 504 of RH loan applicants where the credit report fee charged applicant will be included as part of the FmHA loan. This option was selected as it will conserve funds from the Rural Housing Insurance Fund, the Agricultural Credit Insurance Fund, and the Rural Development Insurance Fund. The disadvantage of this option is that, although the process is simplified, the number of staff hours used in processing, is increased. However, the extra cost of operation is offset by the extra amount of funds recovered. Consider the following for FY–81:

Amount Paid by FmHA to contractors for 156,000 credit reports purchased, $2,532,545
Amount that would have been recovered under Option 3 at $16 average cost/credit report for the fiscal year (156,000×$16), $2,496,000 (approx.)
Less cost of extra man-hours that would have been used under Option 3 (156,000×.25×$6) where 156,000 represents fees collected; .25 hours is the time spent in processing a collection; and $6 is the cost/hour, $234,000
Net FmHA recovery under Option 3 ($2,496,000 −$234,000), $2,262,000 (approx.)
Total loss to FmHA under Option 3 ($2,532,545 −$2,262,000), $270,545 (approx.)

The amendment applies to prospective applicants as well as applicants on the waiting lists for individual FmHA loans whose loan documents have not been submitted to the FmHA Finance Office for fund obligation prior to the effective date of the final rule. Other administrative changes are included in the proposal.

The FmHA proposes to amend Subpart B of Part 1910, Chapter XVIII, Title 7, Code of Federal Regulations, as follows:

1. Revise § 1910.52(a) by deleting the reference to the Department of Housing and Urban Development and inserting such reference, if applicable, in paragraph (a) of Exhibit A (available in any FmHA office).

2. Delete § 1910.52(c).

3. Rember § 1910.52(d) as "(c)," remove the reference to a $12 credit report fee charged the applicant from the paragraph and insert the amount charged in paragraph (a) of Exhibit A.

4. Renumber § 1910.52(e) as "(d)," and make reference in the second sentence to the "Director, Directives and Administrative Services Division."

5. Insert a new § 1910.52(e) for the procedure to be followed in obtaining addresses of credit bureaus serving other states.

6. Revise § 1910.53 to indicate that a credit report fee will be collected from the loan applicant before a credit report(s) is ordered, except in the case of Section 504 Rural Housing loan applicants where the credit report fees for credit reports needed to complete the credit investigation will be included as part of the FmHA loan.

7. Revise § 1910.54 to add the definitions of "applicant" and "County Supervisor," and renumber other paragraphs in the section, accordingly.

8. Revise § 1910.55(e) to list adverse items that should be excluded from the credit report under the provisions of paragraph 605 of the Fair Credit Reporting Act.

9. Delete § 1910.58 as the information is now contained in § 1910.53(b).

10. Revise § 1910.59 to change the title of the section to "Type of credit report to be ordered," and to limit the authority for ordering "individual" credit reports only and discontinue the authority for ordering the more costly "joint" reports.

11. Revise § 1910.61 to clarify the procedure to be used in processing unacceptable credit reports and/or incorrect billing data from credit report contractors.

12. Revise § 1910.62(a) to delete reference to the inclusion of a credit report fee as part of the FmHA loan and to update the Truth in Lending requirements.

13. Delete § 1910.62 (b) and (c) as the collection of fees from the loan applicant is described in § 1910.53.

List of Subjects

7 CFR Part 1910

Administrative practice and procedure, Applications, Credit, Government contracts, Loan programs—agriculture, Loan programs—housing and community development, Low- and moderate-income housing, Marital status discrimination, Reporting and recordkeeping requirements, Sex discrimination.

7 CFR 1944

Administrative practice and procedure, Aged, Fair housing, Grant programs—housing and community development, Handicapped, Loan programs—housing and community development, Low- and moderate-income housing, Migrant labor, Mortgages, Nonprofit organizations, Rent subsidies, Reporting and recordkeeping requirements, Rural areas.

Therefore, as proposed, Chapter XVIII of Title 7, Code of Federal Regulations is amended as follows:

PART 1910—GENERAL

Subpart A—Receiving and Processing Applications

1. Section 1910.3 is amended by adding a new paragraph (m) to read as follows:

§ 1910.3 Receiving applications.

* * * * *

(m) Fees for the total amount charged for individual credit reports as indicated in paragraph (a) in the "General" section of Exhibit A (available in any FmHA office) of Subpart B of this Part, will be collected from the loan applicants before credit reports are ordered, except in the case of Section 504 Rural Housing loan applicants where the total amount charged will be included as part of the FmHA loan. In cases where a fee cannot be collected from the applicant, the application will be handled as prescribed in paragraphs (d), (e), and (f) of § 1910.4 of this subpart.

Subpart B—Credit Reports (Individual)

2. Subpart B of Part 1910 is amended by revising § 1910.51 through § 1910.100 and Exhibit B to read as follows:

Subpart B—Credit Reports (Individual)

Sec.

1910.51 Purpose.
1910.52 General.
1910.53 Policy.
1910.54 Definitions.
1910.55 Contractor bureau requirements.
1910.56–1910.58 [Reserved]
1910.59 Type of credit report to be ordered.
1910.60 Processing order tickets.
1910.61 Invoicing and payments
1910.62 Loan documentation procedure.
1910.63 Unsatisfactory contractor performance.
1910.64 Confidential handling of credit reports.
1910.65–1910.100 [Reserved]
Exhibit A [1]

[1] Exhibits A–E do not appear in the Code of Federal Regulations.

Exhibit B
Exhibit C
Exhibit D
Exhibit E

Subpart B—Credit Reports (Individual)

§ 1910.51 Purpose.

This Subpart describes the policies and procedures for obtaining individual type credit reports. Credit reports will be ordered when needed to determine the eligibility of applicants requesting Farmers Home Administration (FmHA) loans.

§ 1910.52 General.

(a) FmHA obtains credit reports from credit reporting companies listed in Exhibit A of this Subpart (available in any FmHA office) or in other credit report contracts authorized by the Contracting Officer, FmHA. County Supervisors are cautioned to order only from those firms. Furthermore, special reports, supplemental employment reports, joint reports, commercial credit reports, and special services are not authorized.

(b) Credit reports may be ordered under the provisions of this Subpart only by FmHA employees.

(c) Regardless of the amount of the fee charged the Government, the cost charged the applicant for each credit report is as indicated in paragraph (a) in the "General" section of Exhibit A. (This figure is not to be confused with the schedule of charges of the credit report contractors appearing in the Exhibit A).

(d) The Finance Office will furnish each County, District and State Office with address rosters of the Credit Bureau Reports, Inc. (CBR) affiliate bureaus serving this area. Addresses of other contractors may be requested from the Director, Directives and Administrative Services Division, National Office, when needed.

(e) The County Supervisor may call the Finance Office (FTS 279–4423, or for non-FTS offices, commercial 314–425–4423) for the addresses of credit bureaus serving the area of residence of out-of-state loan applicants.

(f) Whenever Exhibit A does not list a contractor for a particular town or area, the County Supervisor may request, through the State Director, that the National Office (Attn: Directives and Administrative Services Division) establish a contract source for that town or area. Meanwhile, § 1910.4 (a)(1), (2), (4), (5), (6) and (7) of Subpart A of this Part will be followed in conducting the credit investigation.

(g) Exhibit B is a sample format of an order ticket which is printed by, and at the expense of, the contractor and supplied to County Offices. CBR order ticket forms are supplied to the County Office through the Finance Office. If additional CBR order tickets are needed, they may be requisitioned from the Finance Office in accordance with § 2024.103 of FmHA Instruction 2024–C (available in any FmHA office). Order ticket forms of firms other than CBR may be ordered from the nearest local office of the contractor. Order tickets of one contractor must not be used to order credit reports from another contractor. Only FmHA employees may use these order tickets. They will not be supplied to brokers, lenders, packagers, etc.

(h) Exhibits C, D and E (available in any FmHA Office), show the type of credit information that contractors must furnish on manual and computerized forms.

§ 1901.53 Policy.

(a) A credit report fee as indicated in paragraph (a) in the "General" section of Exhibit A of this Subpart will be charged the loan applicant for every credit report ordered. For example, if one credit report is ordered, the amount shown will be charged. However, if two credit reports are ordered (e.g., for the applicant and the coapplicant), the amount shown times 2, will be the total amount charged the applicant, and so on.

(b) When credit reports are needed (except for Section 504 Rural Housing loans), the total amount charged will be collected (preferably, in money order or check) from the loan applicant before credit reports are ordered, and:

(1) The County Supervisor will acknowledge receipt of the credit report fee by using Form FmHA 451–1, "Acknowledgment of Cash Payment" (available in any FmHA office). Collections for credit report fees will be submitted to the Finance Office on Form FmHA 451–2, "Schedule of Remittances," as miscellaneous changes, Code–2.

(2) Additional credit reports ordered to update the applicant's credit will be handled as prescribed in paragraphs (a) and (b) of this section.

(3) If a credit report fee was collected and a credit report will not be ordered, the County Supervisor will submit to the Finance Office, Attention 360–D1, a memorandum, subject, "Request for Refund, Loan Applicant(s) ——, ——, ——," accompanied by copies of Form FmHA 452–2 for such collections.

(c) No credit reports will be ordered in servicing loans. An investigation needed to complete the action, will be conducted by the County Supervisor.

(d) When credit reports are ordered for Section 504 RH loan applicants, the total amount charged will be included as part of the FmHA loan, and:

(1) The total amount charged will be entered and identified as "credit report(s)" in line item number "25" of Form FmHA 444–2, "Single Family Housing Fund Analysis."

(2) Form FmHA 1940–1, "Request for Obligation of Funds," will be coded "1" in the "Credit Report" block. Block 22 (Amount of Loan), will be increased by the total amount charged for credit reports. CAUTION: If the fee charged for the credit report(s) will cause the maximum $7,500 authorized for this type of loan to be exceeded, the credit report(s) will not be ordered and the credit investigation will be completed as prescribed in § 1910.4 (a)(1), (2), (4), (5), (6), and (7) of Subpart A of this Part.

(3) Additional credit reports ordered to update the applicant's credit, will be handled as prescribed in paragraph (d) of this section and correction, if needed, made in space "26" of Form FmHA 440–57, "Acknowledgement of Obligated Funds Check Request."

(4) The Finance Office will deduct from the loan check, the total amount charged for credit reports before the loan check is issued.

(5) If a credit report(s) is ordered and received and the loan will not be closed, FmHA will bear the cost of the report(s).

(e) The County Supervisor will determine the need and be responsible for ordering credit reports. These will be obtained whenever the credit information from a credit report would be helpful or needed to determine the eligibility of a loan applicant and when it appears that the credit report will not have to be updated before loan closing. Credit reports will not be ordered when:

(1) The information available indicates that a loan will not be made. In this respect, County Supervisors must train their staffs in the proper evaluation of loan applications to preclude the ordering of unnecessary credit reports.

(2) An applicant resides in a remote area and the credit bureau would not be able to provide sufficient or conclusive credit information. However, County Supervisors are cautioned that information relative to judgments, garnishment of wages, foreclosures and bankruptcies can better be obtained from credit reports as opposed to searches conducted by the County Supervisor.

(3) The applicant's needs can be met with a loan not exceeding $7,500 and the County Supervisor determines on the basis of the information available that the applicant does not have debts other than those reported. However, credit reports will be ordered if they are

essential to complete the credit investigation.

(f) "Individual" credit reports will be ordered as opposed to the more costly "joint" reports, which are no longer authorized.

§ 1910.54 Definitions.

For the purpose of this Subpart, the following definitions apply:

(a) "Antecedent Report" is a previous residence report required when the minimum two year up-to-date credit coverage is not available in the bureau's reporting territory. The report contains information from another bureau located in an area outside of the area covered by the reporting bureau.

(b) "Applicant" also includes coapplicant(s), spouse, cosigner, each individual in an association, and general partner(s) in a partnership.

(c) "Basic report" is a report that does not include supplemental or antecedent information and which contains all credit and public record information available covering no less than a two-year period.

(d) "County Supervisor" also includes the County Supervisor's authorized representative and other authorized FmHA officials. The term also means Area Loan Specialist in Alaska.

(e) "Individual Report" is a report providing information on one person only. It may be supplemented by "antecedent and/or "supplemental credit reference" reports to provide all the information required by the two-year report period.

(f) "Joint Report" is a report providing information on both spouses (partners in marriage). This type of report is not authorized for FmHA.

(g) "Order ticket" (Exhibit B of this Subpart) is the form used for ordering a credit report.

(h) "Report period" is the two-year period before the date the credit report is prepared.

(i) "Repository" is an entity engaged in gathering, recording, and updating information relative to the credit history of individuals in an area. The area covered may encompass several towns, cities, counties, or parts of counties.

(j) "Special services" are any services which are not included in § 1910.54 (a), (c), (e), and (k) of this Subpart and which will result in additional cost.

(k) "Supplemental Credit Reference Report" is a report which is required when the applicant lives in the bureau's reporting area but, because of shopping patterns, credit references are located in another bureau's reporting area.

§ 1910.55 Contractor bureau requirements.

(a) Unless the contract states otherwise, the contractor must provide all credit and public record information available for the report period as defined in § 1910.54(h) of this Subpart.

(b) The contractor must provide all information specified in Exhibit C, D, or E, except that employment information need not be reported.

(c) The contractor must make appropriate certifications regarding check and/or source of public records and credit record history.

(d) The trade or credit history portion of the report must cover a minimum of two years brought up to date. Accounts must be rated to indicate past and current payment records and original amount, monthly installment, and unpaid balance of the debt. All additional available account information must be furnished. The contractor must clear bank, savings and loan, and credit union accounts and clear all local references indicating the date the account was cleared. The contractor should contact the applicant to obtain any additional information necessary to provide a quality report.

(e) Public record information must be obtained by special check of public records or, as an equivalent, from accumulated and regularly filed records of a qualified legal reporting service. All items of public record information must be reported except that adverse items (e.g., bankruptcies that antedate the report by more than fourteen years; suits, judgments, paid tax liens, accounts placed for collection, records of arrest, indictments, convictions of crime, and any other adverse items which antedate the report by more than seven years) are to be excluded as provided under paragraph 605 of the Fair Credit Reporting Act. For purposes of these contracts all adverse items may be excluded which outdate the report by seven years.

(f) Reports which do not require antecedent information shall be delivered by the contractor within eight working days of receipt of the order or twelve working days when antecedent information is required.

§§ 1910.56–1910.58 [Reserved]

§ 1910.59 Type of credit report to be ordered.

Pursuant to the Equal Credit Opportunity Act (ECOA), credit bureaus will maintain credit information in three different forms on a married couple: individual accounts on each spouse, joint accounts covering both spouses, and undesignated accounts (those accounts not designated by the credit grantor as either individual or joint accounts). However, only "individual" reports as defined in § 1910.54(e) of this Subpart may be ordered by FmHA. If credit report information is needed on the spouse and others to complete the credit investigation, a separate "individual" report request which will be paid by the applicant, is prepared for each person as opposed to the more costly "joint" or "special services" reports. Exhibit B, of this Subpart will be used for this purpose.

§ 1910.60 Processing order tickets.

Order tickets will be processed as follows:

(a) An original and 3 copies of Exhibit B of this Subpart will be prepared, except that an extra copy will be furnished when requested by a credit bureau. A copy will be kept in the applicant's file. The original and the remaining copies will be sent to the credit bureau serving the place of residence of the applicant.

(b) All appropriate entries on the order ticket will be completed. Extra entries for "special services," which would result in additional costs, are prohibited.

(c) The "former name," "previous residence address" and "how long residence" blocks must be completed. If an applicant has resided less than two years at the present address, the previous address block must be completed so that the contractor will know where to obtain an antecedent report.

(d) USDA/FmHA should appear on the order ticket with State and County Office Code, applicant's social security number, if available, and loan fund code. Loan fund codes are listed in Exhibit A of FmHA Instruction 450.1 (available in any FmHA Office). If an applicant is to receive more than one type of loan, use the loan fund code for the largest loan.

§ 1910.61 Invoicing and payments.

(a) Optional procedure #1 (Applicable to Credit Bureau Reports, Inc., only).

(1) The contracting bureau returns a copy of the order ticket (with billing block filled in) to the FmHA office with each credit report, and sends a monthly statement to the Finance Office with one copy of each order ticket attached.

(2) The County Supervisor reviews the report, verifies the billing data against the schedule of charges in Exhibit A of this Subpart, and proceeds as follows:

(i) If the report is acceptable and the billing data correct, the "Receipt" certification block on the order ticket is

completed and the order ticket is sent to the Finance Office.

(ii) If the report is not acceptable and/or the billing data is incorrect, the County Supervisor will contact the reporting bureau for corrections. Regardless of the results of the contact, the County Supervisor will submit immediately to the Finance Office (Attn.: FC–360–D1), for flagging action on payment, the following:

(A) A memorandum stating the reasons for not accepting the credit report and/or for changing the billing data on the order ticket.

(B) A copy of the order ticket with corrected billing data, and

(C) A copy of the credit report.

(3) The Finance Office matches order tickets received from the contracting bureau against those verified and received from the FmHA office, and makes payment accordingly.

(b) Optional procedure #2 (Applicable to contracting bureau other than Credit Bureau Reports, Inc.).

(1) Contractor sends a monthly invoice to the FmHA office with a copy of the order ticket attached to support each credit report charge.

(2) FmHA personnel verify the billing data against the schedule of charges shown in Exhibit A of this Subpart or in other credit report contracts authorized by the Contracting Officer, FmHA. If acceptable, a stamp or handwritten certification and signature is placed on the invoice to the effect that services were satisfactorily rendered and that it is approved for payment. The invoice with attachments is then sent to the Finance Office. The Finance Office makes payment to the contracting bureau.

(c) In all cases:

(1) When a credit report is received without an order ticket attached, the County Supervisor will contact the reporting bureau to ensure that FmHA is not being billed for credit reports ordered by parties other than FmHA. Such reports are not encouraged as they frequently result in extra expenses to the loan applicant and extra work for the County Supervisor in verifying the authenticity of the information in the report.

(2) If a report is not acceptable and/or the billing data is incorrect, the County Supervisor will contact the reporting bureau for corrections. If no agreement is reached, the County Supervisor will submit to the National Office, Directives and Administrative Services Division, for review and final determination, the items listed in paragraph (a)(2)(ii) of this Section. After reviewing that case, the National Office authorizes the Finance Office (by memorandum) to make, readjust, or deny payment to the contracting bureau. A copy of the memorandum is also sent to the FmHA office involved. Order tickets received in the Finance Office which do not match those received from the contracting bureau, will be returned to the responsible FmHA field office for reconciliation and compliance with the procedures set forth in this paragraph.

(3) The credit report approval date and cost is posted to the order ticket copy kept in the applicant's file.

§ 1910.62 Loan documentation procedure.

(a) The credit report fees collected will be promptly remitted to the Finance Office in accordance with paragraph (b) of this section. When Form FmHA 1940–41, "Truth in Lending Disclosure Statement," Form FmHA 440–58, "Estimate of Settlement Costs, " or Form FmHA 1940–59, "Settlement Statement," is required, the cost of the credit report will be entered on these forms in accordance with instructions contained in the appropriate Forms Manual Inserts (FMI) for the forms.

(b) Any funds collected as payment for credit reports will be handled in accordance with FmHA Instruction 1951–B and the FMI for Form FmHA 451–2 (available in any FmHA office). The loan fund code should appear on the "Schedule of Remittances." Such payments will not reduce the amount due on the borrower's loan indebtedness.

§ 1910.63 Unsatisfactory contractor performance.

The County Supervisor will monitor credit reports received for promptness, completeness, and adequacy and discuss any deficiencies found with the reporting bureau for the correction of such deficiencies. In the case of recurring deficiencies, the County Supervisor will request the State Director to contact the bureau's parent office in an attempt to improve the bureau's performance. If adequate response is not obtained, the State Director will report the problem to the Contracting Officer in the Directives and Administrative Services Division of the National Office.

§ 1910.64 Confidential handling of credit reports.

The confidential information furnished to FmHA in a credit report shall be used as an aid in conducting business and is based on information obtained by the credit bureau from sources deemed reliable. Disclosures of information contained in the credit report to the consumer will be made by the credit bureau making the report as required by the Fair Credit Reporting Act, Public Law 91–508, except that FmHA must make credit reports available to the subject of the report in response to a request made under the Privacy Act of 1974. Requests from credit parties, including credit bureaus, concerning information about FmHA borrowers or applicants will be handled in accordance with the provisions of FmHA Instruction 2018–F (available in any FmHA office).

BILLING CODE 3410-07-C

PART 1944—HOUSING

Subpart A—Section 502 Rural Housing Loan Policies, Procedures and Authorizations

§ 1944.3 [Amended]

3. Section 1944.3(b)(9) is amended by removing the words "credit reports."

4. Section 1944.26 is amended by revising paragraph (c)(1) to read as follows:

§ 1944.26 Application processing.

* * * * *

(c) * * *

(1) Selected applicants will be notified that they have not more than 30 days in which to submit the necessary material (including the amount the applicant must pay to FmHA for each credit report needed to complete the credit investigation) to continue the processing of the loan. When credit reports will be ordered, the notification must also indicate that the credit report fee paid by the applicant is non-refundable after credit reports have been ordered. The amount charged the applicant for each credit report is as prescribed in paragraph (a) in the "General" section of Exhibit A (available in any FmHA office) of Subpart B of Part 1910 of this Chapter.

* * * * *

Subpart J—Section 504 Rural Housing Loans and Grants

5. Section 1944.456 is amended by revising paragraph (i) to read as follows:

§ 1944.456 Loan and grant purposes.

* * * * *

(i) Payment of incidental expenses such as fees for credit reports, surveys, title clearance, loan closing, and architectural or other technical services. When a credit report(s) is essential to complete the credit investigation, a credit report fee as prescribed in paragraph (a) in the "General" section of Exhibit A (available in any FmHA office) of Subpart B of Part 1910 of this Chapter, will be included in the FmHA loan for each credit report ordered. The amount included in the loan check for credit reports, will be deducted from the loan check at the Finance Office before the first loan check is issued. If a credit report is ordered and received and the loan will not be closed, FmHA will bear the cost of the report.

BILLING CODE 3410-07-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 82-AGL-28]

Proposed Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action amends the Circleville, Ohio, transition area description by deleting the Lockborne AFB exclusion currently contained in the published description.

The intended effect of this action is to insure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions in controlled airspace.

DATE: Comments must be received on or before April 7, 1983.

ADDRESS: Send comments on the proposal in triplicate to FAA Office of Regional Counsel, AGL-7, Attention: Rules Docket Clerk, Docket No. 82-AGL-28, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

An informal docket will also be available for examination during normal business hours in the Airspace, Procedures, and Automation Branch, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: This action amends the Circleville, Ohio, transition area description by deleting all reference to Lockborne AFB as currently referenced in the published Circleville, Ohio, description. The exclusion is no longer necessary. The Lockborne AFB has been renamed Rickenbacker AFB and airspace associated with Rickenbacker AFB will be contained in a later docket in connection with a revised Columbus, Ohio, transition area description. (The Columbus, Ohio, description also references Lockborne AFB and also requires revision.) This action amends only the Circleville, Ohio, transition area description.

Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82-AGL-28." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public

Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2, which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the transition area airspace near Circleville, Ohio.

Section 71.181 of Part 71 of the Federal Aviation Regulations was published in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Transition areas, Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Circleville, Ohio

That airspace extending upward from 700 feet above the surface within a 12-mile radius of the Pickaway County Memorial Airport (latitude 39°31'00"N., longitude 82°58'55"W.)

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It is certified that this: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on February 16, 1983.

Monte R. Belger,

Acting Director, Great Lakes Region.

BILLING CODE 1505–01–M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. 8976]

Borden, Inc.; Proposed Order Modification With Statement To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Agreed Order In Settlement of Judicial Review Proceedings.

SUMMARY: In settlement of judicial review proceedings resulting from the entry of a Commission cease and desist order after full adjudicatory proceedings, this agreed modification, accepted subject to final Commission approval, would require a producer of processed lemon juice to refrain, for a period of seven years, from pricing its product below its variable costs for the product in any sales district. "Variable costs" would be defined as all costs which the firm could have chosen not to incur during the relevant time period. The relevant time period would consist of all consecutive fiscal quarters in which the firm's prices failed to cover it total costs, and thus would vary with the duration of any price reduction. The firm would also be required to file annual compliance reports detailing its market share, costs and net revenues. The proposed order would take the place of an order previously entered by the Commission, which was affirmed by a court of appeals in a judgment that is the subject of a pending petition for a write of certiorari in the Supreme Court. *In the Matter of Borden, Inc.*, 92 F.T.C. 669, 778, 832 (1978) affirmed *Borden, Inc.* v. *FTC*, 674 F. 2d 498 (1982), petition for a writ of certiorari filed August 25, 1982, Sup. Ct. No. 82–328.

DATE: Comments must be received on or before April 4, 1983.

ADDRESS: Comments should be directed to: FTC/S, Office of the Secretary, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: FTC/CD, Barbara A. Clark, Washington, D.C. 20580, (202) 634–4793.

SUPPLEMENTARY INFORMATION: Pursuant to Section 5(c)–(k) of the Federal Trade Commission Act, 38 Stat. 719–721, as amended, 15 U.S.C. 45(c)–(k) and an order of the Commission entered on February 25, 1983 notice is hereby given that the following agreed order to cease and desist, having been accepted by the Commission in settlement of litigation, subject to final approval, has, in the exercise of the Commission's discretion, been placed on the public record for a period of thirty [30] days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Proposed Order

The Commission having considered the proposal of Borden, Inc., to terminate the pending proceedings for judicial review of the order to cease and desist entered herein on November 7, 1978; and the Commission and Borden having agreed upon the provisions of a final order modifying the order of November 7; accordingly,

It is hereby ordered, that the Commission's Order in this matter, dated November 7, 1978, is hereby revised to read as follows:

Order

It is ordered, that Respondent, in connection with the production, marketing and sale of processed lemon juice in or affecting commerce, as "commerce" is defined in the Federal Trade Commission act, shall forthwith cease and desist from:

Selling ReaLemon brand reconstituted lemon juice at a price or prices so that Respondent's net revenue during any fiscal quarter for any sales district is below Respondent's variable cost of the product sold in that quarter and sales district.

For purposes of this Order only, the following definitions shall apply:

A. "Total cost" means the sum of all costs properly attributable to sales made by Respondent of ReaLemon brand reconstituted lemon juice during the relevant fiscal quarter in the relevant sales district.

1. "Total cost," and its various elements, shall be calculated in the same manner as reflected in Respondent's accounting records as of January 1, 1983. With respect to elements of cost incurred over

geographic markets that do not coincide with Respondent's sales districts, such elements of cost shall, be allocated to a sales district on the basis of unit volume sold during the relevant quarter in the relevant sales district, or on the basis of identifiable factors that make allocation to a particular sales district proper, or on the basis of a combination of these two approaches. Similarly, with respect to allocations of elements of cost which, as of January 1, 1983, were made only annually, such elements of cost shall be apportioned to the relevant quarter on the basis of the unit volume sold during that quarter in the relevant sales district, or on the basis of identifiable factors that make allocation to a particular quarter proper, or on the basis of a combination of the these two approaches. The methods of allocation chosen shall be uniform for all sales districts and for all quarters for which an annual compliance report must be submitted. The methods shall not be changed without prior notice to the Commission.

2. The cost of spot television advertising purchased for a station in a particular sales district shall be allocated to the sales district in which the station is located. The costs of all television advertising other than spot television shall be allocated to the relevant sales district for the relevant time period on the basis of the volume of unit sales in that district.

B. "Variable cost" means the sum of all cost included within total costs which Respondent could have avoided during the relevant time period.

1. A cost, whether an element of cost or a portion of an element of cost, shall be considered as one which Respondent could have avoided if, during any part of the relevant time period, Respondent could have chosen not to incur that cost consistent with prudent business practices, and without violating contractual or other legal commitments.

2. The relevant time period, for any fiscal quarter and sales district in which Respondent's net revenue in that quarter and sales district was below its total cost, shall be the period composed of the quarter and any consecutive preceding quarters in which Respondent's net revenue in that sales district was also below its total cost. The relevant time period for any other fiscal quarter and sales district shall be the period composed of that quarter.

C. "Net revenue" means gross revenue to Respondent resulting from sales of ReaLemon brand reconstituted lemon juice, net of returns and allowances, cash discounts, and trade promotions. "Net revenue" and its various elements shall be calculated in the same manner as reflected in Respondent's accounting records as of January 1, 1983.

D. "Fiscal quarter" means the period which coincides with Respondent's standard accounting quarters.

E. "Sales district" means each of the geographic subdivisions of the country, designated, identified and used as such by Respondent in its sales and accounting records (currently twenty-two (22)). If the sales district are changed, the Commission will be notified.

F. "Trade promotions" means discounts or other financial incentives to the grocer or wholesaler, such as buying allowances or retailer coupons. "Trade promotions" (regardless of the manner in which that term is used by Borden in its accounting records) shall not be considered as a "cost" and shall be considered a reduction in net revenue.

G. "Unit" means one case of 12 bottles of ReaLemon brand reconstituted lemon juice in the 32 ounce size, or an equivalent volume of ReaLemon brand reconstituted lemon juice bottled in different sizes.

H. "Respondent" means Borden, Inc., its successors and assigns, officers, agents, representatives, and employees, directly or indirectly, or through any corporation, subsidiary, affiliate, division, or other device.

It is further ordered, that this Order shall remain in effect for seven years from the date it becomes final. During that period, Respondent shall file annual compliance reports with the Commission within 60 days of the end of its fiscal year. Each annual report shall include, for each sales district in which Respondent sold ReaLemon brand reconstituted lemon juice: (a) Copies of A. C. Nielsen market survey reports, or substantially similar market survey reports, detailing the quarterly and annual market shares of ReaLemon brand reconstituted lemon juice and the quarterly and annual market shares of its branded and private label competitors, (b) an accounting quarterly of its total costs for ReaLemon brand reconstituted lemon juice, and (c) an accounting quarterly of its net revenue from sales of ReaLemon brand reconstituted lemon juice.

Each annual report shall also include, for each sales district and fiscal quarter in which Respondent's net revenue for such sales district and fiscal quarter was below its total cost, proof that Respondent's net revenue in that district and quarter exceeded Respondent's variable costs of the product sold in that district and quarter.

Statement of the Commission on the Proposed Order Modification in Borden, Inc., To Aid Public Comment

The Federal Trade Commission has provisionally determined to accept an agreement from Borden, Inc. to settle the pending proceedings for judicial review of a previous Commission order.

The proposed order modification has been placed on the public record for thirty (30) days for receipt of comments by interested persons. Comments received during this time will become part of the public record. After thirty (30) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

In its opinion and final order in this case, the Commission found that Borden, Inc., had violated Section 2 of the Sherman Act, 15 U.S.C. 2, and consequently, Section 5 of the Federal Trade Commission Act, 15 U.S.C. 45, by monopolizing the market for processed lemon juice in the United States.[1] *In the Matter of Borden, Inc.*, 92 F.T.C. 669, 778, 832 (1978). On respondent's petition for review, the United States Court of Appeals for the Sixth Circuit affirmed and enforced the Commission's order. *Borden, Inc.* v. *FTC*, 674 F. 2d 498 (1982). On August 25, 1982, Borden filed a petition for a writ of certiorari in the Supreme Court of the United States seeking review of the court of appeals judgment. Sup. Ct. No. 82-328. That petition is still pending. After it was filed, the Commission and respondent undertook negotiations looking to a mutually acceptable disposition of the important questions of competitive policy raised in this matter. That process has culminated in the proposed order attached hereto, which the Commission is contemplating entering as soon as it reacquires jurisdiction over this case.[2] To that end, the Commission

[1] The Commission decided this case solely under the standards of monopolization developed under Section 2 of the Sherman Act, as comprehended within Section 5 of the Federal Trade Commission Act. It expressly noted that it did not address other possible grounds for liability under Section 5 of the FTC act. 92 F.T.C. at 781, n.4.

[2] The Commission has no jurisdiction to change its prior order so long as the record in the case is before the courts on judicial review. The Commission's power to modify or set aside its order in whole or in part continues only "until the record in the proceeding has been filed in a court of appeals of the United States." 15 U.S.C. 45(b), (c). Thereafter, the Commission does not reacquire jurisdiction to alter, modify or set aside its order until all proceedings on judicial review are completed, including any proceedings on petition for a writ of certiorari in the Supreme Court. 15 U.S.C. 45(g). The Commission's invitation and

is making the text of the proposed order available for public comment for 30 days.[3]

The Commission has determined to settle the pending litigation that resulted from its decision and order of November 7, 1978 because its prior decision herein does not set forth a satisfactory, cost-based standard for predation under Section 2 of the Sherman Act and Section 5 of the Federal Trade Commission Act. Continue defense of that decision in the pending proceeding before the Supreme Court would therefore be inconsistent with the Commission's present view of the matter. Since the court of appeals' judgment was based on grounds to which the Commission no longer adheres, the Commission plans to request the Solicitor General to advise the Supreme Court that the petition for a writ of certiorari should be granted, and that the decision of the court of appeals should be vacated with instructions to remand the case to the Commission. Upon remand, the Commission proposes to enter the attached order in settlement of the litigation, and of the Commission's complaint against respondent.

The Commission is of the view that the standard of conduct it applied to Borden's competitive behavior is inconsistent with the purposes of Section 2 of the Sherman Act and Section 5 of the Federal Trade Commission Act because it may discourage dominant firms from vigorously competing. Subsequent to its ruling in this case, the Commission held in *E. I. du Pont de Nemours & Co.*, 96 F.T.C. 653, 750–751 (1980):

> Antitrust policy wisely disfavors monopoly, but it also seeks to promote vigorous competitive behavior. Indeed, the essence of the competitive process is to induce firms to become more efficient and to pass the benefits of the efficiency along to consumers. That process would be ill-served by using antitrust to block hard, aggressive competition that is solidly based on efficiencies and growth opportunities, even if monopoly is a possible result. Such a view, we believe, is entirely consistent with the "superior skill, foresight and industry" exception in [*United States* v. *Aluminum Company of America*, 148 F. 2d (C.A. 2 1948)] and subsequent cases, for those decisions clearly indicate that monopoly may be lawfully created by superior competitive ability.

That standard informs the Commission's present view of this case.

A. Product Differentiation

The Commission found that Borden had "manipulated"—*i.e.*, reduced— the premium price that consumer preference had conferred upon its brand, in those areas of the national market in which it faced direct competition. In short, Borden reduced prices in order to defend its market share in response to a competitive challenge. The Commission found Borden's price reductions to be unlawful in part because, in the Commission's view, the ReaLemon trademark and the premium price it commanded reflected a form of "spurious product differentiation." 92 F.T.C. at 805. The Commission believed that processed lemon juices are not substantially different, that (apart from advertising cost advantages) producers of processed lemon juice are equally efficient, and that consumer preferences for the ReaLemon brand constituted a significant barrier to entry protecting Borden's monopoly position. 92 F.T.C. at 800, 695, 721.

The Commission recognizes that brand preferences and advertising costs may affect the costs of entry. The conditions of entry, in turn, are one of several factors that may affect the appropriate standard for determining whether any given price reduction is predatory—although, as we discuss blow, experts are far from agreed on the question of what sort of standard to use or how such effects ought to be taken into account. Compare, e.g., P. Joskow & A. Klevorick, *A Framework for Analyzing Predatory Pricing Policy*, 89 *Yale L. J.* 213, 249 (1979), with Y. Brozen, *Concentration and Public Policy* 216–65 (1982). Among the factors that have been suggested as relevant to this inquiry are the extent of any differences between the promotional costs faced by later entrants and those faced by the dominant firm when it originally established its brand (see R. Schmalansee, *Product Differentiation Advantages of Pioneering Brands*, 72 *Am. Econ. Rev.* 349 (1982)); and the extent to which promotional expenditures represent sunk costs which could not be recovered by an unsuccessful entrant (cf. W. Baumol & R. Willing, *Fixed Costs, Sunk Costs, Entry Barriers, and Sustainability of Monopoly*, 96 *Q.J. Econ.* 405, 418–19 (1981)).

However, the Commission did not analyze brand preferences and promotional costs as neutral factors affecting the conditions of entry, and thereby affecting the appropriate predation standard.[4] Instead, the Commission apparently viewed product differentiation as something pernicious in and of itself, which rendered suspect *any* attempt by Borden to respond to Golden Crown's competition by reducing price. In the commission's view, the fact that Borden's price cuts were made from the position of strength reflected by its price premium was itself enough to remove those price cuts from the category of "ordinary marketing methods available to all," and turn them instead into illegal predatory pricing. 92 F.T.C. at 803.

This approach not only unduly limits the ability of an established brand to compete by reducing prices, it also misperceives the nature of product differentiation and of the price premiums reflecting consumer familiarity with or acceptance of an established brand. While such premiums may indeed affect the conditions of entry, they also serve important competitive functions. An integral part of the competitive process—i.e., the process by which consumers select the mix of goods and services they most prefer—is the cost to consumers of becoming informed about a brand's advantages and availability. An established brand is one which has invested capital to reduce those costs, having acquainted most consumers with the product and its quality. The premium accruing to a brand name is thus a form of good will, whose value can be measured by the strength of consumers' preference for that brand. See, e.g., T. Nagle, *Do Advertising-Profitability Studies Really Show that Advertising Creates a Barrier to Entry?*, 24 *J. L. & Econ.* 333 (1981). Federal statutory policy with respect to trademarks expressly encourages and protects this form of good will. 15 U.S.C. 1127.

In this case, consumers were willing to pay a premium price in reliance upon Borden's familiar and successfully advertised trademark. That willingness reflected a marketplace judgment about interbrand competition, which "is the primary concern of antitrust law." *Continental TV* v. *GTE Sylvania*, 433 U.S. 36, 52, n.14 (1977). From an economic standpoint, cost efficiencies achieved with respect to the image value of a successfully advertised product are in many ways similar to cost efficiencies achieved in any other

---

consideration of public comment on the proposed settlement is not inconsistent with the court's exclusive jurisdiction because such action affects only the Commission's position in the litigation.

[3] A public comment period is not required by the Commission's rules, as this is neither a consent agreement terminating an administrative complaint pursuant to Rule 3.7S nor a modification of a final order pursuant to Rule 2.51. However, because of the importance of the issues involved in this matter, the Commission has chosen to seek public comment voluntarily.

[4] Thus, while Commissioner Pitofsky believed that entry conditions justified application of an average total cost rather than an average variable cost standard, he had to concur separately to express that view. 92. F.T.C. at 817–832.

aspect of its production and distribution. Professor Scherer, in the passage adopted by the Commission (92 F.T.C. at 804), conceded as much.[5]

The Commission's decision did not adequately weigh the competitive advantages of Borden's product differentiation and antitrust law's promotion of interbrand competition. Instead, it assumed that consumer preference for Borden necessarily constituted an *anticompetitive* barrier protecting Borden's monopoly position from erosion by new entrants. Moreover, it therefore barred Borden from reducing its prices in competetive markets until its monopoly position had disappeared, *i.e.*, until enough consumers were buying competing brands to neutralize Borden's brand advantage. 92 F.T.C. 805–809, 832–833. This indefinite restraint on price competition, as Commissioner Clanton observed, "threatens to prolong unduly the interval over which consumers must pay higher prices and during which less efficient firms are sheltered from competition." 92 F.T.C. at 814. Because the Commission's analysis of Borden's brand advantage appears to be inconsistent with the purposes of the antitrust laws to promote vigorous competition, as recognized in its *du Pont* decision, the Commission can no longer defend this aspect of its opinion.

B. Geographic Price Differentiation

The Commission also considers the treatment of geographic price discrimination in its prior opinion to be unsound. The opinion recognized (92 F.T.C. 804, n.38*) that "price discrimination among different geographic markets does not of itself constitute a violation of Section 2 of the Sherman Act or Section 5 of the FTC Act." The fact that Borden may have charged lower prices than elsewhere to retailers in areas where it faced competition could not produce competitive injury to those retailers, or to Borden's customers located outside those markets, because the former do not compete with the latter. Nor can such price differences have caused any injury to competing producers of lemon juice within those markets, at least absent proof that Borden was subsidizing its losses in competitive markets with its profits in monopoly markets. Although the Commission stated in its opinion that Borden in part subsidized its price cuts with continued monopoly pricing elsewhere 92 F.T.C. at 802, as Judge Kennedy observed (674 F. 2d at 519), the Commission made no specific finding to support its statement; it presumed what had not been proved.

The only effect of Borden's geographic price differences was to confront Borden's competitors with prices lower than Borden charged in markets where they did not compete. Any losses they suffered, therefore, resulted not from "discrimination," but from the absolute level of Borden's prices in the markets where they actualy competed. When a dominant firm like Borden, that operates nationally, is threatened with loss of market share by the aggressive price rivalry of competitors, common sense and sound antitrust policy should recognize, as did Commissioners Pitofsky and Clanton, that the firm's local price reductions can be "a wholesome part of the competitive process" (92 F.T.C. at 818–822). Otherwise such firms would be required to maintain uniform monopoly prices nationwise in order to protect competitors, a paradoxical and anticompetitive result. Thus, in the Commission's present view, only if Borden's responsive pricing in locally competitive markets had been below lawfully permissible cost levels, would there have been a basis for finding unlawful monopolization.[6]

C. Respondent's Intent

The Commission's opinion condemned Borden's "pricing very close to average variable cost" (92 F.T.C. 804) as "exclusionary in intent and effect" *(id.)* and therefore unlawful because of Borden's monopoly market share. See *United States* v. *Griffith*, 334 U.S. 100, 107 (1948); *American Tobacco Co.* v. *United States*, 328 U.S. 781, 809, 811 814 (1946); *United States* v. *Grinnell Corp.*, 384 U.S. 563 (1966). This condemnation, however, is merely a conclusory characterization. Such pricing should be legally "exclusionary" only if it is at sub-cost levels that Section 2 condemns as predatory. Borden's intent to compete in defense of its market share was to be expected, and, not surprisingly, was clearly shown by its marketing plans. In *du Pont*, however, (96 F.T.C. at 727) the Commission held that efforts to win every sale are not enough to evidence an intent to exclude in the sense condemned by *Griffith, American Tobacco Co.* and *Grinnell*. The line between "intent to exclude" and "intent to acquire market share" is too attenuated to be reliably drawn solely from documentary evidence of management's state-of-mind. Executives on the front line of the competitive struggle are notoriously prone to overzealous hyperbole, and "[a]fter all, competition consists of winning business from rivals." *MCI Communication Corporation, et al.* v. *American Telephone and Telegraph Company*, 1982–83 Trade Cases ¶ 65, 137 (7th Cir. January 12, 1983), at 71,374. See also Posner, *Antitrust Law: An Economic Perspective*, 189–190 (1976); Areeda, *1982 Supplement to Antitrust Law*, ¶ 714.2c. The proof of Borden's intent reflects these uncertainties. Thus, as Commissioner Clanton and Pitofsky noted (92 F.T.C. at 814, 818), it is actual pricing behavior, rather than executive plans, that constitute the best evidence as to whether or not Borden had an intent to exclude. Judge Kennedy was correct, therefore when she observed: "Borden surely meant to obtain as much of the reconstituted lemon juice market as it could, but that is the very essence of normal competition, a goal that we approve even for a monopolist" (Pet. App 35a). As noted in the *du Pont* case, *supra*, this is a view now shared by the Commission.

D. Comparison With Rival's Costs

The court of appeals read the Commission's opinion as condemning price manipulation by a monopolist if such conduct forces its *competitors* to price below *their own* average variable cost. 674 F. 2d at 515–516. This interpretation cannot be squared with the competitive process protected by the Sherman Act. That statute protects price competition because it is "the central nervous system of the economy." *United States* v. *Socony-Vacuum Oil Co.*, 310 U.S. 150, 224 n. 59 (1940). In effect, the court of appeals rule would require dominant firms to raise a price umbrella over competitors by maintaining minimum prices set with reference to their competitors' costs rather than their own.

Such a rule would turn the competitive process upside down by requiring dominant firms to maintain prices at monopoly levels, and by

---

[5] The Commission had relied upon Professor Scherer's observation that while an image advantage permitting the maintenance of a price premium is like a unit cost advantage, temporary price cutting that excludes "'producers handicapped only by an inferior brand image is socially undesirable.'" Scherer, *Predatory Pricing and the Sherman Act: A Comment*, 89 *Harv. L. Rev.* 869, 880 (1976). Professor Scherer's disapproval of image advantage exclusionary pricing, however, did not rest on economic factors. He observed in a sentence omitted from the passage quoted by the Commission that "[a]ssessing the social efficacy of such cases calls for strong non-economic value judgments." *Id.* The Commission agrees with Judge Kennedy's dissent in the court of appeals (674 F. 2d at 519, n.2) that social values unrelated to the protecting of competition are not a concern of tribunals acting under the Sherman Act.

[6] The Commission did not, in finding liability, invoke the Robinson-Patman Act or the reasoning of *Utah Pie Co.* v. *Continental Baking Co.*, 386 U.S. 685 (1967).

depriving consumers of the benefits of price competition. Price competition induces firms to maximize their profits by achieving cost efficiencies in production, marketing (including advertising), and distribution. Lower costs enable them to price at levels which will capture market share from their rivals. If firms must price with reference to their rivals' costs, the entire mechanism by which competitive pricing produces cost efficiency is destroyed. The reasons are explained in Commissioner Pitofsky's concurring opinion (92 F.T.C. at 821):

> A rule that prevents a monopolist from cutting price in response to new or augmented competition requires the monopolist to wait passively as small, perhaps less efficient arrivals take business away. During this time, consumers who continue to buy from the monopolist are paying higher prices because the law prevents the monopolist from pursuing its own best business interest by instituting price reductions that may be possible due to its efficiency. New entrants protected by a legally mandated umbrella price may themselves charge higher prices than would otherwise be the case—sufficiently below the monopolist price to take some of its business but sufficiently high to make supra-competitive profits themselves. Pursuing this scenario, the whole industry may become economically inefficient for the period of time the administered price umbrella is in effect. Finally, a legally mandated umbrella price generates extremely burdensome administrative problems in supervising the monopolist's prices policies.

The court of appeals' approval of umbrella pricing is directly attributable to the ambiguities in the Commission's opinion. The Commission expressly stated that "the ALJ did not find that 'ReaLemon' was sold below cost, nor do we * * *" (92 F.T.C. at 804).[7] On the other hand, the Commission also stated that "while it does not appear that ReaLemon was sold below average variable cost, at least not as a consistent course of conduct, it does appear that Borden sold below average total cost, when fixed costs are added in" (92 F.T.C. at 807). The Commission then indicated that to the extent Borden priced below average total cost, it violated the rule against this practice proposed by Professor Posner [8] (92 F.T.C. at 804, 805). But it never expressly adopted this rule as a basis of decision. As the court of appeals correctly observed (678 F. 2d at 515), the Commission made no choice between average variable and average total cost rules. Instead, it based its decision on a determination that "in any event, the effect of Borden's spurious product differentiation, making it necessary for competitors to sell considerably below ReaLemon, created a circumstance where even prices above marginal cost could, as the record indicates (I.D. 194–200), be predatory in the sense that even equally efficient competitors could be driven from the market." 92 F.T.C. at 805. Thus, the Commission's holding did not at all rest on a pricing standard based on the seller's costs, but instead, on the costs of the seller's competitors. The Commission's holding invited the umbrella pricing rule, based on "manipulation" of Borden's premium price, that was adopted by the court of appeals. 674 F. 2d 515–516.

In a subsequent decision, another panel of the Sixth Circuit, distinguishing the Borden case, has stated that "Borden was found to be predatorially pricing by setting its prices below average total cost." *Richter Concrete Corp. et al.* v. *Hilltop Concrete Corp., et al.*, 1982–83 Trade Cas. ¶ 65,003, at 70,591, n.6 (1982). The *Richter* panel, however, was of the view that mere proof of pricing below average total cost is insufficient to support an inference of predatory pricing. Instead, it read the *Borden* decision as condemning Borden's below cost pricing because of presence of other factors as well: Borden's geographic price discrimination; its 90% market share; the high entry barrier due to consumer preference to ReaLemon; and Borden's subjective intent to eliminate competition. *Id.* As we have shown above, however, the Commission's discussion of these additional factors, either jointly or severally, did not necessarily establish a predatory intent to foreclose competition within the meaning of Section 2. Thus, insofar as the court's affirmance of the Commission's decision might be read as resting upon Borden's pricing below average total cost, the Commission's prior opinion failed to set forth a reasoned explanation of why such pricing is improper.[9]

E. Conclusion

The proper standard for determining predatory pricing continues to be a subject of debate among economists and in the courts. See J. Brodley & G. Hay, *Predatory Pricing: Competing Economic Theories in the Evolution of Legal Standards*, 66 Cornell L. Rev. 738, 740 (1981). The courts that have considered the matter have looked to some measure of marginal or incremental costs because "when a price floor is set substantially *above* marginal or incremental costs, a price umbrella is created which allows less efficient rivals to remain in the market sheltered from full price competition." *MCI Communications Corp.* v. *American Telephone & Telegraph Co., supra*, at 71,378 *(emphasis in original)*. *Accord, Northeastern Telephone Co.* v. *AT&T*, 651 F. 2d 76, 87–90. Most courts have used average variable costs as a factor against which to test an alleged predator's pricing levels, but almost always have expressed a willingness to consider other factors. *MCI Communications Corp., supra*, at 71,379–71,382. See *e.g., Chillicothe Sand & Gravel Co.* v. *Martin Marietta Corp.*, 615 F. 2d 427 (7th Cir. 1980). Some movement away from emphasis on short-run marginal costs has now appeared in the decisions. E.g., *MCI Communications Inc.* v. *American Telephone & Telegraph Co., supra; William Inglis & Sons Baking Co.* v. *ITT Continental Baking Co.*, 668 F. 2d 1014 (9th Cir. 1981), *cert. denied*, 103 S. Ct. 58 (1982). See Note, *Predatory Pricing: The Retreat from the AVC rule and the Search for a Practical Alternative*, 22 *B. C. L. Rev.* 467 (1981). Because all incremental costs vary in the long run, the debate has increasingly focused on what costs are to be attributed to a particular operation, and over what period of time. There has been a deep concern for the goal of developing practically administrable standards that can be used by courts, counsel and businessmen. See *Areeda, 1982 Supplement to Antitrust Law*, ¶¶710'–721'.

For the reasons given above, the Commission's discussion of these issues in its earlier opinion has not clarified them; nor has it articulated reasons consistent with sound antitrust policy for finding Borden liable for monopolization under Section 2 of the Sherman Act. The Commission therefore believes that the public interest would not be served by defending its earlier opinion in the Supreme Court. Instead, the Commission has provisionally agreed to a settlement of the litigation, and proposes to modify the order to prohibit Borden from pricing its ReaLemon product below its variable costs in any sales district. "Variable costs" are defined as all costs which Borden could have chosen not to incur

---

[7] The Commission apparently was referring to the absence of pricing below average variable cost. It agreed with the ALJ's findings in this respect (92 F.T.C. 753–754, and 800).

[8] R. Posner, Antitrust Law: An Economic Perspective 188–193 (1976).

[9] We note also that the Sixth Circuit's subsequent explanation of *Borden* in *Richter* appears to be more consistent with Commissioner Pitofsky's concurring opinion, than with the Commission's ruling. The Commission expressed no agreement with Commissioner Pitofsky's proposal that the average total cost test be adopted as the rule of decision in this case. His concurrence was apparently necessary because the majority was not adopting such a test.

during the relevant time period. The relevant time period will consist of all consecutive fiscal quarters in which Borden's prices failed to cover its total costs, and thus will vary with the duration of any challenged price reduction.

The Commission is not here deciding that the standard imposed by this order is necessarily the appropriate standard in all instances for finding a violation of the antitrust laws as an initial matter.[10] Nor are we deciding that this order is necessarily the exclusive model for the relief to be granted in future predatory pricing cases. The proposed order reflects the particular circumstances of this case, including the fact of a Commission decision based on grounds which can no longer be defended, and the difficulty of re-opening this now stale record or re-litigating the case under a more appropriate standard of liability. The Commission believes that this order represents an appropriate settlement of the pending litigation.

Benjamin I. Berman,

Acting Secretary.

Separate Statement of Commissioner David A. Clanton

While I join in the Commission's decision today, I feel compelled to correct some misimpressions about that decision that could be created by the separate statements of my fellow Commissioners. Focusing on the fact that the proposed settlement only prohibits Borden from pricing below variable costs, Commissioner Bailey, for example, states that the Commission is now endorsing this standard as the appropriate one for judging antitrust liability as an initial matter.

Clearly, that is not what the Commission has decided. In fact, I share many of Commissioner Bailey's concerns about adopting such a standard as the sole test of antitrust liability,* as would (I believe) my fellow Commissioners in the majority. This is why the Commission did not make such a decision, and why the final paragraph of the Commission's Statement explicity disclaims any such decision. Similarly, as that paragraph also makes abundantly clear, we are not deciding that the proposed settlement represents the appropriate remedial order to enter in every case where antitrust liability has already been found. While some in the private sector may wish to ignore those disclaimers, and persist in the belief that the Commission nevertheless has made such a decision, I can at least point out that they do so at their own peril.

The reason the Commission is provisionally accepting the proposed settlement has to do with the alternatives available at this stage of the litigation. One option, asking that the case be remanded to the Commission, is impractical due to the staleness of the record and the difficulties and expense of a new trail. Another option, defending the Commission's original decision before the Supreme Court, would also require us to defend the Commission's original order. That order prohibited Borden from pricing "below cost" without even attempting to define which costs were included in the relevant standard—and, if that were not enough, added a similarly undefined prohibition against charging "unreasonably low prices." ** The third option, of course, is to accept the proposed settlement.

Thus, the comments that will be most useful to the Commission will be those that compare the proposed order with the possible alternatives, and make a recommendation on that basis. To assist in those comments, I have attached the order currently pending in this case as an appendix to this statement.

Current Order (92 F.T.C. at 832–33)

It is ordered, that Borden, Inc., and its successors and assigns, officers, agents, representatives and employees, directly or indirectly, or through any corporation, subsidiary, affiliate, division or other device, in connection with the production, marketing and sale of processed lemon juice in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from:

(1) Granting price reductions, directly or indirectly, which result in different net prices among Borden's ReaLemon customers, whether or not such customers compete in the same geographic area, which differences in price are not attributable to differing costs of manufacture, sale or delivery, and the effect of which is to hinder, restrain or eliminate competition between respondent Borden and its competitors in the production, marketing and sale of processed lemon juice;

(2) Selling ReaLemon lemon juice below its cost or at reasonably low prices, the effect of which is to hinder, restrain or eliminate competition between respondent Borden and its competitors in the production, marketing and sale of processed lemon juice;

(3) Granting promotional allowances or payments of any kind for customers' promotional services, the effect of which is to hinder, restrain or eliminate competition between respondent Borden and its competitors in the production, marketing and sale of processed lemon juice.

It is further ordered, that Borden, Inc., shall within sixty (60) days from the date this order becomes final, and every year thereafter for a period of ten (10) years, submit a detailed written report of its actions, plans and progress in complying with the provisions of this order, and fulfilling its objectives.

Dissenting Statement of Commissioner Pertschuk Concerning Proposed Order Modification in Borden, Inc., Docket No. 8978

February 25, 1983.

A majority of the Commission has voted to take the extraordinary step of weakening an order on the Commission's own initiative, after the order has been upheld by the court of appeals. The agreement adopted by the majority is a retreat to an order standard that is extremely lenient in allowing future predation by a monopolist, unduly ambiguous, and at odds with sound reasoning in recent court opinions. Moreover in order to implement this agreement, the Commission in essence is asking the Supreme Court—highly improperly in my view—to take cases that have long passed from an agency's jurisdiction and return them so that a new administration can re-decide them to apply its prevailing philosophy retroactively as well as prospectively. I cannot support, for proponents of any view, this approach to the administration of justice.

The majority seeks to modify the current *Borden* order in four principal ways: (1) changing the prohibition on below cost pricing to prohibit only pricing below "variable costs"; (2) dropping any prohibition of discriminatory pricing by geographic area; (3) dropping the provision on anticompetitive promotional allowances; and (4) including a 7 year sunset provision. What's left of the Commission's order is a cryptic provision prohibiting pricing below "variable costs," plus a novel definition of variable costs as those costs which are "avoidable, consistent with prudent business practices." This rubric actually changes the conventional concept of variable costs altogether and opens the door for Borden to construe it as narrowly as possible.

Before I discuss the legal and economic shortcomings as well as the administrative problems in the order, it is worthwhile to describe the steps which led to this "settlement." The Commission's order in *Borden* was affirmed by the court of appeals in early 1982. Borden petitioned for certiorari to the Supreme Court in August 1982, and the Commission's response was due to the Court in 30 days. Rather than oppose the petition as would have been the normal case, the Justice Department, on the Commission's behalf, asked for a series of extensions to accommodate "Settlement" discussions. During this period of negotiations, the draft orders exchanged between our staff and Borden grew steadily weaker (weaker than Borden originally proposed in fact) until the final agreement was reached. We have received no staff analysis of or recommendations on the legal and economic issues in the case, though the Bureau of Competition has forwarded a narrowly focused analysis of compliance problems in interpreting and enforcing the agreement. During this period, the makeup of the Commission changed so as to produce

[10] The order therefore should not be read as approving all future pricing activity by Borden which does not violate the order, or as attempting to immunize such pricing from any future antitrust challenge. The fact that certain conduct has not been prohibited by a particular Commission order does not mean that that conduct could not still violate the general prohibitions of the antitrust laws.

* See my concurring opinion in the original Borden decision, 92 F.T.C. at 813.

** To avoid creating the same misimpression I objected to earlier, I should point out that Commissioners Pertschuk's and Bailey's perference for defending the original order does *not* mean that they endorse the terms of that order as the appropriate standard for determining antitrust liability as an initial matter, or even as the appropriate model for relief in future predation cases where liability is found. The same understanding should be brought to the Commission's acceptance of the terms of the proposed settlement.

majority support for this agreement. In short, this settlement was not the result of a compromise to avoid further litigation, producing a compromise applicable only to this case, but a decision to change the order on policy grounds.

The *Borden* case presents a good example of why there is a rule against predatory pricing. The record in the case showed Borden was a monopolist with a 90% market share. While one brand of reconstituted lemon juice is for all practical purposes, virtually identical with any other, the ReaLemon trademark, which Borden promoted heavily, constituted a long-standing barrier to entry. Borden's rivals and retailers alike recognized that as a result of this advantage, Borden was able to charge up to 30% more than equally efficient competitors and remain competitive. Borden priced differently in different geographic areas. It charged monopoly prices in areas where it faced no real market challenge and used selective price cuts to discipline or threaten competition in areas where it did face a competitive threat. Borden's internal documents reflected an intention to price selectively so as to eliminate its major rival in many areas—Golden Crown. This combination of factors makes a particularly strong case for concluding that Borden had crossed over the line from healthy aggressive pricing to anticompetitive predation likely to maintain the concentrated lemon juice market as the province of an almost total monopolist.

In articulating the standard of liability, the Commission quite properly did not focus solely on a comparison of prices and costs but considered other factors, including Borden's monopolist position, the difficulty of entry caused by its brand name advantage, the pattern of geographic price discrimination, and Borden's predatory intent. The Commission also clearly found that Borden had sold below average total costs. (92 F.T.C. at 807) Although the Commission was not unanimous in stating a standard for liability, it was unanimous in concluding Borden had engaged in predatory pricing. I do not believe many courts would quarrel with the essential holding that pricing at or near average variable costs by a monopolist, in a market with significant barriers to entry, and coupled with geographic price discrimination and predatory intent constitutes a violation of both Section 2 of the Sherman Act and Section 5 of the FTC Act. As the majority points out, it is true that the Commission did not establish any single cost-based standard for predation. But doing so would have been exceedingly difficult given the lack of legal or economic consensus in this area; it also would have been unnecessary, given that the evidence showed Borden violated even a very conservative standard of predation.

I would not defend each and every sentence in the Commission's 1978 opinion. If it were to be written today, with the benefit of further thinking and caselaw on predation, I would advocate that some passages be written differently. (I would venture, however, that this is the case for almost all opinions and all Commissioners. The conventional route for refining past opinions is to restate the principles in the next one.) While I concede that the court of appeals opinion reviewing the case went too far in claiming that the Commission's standard was based on *competitors'* costs (674 F. 2d at 515–516), the court clarified its holding in a subsequent opinion.[11]

The Commission's statement also criticizes the opinion in *Borden* by suggesting that the opinion condemned product differentiation through advertising as "something pernicious in and of itself." (Majority statement at 5) I do not think that is a fair statement of the Commission's position in *Borden*. Advertising was significant in *Borden* because it created a barrier to entry, a view that has been supported by the courts.[12] Any language in the opinion which may suggest otherwise is not my view or, to the best of my knowledge, the view of the Commissioners who joined the opinion. While the advertising may have had some positive effects as well, its antitrust significance here is that by serving to erect a barrier to market entry by firms producing an indistinguishable product by equally efficient methods, it fostered a situation in which unassisted market forces could not readily redress any attempts by Borden to exploit its monopoly power. And, the record in this case is clear that Borden did engage, successfully, in such efforts.

There is not yet a consensus about the proper standard for predation, but one point is clear: The reasoned opinions point away from the narrow, virtually impossible to meet average variable cost standard initially proposed by Professors Areeda and Turner in 1975. As Professors Brodley and Hay have pointed out, this standard, while appearing to offer a simple formulation consistent with economically efficient resource allocation, has the distinct disadvantage (for small firms trying to break into a market) that "it holds dominant firm pricing per se legal."[13] Consequently, virtually every recent appellate decision has declined to adopt a strict average variable cost rule for all situations.[14] While the Areeda-Turner rule is overly lenient as a standard for predation, the agreement adopted by the majority of the Commission, though using some terminology borrowed from Areeda-Turner, sets out an even more permissive standard—one that would mean a violation in this or any other industry would rarely occur and even more rarely could be proven.

In understanding the Commission's standard, it is important to note that, though the term "variable costs" is used, the standard is far from the standard conception of the term. The revised order actually prohibits *total* variable costs from exceeding total revenues in a single quarter in a single sales district. This is a very different idea from prohibiting pricing of products below the *average* variable cost per unit (a surrogate for marginal cost), and it leads to easy avoidance of the standard. For example, in a single sales district (there are 22 in the country) Borden could price very low in some cities, far below average variable costs, while compensating by selling at monopoly prices elsewhere in the district. Second, Borden could sell products from a very profitable area at selectively low prices into a district where a new entrant was trying to break in. The lower prices for these sales would reduce revenue for the district but not enough to violate the standard. In short, the idea seems to be that a potential predator must obey the law on *average*, rather than in particular situations. This novel approach is analogous to a speeder pleading with the highway

---

[11] The Sixth Circuit characterized its Borden holding in Richter Concrete Corp. v. Hilltop Concrete Corp., 1982–83 Trade Cas. ¶65,003 (1982). "Borden was found to be predatorially pricing by setting its prices below average total cost." *Id.* at 70,591, n.6.

[12] Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d. 263, 287 (2d Cir. 1979), *cert. denied*, 444 U.S. 1093 (1980).

[13] J. Brodley and G. Hay, "Predatory Pricing: Competing Economic Theories and the Evolution of Legal Standards," 66 Cornell L. Rev. 738, 793 (1981). As Brodley and Hay point out, the Areeda-Turner rule led to several difficulties. First, cost determination proved to be exceedingly complex in adjudication. Second, some adjustments had to be made in using the average variable cost as a surrogate for marginal cost to remain consistent with the economic theory of the rule itself. Third, several writers have rejected the Areeda-Turner rule even on efficiency grounds. Finally, the rule made it extremely difficult for plaintiffs to prove a violation. *Id.* at 788. Professor Williamson has called the rule "a defendant's paradise." Predatory Pricing: A Strategic and Welfare Analysis," 87 Yale L.J. 284, 305 (1977). For an excellent review of trends in predation law, *see* J. Hurwitz and W. Kovacic, "Judicial Analysis of Predation: The Emerging Trends," 35 Vanderbilt L. Rev. 63 (January 1982).

[14] The Ninth Circuit has recently stated in some instances pricing above average total costs could be predatory. Transamerica Computer Co., Inc. v. I.B.M. Corp., [1983] TRADE REG. REP. (CCH) ¶65,218 (9th Cir.). In Northeastern Tel. Co. v. Am. Tel. & Tel. Co., 651 F. 2d 767, 788 (2d Cir. 1981), the Second Circuit said "the relationship between a firms prices and its marginal costs provides the best single determinant of predatory pricing" but applied this presumption only to a "run of the mill case." The Fifth Circuit in International Air Ind., Inc. V. American Excelsior Co., 517 F. 2d 714, 724 (1978), required a showing of below average variable cost pricing or pricing below the short-run profit maximizing price when barriers to entry make such predation worthwhile. The Seventh Circuit in Chillicothe Sand & Gravel v. Martin Marietta Corp., 615 F. 2d 427, 432 (1980), viewed average variable cost as a useful factor but expressly indicated willingness to "consider the presence of other factors." The Eighth Circuit in Superturf, Inc. V. Monsanto Co., 660 F. 2d 1275, 1281 (1981), expressly noted that a monopolist who prices above average variable cost "may still be held to have engaged in a predatory act." The Ninth Circuit in Cal. Computer Products v. Intern. Business Machines, 613 F. 2d 727, 743 (1979), noted "that refinement of the marginal or average variable cost test will be necessary as future cases arise," and expressly declined to "foreclose the possibility that a monopolist who reduces prices to some point above marginal or average variable cost might still be held to have engaged in a predatory act because of other aspects of its conduct." The Tenth Circuit in Pac. Eng. & Prod. Co. of Nev. v. Kerr-McGee Corp., 551 F. 2d 790, 797, cert. denied, 434 U.S. 879 (1977), found average variable costs to be "extremely beneficial," but nevertheless refused to base its test for predation solely on cost, and indicated it would look to other factors as well.

patrolman that he has driven under 55 on average—an argument no doubt herefelt by the speeder but rarely recognized by the law.

The second difference between the Commission's "variable cost" idea and the conventional notion of variable costs is that "variable" in the agreement actually means "avoidable" by Borden and only then when avoiding expenses is consistent with "prudent business practice." What this will come to mean in real life is subject to much speculation, but one thing seems certain: much of Borden's advertising and labor expenses—costs Areeda and Turner have presumptively included in variable costs—will be excluded in Borden's own calculations on the grounds that it was "imprudent" to cancel them. Indeed, it would be hard for this Commission, or any other "outsider" to disagree with Borden's own experts and executives about what is prudent and avoidable for Borden.

I will not discuss in detail other substantive and administrative problems with the order, with one exception—the seven year sunset provision. The original *Borden* order, as is typically the case, was not limited in duration. Our rules provide that respondents may petition to modify orders based on changed conditions, but a ban on predatory practices or any other practice found to violate Section 5 has traditionally been permanent. One irony of the sunset is that because of the leniency of the Commission's order—much more permissive than the current state of the law—Borden is "subjected" to a less stringent standard than binds other monopolists until the sunset provision expires. If the Commission tries to sue Borden on the basis of *another* standard (as the Commission's statement suggests in fn. 10) Borden will no doubt argue that it was conforming to the Commission's order, that the Commission never would incorporate in any order a conduct standard lower than the recognized threshold of legality, and any transgression of any more restrictive standard was done in good faith. Under these circumstances, I am surprised Borden did not hold out for a permanent order.

The Commission now asks the Supreme Court to grant an extension for public comment on this agreement. While I surely support the opportunity for the public to comment, I respectfully believe that the Court should deny the Commission's request. A majority of the Commission is willing to circumvent the lengthy litigation in this matter in order to substitute a legal and policy approach held by the current administration. While I respect the right of the majority to decide the next opinion and to submit its views on that opinion to a court of appeals, I sincerely hope that the Court will not countenance what is in effect a dismissal of this matter by granting the Commission's request. Regardless of the legal merits, I consider it unseemly for this Commission to ask the Supreme Court to help it dismiss a case and vacate existing opinions in the matter five years after the case has left the Commission's jurisdiction, simply to accommodate the views of the administration in power. If accepted, this request threatens to set an unwise precedent for all agencies which, having undergone a change of philosophy and administration want to undo the efforts of past administrations in matters that, without the Supreme Court's aid, are no longer within its grasp.

The majority is doing much more by accepting this agreement than quibbling about language in the Commission's or Court of Appeals' opinions. It is trying to point predation law in a different direction—toward a solely cost-based standard that will be infrequently violated in real life and even less frequently proved. While it may appeal to some as embodying the height of economic rationality, as a practical matter, the standard in this order would take the Commission out of the business of policing predation.

Dissenting Statement of Commissioner Patricia P. Bailey on Proposed Order in Borden Inc., Docket 9278

I cannot agree with many of the policy pronouncements in the majority's statement, and I have only slight hope that the public comment period will resolve my concerns about the wisdom and efficacy of this consent.

Were I deciding *Borden* today, I might well write a different opinion from the one of four years ago (in which I was not a participant), because of both my own views and the evolving state of the law. However, the 1978 opinion is by no means susceptible of the majority's criticism that it embraces a "standard of conduct [which is] inconsistent with the purposes of Section 2 of the Sherman Act and Section 5 of the Federal Trade Commission Act." (Majority Statement, p. 3). On the contrary, *Borden*, whatever its arguable deficiencies, is within the mainstream of judicial and academic opinion which looks at a variety of factors, in addition to "below cost" pricing, to evaluate predatory intent and dangerous probability of success.

The evil of *Borden*, it seems, is that the case "does not set forth a satisfactory cost-based standard for predation." (*Id.*) Judging from this language and the proposed consent, the majority feels that a variable cost standard, and only a variable cost standard, should determine liability on a predation theory. This flies in the face of every [15] recent circuit court decision on predatory pricing and the Commission's own recent examination of dominant firm behavior.

Since 1975 there has been "a virtual explosion in the legal and economic literature dealing with predatory pricing." J. Brodley & G. Hay, *Predatory Pricing: Competing Economic Theories and the Evolution of Legal Standards*, 66 Cornell L. Rev. 738, 740 (1981) At least nine different economic theories for detecting predation have been advanced,[16] and the courts have been both selective and idiomatic in applying these tests.[17] However, the circuits are united in refusal to find that prices above average variable cost but below average total cost are conclusively lawful regardless of market conditions.[18] Rather, each case has indicated that pricing above average variable cost but below average total cost may be unlawful if other factors demonstrate predatory intent and injury to competition. Among the factors which have been mentioned are (1) market conditions which would thwart or aid monopolization, notably the height of entry barriers: *William Inglis & Sons v. ITT Continental Baking Co.*, *supra* at 933; *Northeastern Tel. Co. v. AT&T Co.*, 651 F. 2d 76, 88–89 (2d Cir. 1981), *cert. denied*, 102 S. Ct. 1438 (1982); *International Air Industries, Inc.*,

---

[15] The majority opinion in MCI Communications Corp. v. American Tel. & Tel. Co., 1982–83 Trade Cas. ¶65,127 (7th Cir. 1983) comes close to placing definitive reliance on a cost standard; however the standard referred to, long-run incremental cost, is considerably more inclusive than a variable cost standard, and particularly the variable cost standard proposed by the majority of this Commission.

[16] The seminal discussion recommended a short-run marginal cost pricing rule using average variable cost as a practical surrogate for marginal cost. P. Areeda & D. Turner, Predatory Pricing and Related Practices of Section 2 Under the Sherman Act, 88 Harv. L. Rev. 697 (1975). This proposal was challenged for disregarding the risk that a dominant firm can successfully pursue a strategy of sacrificing short-term profit for long-term benefits in order to exclude actual or threatened competition. F. Scherer, Predatory Pricing and the Sherman Act: A Comment, 89 Harv. L. Rev. 869 (1976) (offering an economic model for testing cost based rules and suggesting a broad rule-of reason approach). Other commentators proposed long-run pricing rules that emphasized different cost factors. R. Posner, Antitrust Law: An Economic Perspective, 194–196 (1976) (presumptively condemning sales below average total cost with intent to exclude a competitor); P. Joskow & A. Klevorick, A Framework for Analyzing Predatory Pricing Policy, 89 Yale L.J. 213 (1979) (proposing a two-tier test: only if monopolistic conditions exist in the market may pricing below the average variable cost be conclusively illegal, or pricing below average total cost be presumptively illegal under specified conditions). Other economists recommend approaches focusing on output changes or the timing of price cuts. O. Williamson, Predatory Pricing, a Strategic and Welfare Analysis, 87 Yale L.J. 284 (1977) (barring dominant firms from expanding output or selling below full cost to forestall entry); W. Baumol, Quasi-Permanence of Price Reductions: A Policy of Prevention of Predatory Pricing, 89 Yale L.J. 1 (1979) (barring price increases by a dominant firm for a specified period after its price cuts drive competitors from the market). Although not proposing a specific legal standard, two commentators have drawn attention to the prerequisites for successful entry-deterrance conduct. Salop, Strategic Entry Deterrance, 69 Am. Econ. Rev. 335 (1979); Spence, Entry, Capacity, Investment and Oligopolistic Pricing, 8 Bell J. Econ. 534 (1977). And finally, in fairness, I should note that at least one commentator has argued that there should be no standard at all, since no problem exists. R. Bork, The Antitrust Paradox 154 (1978).

[17] J. Hurwitz & W. Kovacic, Judicial Analysis of Predation: the Emerging Trends, 35 Vanderbilt L. Rev. 63 (1982).

[18] Most circuit courts have indicated that prices above average total cost are presumptively, if not *per se*, legal. *See, e.g.*, Chillicothe Sand & Gravel Co. v. Martin Marietta Corp., 615 F. 2d 427 (7th Cir. 1980); International Air Indus., Inc., v. American Excelsior Co., 517 F. 2d 714, 723 (5th Cir. 1975), *cert. denied*, 424 U.S. 943 (1976). *But see* Transamerica Computer Co., Inc. v. I.B.M. Corp., 1982-Trade Reg. Rep. (CCH) ¶65,218 (9th Cir.), holding that prices above average total cost are not presumptively legal. The circuits treat prices below average variable cost as presumptively illegal. *See, e.g.*, William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 652 F. 2d 917, 930–940 (9th Cir. 1981), *cert. denied*, 51–2383, Oct. 4, 1982.

supra, 517 F. 2d at 724; (2) independent proof of predatory intent: *SuperTurf Inc. v. Monsanto Co.*, 660 F. 2d 1275 (8th Cir. 1981); *O. Hommel Co. v. Ferro Corp.*, 659 F. 2d 340, 348–50 (3rd Cir. 1981), *cert. denied*, 102 S. Ct. 1711 (1982); *William Inglis & Sons Baking Co., supra* at 942–43; *Chillicothe Sand & Gravel Co., supra* at 433; (3) overall market capacity: *Pacific Engineering & Production Co. v. Kerr-McGee Corp.*, 551 F. 2d 790, 796–97 (10th Cir.), *cert. denied*, 434 U.S. 879 (1977); *William Inglis & Sons Baking Co. v. ITT Continental Baking Co.*, 461 F. Supp. 410, 418–419 (N.D. Cal. 1978), *aff'd in part and rev'd in part*, 652 F. 2d 917 (9th Cir. 1981). In addition, it is of course an antitrust truism that a firm with monopoly power may not be permitted the same latitude of conduct as its smaller rival. *U.S. v. Aluminum Company of America*, 148 F. 2d 416 (2d Cir. 1945); *United States v. United Shoe Machinery Corp.*, 110 F. Supp. 295 (D. Mass 1953). Courts have consistently acknowledged the need to protect equally efficient competitors from abuses of monopoly power.

The *Borden* opinion, as I read it, states that the record contains proof of (1) monopoly power; (2) anticompetitive intent, manifest in Borden documents which identify the threat Golden Crown posed to ReaLemon and present a calculated strategy for blocking Golden Crown at key entry points in order eventually to regain the pricing discretion of the pre-entry period; [19] (3) other conduct, which was arguably anticompetitive in the overall context, such as geographic price discrimination, local market saturation promotions, and high-impact regional advertising; (4) high barriers to entry in the form of ReaLemon's extraordinary brand image; (5) findings that Golden Crown lemon juice essentially matched ReaLemon in quality (thus indicating that the ReaLemon consumer franchise probably did not reflect current product superiority); and (6) findings that Golden Crown was as efficient as ReaLemon. With so many 'plus factors', particularly the evidence on noncompetitive market structure with vulnerable local competitors and direct evidence of predatory intent, surely the strictest possible cost standard is not required. The Commission did not, after all, find that Borden engaged in ephemeral price reductions, only slightly below its average total cost. Rather it found that Borden priced so far below ATC, for significant stretches of time, that it approached its average variable cost line—and crossed it if advertising expenses are counted as variable costs.[20] (see summary in Commissioner Pitofsky's concurring opinion, 92 FTC at 830–831).

The rule of reason approach in Borden—careful scrutiny of market structure, defendant's pricing levels and other conduct, available proof of intent and actual competitive consequences—is the approach I would bring to allegations of predation, and the one which I thought the Commission had reaffirmed in *E.I. DuPont de Nemours & Co.*, 96 F.T.C. 653, 745–46 (1980). I see no need to truncate predation analysis by attaching conclusive presumptions to comparisons of prices and costs. As Judge Wood has recently pointed out, economic and accounting evidence can be just as inexact and ambiguous as evidence of intent gleaned from documents and conduct. *MCI Communications Corp. v. American Tel. and Tel. Co.*, 1982–83 Trade Cas ¶ 65,137 (7th Cir., 1983) (dissent). The two weak components need each other.

I am also troubled by implications in the majority statement that geographic price discrimination is inherently procompetitive. This seems to me contrary to the letter and policy of the Robinson-Patman Act, which we should strive to reconcile with the other antitrust laws. While geographically selective price reductions can be a legitimate response to competition,[21] they can also be a highly effective monopolization strategy, as the Supreme Court has long recognized: If this method of competition were approved, the pattern for growth of monopoly would be simple. As long as the price warfare was strictly intrastate, interstate business could grow and expand with impunity at the expense of local merchants. The competitive advantage would then be with the interstate combines, not by reason of their skills or efficiency but because of their strength and ability to wage price wars. *Moore v. Mead's Fine Bread Co.*, 348 U.S. 115, 119 (1955).

See also U.S. v. Grinnell Corp., 284 U.S. 563, 570, 576 (1966). Many of the current commentators on the predation issue have focussed on the effectiveness of a multimarket strategy. *See, generally*, Salop, ed. *Strategy, Predation and Antitrust Analysis*, (1981); R. Posner, *Antitrust Law: An Economic Perspective*, 62–65, 176–80 (1976). Accordingly, I would not automatically approve geographic price discrimination, but would carefully examine it in light of other conduct to determine if other indicia of an attempt to lessen competition or monopolize are present.

If the majority are incorrect for their exclusive reliance on a cost standard as the determinant of liability, they are doubly incorrect in their choice of the cost standard on which they rely. Even courts which have placed the most reliance on a cost-based standard for predation have looked to *average* variable costs. This order looks only to total variable costs, assessed, moreover, in multi-state markets. These markets are defined, not by competitive realities, but by the boundaries of Borden's sales districts. Currently there are 22, but the order permits Borden to increase or decrease this number at will. As long as total revenues exceed total variable costs, Borden is absolved of wrongdoing. Many, if not most, predation cases have alleged a smallish target market—a city or county area.[22] Yet Borden is now free to confront rivals in such areas with an absolute giveaway program, so long as sales in the remaining parts of the sales district bring total revenues above total variable costs. I would like to hear from some producers of reconstituted lemon juice about their vulnerability to a less-than-sales-district sized price war.

Compounding this problem, the order appears to allow Borden to play a shell game when allocating costs to individual sales districts and time periods. Allocations can be made without prior FTC approval, and without any limitation as to frequency. The order says costs may be allocated according to "identifiable factors that make allocations to a particular sales district proper", but gives virtually no guidance[23] on the precise method of allocation. I would welcome comments for corporate accountants on the feasibility of using such flexibility to hide predatory pricing.

Finally, the order is defective in a practical sense: it appears that compliance monitoring and enforcement will require *de novo* investigations and trial. The essential problem is that the order does not define "variable cost" with any specificity. A cost will qualify as variable if it is "avoidable" consistent with "prudent business practice." I fear that in assessing avoidability, our staff would have to look at market definition and market power in order to know if Borden's actions were prudent under the circumstances. Moreover, on costs which traditionally are seen as variable (such as advertising or labor) it would seem that the burden of proof has shifted; on Borden's mere say-so, our staff now must show that each element of each category of cost was not avoidable, rather than Borden's showing why the characterization does not apply. Since Borden has the most control over the evidence on point, it will be an uphill struggle for our compliance staff.

To the extent that Borden can argue that certain costs, although traditionally considered marginal, nonetheless cannot be avoided consistent with prudent business practices, the standard by which Borden will be judged could be less than acutal marginal cost. It is ironic that Areeda and Turner instituted the search for a cost threshold from a desire to find an objective and workable standard for distinguishing between pricing above or below marginal cost, which they concluded is "the economically sound division between acceptable, competitive behavior and 'below-cost' predation". P. Areeda and D. Turner, *supra* at 716. Today the Commission abandons the quest for objectivity and manageability and endorses a test which rests so much on Borden's subjective conclusions that even the relationship to marginal cost is attenuated.

---

[19] In other words, Borden's price reductions were not simply a response to lower priced competition. They reflected an internal strategy to give up short-term profits in order to eliminate competition and recoup thereafter—the textbook definition in predation. P. Areeda and D. Turner, *supra*, at 698.

[20] The proposed order allows Borden to claim many advertising costs as fixed. I disagree with this provision. I see no unique circumstances in this case or industry which would warrant deviation from the normal practice, endorsed by Areeda and Turner, of presuming that advertising costs are variable. P. Areeda & Turner, III Antitrust Law, 173 (1978).

[21] See discussion by Commissioner Pitofsky in his concurring opinion in *Borden*, 92 FTC at 820–822.

[22] Indeed, Borden's "Golden Crown Strategy" was aimed at specific metropolitan areas and geographic regions. 92 FTC at 727–728, 733–756.

[23] The exception is contained in provision A2, regarding certain costs of television advertising.

Lastly, I am not as sanguine at the majority about the chances of this consent being declared devoid of precedential significance. Most consents are indeed *sui generis*; but this one, accompanied by a lengthy statement full of sweeping statements on the "correct" application of predation theory, seems destined to play a continuing jurisprudential role. We may be able to erase it from our institutional memory (although I doubt that companies seeking equity and parity will allow us to do so uncontested), but we can hardly dictate its use in private actions.

One further aspect of this matter concerns me apart from the actual merits of the settlement or the majority's theories on predatory pricing. What we have here is not a standard settlement. What we have here is a proposal, couched in terms of a settlement, to repudiate the Court of Appeal's decision affirming the 1978-Commission's final decision in order to allow the 1983-Commission to redecide the case. The Supreme Court is being asked to facilitate this change in the Commission's decision, not by rendering a decision on the merits, but by performing the purely administrative function of returning the matter to the agency's jurisdiction so that the agency can change its mind. such an effort seriously distorts the proper relationship of a federal agency to the judiciary, and sets a highly visible precedent for any agency, any time it undergoes a change in administration or guiding principles, to petition the courts to reach backward in time to rewrite opinions long completed and to nullify independent judicial efforts long since expended.

The reality of the Commission's position is not that, since 1978, the law of predatory pricing has become clear; it has not. In any event the terms of the settlement do not conform to any previously expressed standards of law in the area. Rather, the composition of a federal agency has changed, and it now believes its view of predatory pricing is "better" than the one applied earlier.[24] Whether or not this is true, the Commission ought to be content to use its newer view of the law to guide its decision on current matters. By such a process, comment on older cases may be offered, new precedent issued, and the course of the law possibly shifted. To go beyond the bounds of this traditional power, however, is to disrupt the orderly process of jurisprudence—an expansionist view of this agency's role to which I do not subscribe. It is noteworthy, moreover, that this "better" view of the law had not surfaced at the Federal Trade Commission even as recently as February 1982, when, after briefing and argument by Commission attorneys, the Court of Appeals issued its affirmance of the 1978 FTC Opinion. Indeed, the Commission did not see fit to "educate" the Sixth Circuit about these new views even after it received the Court's "favorable" decision, and when that Court still could have modified its opinion or reheard the case *en banc*. Because the only purpose of the extention now requested is to permit the Commission to subsequently ask this Court to help it implement its agreement with Borden, I would urge that the request be denied.

[24] If it were at all clear (1) that the Commission applied the wrong legal standard to this case in 1978, or (2) that the Court of Appeals in 1982 repeated or added to the alleged error in its affirmance of the Commission, (3) or that a "correct" standard applicable to predatory pricing had emerged judicially, or (4) that the Commission itended to apply any such judicially endorsed standard—I might be more sympathetic to the majority's position.

Separate Statement of Commissioner George W. Douglas in the Matter of Borden, Inc., Docket No. 8978

I wholeheartedly concur with the majority statement in support of the revised order for the simple reason that it seeks to correct what has proven to be an egregiously bad order founded on a tortured economic treatment of advertising as an entry barrier, an erroneous concept of geographic price discrimination, and an undefined cost-based standard for predation. Indeed, of all the issues explored in the minority comments and in the majority's statement, the one point that stands clear is that none of the five Commissioners is satisfied with the original decision and order in the case.

First, in the Commission's original, 1978 order, Borden was prohibited from pricing its ReaLemon brand of reconstituted lemon juice "below its costs" or at "unreasonably low prices" (92 FTC 669 at 833). The language used was so vague and undefined ("costs" were not defined at all) that upon appeal the Sixth Circuit Court was able to read into the order a prohibition against Borden from pricing its product at any level that would cause its competitors to price below *their* average variable costs (674 F. 2d 496, at 515–516).

Clearly, forcing Borden to erect a price umbrella over its competitors' heads in effect turns the economic theory of competitive markets on its head, to the extent that under the guise of promoting competition, the Commission would require market leaders to maintain prices above competitive levels so as to enable other firms successfully to market products perceived by consumers as inferior.

Second, I am not at all persuaded by Commissioner Bailey's and Pertschuk's concerns that the cost standard referenced in the modified order is either vague or unenforceable; rather, in comparison with the original order, it is a model of clarity, setting forth with as much direction as possible a cost based standard that comports with traditional economic concepts.

Third, I dispute Commissioner Pertschuk's claim that the revised order is "at odds with sound reasoning in recent court opinions." To the contrary, the revised order is well-attuned to the prevailing tendency of courts to employ more clearly delineated cost-based tests—especially variable cost standards—in evaluating pricing conduct. Indeed, to cling to the language and reasoning of the Commission's original order would confound sound economic principles, and would ignore the basic direction of judicial analysis over the past eight years. In my judgment the Federal Trade Commission should enforce the antitrust laws with the *best* economic evidence and insight available, whether found in court opinions or elsewhere. In this instance the Commission modifies an order which has become, through its own mistaken rationale, through its vagueness, and through its interpretation by the Sixth Circuit, paradoxically anticompetitive in itself.

16 CFR Part 429

Regulatory Flexibility Act for Review of Trade Regulation Rule on Cooling-Off Period for Door-to-Door Sales

AGENCY: Federal Trade Commission.

ACTION: Proposed rule, request for comments.

SUMMARY: The Federal Trade Commission (FTC), in accordance with the Regulatory Flexibility Act and publication of a Plan for Periodic Review of Commission Rules, 46 FR 35118 (1981), is soliciting comments and data on whether the Rule on Cooling-Off Period for Door-to-Door Sales has had a significant economic impact on substantial number of small entities and if it has, whether the Rule should be amended to minimize any significant economic impact on small entities. Another Notice is being published simultaneously soliciting comments on two studies relating to the effects of the Rule on industry and consumers.

DATE: All comments and data should be received by the Commission no later that April 4, 1983.

ADDRESS: Comments should be sent to Secretary, Federal Trade Commission, Washington, D.C. 20580. Comments should be identified as "RFA" comments.

FOR FURTHER INFORMATION CONTACT: Lewis Franke, Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580, Phone 202–376–2891.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act, Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601 et seq. (RFA) requires that the FTC conduct periodic review of the Rules which have or will have a significant economic impact upon a substantial number of small entities.

The Rule on a Cooling-Off Period for Door-to-Door Sales makes it an unfair or deceptive act or practice for sellers of consumer goods or services with a purchase price of $25.00 or more who sell away from their place of business to fail to furnish to the buyer certain information regarding the buyer's right to cancel sales within three business days from the date of the transaction

and to give the buyer a full refund of any downpayment upon the buyer's cancellation.

The Rule requires a seller to furnish the buyer with a completed receipt or copy of a contract pertaining to the sale with a summary notice informing the buyer of the right to cancel the transaction. The Rule also requires the seller to furnish the buyer with a completed Notice of Cancellation in duplicate to be attached to the contract or receipt and which is easily detachable. The Rule was promulgated October 26, 1972, 37 FR 22933 (1972). This Rule is being reviewed by the FTC in accordance with the periodic review requirement of RFA.

The purpose of the statutory periodic review is limited to determining whether the Rule should be continued without change, or should be amended or rescinded, consistent with the stated objectives of applicable statutes, to minimize any significant economic impact of the Rule upon a substantial number of such small entities.

In order to conduct the periodic review of this Rule pursuant to RFA the FTC poses the following questions for public comment. The Commission requests that the factual data (e.g., economic and accounting information, statistical analysis, surveys, studies, etc.) upon which submitted comments are based be included with the comments.

(1) Has the Rule had a significant economic impact (costs and/or benefits) on a substantial number of small entities? Please describe the details of any such significant negative and/or positive economic impact.

(2) Is there a continued need for the Rule?

(3)(a) What burdens, if any, does complicance with the Rule place on small entities?

(b) To what extent are these burdens ones which small entities would also experience under a voluntary policy of giving consumers the right to cancel within a specified time?

(4) What changes, if any, should be made to the Rule which would minimize the economic impact on small entities?

(5) To what extent does the Rule overlap, duplicate or conflict with other other Federal and with state and local governmental rules?

(6) Have technology, economic conditions or other factors changed in the area affected by the Rule since its promulgation in 1972 and, if so, what effect do these changes have on the Rule or those covered by it?

16 CFR Part 429

Review of Certain Studies on Trade Regulations Rule on Cooling-Off Period for Door-to-Door Sales

AGENCY: Federal Trade Commission.

ACTION: Request for comments on studies.

SUMMARY: The Federal Trade Commission (FTC) is soliciting comments on two studies of the effects of the Rule on industry and consumers that the FTC is releasing to the public. One study is entitled "An Impact Evaluation of the Cooling-Off Period for Door-to-Door Sales Trade Rule," conducted by Market Facts, Inc. The general purpose of this study was to evaluate nationwide consumer experiences when purchasing goods or services from door-to-door salespeople. The second study, by Walker Research, Inc., is entitled "Three Day Cooling-Off Period Trade Regulation Rule Evaluation Study," whose purpose was to collect data from industry relating to the costs and benefits of the Rule.

Pursuant to the Regulatory Flexibility Act, another Notice is being published simultaneously soliciting comments on the economic impact of the Rule on small business.

DATE: All comments and data should be received by the Commission no later than April 4, 1983.

ADDRESS: Comments should be sent to Secretary, Federal Trade Commission, Washington, D.C. 20580. Copies of both studies are available for distribution by the FTC Public Reference Branch Room 130. Comments relating to the studies should be marked "Study Comments."

FOR FURTHER INFORMATION CONTACT: Lewis Franke, Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580, Phone 202-376-2091.

SUPPLEMENTARY INFORMATION: Section 6(f) of the Federal Trade Commission Act, 15 U.S.C. 46, empowers the Commission to make public from time to time information obtained by it as is in the public interest.

The Rule on a Cooling-Off Period for Door-to-Door Sales makes it an unfair or deceptive act or practice for sellers of consumer goods or services with a purchase price of $25.00 or more who sell away from their place of business to fail to furnish to the buyer certain information regarding the buyer's right to cancel sales within three business days from the date of the transaction and to give the buyer a full refund of any downpayment upon the buyer's cancellation.

The Rule requires a seller to furnish the buyer with a completed receipt or copy of a contract pertaining to the sale with a summary notice informing the buyer of the right to cancel the transaction. The Rule also requires the seller to furnish the buyer with a completed Notice of Cancellation in duplicate to be attached to the contract or receipt and which is easily detachable. The Rule was promulgated October 26, 1972, 37 FR 22933 (1972).

Some industry members have indicated an interest in modifying the Rule to permit the use of a one-contract form which incorporates all of the right to cancel disclosures and further may be used by the buyer for cancellation purposes. The Walker Research industry study indicates that the printing of cancellation forms is one of the increased costs caused by the Rule (See pages 33-39 of the Walker Research, Inc. Study). The FTC has on previous occasions rejected industry proposals on the grounds that the two form notice is easier for the buyer to use and insures the buyer of a record of the transaction. The continued viability of this rationale may be affected by the findings of the Market Facts consumer survey concerning the extent that consumers invoke the Rule. (See page III-28 of the Market Facts Study, Inc. and page 7 of the Walker Research, Inc. Study.)

Further, some industry members have suggested that "money back guarantee" transactions should be excluded from the Rule requirements. In the past the FTC has rejected this proposal. Certain findings of the industry survey (see page 7 of the Walker Research Study) concerning direct selling firm "money back guarantee" policies, and of the consumer survey (see pp. III-41 through III-46 of the Market Facts Study) concerning consumer interpretations of the term "money back guarantee" may provide additional information on the desirability of excluding these transactions from the Rule.

The following questions relate to those two issues of industry concern, and to others about which the Commission seeks information:

(1)(a) Would modify the Rule to permit a contract form or receipt combining the notice of the right to cancel with the form used by the consumer to cancel reduce costs?

(b) Would a combined notice/cancellation form significantly lessen the protection consumers now have?

(c) Would such modifications reduce paperwork and costs? If so how?

(d) Would printing new forms increase costs?

(e) Could a one-form contract or receipt be devised that would provide the consumer with a permanent record of the transaction? (Businesses and other members of the public are encouraged to submit sample forms incorporating the above modifications.)

(2)(a) How does industry define a "money back guarantee"?

(b) How do consumers understand the term "money back guarantee"? Does the term mean that the transaction may be cancelled by the consumer at any time without giving a reason?

(c) Should "money back guarantee" transactions be exempted from the Rule requirements?

(d) Should there be only certain limited circumstances under which this type of transaction would be exempted? What are they?

(e) How would the buyer be informed of the right to cancel?

(3) Should the Rule be more limited in its application? For example, should party plan sales be exempted from the Rule's coverage? (See page III–2 of Market Facts Study.) Should the exempted amount be raised from $25.00 to account for inflation that has occurred since the Rule's promulgation?

(4) Should the Rule be broadened to cover, for example, telephone solicitations? (See page III–47 of Market Facts Study.)

(5) Are firms presently complying with the rule? In what ways are firms not complying with the rule? Are certain types of firms not complying with the rule? (See pages III–32, III–38 through 39, Table III–15 of the Market Facts Study.)

(6) Are some types of firms experiencing significantly higher rates of cancellation within 3 days than other types? If so, what factors explain this difference? (See pages 42–45 of the Walker Research study.)

Comments would also be appreciated on the methodology and conclusions of the two studies.

BILLING CODE 6750-01-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1145

Proposed Rule To Regulate Under the CPSA a Risk of Injury That May Be Presented by Certain Mesh-Sided Cribs and Play Yards

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rules.

SUMMARY: The Commission is investigating the possibility that certain play yards (playpens) and portable cribs with mesh sides may present a potential hazard of asphyxia from airway blockage or chest compression if an infant becomes entrapped between the base or floor of the play yard or crib and the mesh side, in a pocket which forms when a side of the play yard or crib is not fully raised. The Commission proposes, should regulatory action become necessary regarding the possible risk of asphyxia by airway blockage or chest compression which may be associated with these products, to use the procedures of the Consumer Product Safety Act rather than those of the Federal Hazardous Substances Act. The Commission preliminarily determines that this transfer is in the public interest because, in the event the Commission believes that a risk of asphyxia by airway blockage or chest compression is associated with those products, public notification and remedial action can be accomplished more expeditiously under the CPSA than under the FHSA.

DATE: Comments concerning this proposal must be received in the Office of the Secretary by April 4, 1983.

ADDRESS: Comments should be sent to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207; (301) 492–6800.

FOR FURTHER INFORMATION CONTACT: Lynn Lichtenstein, Trial Attorney, Division of Administrative Litigation, Consumer Product Safety Commission, Washington, D.C. 20207; (301) 492–6626.

SUPPLEMENTARY INFORMATION: By this notice, the Commission proposes to regulate under the Consumer Product Safety Act (CPSA, 15 U.S.C. 2051 *et seq.*), a possible risk of asphyxia by airway blockage or chest compression that may be associated with certain play yards (playpens) and portable cribs with mesh sides, which are described in detail below.

Section 30(d) of the CPSA (15 U.S.C. 2079(d) governs these proposed rules. That section provides:

> A risk of injury which is associated with a consumer product and which could be eliminated or reduced to a sufficient extent by action under the Federal Hazardous Substances Act * * * may be regulated under this Act [the CPSA] only if the Commission by rule finds that it is in the public interest to regulate such risk of injury under this Act.

A. Background

In 1982, the Commission received two reports of infant deaths associated with play yards (playpens) with mesh sides. The product involved in these incidents utilized metal tubing to form a frame which supports a floor, generally of pressed wood, approximately 5¾ to 6½ inches above the surface on which the play yard is placed during use. A thin pad covers the floor of the play yard.

The play yard is enclosed on all four sides by means of an open mesh fabric. The mesh fabric sides extend down from the top of the play yard toward the floor. Approximately two or three inches above the floor, the mesh fabric is sewn to a strip of material, sometimes called a draft shield. The draft shield is attached to the floor of the play yard.

The tubular frame of the play yard is constructed in such a manner that at least one of the sides can be lowered when the product is in use.

The two fatalities associated with play yards of this type reported in 1982 involved infants aged 2½ months and 3½ months. Both of these incidents occurred when the infants was left in a play yard of the type described above with one of the sides lowered.

When one side of the play yard is in a lowered position, the mesh fabric and draft shield on that side becomes slack and forms a pocket at the level of the floor of the play yard. If an infant moves or falls off the edge of the play yard floor into the pocket formed by the mesh side and draft shield, the weight of the infant creates a downward force on the pocket.

Because the floor of the play yard is approximately 5¾ to 6½ inches above the level of the surface on which the play yard rests, the infant becomes trapped in the pocket formed by the mesh side and draft shield. The downward force created by the infant's weight causes the pocket to constrict and the infant is pressed against the pocket alone or against the edge of the play yard floor.

In one of the cases reported in 1982, the infant's face was pressed against the draft shield apparently with sufficient force to block passage of air into the nose or mouth. In the other case, the compression force against the infant's chest was great enough to interfere with the infant's ability to breathe. In either

of these events, asphyxia—loss of consciousness from too little oxygen—may result. If asphyxia continues for a period of three to five minutes, loss of oxygen may result in permanent brain damage. If asphyxia continues for a longer period, death will ensue.

In 1982, the Commission also received a report of an infant death associated with a portable crib with mesh sides. The crib involved in this incident is similar in design and construction to the play yards described above. However, the legs of the portable crib can be adjusted so that the floor of the crib may be raised to approximately 18 inches above the surface on which the crib is placed, and the crib mattress, which covers the crib floor, is somewhat thicker than the pad used with the play yard.

The same risk of injury is associated with portable cribs with mesh sides as the one described in the discussion of play yards. When a side of the crib is lowered, the mesh fabric and draft shield on that side form a pocket near the crib floor. If an infant is left in such a crib with one side lowered, and moves or falls off the mattress into the mesh pocket, the weight of the infant will cause the pocket to constrict. Constriction of the pocket will press the infant's face or body against the draft shield, the floor of the crib, the edge of the mattress, or the mesh itself, resulting in asphyxia. As stated above, asphyxia can cause permanent brain damage or death.

In addition to the crib fatality reported in 1982, the Commission has reports of four similar infant deaths; two in 1978, one in 1977, and one in 1973. All of these earlier deaths appear to have resulted from asphyxia.

B. Regulation Under FHSA

At this time, the play yards and portable cribs described above could be subject to regulation by the Consumer Product Safety Commission under provisions of the Federal Hazardous Substances Act (FHSA, 15 U.S.C. 1261 *et seq.*) as articles intended for use by children.

The Commission has issued requirements for full-size baby cribs at 16 CFR 1500.18(a)(13) and Part 1508, and for non-full-size cribs at 16 CFR 1500.18(a)(14) and Part 1509 under provisions of the FHSA. However, the play yards and cribs described in this notice are not subject to requirements for full-size cribs because they do not have the dimensions of a "full-size crib" as that term is defined at 16 CFR 1508.1, and are specifically excluded from the requirements for non-full-size cribs by provisions of 16 CFR 1509.2(b)(1). Additionally, the risk of injury described in this notice is not addressed by the requirements for full-size or non-full cribs in 16 CFR 1500.18(a) (13) or (14), Part 1508, or Part 1509.

In accordance with provisions of section 3(e) through (i) of the FHSA (15 U.S.C. 1262 (e), (f), (g), (h), (i)), the Commission could begin a proceeding for the issuance of a rule to declare that the play yards and portable cribs with mesh sides which are described in this notice present a mechanical hazard. If issued on a final basis, such a rule would have the effect of classifying these children's products as "banned hazardous substances" as that term is used in section 2(a)(1)(A) of the FHSA (15 U.S.C. 1261(q)(1)(A)), and would prohibit the distribution or sale of these products in the United States, as well as their importation into this country. If a children's article presents an "imminent hazard," provisions of section 3(e)(2) of the FHSA (15 U.S.C. 1262(e)(2)) authorize the Commission to issue an immediate order declaring the product to be a banned hazardous substance pending completion of a proceeding to issue a banning rule.

A final rule issued under provisions of sections 3 (e) through (i) of the FHSA would also make the products in question subject to provisions of section 15 of the FHSA (15 U.S.C. 1274). That section authorizes the Commission to determine, after affording all interested persons opportunity for a hearing, that notification to the public of the hazard presented by a product which is a "banned hazardous substance" is necessary in order to adequately protect the public. That section also authorizes the Commission, after affording all interested persons opportunity for a hearing, (which could be combined with a hearing regarding the need for public notification), to require the manufacturer, distributor or dealer of a product which is a banned hazardous substance to elect to repair or replace the product or to refund the purchase price of the product.

However, the provisions of section 15 of the FHSA concerning public notification and corrective action would be applicable to the products which are the subject of this notice only if the Commission had first issued a rule under provisions of section 3(e) through (i) of the FHSA to announce the Commission's determination that the products present a mechanical hazard. A proceeding to issue such a rule is complex and time-consuming.

Such a proceeding is initiated by publication of an advance notice of proposed rulemaking in the **Federal Register** to invite comments from all interested persons about the risk of injury associated with the product which is the subject of the proceeding and possible means of addressing that risk of injury, including voluntary standards now in existence or which might be developed. If, after consideration of all information received in response to the advance notice of proposed rulemaking, the Commission decides to continue the proceeding, publication of a second notice in the **Federal Register** is required to propose the rule and invite written comments on the proposal. The Commission must then analyze all comments received in response to the proposal and publish a third notice in the **Federal Register** to issue the rule on a final basis.

C. Regulation Under CPSA

The CPSA has provisions for requiring public notification of substantial hazards which may be presented by these articles and for ordering corrective action to be taken with regard to them without the necessity of first completing a rulemaking proceeding.

Additionally, the CPSA has provisions which authorize the Commission in certain cases to obtain an administrative order for public notification of the hazard presented by a product and for repair, or replacement of the product, or refund of the purchase price of the product without any necessity of first completing a rulemaking proceeding. The FHSA has no corresponding provisions.

Section 15 of the CPSA (15 U.S.C. 2064) confers upon the Commission the authority to order public notification of the hazard presented by a product if the Commission determines, after affording all interested persons opportunity for a hearing, that the product presents a "substantial product hazard," and that notification is required in order to adequately protect the public from that substantial product hazard. Additionally, section 15 of the CPSA authorizes the Commission to order any manufacturer, importer, distributor, or retailer of a product to elect to repair or replace the product, or to refund the purchase price of the product, if the Commission determines, after affording all interested persons opportunity for a hearing, that the product presents a "substantial product hazard," and that issuance of such an order is in the public interest.

If the products described in this notice were subject to regulations under the CPSA, no requirement for rulemaking would exist in order to invoke the provisions of section 15 of that Act.

Additionally, provisions of section 12 of the CPSA (15 U.S.C. 2061) authorize the Commission to file an action in a United States district court against a manufacturer, importer, distributor, or retailer of a consumer product which presents an imminent and unreasonable risk or death or severe personal injury. The court has the authority to order the recall of the product, its repair or replacement, or refund of the purchase price. The court also has authority to order a firm to undertake extensive notification efforts to advise purchasers and the general public of the nature of the risk and of the firm's obligation for remedial action. The Commission may file an action under section 12 of the CPSA without any requirement for having first undertaken a rulemaking proceeding. As noted above, no corresponding provisions exist in the FHSA.

Because notification to the public of any hazard which may be presented by the products described in this notice and remedial action with regard to those products could be accomplished more expeditiously under the CPSA than under the FHSA, the Commission has preliminarily determined that it would be in the public interst to regulate under the CPSA rather than the FHSA any risk of asphyxia by airway blockage or chest compression which may be associated with those products if an infant becomes entrapped between the mesh side and the floor, or in the mesh of a play yard; or between the mesh side and the floor, or in the mesh of a play yard; or between the mesh side and the floor, or the edge of the mattress, or in the mesh of a portable crib.

As noted above, the FHSA has provisions for issuance of an immediate order to declare a children's article to be a banned hazardous substance if it presents an "imminent hazard." However, some products may present a "substantial product hazard" warranting issuance of an order for public notification and corrective action, without amounting to an "imminent hazard" as that term is used in section 3(e)(2) of the FHSA.

In making the preliminary determination set forth above, the Commission has decided that notwithstanding provisions of section 3(e)(2) of the FHSA, use of the procedures of the CPSA may lead to more expeditious notification and corrective action than might be obtained by following the procedures of the FHSA.

If the Commission issues the rule proposed below on a final basis, and thereafter determines that a standard or regulation may be needed to address any risk of asphyxia by blockage or compression which these products may present, the CPSA would also authorize the Commission to issue a standard or banning rule. Procedures for issuance of a standard are set forth in sections 7 and 9 of the CPSA (15 U.S.C. 2056, 2058); procedures for issuance of a banning rule are in sections 8 and 9 of the CPSA (15 U.S.C. 2057, 2058).

D. Impact on Small Businesses

Section 603 of the Regulatory Flexibility Act (RFA, 5 U.S.C. 603) requires agencies to prepare and make available for public comment an initial regulatory flexibility analysis of the impact of any proposed rule on small entities, including small businesses. Section 605(b) of the RFA provides that an agency is not required to prepare a regulatory flexibility analysis if the agency certifies that the rule, if issued on a final basis, will not have a significant economic impact on a substantial number of small entities.

The regulation proposed below, if issued on a final basis, will not by itself impose any legal or other obligation on any person or firm. The rule would simply express the Commission's determination that any action taken to eliminate or reduce the risk of injury with which it is concerned will be taken following the procedures set forth in the CPSA rather than the FHSA.

If the Commission issues a final rule based on the proposal published below, and then determines that it should act to eliminate or reduce the risk or injury which is the subject of the rule, the Commission will be required to initiate and follow through to completion appropriate judicial or administrative proceedings under one or more sections of the CPSA before it can impose any obligation on any person or firm.

Since a final rule based on the proposal imposes no obligation on any person or firm, the Commission hereby certifies that it will not have a significant economic impact on a substantial number of small businesses.

E. Environmental Considerations

The regulation proposed below falls within the categories of Commission actions described in 16 CFR 1021.5(c) that have little or no potential for affecting the human environment. For this reason, neither an environmental assessment nor an environmental impact statement is required.

F. Conclusion and Proposal

After consideration of the information set forth above, and provisions of the FHSA and the CPSA, the Commission hereby proposes to regulate under the CPSA rather than the FHSA the possible risk of asphyxia by airway blockage or chest compression which may be associated with the play yards and portable cribs described in this notice if infants become entrapped between the mash side and the floor, or in the mesh of such play yards; or between the mesh side and the floor or mattress, or in the mesh of such portable cribs. Until issuance of any final regulations under section 30(d) of the CPSA, the Commission has authority to regulate under the FHSA any risk of injury described in this notice which these products may present.

List of Subjects in 16 CFR Part 1145

Administrative practice and procedure, Consumer protection, Infants and children.

PART 1145—REGULATION OF PRODUCTS SUBJECT TO OTHER ACTS UNDER THE CONSUMER PRODUCT SAFETY ACT

Therefore, under provisions of the Consumer Product Safety Act (section 30(d), Pub. L. 92–573, 86 Stat. 1207, as amended Pub. L. 94–284, 90 Stat. 503, Pub. L. 97–35, 95 Stat 703; 15 U.S.C. 2079(d)), the Commission proposes to amend the Code of Federal Regulations, Title 16, Chapter II, Subchapter B, Part 1145, by adding new §§ 1145.11 and 1145.12, as follows:

§ 1145.11 Certain play yards (play pens) with mesh sides: risk of asphyxia from airway blockage or chest compression.

(a) The Commission finds that it is in the public interest to regulate under the Consumer Product Safety Act, rather than under the Federal Hazardous Substances Act, the possible risk of asphyxia from airway blockage or chest compression that may be associated with play yards (play pens) with mesh sides.

(b) Therefore, if the Commission finds regulation to be necessary, any such play yards (play pens) shall be regulated only under one or more provisions of the Consumer Product Safety Act.

§ 1145.12 Certain portable cribs with mesh sides; risk of asphyxia from airway blockage or chest compression.

(a) The Commission finds that it is in the public interest to regulate under the Consumer Product Safety Act, rather than under the Federal Hazardous Substances Act, the possible risk of asphyxia from airway blockage or chest compression that may be associated with portable cribs with mesh sides.

(b) Therefore, if the Commission finds regulation to be necessary, any such

portable cribs shall be regulated only under one or more provisions of the Consumer Product Safety Act.

Interested persons are invited to submit written comments by April 4, 1983. Comments may be accompanied by written data, views, and arguments, and should be addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

Received comments may be seen in the Office of the Secretary, eighth floor, 1111 18th Street, NW., Washington D.C., between 8:30 a.m. and 5:00 p.m. Monday through Friday.

(Sec. 30(d), Pub. L. 92–573, 86 Stat. 1207, as amended Pub. L. 94–284, 90 Stat. 503, Pub. L. 97–35, 95 Stat. 703; 15 U.S.C. 2079(d))

Dated: February 28, 1983.

Saint Lawrence Seaway Development Corporation

33 CFR Part 401

Seaway Regulations, Miscellaneous Amendments

AGENCY: Saint Lawrence Seaway Development Corporation, DOT.

ACTION: Proposed rule.

SUMMARY: The Saint Lawrence Seaway Development Corporation and its counterpart agency, the St. Lawrence Seaway Authority of Canada, publish joint Seaway Regulations. As a result of discussions with the St. Lawrence Seaway Authoirty, it has been determined that a number of the existing regulations need clarification. Therefore the Seaway Corporation proposes to amend 33 CFR Part 401, Subpart A.

DATES: Comments received by April 18, 1983 will be considered.

ADDRESS: Interested parties may submit written comments to the Saint Lawrence Seaway Development Corporation, P.O. Box 520, Massena, New York 13662 (Attn: General Counsel). Persons who want the receipt of their comments acknowledged in writing may submit a stamped self-addressed postcard for this purpose.

FOR FURTHER INFORMATION CONTACT: Frederick A. Bush, General Counsel, (315) 764–3245.

SUPPLEMENTARY INFORMATION: As a result of discussions with its counterpart agency, the Saint Lawrence Seaway Development Corporation proposes to amend the joint Seaway Regulations for the reasons set forth in the summary.

List of Subjects in 33 CFR Part 401

Hazardous materials transportation, Navigation (water), Penalties, Radio, Reporting and recordkeeping requirements, Vessels, Waterways.

In § 401.3, paragraph (d)(1) will be reworded to clearly indicate that the dimensions addressed in the regulations are set out in the block diagram.

Section 401.9 will be revised to remove any question that 19.8 m applies to the overall length of the vessel.

In the table in § 401.1C(c), the column heading, "Ship's Overall Length", will be changed to "Overall Length of Vessels", and the information in this column will be revised to eliminate any misunderstanding regarding the vessel's dimensions that are covered by the regulations, and to assure that all dimensions are included.

In § 401.12(a)(5), the word "lines" will replace the word "wires" to bring it into conformity with other areas of that section, and as in § 401.10, the information under the column, "Overall Length of Vessels", will be revised for the reason previously stated.

In § 401.15, the phrase "in overall length" will be added for clarity.the intent of the regulation.

In § 401.40, paragraph (c) will be reworded in order to more clearly define the intent of the regulation.

Section 401.45 will be revised to clearly indicate that the regulation is concerned with the speed of a vessel entering a lock chamber.

In § 401.47, paragraph (c) will be reworded to conform to paragraph (c) of § 401.40.

In the table to § 401.48 items 2. (a), (b), (d) and (e), the phrase "in overall length" will be added for clarity.

In § 401.51, the regulation will be divided into two paragraphs to make it easier to understand.

In § 401.74, the addresses of the Saint Lawrence Seaway Development Corporation and the St. Lawrence Seaway Authority will be added for the convenience of the user.

In § 401.80, a phrase will be added citing Schedule III as the schedule which the vessel owner may look to for compliance with this regulation.

In § 401.82, the word "nearest" will be added to indicate that a vessel extending more than 33.5 m above water level must furnish precise information concerning its height to the nearest Seaway station. As previously written, the regulation had been interpreted to mean that any Seaway station could be contacted, while the intent was to require that it be reported to the nearest Seaway station.

Paragraph (b)(2) of § 401.97 will be reworded to indicate that the Saint Lawrence Seaway Tariff of Tolls is an agreement between the governments of the United States and Canada.

This proposed regulation involves a foreign affairs function of the United States; therefore Executive Order 12291 does not apply to this rulemaking. The Saint Lawrence Seaway Development Corporation certifies that, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), this proposed rule will not have a significant impact on a substantial number of small entities. The Seaway Regulations relate to the activities of commercial users of the Seaway, the vast majority of whom are foreign vessel operators, and therefore any resulting costs will be borne primarily by foreign vessels. On the other hand, the economic benefits derived from a safe and efficiently operated St. Lawrence Seaway are considerable. Finally, the Corporation has determined that this rulemaking is not a major Federal action affecting the quality of the human environment under the National Environmental Policy Act, and therefore an environmental impact statement is not required.

PART 401—[AMENDED]

For the stated reasons, it is proposed to amend the Seaway Regulations as follows.

1. In § 401.3, paragraph (d)(1) is revised to read as follows:

§ 401.3 Maximum vessel dimensions.

* * * * *

(d) * * *

(1) A vessel having a beam width of less than 23.16 m and having dimensions exceeding the limits set out in the block diagram illustrated in Appendix I shall not transit a lock except in accordance with a permit to transit issued by the Authority.

2. In § 401.9, paragraph (a) is revised to read as follows:

§ 401.9 Radiotelephone equipment.

(a) Self-propelled vessels, other than pleasure craft of less than 19.8 m in overall length, shall be equipped with VHF (very high frequency) radiotelephone equipment.

* * * * *

3. In § 401.10, the table in paragraph (c) is revised as follows:

§401.10 Mooring lines.

* * * * *

(c) * * *

Overall length of vessels	Length of mooring line	Breaking strength
40 m or more but not more than 60 m.	110 m	89 kN.
More than 60 m but not more than 90 m.	110 m	134 kN.
More than 90 m but not more than 120 m.	110 m	178 kN.
More than 120 m but not more than 150 m.	110 m	250 kN.
More than 150 m but not more than 223.5 m.	110 m	300 kN.

4. In § 401.12, paragraph (a)(5) and the table are revised to read as follows:

§ 401.12 Minimum requirements—mooring lines and fairleads.

(a) * * *

(5) Every vessel shall have a minimum of two spare mooring lines available and ready for immediate use.

* * * * *

TABLE

Overall length of vessels	For mooring lines nos. 1 and 2	For mooring lines nos. 3 and 4
80 m or more but not more than 90 m.	Between 10 m and 35 m from the stem.	Between 10 m and 25 m from the stem.
More than 90 m but not more than 120 m.	Between 12 m and 30 m from the stem.	Between 15 m and 35 m from the stem.
More than 120 m but not more than 150 m.	Between 12 m and 35 m from the stem.	Between 15 m and 40 m from the stem.
More than 150 m but not more than 180 m.	Between 15 m and 40 m from the stem.	Between 20 m and 45 m from the stem.
More than 180 m but not more than 223.5 m.	Between 20 m and 50 m from the stem.	Between 20 m and 50 m from the stem.

5. Section 401.15 is revised to read as follows:

§ 401.15 Stern anchors.

Every vessel of more than 110 m in overall length, the keel of which is laid after January 1, 1975, shall be equipped with a stern anchor.

6. Section 401.40 is amended by revising paragraph (c) to read as follows:

§ 401.40 Entering a lock.

* * * * *

(c) No vessel shall use thrusters when passing a lock gate.

7. Section 401.45 introductory text is revised to read as follows:

§ 401.45 Emergency procedure.

When the speed of a vessel entering a lock chamber has to be checked in an emergency, a signal consisting of five blasts on a horn shall be given,

* * * * *

8. In § 401.47, paragraph (c) is revised to read as follows:

§ 401.47 Leaving a lock.

* * * * *

(c) No vessel shall use thrusters when passing a lock gate.

9. In the table to § 401.48, items 2. (a), (b), (d) and (e) are revised to read as follows:

§ 401.48 Turning basins.

* * * * *

2. * * *

(a) Turning Basin No. 1—Opposite St. Catharines Wharf for vessels up to 107 m in overall length.

(b) Turing Basin No. 2—Between Lock 7 and Guard Gate for vessels up to 180 m in overall length.

* * * * *

(d) Turning Basin No. 4—North of Lock No. 8 for vessels up to 170 m in overall length.

(e) For vessels up to 80 m in overall length.:

* * * * *

10. Section 401.51 is revised to read as follows:

§ 401.51 Signalling approach to a bridge.

(a) Unless a vessel's approach has been recognized by a flashing signal, the master shall signal the vessel's presence to the bridgemaster by VHF radio when it comes abreast of any of the bridge whistle signs.

(b) The signs referred to in paragraph (a) of this section shall be placed at distances varying between 670 m and 1,500 m upstream and downstream from movable bridges at sites other than lock sites.

11. In § 401.74, paragraph (a) is revised to read as follows:

§ 401.74 Transit declaration.

(a) A Seaway Transit Declaration Form (Cargo and Passenger), which may be obtained from the Saint Lawrence Seaway Development Corporation, P.O. Box 520, Massena, New York 13662, or the St. Lawrence Seaway Authority, 202 Pitt Street, Cornwall, Ontario K6J 3P7, shall be forwarded to the Corporation or the Authority by the representative of a vessel, other than a pleasure craft of not more than 317.5 tonnes, within fourteen days after the vessel first enters the Seaway on any upbound or downbound voyage.

* * * * *

12. In § 401.80, paragraph (a) is revised to read as follows:

§ 401.80 Reporting dangerous cargo.

(a) The master of any explosive vessel or hazardous cargo vessel shall report to a Seaway station, as set out in Schedule III, the nature, quantity, and IMCO classification of the dangerous cargo and where it is stowed on the vessel.

* * * * *

13. Section 401.82 is revised to read as follows:

§ 401.82 Reporting mast height.

A vessel, any part of which extends more than 33.5 m above water level, shall not transit any part of the Seaway until precise information concerning the height of the vessel has been furnished to the nearest Seaway station.

14. In § 401.97, paragraphs (b)(2) and (e)(1) are revised to read as follows:

§ 401.97 Closing procedures.

* * * * *

(b) * * *

(2) It reports at the applicable calling in point referred to in paragraph (c) of this section within a period of 96 hours after the clearance date in that navigation season, it furnishes the applicable operational surcharge established by agreement between the United States and Canada, known as the *St. Lawrence Seaway Tariff of Tolls*, and the transit is authorized by the Corporation and the Authority.

* * * * *

(e) * * *

(1) At the time of such entry or departure, report to the nearest Seaway station the furthermost destination of the vessel's voyage and any intermediate destinations within that section; and

* * * * *

(68 Stat. 93–96, 33 U.S.C. 981–990, as amended and Sections 4, 5, 6, 7, 8, 12 and 13 of SEC. 2 of Pub. L. 95–474, 92 Stat. 1471)

Issued at Washington, D.C. on February 22, 1983.

Saint Lawrence Seaway Development Corporation.

D. W. Oberlin,

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 433

Medicaid Program; Medicaid Management Information Systems; Conditions of Approval and Reapproval and Procedures for Reduction of Federal Financial Participation

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposal adds to regulations new conditions and procedures for initial approval and for reapproval of Medicaid Management Information Systems (MMIS) to update

the regulations to reflect additional requirements added by section 901 of the Mental Health Systems Act of 1980 (Pub. L. 96–398). The proposal specifies procedures for reducing the level of Federal financial participation in a State's administrative expenditures when a State fails to meet the conditions for initial operation, initial approval or reapproval of an MMIS.

It also proposes procedures with respect to waivers of the conditions of approval and reapproval and to appeals of adverse decisions. These provisions are intended to improve States' MMIS, and to ensure efficient system operations, and to detect cases of fraud, waste, and abuse effectively.

DATES: To assure consideration, comments should be mailed by May 2, 1983.

ADDRESS: Address comments in writing to: Health Care Financing Administration, Department of Health and Human Services, Attention: BPO–11–P, P.O. Box 17073, Baltimore, Md. 21235.

If you prefer, you may deliver your comments to room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue, Washington, D.C. or to Room 132, East High Rise, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to BPO–11–P.

Comments will be available for public inspection as they are received, beginning approximately three weeks after publication, in Room 309–G of the Department's office at 200 Independence Avenue, SW., Washington, D.C. 20201 on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202–245–7890).

FOR FURTHER INFORMATION CONTACT:

Charles R. Booth, Initial Approvals and System Requirements (301) 594–5415, or

Newton Dikoff, Reapprovals and Performance Standards (301) 594–8190.

SUPPLEMENTARY INFORMATION:

I. Background

A. Medicaid Management Information Systems

A Medicaid Management Information System (MMIS) is a mechanized system of claims processing and information retrieval used in State Medicaid programs under title XIX of the Social Security Act (the Act). The system is used to process Medicaid claims and to retrieve and produce utilization data and management information about recipients and services. Under section 1903(a)(3)(A) of the Act and regulations at 42 CFR 433.112, Federal financial participation (FFP) is available at a rate of 90 percent in State expenditures for design, development, installation or improvement of the systems. (As with all Medicaid FFP rates, the rates presented in this preamble and in the regulations are subject to any adjustment that occurs under sections 1903 (s) and (t) of the Act.) Similarly, under section 1903(a)(3)(B) of the Act and 42 CFR 433.113, FFP is available at 75 percent for operation of an approved MMIS. These rates are higher than the normal matching rate of 50 percent under section 1903(a)(7) of the Act for general administrative operations of the State agency.

Over the past few years, it has become evident that these systems have the potential for saving millions of Medicaid dollars through improved program management and the detection of fraud, waste and abuse. However, the optimal potential can be realized only if the systems are fully operational and updated from time to time to meet program needs. (Future updates that are being considered include uniform billing, uniform diagnostic and procedure coding, and modified Medicaid quality control programs for claims processing. These updates are subject to required public notice and comment.) Thus, in order to assure the maximum savings that efficient computerized administrative systems can offer, Congress enacted legislation to promote their efficient use.

B. Title IX of the Mental Health Systems Act of 1980

Title IX of Pub. L. 96–398, the Mental Health Systems Act of 1980, added a new paragraph (r) to section 1903 of the Social Security Act (42 U.S.C. 1396b(r)). That legislation requires each State with a Medicaid program, with certain exceptions, to have an approved operating MMIS before established deadlines and, if the State fails to do so, prescribes FFP reductions by increments in the funding available under section 1903(a) (2) and (7) of the Act. (Those sections provide 75 percent FFP for compensation and training of skilled medical professional and support staff, and 50 percent FFP for general administrative expenditures.) The legislation also imposes new conditions for approval and reapproval of systems and prescribes FFP reductions by increments for failure to meet the conditions. However, the law requires HCFA to waive the FFP reductions and modify deadlines if it determines that a State has good cause for being unable to comply or the State cannot comply due to circumstances beyond its control. We are required to report to Congress all waivers of FFP reductions, the bases for the determinations, and modifications of deadlines.

Because the basic requirements of section 1903(r) of the Act were sufficiently complete and clear to take effect without regulations, we have already put into effect the portions of that section for which we had to act by specific dates. We notified the States of the statutory requirements well before the deadlines. Part of the proposed regulations supplement the existing MMIS regulations and reflect these statutory changes.

However, other issues arising from section 1903(r) have not been resolved by the terms of the statute. (For example, the statute does not specify the mechanisms by which a State may challenge adverse determinations under section 1903(r).) These regulations propose procedures that will resolve these ambiguities. In the interim, we have acted in accordance with the proposed procedures pending publication of a final rule.

C. Evaluating Performance

HCFA's approach in evaluating performance for both initial approval and yearly reapproval is based on a two-step process. First, an MMIS must meet specific system requirements that govern its structure and composition. The structure and composition have been designed to further program objectives. For example, the claims processing subsystem must have the ability to identify third party liability and assure that Medicaid is the payor of last resort.

The second step involves applying performance standards to both system operating procedures and the information that the system produces, to determine whether the system is performing in an acceptable manner. Performance standards establish levels of achievement in terms of accuracy, timeliness, and cost.

Although system requirements are currently the same for both initial approval and yearly reapproval, the present performance standards differ.

D. Yearly Performance Reviews

The basic purpose of the reviews for MMIS is to improve the effectiveness and efficiency of the Medicaid program on both an individual State basis and nationwide.

Approved systems must meet performance standards, current system requirements and other conditions of reapproval, or be subject to FFP reductions.

In accordance with section 1903(r)(6)(C) of the Act, however, we did not reduce FFP for States that failed to meet the reapproval conditions before the yearly review we conducted in fiscal year 1982 (from October 1, 1981 through September 30, 1982). We conducted a "dry run" review of most of the approved MMIS during fiscal year 1981, to see if they met the conditions of reapproval. The "dry run" enabled us to develop a systems performance data base, and to assist the States in developing and improving their systems, as the law requires. (We reviewed them against the then proposed conditions of reapproval in order to give States an informational advance evaluation of their performance, before we conducted a review in fiscal year 1982 that resulted in FFP reductions in six States.) We used the data base from the dry run to refine our review methodology and established empirically-based numerical scores for acceptable performance.

The initial "dry run" review gave the States a "no risk" opportunity through September 30, 1981 to determine if their systems met the conditions of reapproval and to correct detected weaknesses in their MMIS operations. Beginning with fiscal year 1982, we started conducting reviews during each Federal fiscal year that could result, at the end of that year, in determinations to reduce FFP for the following year.

Current system requirements and performance standards for MMIS yearly reapproval have been published in Part 11 of the State Medicaid Manual (SMM). (Before October 1982, the performance standards had not been included in Part 11.) We had previously furnished the States with the seven standards, 15 elements, and 54 factors that we used for the MMIS yearly reapproval reviews for FY 82.

E. Publication of Conditions of Approval and Reapproval

We published a notice with comment period on the performance standards for reapproval (with all the standards and elements, and several illustrative factors) on June 30, 1981, in the **Federal Register** (46 FR 33653) as part of the implementation plan for reviewing previously approved State systems. The performance standards for reapproval have been added as Chapter 4 to Part 11 of the State Medicaid Manual (the successor to Part 7 of the Medical Assistance Manual). Part 11 of the SMM now contains both the performance standards (including their factors and elements) for reapproval and system requirements for initial approval and reapproval. Any changes made in these standards and requirements or any additional standards or requirements will appear in Part 11 of the SMM.

Although we do not anticipate that the performance standards will change frequently, the elements, factors, and related aspects of the conditions for reapproval may be modified from time to time to reflect new information and the results of experience. Moreover, when necessary we plan to add new system requirements or other conditions appropriate for the proper and efficient operation of an MMIS. We intend to solicit public comment on future proposed substantive changes to be made in Part 11 of the SMM by publishing notices in the **Federal Register**. However, due to the technical nature of the MMIS performance standards and requirements, and our belief that MMIS is of interest only to a very limited audience, we would not publish in the **Federal Register** the text of the proposed changes or the changes which are finally adopted. We would summarize the changes to be made in the **Federal Register** notice, and make the text available to the States and to any other interested parties who request it. HCFA's response to any comments received would be the subject of a subsequent **Federal Register** notice that would also announce any modifications in the changes originally proposed to be made in Part 11 of the SMM. Of course, the text of the changes would be made available to the public.

As part of the process for development of the performance standards for reapproval to be used during fiscal year 1984, and in view of the recent publication of the performance standards in Part 11, we are at this time requesting comments on all of Part 11, which now contains all the conditions for initial approval and annual reapproval of MMIS. States have already been provided with copies of Part 11. Other interested individuals may obtain a copy of Part 11 of the SMM by telephoning the Inquiries Staff of the Bureau of Program Operations at (301) 594–8715. Individuals with questions concerning reapproval procedures or performance standards should call Newton Dikoff (301) 594–8190. For questions concerning procedures for initial approval or system requirements call Charles R. Booth (301) 594–5415. Comments should be submitted by the deadline for submitting comments on this notice of proposed rulemaking and to the same address, as stated above.

II. Major Provisions of the Regulations

The provisions of the proposed regulations would update the regulations to reflect the additional requirements of section 1903(r) of the Act and would amend 42 CFR Part 433, Subpart C, Mechanized Claims Processing and Information Retrieval Systems. The references in this preamble to specific sections are to those in the proposed rule, which makes some numbering and other technical changes in the current rules.

A. Initial Operation

As required by section 1903(r)(1) of the Act, these regulations would require a State (unless a waiver is obtained) to have in operation an MMIS system that the State detailed in an advance planning document (APD) that was approved by the Secretary. Section 1903(r)(1) of the Act requires the system to have been in operation by the earlier of: (1) September 30, 1982; or (2) the last day of the sixth month following the date specified for operation of the system in the State's most recently approved APD submitted before October 7, 1980 (the date of enactment of Pub. L. 96–398). This means that a State that submitted an APD after October 7, 1980, had to have its system operating by September 30, 1982. If the State submitted an APD before October 7, 1980 that was approved by the Secretary and that contained an operating date before March 1, 1982, the system must have been operating by the last day of the sixth month following the specified operating date. These deadlines were delayed only if the Secretary determined that the State was unable to comply for good cause or for circumstances beyond its control (see sections II–M and II–N below).

When system operation begins, the State receives 50 percent FFP in its expenditures for system operation until the system is approved. The FFP in State expenditures for system operation increases to 75 percent, effective with the first day of the calendar quarter after the system was determined to be operating satisfactorily. This 75 percent rate may be given retroactive effect if we determine the system to have been operational for an entire calendar quarter before the quarter in which the system received its initial approval.

If a system had not been in operation by the specified deadline, HCFA would have reduced the rate of FFP in both State expenditures for skilled medical personnel and staff (section 1903(a)(2)) and general administrative expenses (section 1903(a)(7)) by 5 percentage points for every two-quarter period of non-operation beyond the deadline described above. (The rate of FFP under section 1903(a) (2) and (7) would not have been reduced more than 25 percentage points for each type of FFP.)

However, of the seven States that do not now have operating systems, requirements for four States were waived under section 1903(r)(7), and another State has requested a waiver under that section. Section 1903(r)(7) provides waivers for operating an MMIS in certain States with small populations. Also, HCFA has granted two States six-month waivers of the FFP reductions for good cause under section 1903(r)(8).

B. Initial Approval of an Operating System

As required by section 1903(r)(2) of the Act, these regulations would require that a State have an operating system initially approved by HCFA by the last day of the fourth quarter that begins after the date on which HCFA establishes that the system became operational.

Section 1903(r)(3) (A) of the Act provides retroactive funding (at the 75 percent rate under section 1903(a)(3)) for operation of an approved system from the first quarter beginning after the system became operational. If a system were operating but not approved by the specified deadline, HCFA would reduce FFP in State expenditures under section 1903(a) (2) and (7) by 5 percentage points each for every two-quarter period for which the system is operating but not approved beyond that deadline. Again, the rate of FFP may not be reduced more than 25 percentage points for each type of FFP.

If the State were subjected to a reduction of FFP under section 1903(a) (2) and (7) of the Act because it did not meet the deadline for initial approval by HCFA, section 1903(r)(3)(B) requires that the State be subjected to reductions in the retroactive FFP otherwise available for operating an approved system under section 1903(a)(3)(B). That section also requires that funding must be reduced by five percentage points for every two-quarter period beyond the deadline for initial approval. Funding of the system for the quarters following the quarter in which the system is initially approved will be at the 75 percent rate specified in section 1903(a)(3) of the Act (and is not subject to reduction under section 1903(r)(3)(B) of the Act).

In order to minimize the accumulation of the FFP reductions that could occur if there is a delay in the approval process, we would continue the current practice under which a State contacts HCFA when its system has been in operation between three and six months and requests initial approval of the system. At that time, we would review and evaluate State-furnished information developed by the system and schedule an on-site visit.

We have found that we need at least six months of claims processing data to evaluate the system performance properly. We believe this amount of data is necessary to validate statistically provider and patient profiles that provide specific information on use of covered types of services and to evaluate the overall performance of the system. Because States frequently begin processing claims three months before the system becomes fully operational, six months of claims processing data generally is available three months after a system becomes operational.

When States that are now without an operating system or that wish to replace a currently approved system submit their request for approval, they should submit their request with the supporting documentation within three months after the system begins operating to allow us the needed time to complete our evaluation within the first year of system operation.

If a State were unable to submit the data necessary for initial approval by the end of three months after the system becomes operational, the State could possibly be entitled to a waiver of reduction of FFP under section 1903(r)(B)(A). We recommend that, where appropriate, we be notified at this point of the State's possible entitlement to a waiver, rather than after the year ends, to avoid a needless disruption in the level of FFP available to the State. Procedures for waiving FFP reductions are explained in paragraphs II–M and II–N of this document.

All State systems that were approved by HCFA as operational before October 8, 1980, are deemed to be initially approved, unless the approved system is no longer in operation. If a system discontinues operation, and the State does not replace the system with another approved system or does not intend to renew operations of the system, FFP paid under section 1903(a) (2) and (7) would be reduced as required under section 1903(r)(2)(C) unless the State is entitled to a waiver. A waiver of the requirement for an approved operating system is available only to States that meet the criteria in paragraph II–L of this document.

C. Appeals of Initial Operations and Approval Decisions

An agency may appeal reductions in FFP resulting from the denial of an initial approval and reductions in FFP for expenses of the system for initial operations under the procedures of the Departmental Grant Appeals Board contained in 45 CFR Part 16 (governing reconsiderations of disallowances of claims for FFP under section 1903 of the Act).

D. Replacement Systems

We can foresee that a State may want to discontinue operating an approved system in order to replace it with a more efficient one or for other appropriate reasons. Under the proposed regulations, replacement systems would have to be approved by HCFA in accordance with the initial approval conditions. HCFA would require that the State file an APO that contains: (1) The date the new system will become operational; and (2) a plan that assures an orderly transition from the system being replaced.

FFP would be available at 90 percent in expenditures for the design, development and installation of the replacement system if the State owns the software. (Software includes computer programs, procedures, and associated documentation that is part of the MMIS.) FFP for automated equipment (hardware) and services are governed by Departmental regulations beginning at 45 CFR 95.601. While the replacement system is being prepared to become operational, we would continue to fund, at 75 percent, the already approved operating system. When a replacement system becomes operational, FFP would be available at 50 percent of expenditures for operation of the replacement system until we approve it. At that time, increased FFP would be available at 75 percent retroactively to the date HCFA determines the replacement system met all conditions for initial approval. However, although a State may be operating both systems for a limited period of time, FFP would be available at 75 percent for only one system at any time. (FFP would be available at 50 percent for the other operating system.)

E. Replacement of System Operators

A State may replace the operator of an approved MMIS at any time. (Either a State organization or an outside contractor may be responsible for operating an MMIS.) FFP continues to be available at 75 percent for an approved operating system regardless of who operates it. Although we require the State to notify us before a change of operators, there are no additional HCFA requirements. The following Departmental requirements apply also: 45 CFR Part 74, Administration of Grants, and 45 CFR Part 95, which prescribes the conditions under which the Department will provide FFP for the costs of automated data processing.

F. New Conditions of Approval and Reapproval.

In order to receive 75 percent FFP for operation of an MMIS, States must meet, in addition to current requirements of 42 CFR 433.113 (which would be redesignated as § 433.116), the following requirements added by section 1903(r) of the Act for approval and for reapproval, which would be added to the regulations by these proposed regulations. For initial approval, the statute specifies the following:

1. The system must be capable of developing provider, physician, and patient profiles that are sufficient to provide specific information as to the use of covered types of services and items, including prescribed drugs.

A similar condition is currently contained in 42 CFR 433.113(g), although that section does not use the same wording as the statute. The regulations address themselves only to "provider and patient profiles," rather than "provider, physician, and patient profiles." However, because a physician is a provider as defined by the Medicaid program, the effect of the proposed regulations is the same as that of the statute. Also, the current section requires the profiles for "program management and utilization review purposes." Again, we believe the current language of the regulations encompasses the statutory purpose as providing "specific information as to the use of covered types of services and items, including prescribed drugs." Accordingly, we are not proposing to modify the existing language in regulations.

2. The State must provide that information on probable fraud or abuse obtained from, or developed by, the system, is made available to the State's Medicaid fraud control unit (if any) certified under section 1903(q) of the Act.

This condition is already a State plan requirement in other Medicaid regulations (42 CFR 455.21, "Cooperation with State Medicaid fraud control units"). We propose, however, to add it as a new paragraph (h) both to the initial approval conditions for MMIS contained in redesignated 42 CFR 433.116 and to the reapproval conditions for MMIS contained in a new 42 CFR 443.119, with the appropriate cross-reference.

3. The system must meet all performance standards and other conditions for initial approval that HCFA develops and about which it notifies the States.

Except as explained above, there would be no changes in the existing conditions in the regulations for initial approval specified in redesignated 42 CFR 433.116 (c) through (g) and Part 11 of the SMM.

For reapproval, States would be required to meet the first two requirements above, and, also, performance standards and other conditions for reapproval that HCFA is required to develop under section 1903(r)(6) (B) to (F) of the Act. These would include the system requirements in Part 11 of the SMM. The initial list of performance standards that must be met for reapproval was issued earlier to all the States and published in the **Federal Register** on June 30, 1981 (46 FR 33653). It was also published in the SMM. For purposes of clarity, we propose to have separate regulations specifying conditions for initial approval and conditions for reapproval. Current regulations do not clearly distinguish between them.

Also, HCFA is considering revising the claims processing quality control (MQC) program in the future. Our proposal would add a claims processing quality control component as an additional condition for MMIS approval and annual reapproval. The claims processing quality control component would measure whether the State paid only those claims: (1) That are for covered services, (2) that are for recipients who are on the eligibility roles, (3) that are for eligible providers, (4) that are not duplicate claims, and (5) that are within the appropriate fee schedule.

Separate Medicaid quality control claims processing requirements would then be eliminated for States with MMIS since the substance of the claims processing quality control program would be incorporated into the MMIS conditions and performance review.

This component's specific requirements would vary depending on the most recent quality indicators of State claims processing operations. States with documented poor performance would be required to use the Medicaid quality control claims processing review program (generally referred to as MQC II) that nine States are currently using on a demonstration basis.

We would authorize MMIS States with documented superior claims processing operations to submit alternative claims processing review programs, which they may use if they receive our approval based upon the program's effectiveness, efficiency, and economy.

We would also require non-MMIS States with documented superior claims processing operations to use MQC II, and allow a 60 percent reduction in sample size.

If adopted, we plan to use this claims processing quality control component as part of the initial approval and reapproval process starting in fiscal year 1984. The claims processing requirements that HCFA will propose should reduce the sampling requirements and overall burden to States by 50 percent. However, the full effect of this burden reduction will apply only to States that are fully successful in maintaining low error rates for claims processing programs.

Before adopting this component as an additional MMIS requirement, we would follow the notice and comment procedure outlined in section I–E of this notice. As is true for other MMIS activities, only systems-related functions would be funded at more than 50 percent FFP. We are encouraging States to put into place the claims processing quality control component in fiscal year 1983, using the MQC II system or an alternative system if the State qualifies for that option.

After analysis and consideration of the public comments on the claims processing quality control proposal and the MMIS changes proposed in this document, we plan to publish final requirements. At that time, if practical, we would combine in a single **Federal Register** document all claims processing quality control requirements with the final rule that involves conditions of MMIS approval and reapproval and procedures for reduction of FFP.

G. Reapproval: Basis for and Amount of Reduction.

Section 1903(r)(4)(B) of theAct requires us to reduce FFP to no more than 70 percent, but not less than 50 percent, for an MMIS that fails to meet the conditions of reapproval. We may not reduce FFP by more than 10 percent points in any four-quarter period. That is, a State whose system fails to meet the conditions of reapproval three years in a row and that is subject to the maximum potential reduction each year would receive 65 percent FFP the first year, 55 percent FFP the second year, and 50 percent the third year. In such a case, only 50 percent FFP would be available to the State until it meets the conditions of reapproval in a subsequent yearly review period.

Under the proposed regulations, we would reduce FFP by increments from 75 percent to 50 percent of State expenditures, in accordance with the statutory provisions, if successive yearly reviews of a State's MMIS operations show that the system no longer meets

the requirements for reapproval specified in new 42 CFR 433.119 (performance standards, system requirements, and other conditions of reapproval).

If the State system were to fail to meet requirements in place during the evaluation period, the State would be subject to a reduction in FFP. To avoid a further reduction in FFP because of the requirements, the State would be required to demonstrate that the system met the requirements during the next annual review, when the system would be examined to see if the requirements were met.

H. Reapproval: Notice of Results of Review.

During each yearly review, we evaluate performance for each State's MMIS over a period of at least six months. We are continuing to provide technical assistance, as in the past, to enable States to correct system deficiencies. As early as possible in the first quarter after the end of the fiscal year under review, we notify each State whether its system has met the conditions of reapproval. If the system failed to meet these conditions, the notice would include—

1. A statement that the State's FFP for systems operation will be reduced, and the percentage to which it is reduced, for the four quarters immediately following the quarter in which the notice is issued;
2. The findings of fact on which we made our determination; and
3. A statement that State claims in excess of the reduced FFP rate will be disallowed and that any such disallowance will be appealable to the Grant Appeals Board.

I. Reapproval: Timing, Duration and Restoration of the FFP Reduction.

By law (section 1903(r)(4)(B) of the Act), the first review that could result in a reduction of FFP to a State could not begin before Federal fiscal year 1982 (October 1, 1981 to September 30, 1982). Under the regulations, review periods would continue to coincide with Federal fiscal years and any reduction of FFP would begin in the January following the end of the fiscal year.

States with systems approved before October 1, 1981, received 75 percent FFP for MMIS operation for the four quarters of fiscal year 1982 in addition to the following quarter in which we issued our annual review determinations. No decision to reduce FFP under the reapproval provisions of section 1903(r) of the Act was made before the fifth quarter and any reduction became effective after that quarter. States with systems initially approved on or after October 1, 1981 also received at least five quarters of 75 percent FFP. For example, if a system was initially approved in June 1982, retroactive to January 1, 1982, there was no review of the system (for purposes of determining FFP reductions) during the remainder of that fiscal year. FFP at 75 percent for MMIS operation would be effective for the three quarters (January-September) of that year, the following full fiscal year, and at least the first subsequent quarter of the next fiscal year.

HCFA interprets section 1903(r) of the Act to establish the mechanism under which States that have had their MMIS disapproved will have their FFP reduced for at least four quarters after the quarter in which the disapproval is made and up to the first quarter beginning after the system is reapproved. Section 1903(r)(4)(A) of the Act requires us to review at least once each fiscal year; we are making a review determination only once each fiscal year. We will continue to conduct the required regular yearly reviews in all States to determine whether systems receiving reduced funding subsequently meet the conditions of reapproval, and whether systems receiving full funding continue to meet those conditions.

As we make regular review determinations once each fiscal year, we would not resume full FFP for a system receiving reduced funding until we complete the next regular yearly review that results in a favorable determination. Yearly review determinations actually take effect after the end of the fiscal year (i.e., we would resume 75 percent FFP for MMIS operation, or reduce it if applicable, effective the following January).

Under the proposed regulation, a State that receives reduced FFP because of deficiencies found during the review process could receive the withheld amount retroactively, if the next yearly review determination shows that the system then meets all conditions of reapproval. The restoring of withheld FFP would also be subject to HCFA's judgment that return of the funds would improve the effective administration of the State's plan. This provision for retroactive adjustment is intended as an incentive for States to correct the system deficiencies as soon as possible.

Under section 1903(r)(4)(C) of the Act and these regulations, HCFA could restore FFP retroactively for as many as four quarters that immediately precede the quarter in which the State's system is reapproved. However, we are not required to restore funds for any quarter.

Because section 1903(r)(4)(C) of the Act precludes restoration of the withheld FFP for more than these four quarters, the withheld FFP would be lost permanently for the year in question if the subsequent yearly review showed the system still failing to meet any condition of reapproval.

HCFA's decisions to restore FFP, and the number of quarters of the restoration are discretionary and, therefore, not subject to appeal to the Grant Appeals Board. In making these decisions, we would consider any relevant information, such as the amount of improvement shown as a result of the latest yearly review.

During the period in which a State receives FFP for MMIS operation at a reduced rate, claims by the State for FFP at any higher level for MMIS would be disallowed; i.e., the State would not be eligible to receive 75 percent FFP for MMIS funding.

J. Reconsideration by the Departmental Grant Appeals Board.

States have the opportunity to request a reconsideration from the Board of the disallowance of claims for FFP. Where FFP for MMIS expenditures is reduced or the section 1903(a) (2) and (7) FFP is reduced because of the State's failure to meet the requirements of section 1903(r) of the Act, the State could request Grant Appeals Board review of the resulting disallowance by filing a written request with the Board. This request should be filed with a copy of the disallowance letter, within 30 days from the date of that letter. By requesting a reconsideration of the disallowance, the State could challenge the basis of the decision to reduce FFP. However, under this process, the State would not be able to make this challenge until after the end of the first quarter in which FFP is reduced.

The Board would be able to verify the accuracy of the computation of the amount of FFP that has been disallowed from a State's claim.

However, the Board would not review the specific percentage used in reducing the State's FFP because of failure to meet MMIS conditions of reapproval except to determine whether the percentage reduction is outside the range of discretion provided to HCFA under the statute (section 1903(r)(4)(B) of the Act).

As stated earlier, HCFA's decision whether to restore FFP, and the number of quarters' restoration of FFP, would not be subject to appeal before the Board.

If the reduction of FFP goes into effect, the reduction continues pending a Board review of the disapproval of the State's MMIS. If the Board subsequently

reverses the disallowance, the case would be remanded to HCFA to restore withheld FFP retroactively.

K. Notification to States of Changes in Conditions of Approval and Reapproval.

Currently, changes in conditions of approval may be announced only once a year. We publish a notice in the **Federal Register** describing the proposed revision, and respond in the **Federal Register** to comments on revisions making substantive changes. We propose to continue to follow this procedure. Systems requirements used for reapproval would be published in the **Federal Register** in the same manner.

Also, we propose to publish changes in performance standards and other conditions for reapproval in the SMM after first publishing a notice in the **Federal Register** advising the public of the changes and inviting comment, and after responding to the comments received, if any, in a subsequent **Federal Register** notice. Under section 1903(r) of the Act, we are required to inform the States of conditions of reapproval at least three months before the beginning of the review period in which the procedures, standards and other conditions will be used. Although we might publish changes in performance standards several times during the year, they would not be effective until the next fiscal year's review and then only if they are published at least three months before the fiscal year begins.

L. Waiver of Conditions for Initial Operation and Approval

HCFA will continue to waive the requirements for initial approval and for operating an MMIS for States with small populations if a State has demonstrated to HCFA's satisfaction that an MMIS would not significantly improve the efficiency of the administration of the State plan. Under section 1903(r)(7) of the Act, only a State that had fewer than one million residents in 1976 (as reported by the Bureau of Census), and total Medicaid expenditures (including FFP) of less than $100 million in fiscal year 1976 (as reported by the State for the period of October 1, 1975 through September 30, 1976) is entitled to receive this waiver.

To obtain the waiver, a State must submit the applicable information stated in the immediately preceding paragraph.

If HCFA determines, after granting a waiver of MMIS requirements, that an MMIS would significantly improve the administration of a State Medicaid program, the law requires HCFA to withdraw the waiver and prepare a timetable for State compliance. This timetable must be comparable with the time period allowed under the statute for initial approval of other operating systems, which is two years. During this period, a State must submit an APD, which will specify the proposed operating date of the system. The requirements for approval of an operating system will apply to a system required by HCFA after a waiver is withdrawn.

Section 1903(r)(7)(A)(ii) also directs the Secretary to waive these requirements for the Commonwealths, territories, and possessions of the United States under the same conditions as described above for States with small populations. Additionally, section 1108(c) of the Act limits the total amount of FFP that is available to Guam, Puerto Rico, the Virgin Islands and the Northern Mariana Islands to fixed amounts. (There is no ceiling on the availability of FFP in the States). Historically, these territories have received the entire fixed amount each year. Because additional FFP is not available for developing or operating an approved system, as it is for States, we believe that to require these jurisdictions to comply with the proposed MMIS regulations would not significantly improve the efficiency of the administration of their Medicaid programs. We reach this conclusion since, under these circumstances, any MMIS expenditures in these jurisdictions would invariably result in a diminution of Federal funds available for providing services and administering other aspects of their Medicaid programs. Therefore, without necessity for a further showing, we granted waivers of MMIS requirements to Guam, Puerto Rico, the Virgin Islands, and the Northern Mariana Islands.

M. Waiver of Reductions for Good Cause

Under these regulations, HCFA would waive the FFP reductions if we determine that a State is unable to comply with a requirement of these regulations for good cause. Under the law, no waiver of an FFP reduction for good cause can exceed two quarters.

N. Waiver of Reductions Due to Circumstances Beyond the Control of the State

HCFA would waive the FFP reductions for a period during which a State is unable to comply due to circumstances beyond its control. This situation would exist when a State or the contractor responsible for the MMIS is without fault in being unable to comply; e.g., a natural disaster occurred or a delay was caused by HCFA. We would also defer all remaining deadlines for the initial approval process for the same length of time.

III. Regulatory Impact Analyses

Executive Order 12291

The Secretary has determined, in accordance with Executive Order 12291, that this rule does not constitute a major rule because it will not have an annual impact on the economy of $100 million or more, result in a major increase in costs or prices for consumers, any industries, any governmental agencies or any geographic regions, or otherwise meet the thresholds of the Executive Order.

These proposed regulations would not result in any significant economic impact. The regulations implement statutory provisions, and we estimate that the annual impact of the statutory provisions will be no more than $25 million. We do not expect the statutory requirements for initial approval to result in any additional expenditures because 42 States and the District of Columbia already operate approved systems; two States have approved APDs and are currently installing their systems; four States with Medicaid programs have received waivers from compliance with the MMIS requirements; and the waiver of one State is pending. Territories are not subject to the MMIS requirements. Also, neither the statutory provisions nor these proposed regulations would have an impact on the cost of replacement systems.

However, if all currently approved MMIS systems were found deficient during the next yearly review, the maximum payment reduction to States could amount to $25 million.

Regulatory Flexibility Act

The Secretary certifies under 5 U.S.C. 605(b), as enacted by the Regulatory Flexibility Act (Pub. L. 96-354), that these proposed regulations will not have a significant economic impact on a substantial number of small entities. As defined by the Regulatory Flexibility Act, a "small entity" includes the term "small governmental jurisdiction", which means "governments of cities, counties, towns, townships, villages, school districts or special districts, with a population of less than fifty thousand." No State meets this definition, and as these regulations only affect States, a regulatory flexibility analysis is not required.

IV. Response to Comments

Because of the large number of comments we receive, we cannot acknowledge or respond to them

individually. However, in preparing the final rule, we will consider all comments and will respond to them in the preamble to that rule.

V. Reporting Requirements

The system requirements contained in 42 CFR 433.122(b), 433.116, 433.117, and 433.123 of this proposed rule contain information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980, we have submitted a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of these information collection requirements. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Administrator at the address that appears in this preamble, and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building (Room 3208), Washington, D.C. 20503, ATTN: Desk Officer for HHS.

The system requirements were approved on April 4, 1982 by the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507). The OMB approval number is 0938–0247, and the expiration date was December 31, 1982. HCFA has applied for reapproval, and the request is currently pending in OMB.

List of Subjects in 42 CFR Part 433

Administrative practice and procedure, Assignment of rights, Claims, Contracts (agreements), Cost allocation, Federal financial participation, Federal matching provision, Grant-in-aid program—health, Mechanized claims processing and information retrieval systems, Medicaid, State fiscal administration, Third party liability.

PART 433—[AMENDED]

42 CFR Part 433, Subpart C is amended as set forth below:

1. The Table of Contents is revised to read as follows:

Subpart C—Mechanized Claims Processing and Information Retrieval Systems

Sec.
433.110 Basis, purpose, and applicability.
433.111 Definitions.
433.112 FFP for design, development, installation, or improvement of mechanized claims processing and information retrieval systems.
433.113 Reduction of FFP for failure to operate a system and obtain initial approval.
433.114 Procedures for obtaining initial approval; notice of decision.
433.116 FFP for operation of mechanized claims processing and information retrieval systems.
433.117 Initial approval of replacement systems.
433.119 Conditions for yearly reapproval; notice of decision.
433.120 Procedures for reduction of FFP after yearly approval review.
433.121 Reconsideration of the decision to reduce FFP after the yearly review.
433.122 Reapproval of a disapproved system.
433.123 Notification of changes in system requirements, performance standards or other conditions for approval or reapproval.
433.127 Termination of FFP for failure to provide access to claims processing and information retrieval systems.
433.130 Waiver of conditions of initial operation and approval.
433.131 Waiver for noncompliance with conditions of approval and reapproval.

2. Section 433.110 is revised to read as follows:

§ 433.110 Basis, purpose, and applicability.

(a) This subpart implements the following sections of the Act:

(1) Section 1903(a)(3) of the Act, which provides for FFP in State expenditures for the design, development, or installation of mechanized claims processing and information retrieval systems and for the operation of certain systems. Additional HHS regulations and HCFA procedures for implementing these regulations are in 45 CFR Part 74, 45 CFR Part 95, Subpart F, and Part 11, State Medicaid Manual; and

(2) Section 1903(r) of the Act, which—(i) Requires reductions in FFP otherwise due a State under section 1903(a) if a State fails to meet certain deadlines for operating a mechanized claims processing and information retrieval system or if the system fails to meet certain conditions of approval or conditions of reapproval;

(ii) Requires at least an annual Federal performace review of the mechanized claims processing and information retrieval systems; and

(iii) Allows waivers of conditions of approval, conditions of reapproval, and FFP reductions under certain circumstances.

(b) The requirements under section 1903(r) of the Act do not apply to Puerto Rico, Guam, the Virgin Islands and the Northern Mariana Islands.

3. Section 433.111 is amended by reprinting the introductory text of the section for the convenience of the reader and revising the first definition to read as follows:

§ 433.111 Definitions.

For purposes of this section:

"Advance Planning Document (APD)" means a written plan of action to acquire the proposed system. Content requirements for the APD are in 45 CFR Part 95, Subpart F, and in Part 11 of the State Medicaid Manual (SMM).

* * * * *

4. Section 433.112 is amended by changing the words "the Administrator" to "HCFA" wherever they appear, and by revising the introductory text of paragraph (6) and paragraphs (b) (2) and (7) to read as follows:

§ 433.112 FFP for design, development, installation or improvement of mechanized claims processing and information retrieval systems.

* * * * *

(b) HCFA will approve the system if the following conditions are met:

* * * * *

(2) The system meets the system requirements and performance standards for initial approval in Part 11, State Medicaid Manual, as periodically amended.

* * * * *

(7) The costs of the system are determined in accordance with 45 CFR 74.171.

* * * * *

§ 433.116 [Redesignated from § 433.113]

5. Section 433.113 is redesignated as § 433.116.

6. A new § 433.113 is added to read as follows:

§ 433.113 Reduction of FFP for failure to operate a system and obtain initial approval.

(a) Except as waived under §§ 433.130 or 433.131, FFP will be reduced as specified in paragraph (b) of this section unless the Medicaid agency has in continuous operation a mechanized claims processing and information retrieval system that meets the following conditions:

(1) The APD for the system was approved by HCFA;

(2) The system is operational by the earlier of—

(i) September 30, 1982; or

(ii) The last day of the sixth month following the date specified for operation in the State's most recently approved APD that was submitted before October 7, 1980; and

(3) The system is initially approved by the last day of the fourth quarter that begins after the date the system became operational as determined by HCFA.

(b) HCFA wll reduce FFP in expenditures for compensation and training of skilled professional medical personnel and support staff under

section 1903(a)(2) of the Act, and for general administration under section 1903(a)(7) of the Act, by the following increments applied separately to those two categories of expenditures:

(1) Five percentage points for the first two quarters beginning after a deadline in paragraph (a) of this section;

(2) An additional five percentage points during each additional two-quarter period, through the quarter in which the State achieves compliance with the conditions for initial operation or initial approval of an operating system. FFP reductions will not exceed 25 percent for each type of reduction.

(c) HCFA will reduce FFP, otherwise available for operating an approved system under 1903(a)(3)(B), for every two-quarter period beyond the deadline for initial approval. No reduction will be made after the quarter during which the system is initally approved.

§ 433.127 [Redesignated from § 433.114]

7. Section 433.114 is redesignated as § 433.127.

8. A new § 433.114 is added to read as follows:

§ 433.114 Procedures for obtaining initial approval; notice of decision.

(a) To obtain initial approval, the Medicaid agency must inform HCFA in writing that the system meets the conditions specified in § 433.116 (c) through (h).

(b) If HCFA disapproves the system, or determines that the system met requirements for initial approval on a date later than the date required under § 433.113(a)(3), the notice will include—

(1) The findings of fact upon which the determination was made; and

(2) The procedures for appeal of the determination in the context of a reconsideration of the resulting disallowance, to the Departmental Grant Appeals Board.

§ 433.123 [Redesignated from § 433.115]

9. Section 433.115 is redesignated as § 433.123.

10. The redesignated § 433.116 is amended by revising paragraphs (a), (b), (c), and (h) to read as follows:

§ 433.116 FFP for operation of mechanized claims processing and information retrieval systems.

(a) Subject to § 433.113(c), FFP is available at 75 percent of expenditures for operation of a mechanized claims processing and information retrieval system approved by HCFA, from the first day of the calendar quarter after the date the system met the conditions of initial approval, as established by HCFA (including a retroactive adjustment of FFP if necessary to provide the 75 percent rate beginning on the first day of that calendar quarter).

(b) HCFA will approve the system operation if the conditions specified in paragraphs (c) through (h) of this section are met.

(c) The conditions of § 433.112(b) (1) through (4) and (7) through (9), as periodically modified under § 433.112(b)(2), must be met.

* * * * *

(h) If the State has a Medicaid fraud control unit certified under section 1903(q) of the Act and § 455.300 of this chapter, the Medicaid agency must have procedures to assure that information on probable fraud or abuse that is obtained from, or developed by, the system is made available to that unit. (See § 455.21 of this chapter for State plan requirements.)

11. New §§ 433.117, 433.119, 433.120, 433.121 and 433.122 are added to read as follows:

§ 433.117 Initial approval of replacement systems.

(a) A replacement system must meet all conditions of initial approval of a mechanized claims processing and information retrieval system.

(b) The agency must submit an APD that includes—

(1) The date the replacement system will be in operation; and

(2) A plan for orderly transition from the system being replaced to the replacement system.

(c) FFP is available at—

(1) 90 percent in expenditures for design, development, and installation in accordance with the provisions of § 433.112; and

(2) 75 percent in expenditures for operation of an approved replacement system in accordance with the provisions of § 433.116(b) through (h), from the date that the system met the conditions of initial approval, as established by HCFA.

(d) FFP is available at 75 percent in expenditures for the operation of an approved system being replaced until the replacement system is in operation and approved.

§ 433.119 Conditions for yearly reapproval; notice of decision.

(a) HCFA will review yearly each system operation initially approved under § 433.114 and reapprove it for FFP at 75 percent of expenditures if the following conditions are met:

(1) The system meets the conditions of §433.112(b) (1), (3), (4), and (7) through (9).

(2) The system meets the conditions of §433.116 (d) through (h).

(3) The system meets the performance standards for reapproval and the system requirements in Part 11 of the State Medicaid Manual as periodically amended.

(b) HCFA will issue to each Medicaid agency, by the end of the first quarter after the fiscal year of the review, a written notice informing the agency whether its system is reapproved or disapproved. If the system is disapproved, the notice will also include—

(1) HCFA's decision to reduce FFP for system operations, and the percentage to which it is reduced, beginning with the next calendar quarter;

(2) The findings of fact upon which the determination was made; and

(3) A statement that State claims in excess of the reduced FFP rate will be disallowed and that any such disallowance will be appealable to the Grant Appeals Board.

§ 433.120 Procedures for reduction of FFP after yearly reapproval review.

(a) If HCFA determines after the yearly review that the system no longer meets the conditions of reapproval in § 433.119, HCFA will reduce FFP for system operations for at least four quarters. However, no system will be subject to reduction of FFP for at least the first four quarters after the quarter in which the system is initially approved as eligible for 75 percent FFP.

(b) HCFA will reduce FFP in expenditures for system operations from 75 percent to no more than 70 percent and no less than 50 percent; however, HCFA will not reduce FFP by more than 10 percent in any four-quarter period. The percentage to which the FFP is reduced will depend primarily on the following criteria:

(1) The number of conditions judged unsatisfactory;

(2) The extent to which conditions were not met; and

(3) The significance of the unsatisfactory conditions in overall mechainized claims processing and information retrieval system operations.

§ 433.121 Reconsideration of the decision to reduce FFP after the yearly review.

(a) The agency appeal to the Departmental Grant Appeals Board, under 45 CFR Part 16, a disallowance concerning a reduction in FFP claimed for system operation caused by a disapproval of the State's MMIS. If the Board finds such a disallowance to be appropriate, the discretionary determination to reduce FFP by a particular percentage amount (instead of by a lesser percentage) is not subject to

review by the Board unless the percentage reduction exceeds the range authorized by section 1903(r)(4)(B) of the Act.

(b) The decisions concerning whether to restore any FFP retroactively and the actual number of quarters for which FFP will be restored under § 433.122 of this subpart are not subject to administrative appeal to the Grant Appeals Board under 45 CFR part 16.

(c) An agency's request for a reconsideration before the Board under paragraph (a) of this section does not delay implementation of the reduction in FFP. However, any reduction is subject to retroactive adjustment if required by the Board's determination on reconsideration.

§ 433.122 Reapproval of a disapproved system.

When FFP has been reduced under § 433.120(a), and HCFA determines upon subequent yearly review that the system meets all current performance standards, system requirements and other conditions of reapproval, the following provisions apply:

(a) HCFA will resume FFP in expenditures for system operations at the 75 percent level beginning with the quarter following the yearly review determination that the system again meets the conditions of reapproval.

(b) HCFA may retroactively waive a reduction of FFP in expenditures for system operations if HCFA determines that the waiver could improve the administration of the State Medicaid plan. However, HCFA cannot waive this reduction for any quarter before the fourth quarter immediately preceding the quarter in which HCFA issues the determination (as part of the yearly review process) stating that the system is reapproved.

12. The redesignated § 433.123 is revised to read as follows:

§ 433.123 Notification of changes in system requirements, performance standards or other conditions for approval or reapproval.

(a) Whenever HCFA modifies system requirements or other conditions for approval under § 433.112 or § 433.116, or performance standards or other conditions of reapproval under § 433.119, HCFA will—

(1) Publish a notice in the **Federal Register** making available the proposed changes for public comment;

(2) Respond in a subsequent **Federal Register** notice to comments received; and

(3) Issue the new or modified standards or conditions in the State Medicaid Manual.

(b) For changes in system requirements or other conditions for approval, HCFA will allow an appropriate period for Medicaid agencies to meet the requirement determining this period on the basis of the requirement's complexity and other relevant factors.

(c) For performance standards and other conditions for reapproval, HCFA will notify Medicaid agencies at least one calendar quarter before the review period to which the new or modified standards or conditions apply.

13. New §§ 433.130 and 433.131 are added to read as follows:

§ 433.130 Waiver of conditions of initial operation and approval.

(a) HCFA will waive requirements for initial operation and approval of systems under § 433.113 for a State meeting the requirements of paragraph (b) of this section and that had a 1976 population of less than one million and made total Federal and State Medicaid expenditures of less than $100 million in fiscal year 1976. Population figures are those reported by the Bureau of the Census. Expenditures for fiscal year 1976 are those reported by the State for that year.

(b) To be eligible for this waiver, the agency must submit its reasons to HCFA in writing and demonstrate to HCFA's satisfaction that an MMIS will not significantly improve the efficiency of the administration of the State plan.

(c) If HCFA denies the waiver request, the notice of denial will include—

(1) The findings of fact upon which the denial was made; and

(2) The procedures for appeal of the denial.

(d) If HCFA determines, after granting a waiver, that an MMIS would significantly improve the administration of the State Medicaid program, HCFA may withdraw the waiver and require that a State obtain initial approval of an MMIS within two years of the date of waiver withdrawal.

§ 433.131 Waiver for noncompliance with conditions of approval and reapproval.

If a State is unable to comply with the conditions of approval or of reapproval and the noncompliance will cause a percentum reduction in FFP, HCFA will waive the FFP reduction in the following circumstances:

(a) *Good Cause.* If HCFA determines good cause, HCFA will waive the FFP reduction. A waiver for good cause will not extend beyond two consecutive quarters.

(b) *Circumstances beyond the control of a State.* The State must satisfactorily explain the circumstances that are beyond its control. When HCFA grants the waiver, HCFA will also defer all other MMIS deadlines for the same length of time that the waiver applies.

(Sec. 1102 of the Social Security Act; 42 U.S.C. 1302)

BILLING CODE 4120-03-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 2560

Alaska Occupancy and Use; Requirements for Occupancy and Use of a Native Allotment; Withdrawal

AGENCY: Burau of Land Management, Interior.

ACTION: Notice of Withdrawal of Proposed Rulemaking.

SUMMARY: Notice is hereby given of the withdrawal of the proposed rulemaking that would have provided a procedure for carrying out the policy of the Department of the Interior regarding the requirement for 5 years for use and occupancy of a Native allotment under the Alaska Native Allotment Act, as amended, published in the **Federal Register** on August 6, 1980 (45 FR 52303). The Department has determined that the requirements contained in the proposed rulemaking are not needed, but can be carried out through procedures set out in Bureau of Land Management's Manual.

DATE: This withdrawal is effective March 3, 1983.

ADDRESS: Suggestions or inquiries should be sent to: Director (311), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Sue Wolf, (202) 343-6511.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 22

[CC Docket No. 20870; FCC 83-38]

Regulatory Policies and Procedures for the Domestic Public Land Mobile Radio Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Policies and procedures concerning objective need showings for applications requesting an additional one-way frequency for one-way signaling stations are being proposed. The present rules do not provide applicants with sufficient information as to what is required in need showings before applications can be granted. Applicants requesting an additional one-way frequency must show that the existing or projected grade of service is .50 before an additional channel is granted. The proposed standards are concurrently being adopted as an interim rule.

DATES: Comments must be received on or before April 4, 1983 and Replies on or before May 4, 1983.

ADDRESS: Secretary's Office, Rm. 222, FCC, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Carmen A. C. Borkowski, (202) 632-6450.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 22

Communications common carriers, Mobile radio service, Radio common carriers.

Adopted: January 27, 1983.

Released: February 14, 1983.

In the matter of Regulatory Policies and Procedures for the Domestic Public Land Mobile Radio Service; CC Docket No. 20870; Further notice of proposed rulemaking.

1. In this notice we propose to adopt objective need standards for one-way service. We think the public interest will benefit from the adoption of objective need standards for one-way service. In a *Third Report and Order* in this proceeding adopted concurrently with this *Further Notice* we found that objective need standards promote efficient use of a limited spectrum. Our present rules for one-way service do not provide a specific methodology to be followed in demonstrating need for proposed facilities, this has created excessive administrative burdens and delays in authorizing facilities to the public. Accordingly, we are proposing that objective need standards governing one-way applications requesting an additional frequency be adopted.[1] In addition, these objective one-way need standards were adopted concurrently as an interim rule pending the conclusion of this rulemaking proceeding. *See* Rules Section in todays Fed. Reg.[2] The experience we have gained from using objective need standards for two-way service demonstrate to us that one-way standards are also needed. Although one way service is different from two-way service, one-way stations are much more heavily loaded, average air time per transmission is much less and storage techniques are commonly used—in some areas much is the same. Accordingly, the procedures we are proposing for one-way frequencies are substantially the same as the ones we adopted in the *Third Report and Order* for the two-way frequencies, except for the grade of service level, which will be 0.50. Applications for one additional paging channel will be granted, if the application shows that the existing system's present grade of service is 0.50 or greater or that the existing grade of service is 0.40 or greater with a projected grade of service of 0.50 or greater. This rulemaking is largely a formalization and clarification of existing procedures. As in the case of two-way service, we tentatively fined that adoption of objective need standards for one-way service is in the public interest. Applicants will be certain as to what is required to obtain and additional frequency. Objective need standards will promote efficient use of a limited spectrum and permit authorizing facilities to the public in an expeditious and efficient manner. Accordingly, we invite comments on this proposal.

Regulatory Flexibility Act—Initial analysis

2. *Reasons for Action and Objective.* These rules are being proposed in order to give greater clarity to the Commission's processing standards with respect to need showings for an additional one-way frequency in the DPLMRS. The rules will ease regulatory burdens for small entities. The objectives are to streamline, clarify and codify existing regulations and policies and to provide service to the public in the most efficient and expeditious manner possible.

3. *Legal Basis.* The authority for this proposed rulemaking is contained in Sections 4 and 303 of the Communications Act of 1934, as amended.

4. *Small Entities Affected and Potential Impact.* The impact of the proposed rule revisions will be on all DPLMRS applicants and licensees and on members of the public receiving mobile service. Existing and potential applicants for this service range in size from single individuals and small partnerships to large multimillion dollar corporations. The proposed rules will clarify requirements and simplify and reduce the paperwork and administrative procedures for obtaining an additional one-way frequency and serving the public.

5. *Relevant Federal Rules which Overlap, Duplicate or Conflict with this Action.* None

6. *Reporting, Record-Keeping and Compliance Requirements.* This action will reduce the reporting and recordkeeping requirements. This action will reduce the reporting and recordkeeping requirements. Licensees will no longer be required to submit demographic or statistical studies and other methods of evidencing need used in the past. The same level of engineering and other technical skills will be required as is presently necessary to properly submit an application in these radio services.

7. *Alternatives that would lessen impact.* We have considered the alternative of exempting small businesses from the proposed rule. This would not establish an easier standard for receiving an additional channel, therefore, it would not lessen adverse economic impact on these entities. Therefore, we have opted for lessening the regulatory burdens on small entities by clarifying our rules.

8. Interested parties are invited to submit written comments on their views concerning the adoption of objective need standards for an additional one-way frequency to the Federal Communications Commission, Washington, D.C. 20554. Comments should address specifically with supportive data actual channel usage for tone/voice, tone only, tone/optical readout and mixed, or a combination thereof as well as specific recommendations concerning channel loading standards for the previously cited units.[3]

---

[1] In General Docket No. 80-183, First Report and Order, 89 FCC 2d 1337 (1982), we eliminated the requirement of demonstrating public need for the proposed facilities for applications requesting one initial one-way frequency. We also established that initial and additional frequencies would be limited to no more than one at a time.

[2] Applications which fail to demonstrate need in accordance with the interim standards will be returned as unacceptable for filing pursuant to § 22.20 of the Rules.

[3] In this regard comments can rely on business judgment and/or historical experience with supportive data or evidence.

9. Comments should be submitted in accordance with Rule § 1.419, 47 CFR 1.419 Comments should be submitted by April 4, 1983. Reply comments by May 4, 1983. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments, pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231 of the Commission's Rules, 47 CFR 1.1231. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

10. Pending the conclusion of this rulemaking proceeding, we will follow the objective need standards of the interim rule adopted concurrently with this Further Notice.

Federal Communications Commission.

William J. Tricarico,

Secretary.

47 CFR Part 73

[BC Docket No. 82-716; RM-4102; RM-4140]

TV Broadcast Stations in Anchorage and Seward, Alaska; Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule; Extension of reply comment period.

SUMMARY: Action taken herein extends the time for filing reply comments in a proceeding involving the assignment of VHF Television Channel 5 and/or Channel 9 to Anchorage, Alaska, and the substitution of Channel 8 for unused Channel 9 at Seward, Alaska (47 FR 49416). Alaska 13 Corporation requests the additional time to file reply comments.

DATE: Reply comments must be filed on or before February 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau (202) 634-6530.

SUPPLEMENTARY INFORMATION:

In the Matter of an amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations. (Anchorage and Seward, Alaska); BC Docket No. 82-716, RM-4102, RM-4140; Order.

Adopted: January 25, 1983.
Released: February 7, 1983.

1. On October 14, 1982, the Commission adopted a Notice of Proposed Rule Making, 47 FR 49416, published November 1, 1982, in response to petitions filed by the State of Alaska and by Pioneer Broadcasting Company, Inc., proposing two options. The first proposal was to reassign Channel 9 from Seward to Anchorage on a reserved basis, to assign Channel 5 to Anchorage, Alaska, and to substitute Channel 8 for unused Channel 9 at Seward. The second option proposed to reassign Channel 9 from Seward to Anchorage as an unreserved assignment, with a reservation on Channel 5 at Anchorage instead, and to substitute Channel 8 for Channel 9 in Seward. The reply comment deadline is currently January 27, 1983.

2. On January 19, 1983, counsel for Alaska 13 Corporation (licensee of Station KIMO (TV), Anchorage, Alaska) filed a request seeking additional time in which to file reply comments to and including February 7, 1983. Counsel states that according to the comments filed January 11 and 13, 1983, the State of Alaska Division of Telecommunications Systems and Alaska Public Broadcasting Commission have withdrawn from this proceeding. As a result, it is not clear whether Alaska Public Television intends to pursue the allocation of Channel 9 to Anchorage. The requested extension would permit any other party, who wishes to withdraw, additional time to do so thereby saving the Commission and commenting parties from expending resources to address comments from parties no longer interested in the proceeding.

3. We believe that the requested extension of time is justified in order to provide interested parties an opportunity to respond to comments filed in this proceeding. It does not appear that any party involved in this proceeding would be adversely affected by the extension of time..

4. Accordingly, it is ordered, That the date for filing reply comments in BC Docket No. 82-716 is extended to and including February 7, 1983.

5. This action is taken pursuant to authority contained in sections 4(i), 5(d)(1) and 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Federal Register
Vol. 48, No. 43
Thursday, March 3, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Allegheny Front RARE II Further Planning Area Oil-Gas Operations by Non-Federal Owners of Prior Severed Mineral Rights, Allegheny National Forest, Warren County, Pennsylvania; Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare an environmental impact statement to determine possible effects on wilderness and other values of various proposals for oil or gas development by non-Federal owners of mineral rights severed at the time or prior to the acquisition by the Government of the 8,696 acres of National Forest lands comprising the RARE II Allegheny Front Further Planning Area. Approximately 95% of such mineral rights are privately owned.

The current proposal is for 28 new oil-gas wells for immediate development. Companies intend additional developments and production that will include road construction, installation of storage tanks and powerlines and other facilities commonly used for local oil-gas production. The mineral owners claim the legal right to carry out these activities pursuant to the severance documents.

A range of alternatives will be considered. They will include; denying access for mineral operations; acquisition and subordination of the mineral rights; and issuance of permits for the operations. Each alternative must address potential operational impacts for the entire Further Planning Area. However, the final decision of whether or not to recommend the Allegheny Front for wilderness study will either be made legislatively or as a part of the Allegheny National Forest Planning Process, according to Section 6 National Forest Management Act.

Federal, State and local agencies, special interest groups, organizations and individuals will be invited to participate in the scoping process. This process will include:

1. Identification of those issues to be addressed.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a previous environmental review.

The Forest Supervisor will hold a public meeting in his office at the Allegheny National Forest; Warren, PA, April 5, 1983 at 7:00 p.m.

The responsible official is Regional Forester Steve Yurich, USDA-Forest Service, 633 West Wisconsin Avenue, Milwaukee, Wisconsin.

Analysis is expected to take seven months. The draft environmental impact statement should be available in July 1983. The final environmental impact statement is scheduled for completion in November 1983.

Written comments and suggestions concerning the analysis should be sent to John P. Butt, Forest Supervisor, Spiridon Building, Box 847, Warren, Pennsylvania 16365 by April 8, 1983.

Questions about the proposed action and environmental impact should be directed to James Schuler, District Ranger, Sheffield Ranger District, Sheffield, PA 16347 Telephone: (814) 968-3232.

Dated: February 23, 1983.

Larry Hanson,
Deputy Regional Forester.

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

Discussion on Utilization of Discretionary Funds in FY 1983; Meeting

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Notice of ATBCB meeting.

SUMMARY: The Architectural and Transportation Barriers Compliance Board (ATBCB) has scheduled a meeting to be held from 1:00 p.m. to 5:00 p.m., Tuesday, March 8, 1983, to take place in the Main Hall of the Disabled American Veterans (DAV) National Service and Legislative Headquarters, 807 Maine Avenue, SW., Washington, D.C. 20024. Portions of the meeting on ATBCB discretionary funds for FY 1983 will be open only to ATBCB members and Federal agency staff.

Items to be considered are as follows: Discussion on the utilization of ATBCB discretionary funds in FY 1983; courtroom accessibility policy; safe transport of disabled air travelers; status report on ATBCB retreat; resolution regarding the voting accessibility act.

DATE: March 8, 1983—1:00 p.m.—5:00 p.m.

ADDRESS: Main Hall, Disabled American Veterans (DAV) National Service and Legislative Headquarters, 807 Maine Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Larry Allison, Director of Public Information (202) 245-1591 (voice or TDD).

Committee meetings of the ATBCB will be held on Monday, March 7, 1983, and Tuesday morning, March 8, in the Hubert Humphrey Building. Contact Larry Allison, Director of Public Information (202)245-1591 (voice or TDD), for further information.

Wm. Bradford Reynolds,
Chairperson.

CIVIL AERONAUTICS BOARD

[Order 83-2-104; Docket 41302]

Air Canada; Proposed U.S.-Canada "Seat Sale" Fares; Order of Suspension and Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 22nd day of February, 1983.

By tariff revisions filed January 21, 1983, for effectiveness February 25, Air Canada has proposed new low "Seat Sale" fares on all of its North American routes except Canada-Florida. The proposed roundtrip fares would be available for travel through June 20, 1983, and would be priced at $79 for markets up to 500 miles, $119 for 501 to 1,500 miles, $169 for 1,501 to 2,300 miles, and $209 for markets of more than 2,300 miles. The "Seat Sale" would be subject to a 21-day advance-purchase requirement, a first-Sunday/30-day minimum/maximum stay provision, capacity and day-of-travel restrictions, and a 100 percent cancellation penalty.

Despite the relatively short duration and restrictive conditions of the "Seat Sale" fares, we believe that the proposal would offer significant benefits to the traveling public. The Air Canada initiative is particularly encouraging since low-fare options have been fairly limited in U.S.-Canada markets, compared to U.S. domestic routes. The Government of Canada has repeatedly rejected innovative low-fare filings by U.S. carriers in the market, including tariffs which represent *bona fide* competitive responses to Canadian carrier filings. It is this continuing reluctance on the part of the Canadian aviation authorities to permit competitive pricing by U.S. carriers that prompts our present concern with Air Canada's "Seat Sale" fares.

Specifically, since April 1980, Continental Air Lines has repeatedly sought Canadian government approval for tariffs establishing interline fares between Canada and the South Pacific (via Los Angeles) at levels that match the Canada-South Pacific fares Canadian Pacific Air Lines currently offers (via Honolulu). In addition, a number of U.S. carriers have now filed competitive responses to Air Canada's "Seat Sale" fares. Many of these "Seat Sale" filings have apparently now been approved, but the Canadian authorities have repeatedly blocked Continental's efforts to compete with C P Air on the Canada-South Pacific routes. Despite our persistent efforts to resolve the matter by negotiation, Continental's diligent attempts to develop an acceptable fares package, and our ready approval of comparable U.S.-South Pacific tariffs by C P Air, the Canadian authorities continue to deny Continental the right to match C P Air's Canada-South Pacific fares. While we welcome the Canadian government's acceptance of U.S. carriers' "Seat Sale" fares, their continued reluctance to permit the same competitive pricing freedom with respect to Continental's Canada-South Pacific fares makes it imperative that we take action at this point.

Our policy is to allow most new low-fare filings that would encourage greater use of air transportation and offer a wider array of choices for the consumer. Consequently, we would normally conclude that we should not suspend the "Seat Sale" proposal, based on a number of factors: (1) The Air Canada filing would provide significant public benefits, albeit for a short period of time; (2) the Canadian and U.S. traveling public should not be denied the benefits of any low fares by any carrier; and (3) our permissiveness would have the effect of conveying to our Canadian friends an open-minded attitude toward permissive filings by all carriers. We hope that cooperation between our two governments will produce an environment that would provide the public with low fares and permit any carrier on either side to file prices in an open competitive regime without arbitrary government intervention. In the interim, we cannot allow Canadian carriers to dictate fare levels unilaterally, in any major market.

In this case, we believe it is essential for us to take action in order to effectively preserve the public's right to low fares in these markets. The public stands to gain much more over the long run by our firm support of the right of competitive carriers to provide a variety of fare choices which make air travel available to more consumers and expand the total market, than they would be unqualified approval of these temporary Canadian fares.

We have concluded, therefore, that the public interest requires a suspension of Air Canada's proposal.

Accordingly, under the Federal Aviation Act of 1958, as amended, particularly sections 102, 204(a), 403, 801 and 1002(j) thereof,

1. We shall institute an investigation to determine whether the fares and provisions set forth in Appendix A hereof, and rules and regulations or practices affecting such fares and provisions, are or will be discriminatory, unduly preferential, unduly prejudicial or otherwise unlawful, and if we find them to be unlawful, to act appropriately to prevent the use of such fares, provisions or rules, regulations, or practices;

2. Pending hearing and decision by the Board, we suspend the tariff provisions specified in the attached Appendix,[1] and defer their use from February 25, 1983, to and including February 24, 1984, unless otherwise ordered by the Board, and shall permit no changes to be made therein during the period of suspension except by order or special permission of the Board;

3. We shall submit this order to the President [2] and it shall become effective on February 25, 1983.

4. We shall file copies of this order in the aforesaid tariffs and serve them upon Air Canada, American Airlines, Inc., Canadian Pacific Air Lines, Ltd., Continental Air Lines, Inc., Eastern Air Lines, Inc., Frontier Airlines, Inc., Republic Airlines, Inc., United Air Lines, Inc., and Western Airlines, Inc.

We shall publish this order in the **Federal Register.**

By the Civil Aeronautics Board.

Phyllis T. Kaylor, [3]

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 209]

Resolution and Order Approving the Application of the Huntsville-Madison County Airport Authority for a Foreign-Trade Zone in Huntsville, Ala., Within the Huntsville Customs Port of Entry

Proceedings of the Foreign-Trade Zones Board, Washington, D.C.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Huntsville-Madison County Airport Authority, filed with the Foreign-Trade Zones Board (the Board) on July 30, 1982, requesting a grant of authority for establishing, operating, and maintaining a general-purpose foreign-trade zone in Huntsville, within the Huntsville Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended,and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

As the proposal involves open space on which buildings may be constructed by parties other than the grantee, this approval includes authority to the grantee to permit the erection of such buildings, pursuant to § 400.815 of the Board's regulations, as are necessary to carry out the zone proposal, providing that prior to its granting such permission it shall have the concurrences of the local District Director of Customs, the U.S. Army District Engineer, when appropriate, and the Board's Executive Secretary. Further, the grantee shall notify the Board's Executive Secretary for approval prior to the commencement of any manufacturing operation within the zone. The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry to the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Huntsville-Madison County Airport Authority (the Grantee) has made application (filed July 30, 1982) in due and proper form to the Board, requesting the establishment, operation, and maintenance of a foreign-trade zone in Huntsville, within the Huntsville, Customs port of entry;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations (15 CFR Part 400) are satisfied;

Now, Therefore, the Board hereby grants to the Grantee the privilege of establishing, operating, and maintaining a foreign-trade zone, designated on the records of the Board as Zone No. 83 at the location mentioned above and more particularly described on the maps and drawings accompanying the application in Exhibits IX and X, subject to the provisions, conditions, and restrictions of the Act and the regulations issued thereunder, to the same extent as though the same were fully set forth herein, and also to the following express conditions and limitations:

Activation of the foreign-trade zone shall be commenced by the Grantee within a reasonable time from the date of issuance of the grant, and prior thereto the Grantee shall obtain all necessary permits from Federal, State, and municipal authorities.

The Grantee shall allow officers and employees of the United States free and unrestricted access to and throughout the foreign-trade zone site in the performance of their official duties.

The Grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operations within the zone.

The grant shall not be construed to relieve the Grantee from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said zone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and the Army District Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In Witness Whereof, the Foreign-Trade Zone Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer at Washington, D.C. this 24th day of February 1983, pursuant to Order of the Board.

Foreign-Trade Zones Board.

Malcolm Baldrige,
Chairman and Executive Officer.

Attest:

John J. De Ponte,
Executive Secretary.

BILLING CODE 3510-25-M

[Order No. 208]

Resolution and Order Approving the Application of the City of Mobile, Alabama, for a Foreign-Trade Zone in Mobile, Within the Mobile Customs Port of Entry

Proceedings of the Foreign-Trade Zones Board, Washington, D.C.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18,

1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the City of Mobile, Alabama, filed with the Foreign-Trade Zones Board (the Board) on January 4, 1982, requesting a grant of authority for establishing, operating, and maintaining a general-purpose foreign-trade zone in Mobile, within the Mobile Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

As the proposal involves open space on which building may be constructed by parties other than the grantee, this approval includes authority to the grantee to permit the erection of such buildings, pursuant to § 400.815 of the Board's regulations, as are necessary to carry out the zone proposal, providing that prior to its granting such permission it shall have the concurrences of the local District Director of Customs, the U.S. Army District Engineer, when appropriate, and the Board's Executive Secretary. Further, the grantee shall notify the Board's Executive Secretary for approval prior to the commencement of any manufacturing operation within the zone. The Secretary of Commerce, as Chairman and Exceutive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant To Establish, Operate, and Maintain a Foreign-Trade Zone in Mobile, Alabama

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the City of Mobile, Alabama (the Grantee) has made application (filed January 4, 1982) in due and proper form to the Board, requesting the establishment, operation, and maintenance of a foreign-trade zone in Mobile, within the Mobile Customs port of entry;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations (15 CFR Part 400) are satisfied;

Now, therefore, the Board hereby grants to the Grantee the privilege of establishing, operating, and maintaining a foreign-trade zone, designated on the records of the Board as Zone No. 82 at the location mentioned above and more particularly described on the maps and drawings accompanying the application in Exhibits IX and X, subject to the provisions, conditions, and restrictions of the Act and the regulations issued thereunder, to the same extent as though the same were fully set forth herein, and also to the following express conditions and limitations:

Activation of the foreign-trade zone shall be commenced by the Grantee within a reasonable time from the date of issuance of the grant, and prior thereto the Grantee shall obtain all necessary permits from Federal, State, and municipal authorities.

The Grantee shall allow officers and employees of the United States free and unrestricted access to and throughout the foreign-trade zone site in the performance of their official duties.

The Grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operations within the zone.

The grant shall not be construed to relieve the Grantee from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said zone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and the Army District Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In Witness Whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer at Washington, D.C. this 24th day of February 1983, pursuant to Order of the Board.

Foreign-Trade Zones Board.

Malcolm Baldrige,

Chairman and Executive Officer.

BILLING CODE 3510-25-M

Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Cotton Yarn From Peru

AGENCY: International Trade Administration, Commerce.

ACTION: Amendment to the final affirmative countervailing duty determination and countervailing duty order.

SUMMARY: On February 1, 1983, we published a final affirmative countervailing duty determination and countervailing duty order on cotton yarn from Peru (48 FR 4508). Due to a mathematical error in the calculation of the CERTEX rate, the benefit provided by CERTEX is lowered, and therefore, the net bounty or grant provided on the export of cotton yarn from Peru is lowered by the same amount.

In the "Final Determination" section of the notice, we stated: "The estimated net bounty or grant is 38.288 percent of the f.o.b. value of the export of cotton yarn." This should read: "The estimated net bounty or grant is 37.956 percent of the f.o.b. value of the export of cotton yarn."

In the "CERTEX" section of the notice paragraph 11, we stated: "Since the above-described linkage has not been demonstrated, we have determined that the CERTEX payments must be considered as conferring bounties or grants in the amount of 26.298 percent of the f.o.b. value of the export in the amount of 26.298 percent of the f.o.b. value of the export for all exporters of cotton yarn, regardless of area of production." This should read: "* * * in the amount of 25.966 percent * * *"

In the "Administrative Procedures" section of the notice we stated: "The net bounty or grant is 38.288 percent of the f.o.b. value of the export of cotton yarn." This should read: "The net bounty or grant is 37.956 percent of the f.o.b. value of the export of cotton yarn."

This amendment corrects the three sections quoted: No other information in the February 1, 1983 determination is affected by this amendment.

EFFECTIVE DATE: March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Vincent P. Kane or Melissa G. Skinner, Office of Investigations Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, Telephone: (202) 377–5414 or 3530.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

BILLING CODE 3510-25-M

National Technical Information Service

Intent To Grant Exclusive Patent License

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Bend Research, Inc., having a place of business at Bend, Oregon an exclusive right in the United States to manufacture, use and sell products embodied in the invention, "Composite Membrane for Reverse Osmosis," U.S. Patent Application Serial No. 259,349 filed May 1, 1981 and its continuation application filed December 8, 1982. The patent rights in this invention have been assigned to the United States of America, as represented by the Secretary of Commerce.

The proposed exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 41 CFR 101–4.1. The proposed license may be granted unless, within sixty days from the date of this notice, NTIS receives written evidence and argument which establishes that the grant of the proposed license would not serve the public interest.

Inquiries, comments and other materials relating to the proposed license must be submitted to the Office of Government Inventions and Patents, P.O. Box 1423, Springfield, Virginia 22151. NTIS will maintain and make available for public inspection a file containing all inquiries, comments and other written materials received in response to this Notice and a record of all decisions made in this matter.

Dated: February 23, 1983.

Douglas J. Campion,

Program Coordinator, Office of Government Inventions and Patents, National Technical Information Service, U.S. Department of Commerce.

BILLING CODE 3510-04-M

DEPARTMENT OF DEFENSE

Department of the Army

Department of the Army Historical Advisory Committee; Notice of Meeting

1. In accordance with Section 10(A)(2) of the Federal Advisory Committee Act (Pub. L. 92–463) announcement is made of the following committee meeting: Name of Committee: Department of the Army Historical Advisory Committee.

Date: 29 April 1983.

Place: Conference Room, 8222–C Casimir Pulaski Building, 20 Massachusetts Ave., NW., Washington, D.C.

Time: 1000–1140; 1345–1515.

Proposed Agenda: 1000–1140—Review of historical activities; 1345–1515—Discussion of activities and executive session of the committee.

Purpose of meeting: The committee will review the past year's historical activities based on reports and manuscripts received throughout the year and formulate recommendations through the Chief of Military History to the Chief of Staff, US Army and the Secretary of the Army for advancing the purpose of the Army Historical Program.

2. Meetings of the Advisory Committee are open to the public. Due to space limitations, attendance may be limited to those persons who have notified the Advisory Committee Management Office in writing, at least five days prior to the meeting of their intention to attend the April 29 meeting.

3. Any members of the public may file a written statement with the Committee before, during or after the meeting. To the extent that time permits, the Committee Chairman may allow public presentations or oral statements at the meeting.

4. All communications regarding this Advisory Committee should be addressed to LTC Grady A. Smith, Advisory Committee Management Officer for the Chief of Military History, HQS Department of the Army, Washington, D.C. 20314.

Dated: February 1, 1983.

Grady A. Smith,

LTC, AGC, Executive Officer.

[FR Doc. 83-5510 Filed 3-2-83; 8:45 am]

BILLING CODE 3710-08-M

United States Army Medical Research and Development Advisory Committee Blood Preservation and Substitutes Subcommittee; Partially Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Subcommittee meeting:

Name of Committee: United States Army Medical Research and Development Advisory Committee, Subcommittee on Blood Preservation and Substitutes.

Date of Meeting: March 18, 1983.

Time and Place: 0830 hrs, Conference Room AS3102, Letterman Army Institute of Research, Presidio of San Francisco, CA.

Proposed Agenda: This meeting will be open to the public from 0830 to 1000 hrs for the administrative review and discussion of the scientific research program of the Blood Preservation and Substitutes Group, Letterman Army Institute of Research. Attendance by the public at open sessions will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), United States Code, Title 5 and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 1015-1700 hrs for the review, discussion and evaluation of individual programs and projects conducted by the US army Medical Research and Development Command, including consideration of personnel qualifications and performance, the competence of individual investigators, medical files of individual research subjects, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. J. Ryan Neville, Assistant Director, Research Contract Management, Letterman Army Institute of Research, Presidio of San Francisco, CA 94129 (415/561-4367), will furnish summary minutes, roster of Subcommittee members and substantive program information.

Harry G. Dangerfield,

Colonel, MC, Deputy Commander.

BILLING CODE 3710-08-M

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for Mississippi and Louisiana Estuarine Areas, Freshwater Diversion into Lakes Maurepas, Pontchartrain and Borgne, and Mississippi Sound

AGENCY: U.S. Army Engineer District, New Orleans, DOD.

ACTION: Notice of Intent to Prepare A Draft Invironmental Impact Statement.

SUMMARY: 1. *Proposed Action.* The proposed work to be analyzed in this statement is the diversion of Mississippi River water into estuarine areas at three potential locations in southeastern Louisiana. The purposes of the proposed work include improvement of wildlife and fisheries production, reduction of saltwater intrusion, enhancement of vegetative growth, and restoration of coastal wetlands. The potential diversion sites are at the following locations, all in southeastern Louisiana:

a. Through the eastbank levee at approximately river mile 128, then via a dredged canal within the Bonnet Carre' Spillway to Lake Pontchartrain, a distance of about 6 miles.

b. Through the Inner Harbor Navigation Canal at about mile 92.6 to Lake Pontchartrain, the Gulf Intracoastal Waterway, and Mississippi River Gulf Outlet.

c. Through the eastbank levee at approximately river mile 84, then via a dredged canal to Lake Borgne, a distance of about 5 miles.

2. *Alternatives.*

a. Measures considered to meet study planning objectives included freshwater diversions, saltwater barriers, regulating alterations of wetlands, filling open water areas, establishing sanctuaries, and managing fish and wildlife. Freshwater diversion was concluded to be the most effective measure to achieve the objectives.

b. A total of 13 freshwater diversion sites were investigated. The 13 sites have been screened to 3 sites based on engineering, socioeconomics, and environmental considerations.

c. The no action alternative is also being considered. However, this would not be accepted because no action would allow continued deterioration of the estuarine environment of coastal Louisiana.

3. *Scoping Process.*

a. Two initial public meetings were held on February 1st and 9th, 1978 at Gulfport, Mississippi and New Orleans, Louisiana, respectively. A coordination meeting was held on April 23, 1980 with representatives of Federal, state, and local agencies interested in freshwater diversion to discuss the status of the study and the planned course of action. Ad hoc interagency meetings were held on May 28 and June 22-24, 1982 to develop objectives for enhancing fish and wildlife resources through freshwater diversion. Various informal meetings were held and more will be held with representatives of Federal and state fish and wildlife agencies, local interests, environmental groups, and other special interest groups.

b. Significant issues to be addressed in the draft EIS include coastal wetland deterioration, adverse and beneficial impacts of freshwater diversion on the estuarine ecosystem, water quality, project costs, real estate requirements, effects of diversion on local drainage, impacts on the human environment and cultural and historical resources.

c. The US Fish and Wildlife Service has provided a planning aid report on the proposed action. In the future, the agency will provide a Fish and wildlife Coordination Act Report.

d. Periodic reviews will be held with US Fish and Wildlife Service and other Federal, state and local agencies.

4. *Scoping Meetings.* The public meeting is scheduled for November 1983. Public distribution of notices relatives to the study will be provided.

5. *Availability.* The draft EIS is scheduled to be available to the public in October 1983.

ADDRESS: Questions concerning the proposed action and draft EIS can be directed to Dennis L. Chew, US Army Corps of Engineers District, New Orleans, Planning Division, Post Office Box 60267, New Orleans, Louisiana 70160, telephone (504) 838-2523.

Dated: February 23, 1983.

Robert C. Lee,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-84-M

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Icicle Creek Hydropower Study

AGENCY: U.S. Army Corps of Engineers, Seattle District, DoD.

ACTION: Notice of Intent to prepare a draft environmental impact statement (DEIS) for a study called the Icicle Creek Hydropower Study. Icicle Creek is a tributary to the Wenatchee River in central Washington.

SUMMARY:

a. *Proposed Action.* The Corps of Engineers began this feasibility study in September 1982. The purpose of the study is to determine the feasibility of meeting a portion of future projected Pacific Northwest electrical energy needs through hydopower development of Icicle Creek in Chelan County, Washington. At present, the most promising hydropower alternative would involve construction of a small diversion dam near river mile (R.M.) 11 of Icicle Creek. The dam would create a small, constant pool with a surface area of 1 acre or less. From the dam a penstock would extend downsteam to a powerhouse near R.M. 6. When electricity from the powerhouse is needed, water would be diverted into the penstock and would run through the powerhouse turbines, and then the water would be discharged back into the creek near R.M. 6. The maximum installed capacity of the powerhouse would be between 40 and 80 megawatts, and the average annual energy that could be produced would be between 300,000 and 500,000 megawatt hours. As the feasibility study progresses, these capacity and energy estimates will be refined. Powerlines from the powerhouse to the local power grid would also be required.

b. *Alternatives.* Other alternatives which would produce or conserve electricity will be investigated.

c. *Public Involvement and Review.* A coordination letter describing the study, hydropower alternatives, potential impacts, and specific future Icicle Creek studies will be sent to interested agencies and groups in February 1983. Public meetings, workshops, and agency meetings will be scheduled throughout the feasibility study.

d. *Significant Issues.* The following two main issues have surfaced to date. These issues and others will be addressed in the DEIS.

(1) Icicle Creek is important for its fish, wildlife, recreation, and esthetic values. A hydropower plan must be developed which will not have serious adverse impacts to these values.

(2) Icicle Creek has annual variations in flow which do not correspond to the annual variations in Pacific Northwest Electricity demand. During periods of peak electricity demand, Icicle Creek flows will sometimes be meager, and during periods of lesser demand, Icicle Creek flows will sometimes be relatively large. A cost-effective hydropower plan must be developed around this constraint.

e. *Other Environmental Review and Consultation Requirements.* The study is being coordinated with the U.S. Fish and Wildlife Service and will satisfy requirements of the Fish and Wildlife Coordination Act and Section 7(c) of the Endangered Species Act. Section 404 of Public Law 92–500 requires an evaluation of the effects of activities on aquatic ecosystems involving the discharge of dredged or fill material in waters of the United States. A "Section 404b evaluation," which discusses the plan's potential impacts on the Icicle Creek aquatic ecosystem, will be developed.

f. *Availability of DEIS.* The DEIS is presently scheduled to become available to the public in the summer of 1985.

g. *Address.* Information about the proposed action and DEIS can be obtained by contacting: Mr. Paul Cooke, Environmental Resources Section, Seattle District, Corps of Engineers, Post Office Box C–3755, Seattle, Washington 98124, Telephone (206) 764–3624 (FTS 399–3624).

Dated: February 24, 1983.

Norman C. Hintz,

Colonel, Corps of Engineers District Engineer.

[FR Doc. 83-5429 Filed 3-2-83; 8:45 am]

BILLING CODE 3710-GB-M

DEPARTMENT OF EDUCATION

National Institute of Handicapped Research; Rehabilitation Engineering Centers

AGENCY: Department of Education.

ACTION: Application Notice for Transmittal of Applications for Fiscal Year 1983.

Applications are invited for new Rehabilitation Engineering Centers for fiscal year 1983 under the National Institute of Handicapped Research in the three priority areas stated below.

Authority for this program is contained in Section 204(b)(2) of the Rehabilitation Act of 1973, as amended by Pub. L. 95–602 (29 U.S.C. 762(b)(2)).

The following three priorities were announced as final priorities, pursuant to Departmental regulations and procedures, on August 25, 1982. An application notice soliciting applications to compete for funding under these three priorities as well as other NIHR final priorities for fiscal year 1983 was also published in the **Federal Register** on August 25, 1982 (47 FR 32768 and 37281).

However, very few applications were received in response to these three priorities and those that were received were deemed inadequate for funding as a result of the Department's scientific and technical review process. Applications which were received under these three priorities were considered to be not fully responsive to the substantive research requirements of the priorities. Areas of deficiency in these applications included failure to focus on rehabilitation aspects of the research issue; inadequately defined programs of research, particularly in terms of interdisciplinary components; inadequately developed approaches to evaluation; and, in some cases, failure to propose senior staff sufficiently qualified by background and prior experience.

Nevertheless, the Secretary is convinced of the importance of these three priority areas to the advancement of rehabilitation research and to meeting critical needs of handicapped individuals. Therefore, the Secretary is reannouncing these three final funding priorities. No changes have been made in the wording of the priorities. Applicants who submitted applications in the earlier competition are invited to submit new applications as are all other interested eligible agenices and organizations.

Closing Date for Transmittal of Applications

Applications for grant awards must be mailed or hand delivered by May 6, 1983.

Applications Delivered By Mail

Any applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.133, 400 Maryland Avenue, SW., Washington, D.C. 20202.

An applicant must show proof of mailing, consisting of one of the following:

(1) A legible dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered. Amendments received after the closing

date also will not be considered in the review of the application.

Applications Delivered By Hand

An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building #3, 7th and D Streets, SW., Washington, D.C.

The Application Control Center will accept hand-delivered applications between the hours of 8:00 a.m. and 4:30 p.m. (Washington, D.C. time), daily except Saturdays, Sundays, and Federal holidays. An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information

Awards are made under this program to States and public or private agencies and organizations including institutions of higher education.

NIHR is authorized to support research and related activities under several program authorities. The priorities identified in this Notice cover research and related activities to be conducted through Rehabilitation Engineering Centers.

Rehabilitation Engineering Research Centers (RECs) conduct coordinated programs of advanced research of an engineering or technological nature. RECs are also encouraged to develop systems for the exchange of technical and engineering information and to improve the distribution of technological devices and equipment to handicapped individuals. Each REC must be located in a clinical rehabilitation setting and is encouraged to collaborate with institutions of higher education.

Ideally each REC conducts a program of research, scientific evaluation, and training that advances the state-of-the-art in technology or its application, contributes substantially to the solution of rehabilitation problems, and becomes an acknowledged Center of excellence in a given subject area. RECs are encouraged to develop practical applications for their research through scientific evaluation activities that validate their findings as well as related findings of other Centers. RECS generally conduct training programs to disseminate and encourage utilization of new rehabilitation engineering knowledge through such means as development of or contribution to undergraduate and graduate texts and curricula, in-service training, continuing education, and distribution of information and appropriate technology.

Rehabilitation Engineering Research Centers will be funded for periods up to 60 months. Funding Priorities for RECs (3).

Improving Personal Licenses Vehicled and Transportation

Mobility for handicapped persons is seriously impaired by problems of accessibility to mass transit. Alternative transportation resources are often the only viable option. Personal vehicles can be an option for many handicapped individuals, but there are many issues of design, operation, cost and safety to be resolved.

A Center in this area must design equipment to modify personal vehicles; establish safety and performance criteria for vehicular equipment matched to the capabilities of disabled drivers (especially the most severely disabled); study access and safety systems to determine the most appropriate devices and combinations of devices for disabled drivers; and initiate a program of training of disabled drivers to utilize appropriate equipment and modifications best suited to their needs.

The Secretary intends to fund at least one REC in this area in an amount up to $500,000.

Improving Rehabilitation of Low Back Pain

Disability as a result of low back pain is one of the most common handicapping conditions affecting millions of Americans and limiting their productivity. Very little systematic, coordinated research has been focused upon the rehabilitation of persons with chronic low back syndrome. It is anticipated that a substantial improvement of low-back-related disability can result from concentrated, coordinated research which combines the efforts of medical and engineering scientists.

The REC in this area will design and develop methods and equipment to quantify low back pain; evaluate existing, and design new orthotic systems, including electrical stimulation for the mitigation of back and neck pain; evaluate the effectiveness of electrical stimulation for the control of low back pain and for increasing muscular strength to stabilize the low back; and evaluate existing exercise regimens and design new ones to reduce the incidence of low back pain.

The Center must also develop new equipment and methods for training persons to manage low back pain, including electrical and biofeedback systems, and develop modified seating and other components to reduce low back pain.

The Secretary intends to fund at least one REC in this are in an amount up to $500,000.

Development of New Generation Hearing Aids

Hearing aids can be used to various degrees of satisfaction by those persons impaired by conductive, sensorineural, mixed and central hearing losses.

Hearing aids technology has advanced to a state where it could benefit from additional research to improve the quality of amplification and frequency responses produced and the clarity of sound perceived by the user.

Such a Center shall develop performance evaluation standards and evaluate all currently available hearing aids systems for quantity and quality of amplification and frequency responses relating to conductive, sensorineural, mixed and central hearing losses; develop new concepts in hearing aids using the latest technologies for sound reproduction and pattern recognition of messages; develop diagnostic and prescriptive instruments and common prescriptive criteria to optimize use of residual hearing and hearing enhancement; and evaluate newly-developed hearing aids.

The Secretary intends to fund at least one REC in this area in an amount up to $400,000.

The Secretary intends to fund at least one grant or cooperative agreement in each of these three areas, assuming satisfactory applications and continued availability of funds. However, this Notice does not bind the U.S. Department of Education to fund projects in any or all of these areas, or to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulation.

Application Forms

Application forms and further information may be obtained by writing to or calling the National Institute of Handicapped Research, U.S. Department of Education, Switzer Office Building, Room 3511, 330 C Street, SW., Washington, D.C. 20202. (Attention: Peer Review Unit); 202/245-0555.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information packages. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance

requirement beyond those imposed under the statute and regulations.

Applicable Regulations

Regulations governing the program include the following:

(A) Education Department General Administrative Regulations (EDGAR) 34 CFR Parts 74, 75, 77, and 78; and

(B) Applicants for fiscal year 1983 grants should base their applications on Section 204(b)(2) of the Act, applicable NIHR regulations in 34 CFR Parts 350 and 353 and EDGAR.

FOR FURTHER INFORMATION CONTACT: For further information, contact Ms. Edythe Glazer, National Institute of Handicapped Research, U.S. Department of Education, Switzer Office Building, Room 3511, 330 C Street, SW., Washington, D.C. 20202. Telephone: 202/245-0555, TTY for deaf individuals 202/472-4217.

(29 U.S.C. 762)

(Catalog of Federal Domestic Assistance No. 84.133, National Institute of Handicapped Research)

Dated: February 28, 1983.

Douglas A. Fenderson, Ph. D.,

Acting Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000-01-M

National Advisory Council on Women's Educational Programs

AGENCY: National Advisory Council on Women's Educational Programs, Ed.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule for a Demonstration Site Visit, and proposed agenda of a meeting of the National Advisory Council on Women's Educational Programs, and its Executive, Civil Rights, Federal Policies, Practices, and Programs, and Women's Educational Equity Act Program Committees. This notice also describes the functions of the Council. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: March 25, 1983, 8:00 a.m. to 9:30 p.m. and March 26, 1983, 8:00 a.m. to 3:00 p.m.

ADDRESS: The meetings will be held at Airport Hilton Inn, I-40 at Guilford-Jamestown Road; Greensboro, North Carolina.

FOR FURTHER INFORMATION CONTACT: Sharon Petersen, Administrative Assistant to the Executive Director, National Advisory Council on Women's Educational Programs, 425 13th Street NW., Suite 416, Washington, D.C. 20004, (202) 376-1038.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Women's Educational Programs is established pursuant to Public Law 95-561. The Council is mandated to: (a) Advise the Secretary on matters relating to equal education opportunities for women and policy matters relating to the administration of the Women's Educational Equity Act of 1978; (b) make recommendations to the Secretary with respect to the allocation of any funds pursuant to the Act, including criteria developed to insure an appropriate geographical distribution of approved programs and projects throughout the Nation; (c) recommend criteria for the establishment of program priorities; (d) make such reports as the Council determines appropriate to the President and Congress on the activities of the Council; and (e) disseminate information concerning the activities of the Council.

The Executive Committee meeting will meet March 25, 1983, from 7:30 a.m. to 9:30 a.m. at the Airport Hilton Inn, I-40 at Guilford-Jamestown Road, Greensboro, North Carolina.

The demonstration site visit will be held March 25, 1983, from 11:00 a.m. to 3:30 p.m. at the Reidsville City School System Demonstration site in Reidsville, 920 Johnson Street, Reidsville, N.C. and at nearby schools.

The Civil Rights Committee, Women's Educational Equity Act Program Committee and the Federal Policies, Practices and Programs Committee, will meet March 25, 1983, from 7:00 p.m. to 9:30 p.m. at the Airport Hilton Inn, I-40 at Guilford-Jamestown Road, Greensboro, North Carolina.

The meeting of the National Advisory Council on Women's Educational Programs will take place from 8:00 a.m. to 9:30 a.m. on March 25, 1983 and from 8:00 a.m. to 3:00 p.m. on March 26, 1983 at the Airport Hilton Inn, I-40 at Guilford-Jamestown Road, Greensboro, North Carolina. The agenda includes reports of the Executive Committee and Executive Director; Civil Rights, Federal Policies, Practices, and Programs, and Women's Educational Equity Act Program Committees; old and new business; and planning for future meetings.

The meeting of the Council will be open to the public. Records will be kept of the proceedings and will be available for public inspection at the office of the National Advisory Council on Women's Educational Programs, 425 13th Street NW., Suite 416, Washington, D.C. 20004.

Signed at Washington, D.C., on February 28, 1983.

Rosemary Thomson,

Executive Director.

BILLING CODE 4000-01-M

National Board of the Fund for the Improvement of Postsecondary Education; Meeting

AGENCY: National Board of the Fund for the Improvement of Postsecondary Education.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Board of the Fund for the Improvement of Postsecondary Education. This notice also describes the functions of the Board. Notice of this meeting is required under the Federal Advisory Committee Act (Public Law 92-463), Section 10(a)(2).

DATE: March 27, 1983 at 2:00 p.m. through March 28, 1983 at 3:00 p.m.

ADDRESS: Washington Hilton Hotel, 1919 Connecticut Avenue, NW., Washington, D.C. March 27 (2:00 p.m. to 5:00 p.m.); and Mayflower Hotel, 1127 Connecticut Avenue, NW., Washington, D.C. March 28 (9:00 a.m. to 3:00 p.m.)

FOR FURTHER INFORMATION CONTACT: Sven Groennings, Director, Fund for the Improvement of Postsecondary Education, 7th & D Streets, SW., Washington, D.C. 20202 (202-245-8091).

SUPPLEMENTARY INFORMATION: The National Board of the Fund for the Improvement of Postsecondary Education is established under Section 1003 of the Higher Education Amendments of 1980, Title X (20 U.S.C. 1135a-1). The National Board of the Fund is established to "advise the Secretary and the Director of the Fund for the Improvement of Postsecondary Education on priorities for the improvement of postsecondary education . . . and on the selection of projects under consideration for support by the Fund in its competitions."

The meeting of the National Board will be open to the public. The proposed agenda include:

—On March 27, the Board will participate in a public forum on "Priorities for Improvement," a special event marking the 10th anniversary of the Fund, held in conjunction with the Annual Meeting of the American Association for Higher Education.

—On March 28, the Board will address special efforts in conjunction with math, science, and technology

education issues, and examine progress to date of this year's Mina Shaughnessy Scholars Program, and the Final Year Dissemination and Comprehensive Program competitions.

Records shall be kept of all Board proceedings, and shall be available for public inspection at the Fund for the Improvement of Postsecondary Education, 7th and D Streets, SW., Room 3100, Washington, D.C. 20202 from the hours of 8:00 a.m. to 4:30 p.m. weekdays, except Federal Holidays.

Dated: February 18, 1983.

Edward M. Elmendorf,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: Under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Department of Energy (DOE) notices of proposed collections under review will be published in the **Federal Register** on the Thursday of the week following their submission to the Office of Management and Budget (OMB). Following this notice is a list of the DOE proposals sent to OMB for approval since Thursday, January 27, 1983.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The form number; (2) Form title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to fill out the form; and (9) A brief abstract describing the proposed collection.

DATES: Last Notice published Thursday, January 27, 1983 (48 FR 3801).

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Forms Clearance and Burden Control Division, Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Ave., NW., Washington, DC 20585 (202) 252-2308

Jefferson B. Hill, Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503 (202) 395-7340

Vartkes Broussalian, Federal Energy Regulatory Commission Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503 (202) 395-3807

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to the OMB reviewer; comments should also be provided Mr. Gross. If you anticipate commenting on a form, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washington, D.C., February 28, 1983.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

DOD FORMS UNDER REVIEW BY OMB

Form No. (1)	Form title (2)	Type of request (3)	Response frequency (4)	Response obligation (5)	Respondent description (6)	Estimated number of respondents (7)	Annual respondent burden (8)	Abstract (9)
BPA: BPA-787A-C	Pacific Northwest Residential Energy Survey	New	On Occasion	Voluntary	A—Households. B—Electric Utilities. C—Natural Gas Companies.	A-8100 B-56 C-8	A-8100 B-448 C-48	BPA-787A-C will collect information on residential units and their energy consumption. The survey will be conducted between April 1983 and February 1984. The data will be used to forecast energy demand and plan resources to meet the anticipated demand. The data will be published by the Bonneville Power Administration.
CE: CE-189P,C,S	Industrial Energy Conservation Program for Energy Efficiency Improvement and Recovered Materials Utilization.	Extension	Annually	Mandatory	Corporations consuming more than one billion Btu's of Energy per year in SIC codes 201-399.	15,204	167,750	The information collected on Form CE-189P,C,S will be used by the Integrated Energy Systems Branch at the Office of Industrial Programs to prepare the report on the Industrial Energy Efficiency Improvement Program required by Public Law 95-619.
EIA: EIA-6	Coal Distribution Report.	Extension	Quarterly	Mandatory	All companies that owned or purchased and distributed in excess of 50,000 tons of coal during the prior year.	1,450	14,500	Form EIA-6 collects data on the origin of coal produced and purchased by coal production district; distribution by consumer category; shipment by method of transportation and by state of destination; other uses; and stocks of coal. The data are published quarterly in the Coal Distribution Report.

DOD Forms Under Review By OMB—Continued

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. CP83-6-000]

Arkansas Louisiana Gas Co., a division of Arkla, Inc.; Request Under Blanket Authorization

February 25, 1983.

TAke notice that on October 4, 1982, Arkansas Louisiana Gas Company, a division of Arkla, Inc. (Arkla), P.O. Box 21734, Shreveport, Tennessee 71151, filed in Docket No. CP83-6-000 a request as amended October 12, 1982, November 22, 1982, and December 14, 1982, pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) to construct and operate three sales taps on its jurisdictional facilities to permit direct sales of gas under the authorization issued in Docket Nos. CP82-384-000 and CP82-384-001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Arkla proposes the construction and operation of sales taps to permit direct sales as follows:

Customer name	Annual sale Mcf	Arkla jurisdictional line	End use
Robert Carter, Stephens, Ark.	90	SM-23	Domestic purposes at new home.
Dennis Mason, Magnolia, Ark.	90	KM-47	Domestic purposes at new home.
Sally Roosevelt, Sheridan Ark.	90	AM-19	Domestic purposes at trailer at new home.

Arkla states that the impact of service to the new customers would be *de minimis* upon Arkla's peak day and annual deliveries, which during 1981 were 1,645,087 Mcf and 446,542,880 Mcf, respectively. Arkla also indicates it projects no curtailment to any class of customer on the entire Arkla system during the next winter.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and, pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-62-000]

Arkansas Louisiana Gas Co., a division of Arkla, Inc.; Request Under Blanket Authorization

February 25, 1983.

Take notice that on November 4, 1982, Arkansas Louisiana Gas Company, a division of Arkla, Inc. (Arkla), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP83-62-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) to construct and operate a sales tap on its jurisdictional Line JM-2 to permit direct sales of gas under the authorization issued in Docket Nos. CP82-384-000 and CP82-384-001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Arkla proposes to construct and operate a sales tap to permit direct sales of gas to Nibco Inc. of Augusta, Arkansas, which would use an estimated 109,560 Mcf annually and 1,760 Mcf on a peak day for manufacturing plumbing equipment.

Arkla states that the impact of service to the new customer would be *de minimis* upon Arkla's peak day and annual deliveries, which during 1981

were 1,645,087 Mcf and 446,542,880 Mcf, respectively. Arkla also indicates it projects no curtailment to any class of customer on the entire Arkla system during the next winter.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[RP81-18-019]

High Island Offshore System; Tariff Revision

February 25, 1983.

Take notice that on February 15, 1983, High Island Offshore System (HIOS) tendered for filing Seventh Revised Sheet No. 4 to Original Volume No. 1 of its F.E.R.C. Gas Tariff.

HIOS states that the purpose of this filing is to reflect the further revision of its rates in compliance with the settlement of its rate proceeding in Docket No. RP81-18-001, as approved in the Commission's order issued June 3, 1982. Such further revision results from the partial settlement of the U-T Offshore Seytem's (U-TOS) rate proceeding in Docket No. RP81-20-001, approved by Commission Order dated December 1, 1982. Pursuant to this partial settlement, U-TOS has made a refund to HIOS for the period January 1, 1981 through November 30, 1982, and reduced its charge to HIOS under Rate Schedule X-1 of its F.E.R.C. Gas Tariff for the period commencing December 1, 1982.

It is stated that HIOS will pass through to its Shippers the refund it has received from U-TOS for the period January 1, 1981 through November 30, 1982. Also, HIOS will refund to its Shippers the difference between the rates shown on Seventh Revised Sheet No. 4 and the rates actually billed and collected for the period commencing December 1, 1982.

HIOS has requested a waiver of Part 154 of the Commission's Regulations under the Natural Gas Act to the extent necessary to permit Seventh Revised Sheet No. 4 to be accepted for filing and made effective on December 1, 1982.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rule 211 or Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 4, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any person wishing to become a party to the proceeding must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-5402 Filed 3-2-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-189-000]

Montana-Dakota Utilities Co., Application

February 25, 1983.

Take notice that on February 4, 1983, Montana-Dakota Utilities Co. (Applicant), 400 North Fourth Street, Bismarck, North Dakota 58501, filed in Docket No. CP83-189-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain facilities and associated services rendered in connection with the purchase, transportation and exchange of natural gas under an agreement with Colorado Interstate Gas Company (CIG) dated January 24, 1975, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon the 4-inch tap connection to the South Big Coulee lateral, Stillwater County, Montana, which consists of a 4-inch valve, drip and 2-inch blow-off valve. It is stated that the subject tap connection was used to allow deliveries of natural gas from CIG's Brickley #29-4-20 well in the South Big Coulee area. Applicant asserts that gas production has ceased from the Brickley #29-4-20 well, and therefore, the facilities and services authorized in Docket No. CP75-284 are no longer required.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 18, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-1-16-003]

National Fuel Gas Supply Corp.; Proposed Tariff Change

February 25, 1983.

Take notice that on February 16, 1983, National Fuel Gas Supply Corporation (National) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, Substitute Forty-first Revised Sheet No. 4, proposed to be effective February 1, 1983.

National states that the purpose of this revised tariff sheet is to comply

with Commission order dated February 3, 1983, requiring that National reflect any downward modification in its pipeline suppliers and the elimination of the $6.4 million undercollection in the current surcharge. National further states that Substitute Forty-first Revised Sheet No. 4 reflects a decrease in National's rate of 15.42 cents per Mcf.

It is stated that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Sections 211 and 214, of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 4, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-1-59-003]

Northern Natural Gas Co.; Filing

February 25, 1983.

Take notice that on February 15, 1983, Northern Natural Gas Company (Northern) tendered for filing, in compliance with the Commission's "Order Accepting For Filing And Suspending Proposed Tariff Sheets Subject To Refunds And Conditions" issued December 17, 1982, additional information regarding the Northern's filing in Docket No. TA83-1-59-000.

Ordering Paragraph (B) of the Commission's Order required a recalculation of interest on producer refunds made to Northern. Attached to the instant filing as Appendix A is a narrative and supporting schedules detailing the adjustment.

Ordering Paragraph (C) required an adjustment to Account No. 191 for costs associated with an exchange transaction with Getty Oil. Northern states that this adjustment would result in a rate increase. To avoid this consequence, Northern proposes that the rate treatment and accounting entries detailed on Appendix B to the filing, pursuant to which any required adjustments to the instant filing would be deferred with interest, and reflected in Northern's next PGA filing.

Northern requests that this filing be accepted as compliance with the December 17, 1982 Order.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Sections 211 and 214, of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 4, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-1-17-008, (PGA83-1, IPR83-1, DCA83-1]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

February 25, 1983.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on February 15, 1983 tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1, the following sheets:

Third Substitute Sixty-fourth Revised Sheet No. 14
Second Substitute Sixty-fourth Revised Sheet No. 14A
Second Substitute Sixty-fourth Revised Sheet No. 14B
Second Substitute Sixty-fourth Revised Sheet No. 14C
Second Substitute Sixty-fourth Revised Sheet No. 14D

The above sheets are being issued in substitution for those sheets filed January 25, 1983 which reflected a revision to Texas Eastern's semiannual PGA tracking adjustment to be effective February 1, 1983 filed on December 30, 1982. The above sheets are being filed in compliance with Ordering Paragraph (A)(i) of the Commission's Order issued January 31, 1983 in Docket No. TA83-1-17-003 (GPGA83-1, IPR83-1, DCA83-1). Ordering Paragraph (A)(i) requires Texas Eastern to revise its February 1, 1983 PGA filing to reflect the proper pipeline supplier rates. The above sheets reflect reductions from all three of Texas Eastern's pipeline suppliers, Southern Natural Gas Company, Texas Gas Transmission Corporation and United Gas Pipe Line Company. The impact of these rate reductions from pipeline suppliers is a decrease of $.115/dth in the demand component of Texas Eastern's rates and a decrease of $.0047/dth in the commodity component of Texas Eatern's rates.

The proposed effective date of the above tariff sheets is February 1, 1983.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 4, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-178-000]

Texas Gas Transmission Corp.; Request Under Blanket Authorization

February 25, 1983.

Take notice that on January 31, 1983, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP83-178-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) to add a new delivery point under the authorization issued in Docket No. CP82-407-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Texas Gas states that it would construct and operate a delivery point located on its Slaughters-Montezuma Main Line in Warrick County, Indiana, to serve Southern Indiana Gas and

Electric Company (SIGECO), an existing customer of Texas Gas, pursuant to a service agreement dated September 1, 1970. It is indicated that the maximum volume of natural gas delivered during the first year would be 85,000 Mcf with proposed maximum annual deliveries reading approximately 500,000 Mcf at the proposed point. It is stated that the gas would be for residential and small commercial service. It is asserted that the addition of this delivery point would not increase SIGECO's contract demand and would be without detriment to Texas Gas' existing customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and, pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted To Office of Management and Budget for Review

On February 24, 1983 the Federal Communications Commission submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511.

Copies of these submissions are available from Richard D. Goodfriend, Agency Clearance Officer, (202) 632-7513. Comments should be sent to Edward H. Clarke, Office of Management and Budget, OIRA, Room 3201 NEOB, 726 Jackson Place, NW., Washington, D.C. 20503.

Title: Ownership Report
Form No.: FCC 323
Action: Extension
Respondents: All licensees and permittees of AM, FM and TV Commercial broadcast stations
Estimated Annual Burden: 5, 046 Responses; 80,736 Hours.
Title: Application for Ship Radio Station License and Temporary Operating Authority
Form No.: FCC 506/506-A
Action: Extension
Respondents: Individuals, associations, partnerships, corporations and local governmental entities eligible to hold a radio station authorization in the ship radio service
Estimated Annual Burden: 67,500 Responses; 22,500 Hours.
Title: Application for Renewal of Radio Station License
Form No.: FCC 574-R
Action: New
Respondents: Businesses and State and local governments applying for renewal of their radio station licenses in the Land Mobile and General Mobile Radio Services
Estimated Annual Burden: 40,000 Responses; 2,667 Hours. This renewal application will be in the form of a computer-generated mailer sent to licensees 90 days prior to expiration. The data need only be verified or corrected and mailed to FCC.
Title: Supplemental Return Notice for the General Mobile Radio Service
Form No.: FCC 6024-B
Action: New
Respondents: Individuals, associations, partnerships and corporations eligible to hold a radio station authorization in the General Mobile Radio Service
Estimated Annual Burden: 250 Responses; 62 Hours.

BILLING CODE 6712-01-M

Meeting of the Telecommunications Industry Advisory Group Steering Committee

Pursuant to Section 10(a)(2) of The Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Telecommunications Industry Advisory Group Steering Committee scheduled to meet on Tuesday, March 15, 1983. The meeting will be held at 9:30 a.m. in Conference A (10th Floor) at AT&T located at 1120 20th Street NW., Washington, D.C. and will be open to the public.

The agenda is as follows:

I. Review of Minutes of Previous Meeting
II. General Administrative Matters
III. Presentation of Plant Account Model
IV. Consideration of Revenue Account Proposals
V. Other Business
VI. Presentation of Oral Statements
VII. Adjournment

With prior approval of the Chairman, Gerald P. Vaughan, oral statements, while not favored or encouraged, may be allowed if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Steering Committee objectives. Anyone not a member of the Steering Committee and wishing to make an oral presentation should contact Stephen T. Duffy, Group Vice-Chairman (202/634-1509), at least five days prior to the meeting date.

BILLING CODE 6720–01–M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

February 23, 1983.

Background

When executive departments and independent agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act [44 U.S.C. Chapter 35]. Department and agencies use a number of techniques to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibilities under the act also considers comments on the forms and recordkeeping requirements that will affect the public. Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. OMB's usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

List of Forms Under Review

Immediately following the submission of a request by the Federal Reserve for OMB approval of a reporting or recordkeeping requirement, a description of the report is published in the **Federal Register**. This information contains the name and telephone number of the Federal Reserve Board clearance officer (from whom a copy of the form and supporting documents is available). The entries are grouped by type of submission—i.e., new forms, revisions, extensions (burden change), extensions (no change), and reinstatements.

Copies of the proposed forms and supporting documents may be obtained from the Federal Reserve Board clearance officer whose name, address, and telephone number appear below. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF 83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review.

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Cynthia Glassman—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–3829)

OMB Reviewer—Richard Sheppard—Officer of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503 (202–395–6880).

Request for implementation of new report

1. Report title: Report on Total Foreign Exchange Turnover.
Agency form No.: FR 3026
Frequency: One-time
Reporters: Selected foreign exchange brokers and banking institutions. SIC Code: 602, 605
Small businesses are not affected.
General description of report:
Respondent's obligation to respond is voluntary; a pledge of confidentiality is promised [5 U.S.C. 552(b)(4) and (b)(8)].

This information is needed to provide the Federal Reserve System with information about the growth of the U.S. foreign exchange market as well as changes in the practices and structure of the market.

Board of Governors of the Federal Reserve System, February 25, 1983.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–M

Bank Holding Companies; Proposed de Novo Nonbank Activities; Barclays Bank PLC et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commence *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. Federal Reserve Bank of New York. (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Barclays Bank PLC* and its subsidiary, *Barclays Bank International Limited*, each a bank holding company whose principal office is in London, England (leasing activities; Arizona, Arkansas, Colorado, Louisiana, New Mexico, Oklahoma and Texas): To engage through their subsidiary, Barclays American/Leasing, Inc. ("BAL"), in lease financing of personal property by means of leases that meet the standards of Section 225.4(a)(6) of Regulation Y. This activity would be conducted from an office of BAL located in Houston, Texas, serving customers in the States of Arizona, Arkansas, Colorado, Louisiana, New Mexico, Oklahoma and Texas. This notification is for the relocation of an existing office located in Houston, Texas. Comments on this application must be received not later than March 25, 1983.

B. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *The Wachovia Corporation*, Winston-Salem, North Carolina (mortgage banking and insurance activities; North Carolina): To engage, through its subsidiary, Wachovia Mortgage Company, in providing mortgage banking services, including the origination and processing of residential, construction, development, and income property mortgage loans, the purchase and sale or placement of mortgage loans, the administration and servicing of mortgage loans, the management and sale of properties acquired through foreclosure or transfers in lieu of foreclosure, and acting as agent for credit life and accident and health insurance and for property and casualty insurance related to extensions of credit. Property and casualty insurance will be offered pursuant to the grandfather provision in section 601(D)(i) of the Garn-St Germain Depository Institutions Act. Such activities will be conducted at an office in Wilson, North Carolina, serving the Wilson, Rocky Mount, and Goldsboro, North Carolina markets. Comments on this application must be received not later than March 25, 1983.

C. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30301:

1. *First Bankers Corporation of Florida*, Pompano Beach, Florida (management consulting activities, central and southern Florida): To engage, through its subsidiary, The First Bankers Management Group, Inc., in providing management consulting advice to bank and nonbank depository institutions, including, but not limited to, advice concerning bank operations, systems and procedures; computer operations and mechanization; implementation of electronic funds transfer systems; site planning and evaluation; bank mergers and the establishment of new branches; operation and management of a trust department; international banking; foreign exchange transactions; purchasing policies and practices; cost analysis, capital adequacy and planning; auditing; accounting procedures; tax planning; investments, to the extent permitted by Regulation Y promulgated by the Federal Reserve Board; credit policies and administration, including credit documentation, evaluation, and debt collection; product development, including specialized lending provisions; marketing operations, including research, market development and advertising programs; personnel operations, including recruiting, training, evaluation and compensation; and security measures and procedures. These activities would be conducted from offices in Pompano Beach, Florida, serving central and southern Florida. Comments on this application must be received not later than March 25, 1983.

D. Federal Reserve Bank of Minneapolis (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Intermountain Bancorporation*, Columbia Falls, Montana (data processing activities; Montana): To engage through its subsidiary, Data-Mont in providing bookkeeping or data processing services for the internal operations of the holding company and its subsidiaries and storing and processing other banking, financial, or related economic data, such as performing payroll, accounts receivable or payable or billing services. These activities would be conducted from an office in Columbia Falls, Montana, serving the State of Montana. Comments on this application must be received not later than March 24, 1983.

2. *Northwest Bancorporation*, Minneapolis, Minnesota (financing and insurance activities; North Carolina): To engage through its subsidiaries, Dial Finance Company of North Carolina, Dial Credit Company of North Carolina and First Dial, Inc., in the activities of consumer and commercial finance, and the sale of credit related insurance, including credit life, credit accident and health and property and credit related casualty insurance related to extensions of credit by Dial Finance Company of North Carolina, Dial Credit Company of North Carolina and First Dial, Inc. These activities would be conducted from a new office in Raleigh, North Carolina, serving Raleigh, North Carolina. Comments on this application must be received not later than March 24, 1983.

E. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *BankAmerica Corporation*, San Francisco, California (financing, servicing, and insurance activities; *de novo* office; Illinois): To engage, through its indirect subsidiary, FinanceAmerica Corporation, a Delaware corporation, in the activities of making or acquiring for its own account loans and other extensions of credit such as would be made or acquired by a finance company; servicing loans and other extensions of credit; and offering credit-related life insurance and credit-related accident and health insurance. Credit-related property insurance will not be offered. Such activities will include, but not be limited to, making consumer installment loans, purchasing installment sales finance contracts, making loans and other extensions of credit to businesses, making loans and other extensions of credit secured by real and personal property, and offering credit-related life and credit-related accident and health insurance directly related to extensions

of credit by FinanceAmerica Corporation. Credit-related life and credit-related accident and health insurance may be reinsured by BA Insurance Company, Inc., an affiliate of FinanceAmerica Corporation. These activities will be conducted from a *de novo* office located in Mount Vernon, Illinois, serving the entire State of Illinois. Comments on this application must be received not later than March 25, 1983.

2. *Torrey Pines Group,* Solana Beach, California (mortgage banking activities; California, western United States): To engage, through its subsidiary, Torrey Pines Equity Corp., in mortgage banking activities, including negotiating, making, acquiring, servicing, selling, buying and/or exchanging for its own account or for the account of others, real property sales contracts and promissory notes secured directly or collaterally by liens on real property or such other extensions of credit as would be made or arranged by a mortgage banking company. This activity would be conducted from an office located in Solana Beach, California. These activities would be performed in the states of California, Arizona, Nevada, New Mexico, Texas, Utah, Oregon, Florida and Washington. Comments on this application must be received not later than March 25, 1983.

Board of Governors of the Federal Reserve System, February 25, 1983.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules; Carlisle Corp. et al.

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvement Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
(1) Carlisle Corporation's proposed acquisition of all assets of Numeridex, Incorporated.	Feb. 3, 1983.

BILLING CODE 6750-01-M

GENERAL SERVICES ADMINISTRATION

Solicitation Offer and Award (Contract for Building Services), GSA Form 1467

AGENCY: General Services Administration.

ACTION: Notice of Information Collection; Extension.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the General Services Administration (GSA) plans to request the Office of Management and Budget to review and approve the extension of an information collection request for the continued collection of data.

DATES: Comments on the information collection requests must be submitted on or before March 23, 1983.

ADDRESSES: Send comments to Franklin S. Reeder, GSA Desk Officer, Room 3235, NEOB, Washington, DC 20503, and to Anthony Artigliere, GSA Clearance Officer, GSA (ORAI), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Shirley Scott, GSA (202) 566–1181.

SUPPLEMENTARY INFORMATION: The information collection is used to solicit bids for building service contracts, report on socio-economic programs, and to determine compliance with Federal regulations. The estimated annual number of responses is 12,500; each response requires an estimated 15 minutes to prepare. A copy of the information collection proposal may be obtained from the Directives and Reports Management Branch (ORAI), Room 3011, GS Building, Washington, DC 20450, telephone 566–1164.

Dated: February 18, 1983.

Clarence A. Lee, Jr.,

Director of Administrative Services.

BILLING CODE 6820-34-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Adolescent Family Life Demonstration Projects; Delegation of Authority

Notice is hereby given that on December 9, 1982, the Secretary of Health and Human Services delegated to the Assistant Secretary for Health, with authority to redelegate, all the authority vested in the Secretary under Title XX of the Public Health Service Act, as amended (42 U.S.C. 300z *et seq.*) concerning adolescent family life demonstration projects. The delegation to the Assistant Secretary for Health excluded the authority under section 2009(a) to reserve not less than one per centum and not more than three per centum of appropriated funds for the evaluation of adolescent family life demonstration projects, the authority to promulgate regulations, and the authority to submit reports to the Congress.

Dated: February 23, 1983.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

[FR Doc. 83-5445 Filed 3-2-83; 8:45 am]

BILLING CODE 4160-17-M

Miscellaneous; Delegation of Authority

Notice is hereby given that on December 9, 1982, the Secretary of Health and Human Services delegated to the Assistant Secretary for Health all the authority under Title V of the Public Health Service Act, as amended (42 U.S.C. 219 et seq.) concerning certain functions of the Public Health Service. The delegation to the Assistant Secretary for Health excluded:

(1) The authority under section 501 to accept gifts of real property subject to a reverter clause. Offers of property shall not be accepted if the total costs associated with acceptance are expected to exceed the cost of purchasing a similar item and the cost of normal care and maintenance.

(2) The authority under section 508 concerning the transfer of funds between appropriations.

(3) The authority under section 513 to determine the portions, but not more than one per centum, of appropriations to be set aside for evaluation programs. This exclusion does not affect the authority to award grants and contracts for evaluation projects which have been approved by the Assistant Secretary for Planning and Evaluation.

(4) The authority to promulgate regulations and submit reports to the Congress.

The Assistant Secretary for Health may redelegate all authorities delegated to him under Title V except the authority to accept offers of real property.

Previous delegations made by the Secretary to the Assistant Secretary for Health under Title V (33 FR 4694 and 33 FR 16412) have been superseded. However, provision has been made for redelegations of authority made under these superseded delegations to continue in effect pending further redelegations, provided they are consistent with the delegation to the Assistant Secretary for Health.

Dated: February 23, 1983.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4160-17-M

Social Security Administration

Proposed Availability of Funding for Targeted Assistance Grants for Services for Refugees in Local Areas of High Need

AGENCY: Office of Refugee Resettlement (ORR), SAA, HHS.

ACTION: Notice of proposed availability of funding for targeted assistance grants for refugee services in high-need local areas.

SUMMARY: This notice announces the proposed availability of funds and award procedures for targeted assistance project grants for services to refugees under the Refugee Resettlement Program (RRP) in localities with large refugee populations, high refugee concentrations, and high use of assistance, and where specific needs exist for supplementation of currently available resources. In FY 1983, funds are expected to be available for targeted assistance grants.

DATE: Comments on the requirements and procedures set forth in this notice will be considered if received by April 14, 1983.

ADDRESS: Address written comments, in duplicate, to: David Howell, Office of Refugee Resettlement, Room 1332, Switzer Building, 330 C Street, SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT: David Howell, (202) 472–6510.

SUPPLEMENTARY INFORMATION:

I. Purpose and Scope

This notice announces the proposed availability of funds for targeted assistance grants for services to refugees in counties where, because of factors such as unusually large refugee populations, high refugee concentrations, and high use of public assistance, there exists and can be demonstrated a specific need for supplementation of currently available resources for services to this population.

A total of at least $30,000,000 in funds which Congress has designated for this purpose is currently expected to be available for targeted assistance for refugees. (A separate announcement will be made for targeted assistance for Cuban and Haitian entrants.)

The purpose of the proposed grants is to provide to unemployed refugees who reside in qualifying counties direct services which are intended to result in economic self-sufficiency and reduced dependency. Funds awarded under this proposed program are intended to support projects which enhance refugee employment potential and increase the ability of refugees to find and retain jobs. Innovative approaches to accomplish this objective will be entertained and are encouraged.

Funds awarded under this targeted assistance program will be generally related to the existence of and relative extent of refugee need in each qualifying county, as indicated by a qualification and allocation formula (described in this notice), and to the quality and quantity of refugee services proposed, as documented in applications. It is intended that if an application is deficient, comment and technical assistance will be provided to the applicant by the granting agency in order that a proposal can be developed which will merit the award of funds at the level determined by the allocation formula. An award of funds will be made only if, and to the extent that, an application is determined acceptable by the Director of ORR.

II. Authorization

Targeted assistance projects would be funded under the authority of section 412(c) of the Immigration and Nationality Act (INA), as amended by the Refugee Act of 1980 (Pub. L. 96–212), 8 U.S.C. 1522(c).

III. Eligible Grantees

The Department proposes to limit eligible grantees to those agencies of State governments which are responsible for the refugee program under 45 CFR 400.5 (except that under certain circumstances—see section VII, below—a grant could be made directly to a local entity). It is proposed that the above mentioned State agency submit proposals on behalf of the county governments of the qualified counties in that State. In the absence of a statewide county system, or in the absence of an appropriate county-level refugee program agent or agency and with the concurrence of the county government, the State may designate a city or other entity, either public or private nonprofit, to administer the targeted assistance funds for a qualified local area. It is further proposed that the county government or other designated entity develop the targeted assistance proposal according to local needs and capabilities and that the proposed activities be required to be identified and planned in cooperation with voluntary refugee resettlement agencies, the business community, and refugees in that area. In submitting proposals on behalf of qualified local entities in the State, the State agency would provide assurance that the proposed activities do not duplicate existing refugee support service activities in the targeted localities and would certify that not less than 95% of each locality's allocated amount would be passed through to the designated administering entity.

Applications submitted in response to this notice are not subject to review by State and areawide clearinghouses under the procedures in Part I of Office of Management and Budget Circular No. A–95.

IV. Qualification and Allocation Formula

The Department proposes a two-stage formula for qualification for, and allocation of, targeted assistance funds. The first stage of the proposed formula defines the qualification of counties for targeted assistance through the use of four equally-weighted criteria which have been selected to collectively indicate local conditions and problems which the proposed program is intended to address. In order to qualify for application for targeted assistance funds, a county would be required to be above the median or above a selected cutoff point of jurisdictions for which data were reviewed (as described in section V, below) in three of the four following criteria: (1) The number of refugees placed in the county during Federal fiscal years 1980–82; (2) the ratio of the overall county population to the refugees in item (1), above; (3) the number of refugees in the county who were receiving cash assistance under the programs of aid to families with dependent children program (AFDC), including the unemployed parent (UP) portion of that program, and refugee cash assistance (RCA) on October 1, 1982; and (4) the ratio of refugees in item (3) to the number of refugees in item (1). A county which places above the cutoff point in any three of the above categories would qualify to apply for targeted assistance funds. It would then be included in the list of qualifying localities for determination of its targeted assistance allocation. Discussion of the derivation and use of data is presented in section V, below.

The second stage of the proposed targeted assistance formula is designed to reflect the relative level of need for funds among those counties which have qualified to apply under the formula's first stage. It proposes that the relative degree of need of each qualified locality is best indicated by the number of refugees residing in that locality who are not self-sufficient. Therefore the Department proposes the following single criterion as the basis for the allocation of targeted assistance funds among the eligible counties: The number of refugees residing in the country who have been in the United States 36 months or less and who were receiving cash assistance under AFDC, AFDC–UP, or RCA on October 1, 1982. (These data are adopted to represent refugee need for targeted assistance services on a basis which makes some adjustment for the variation in caseloads caused by State-to-State assistance program differences. Thus the presence or absence of General Assistance is neutralized in the calculation.) A county's allocation would be the proportion of available funds which equals that county's proportion of all such refugee recipients residing in all counties which have qualified to apply for targeted assistance funds under the first stage of the formula. Further discussion of the data and proposed allocation amounts are presented in section VI, below.

The proposed two-stage formula separates qualification for the targeted assistance program from the proposed amount to be allocated to each qualifying locality in order to obtain a high degree of sensitivity to need and of equity in the distribution of available resources.

In summary, the Department recognizes that local need for targeted assistance funds may be reflected in several different, if interrelated, factors. It proposes that such need be addressed in a manner which, to the extent measurable, takes into account both the variety and cumulative impact of those factors. Therefore the first stage of the proposed formula allows for differences in local circumstances and problems by measuring each of four factors separately. It then selects qualified localities by identifying those which exhibit consistently high indications of need across most of the criteria.

With respect to the second stage of the formula, the Department considers the purpose of this program to be to provide self-sufficiency-related services to refugees in all qualifying areas on an equitable basis. Therefore the amount of funds allocated to each county is proposed as a proportion of the available funds which is equal to each county's proportion of the refugees in all qualifying counties who are not self-sufficient.

V. Discussion of Data and Application of Criteria

This section discusses the development and application of the four criteria and explains the data bases used to derive them. A table is included to show which counties were considered and how they scored on each criterion.

The Department proposes to use the county as the basic unit to which the criteria are applied. This insures that uniform units are compared nationwide. All relevant data are available at the county level, which is not the case with other possible units. The county is thought to be a meaningful local unit in which need for additional services to the resident refugee population can be identified and addressed.

An initial list of counties was developed which could be screened according to the proposed criteria. From ORR's data system, all counties that received more than 900 initial resettlements of Southeast Asian refugees during either of two time periods were listed. The time periods were October 1979 through December 1980 (a 15-month period during which 196,057 refugees arrived) and January 1981 through September 1982 (a 21-month period during which 175,243 arrived). Thus, all counties were listed that received more than approximately one-half of one percent of the new arrivals in either time period. Together, these time periods constitute the entire 36-month period considered in the allocation of funds for social services for FY 1983. The number of counties meeting this initial criterion was 40. (Washington, D.C., was treated as a county for this purpose.)

The ORR refugee data system contains information on the refugee's initial place of resettlement as recorded in documents carried by the refugee at the time of arrival in the U.S. The system contains records on 99 percent of the Southeast Asian refugees who arrived during the 3-year period considered. The county of arrival could not be identified (although the State was identified) for about 15 percent of those who arrived during 1980, 6 percent of those who arrived during 1981, and 1 percent of those arriving in 1982. Because of this, arrival numbers by county are somewhat understated; however, the "unknown" placements are distributed proportionately across all of the States, and no county is thought to suffer a relative disadvantage due to the missing information.

Consideration was confined to Southeast Asian refugees primarily because this population is in greatest need for targeted assistance services, but also because comparable data are not available at the county level for other groups of refugees over the 3-year period. (Data available to the Department indicate that Southeast Asian refugees have a higher rate of cash assistance use and lower employment rates than other refugee groups; however, eligibility for participation in targeted assistance projects would *not* be confined to Southeast Asian refugees.)

This initial list was compared with three other lists of places thought to be significantly affected by their refugee populations, as compiled by three organizations: The Committee on Migration and Refugee Affairs of the American Council of Voluntary Agencies for Foreign Service, Inc. (ACVA), the National Association of Counties, and the U.S. Conference of Mayors. In cases where these lists referred to a non-county entity, the county thought to best approximate the organization's meaning was used. From the ACVA list, places designated as either "impacted" or "sensitive" were considered. All counties so identified were added to the ORR list, unless they had clearly been named as "impacted" due to the presence of Cuban/Haitian entrants rather than refugees. While all lists showed substantial overlap, the review of these additional three sources resulted in the addition of 20 more counties to ORR's initial list of 40. In this way, 60 counties were screened according to the proposed criteria.

Criterion 1, the number of Southeast Asian refugees initially resettled in the county during FY's 1980, 1981, and 1982, appears in Column B of Table 1. The median of Criterion 1 for the counties screened is 2,066.5. Criterion 2 appears in Column E of the same table; it consists of the county population according to the 1980 U.S. Census divided by the refugee arrival figure in Column B and may be interpreted as persons per refugee. The median of Criterion 2 is 244.5. Criterion 3, the number of refugees receiving ORR-reimbursed AFDC, AFDC–UP, or RCA benefits as of October 1, 1982, appears in Column D. The source of this information was the counties themselves. (Counties that did not meet the first two criteria, and thus would not be eligible in any case, were not asked to supply this information.) The cutoff point for Criterion 3 was established at 1,000, in order to insure a sizable pool of refugees needing services. Criterion 4, the ratio of refugees receiving assistance as shown in Column D to refugees initially resettled in the county as shown in Column B, appears in Column F. The cutoff point for Criterion 4 was established at 50 percent, the approximate national average dependency rate. This criterion should not be interpreted as a dependency rate, for several reasons: (1) It does not include all types of assistance; (2) refugees of all nationalities are compared only with Southeast Asians in the population base; (3) no effort was made to correct the base population figure for secondary migration. However, the Department feels that Criterion 4 is a good measure of the *relative* need for additional services in the area; and it is an indirect indicator of secondary migration since secondary migrants would be included in the cash assistance data.

It is possible that some counties which have experienced extreme growth in refugee population due to net secondary in-migration may, in fact, qualify for targeted assistance funds if secondary arrivals are considered. In most circumstances, counties with notable secondary migration already qualify on the basis of initial placements, or would not qualify under any circumstance because secondary migrants do not sufficiently increase the local refugee population. However, in the event that uncommonly high numbers of secondary arrivals would, by their presence and use of cash assistance, qualify a county which has not met the criteria for qualification as presented in this proposed notice, the granting agency will consider an adjustment of the local refugee population figure.

If State and county officials believe that a county would qualify on the basis of secondary migration, State officials should submit a letter containing supporting evidence. The following evidence is requested:

- As of 10/1/82, the total numbers of refugees in the county who has been in the U.S. 36 months or less and who were receiving refugee cash assistance (RCA), aid to families with dependent children (AFDC, including AFDC–UP), and general assistance (GA) (each category *must be* separately reported);
- If possible, statistics on the proportion of the cash assistance caseload that consists of persons initially resettled out of the county and/or out of the State.
- The best available information on the amount of in-migration and out-migration of refugees experienced by the county, with emphasis on the past two years. Discussion should be confined to the population entering since October 1, 1979, and should clearly identify what refugee groups are being discussed. The evidence should include a description of the information collection system(s) used by the State and/or county, including data sources, time period covered, timeliness, and validation procedures. Surveys or other special studies can only be considered if they are submitted for review.

Letters must be received by 30 days from date of publication of this notice to be considered. Address letters, in duplicate to: Linda Gordon, Office of Refugee Resettlement, Room 1332, Switzer Building, 330 C Street, SW., Washington, D.C. 20201.

The qualification of additional counties for the proposed targeted assistance program would necessarily increase the number of refugees to be used in calculating the proportionate allocation of funds. Such an adjustment would, therefore, reduce slightly the individual allocations to each of the other qualifying counties below the amount indicated in this notice.

Application of these four criteria resulted in the identification of 25 counties that meet three of the four criteria and therefore qualify for the proposed program.

While recognizing that differing views may exist, we believe that these criteria comprise good indicators of high-need counties and that the proposed cutoff points establish a reasonable basis for identifying those counties which have the greatest needs and would qualify for targeted assistance funds. The basic intent of the proposed targeted assistance program is to concentrate the available funds in those areas which have the greatest need for funds in addition to those provided under the social services allocations and where there are appreciable numbers of unemployed and dependent refugees on whose behalf special self-support efforts are required.

VI. Proposed Allocations

The proposed allocation to be available for targeted assistance are shown in Column H of Table 1.

TABLE 1.—COUNTIES FOR PROPOSED TARGETED ASSISTANCE PROGRAM AND FORMULA CALCULATION

[b] Includes independent cities of Alexandria, Fairfax, and Falls Church.

VII. Eligible Projects

In applying for targeted assistance funds on behalf of a qualified county in the State, a State agency would be required to certify that: (1) The proposed activities do not duplicate existing services available under Federal funding for the Refugee Resettlement Program (RRP); (2) the State will make available to the county or designated local entity not less than 95% of the amount of the award for purposes of implementing the proposed activities; (3) the State's authorization to the county or designated local entity to use funds awarded will be made within 45 days of the State's receipt of the notification of the grant award, or, in lieu of this, the State may recommend that the award be granted directly to the eligible entity; (4) the proposal was developed through a local process which involved meaningful consultation with appropriate public and private groups involved in resettlement, including representation from voluntary refugee resettlement agencies, the business community, and refugees in the local area; and (5) proposed services will be designed for and made available only to refugees in the qualifying counties who are unemployed.

In developing a proposal, a county or designated local entity would be required to set forth in detail: (1) Evidence of specific needs and

definition of targeted population; (2) a statement of specific employment objectives for use of the funds in increasing refugee self-sufficiency in the area; (3) a description of the strategy proposed to achieve these objectives; including detailed discussion of individual program activities, number of clients to be served, and the integration and/or coordination of proposed activities with the overall refugee service system in the area; (4) an estimation of anticipated outcomes achieved within 6 months from date of grant award and 12 months from such date; (5) a description of program monitoring and evaluation of the proposed activities; and (6) a detailed budget, including itemization by individual project, and containing a local administration cost not to exceed 10% of the amount allowed for the county by the formula.

Allowable activities include any activity permissible under section 412(c) of the INA which is directly related to the furtherance of refugee economic self-sufficiency by aiding refugees in finding and retaining jobs, increasing refugee employability potential, and/or enhancing refugee job market possibilities. Creative approaches to such activities are encouraged. Allowable activities would include, for example, job development, job placement, business and employer incentives (such as on-site employee orientation and vocational English training, or bilingual supervisor assistance), business technical assistance, short-term job training specifically related to opportunities in the local economy, and on-the-job training. Stipened programs are allowable if justification is provided for support of enrollees and if not more than 30% of the cost of such a project is allocated for stipends. Use of targeted assistance funds for venture capital, either as grants or loans, is specifically not allowed. Support services, such as day care and transportation, are allowable when specifically necessary to enable clients to participate in the targeted assistance program. Proposals which include voluntary corporate participation and a generally high degree of business involvement are especially welcomed.

VIII. Criteria for Evaluating Applications

In developing targeted assistance proposals, counties or designated local entities must consider and spell out clearly the appropriateness of the proposed activities to the local economy, the appropriateness of the proposed activities for the refugee population(s) in the area, and the relationship of the proposed activities to existing refugee services carried out with Federal funds.

Targeted assistance grant applications will be evaluated on the following criteria:

1. Certification by the State agency that, for each local entity on whose behalf an application is being submitted, the five conditions listed in the first paragraph of section VII, above, have been met.

2. Documentation of specific needs for targeted assistance projects and discussion of characteristics of anticipated refugee client population.

3. Description of specific employment objectives for use of funds, including justification that the proposed objectives are appropriate to the needs of the proposed refugee clients and the local economy and will result in jobs and employment of the clients.

4. Results anticipated within 6 months from date of grant award and 12 months from such date.

5. Justification of the strategic approach to achieving the stated objectives, including complementarity among targeted assistance activities and with other existing refugee services.

6. Adequacy of justification for and description of each specific activity that is proposed.

7. Adequacy of proposed plan for determination of measurable, performance-based project outcomes on a semiannual basis.

8. Description of the local planning process which was used to develop the proposal, including identification of interests and sectors represented.

9. Assurance that services will be provided by qualified non-profit or for-profit agencies or individuals.

10. Reasonableness of estimated costs in relation to anticipated results.

ORR proposes to allow 45 days from the date of publication of the final notice for the submittal of applications.

IX. Review, Technical Assistance, and Award Procedure

Applicants will be evaluated on a non-competitive basis by a review panel of experts according to the criteria above, and in accordance with the HHS Grants Administration Manual (chapter 1–55). Applications will be reviewed in terms of the amount allowable to the eligible entity under the proposed formula. The Department will provide technical assistance to an eligible entity if it is necessary in order to develop a proposal which warrants the award of funds at the proposed allocation amount and if such assistance is requested on behalf of the eligible entity by the applying State agency.

Awards for targeted assistance programs will be made on the basis of the acceptability of proposals submitted on behalf of eligible entities and within the amounts allowed by the proposed allocation formula. The panel will make recommendations regarding acceptability of applications to the Director of the Office of Refugee Resettlement (ORR). Determination of the acceptability of applications, determination of whether an award will be made to a State or local entity, decisions to provide technical assistance, and determination of award amounts are at the discretion of the Director of ORR.

X. HHS Regulations That Apply

The following HHS regulations apply to grants under this Notice:

42 CFR Part 441, Subparts E and F, Services: Requirements and limits applicable to specific services—Abortions and Sterilizations:

45 CFR Part 16, Department grant appeals process.

45 CFR Part 74, Administration of grants.

45 CFR Part 75, Informal grant appeals procedures.

45 CFR Part 80, Nondiscrimination under programs receiving Federal assistance through the Department of Health, Education, and Welfare effectuation of Title VI of the Civil Rights Act of 1964.

45 CFR Part 81, Practice and procedure for hearings under Part 80 of this title.

45 CFR Part 84, Nondiscrimination on the basis of handicap in programs and activities receiving or benefiting from Federal financial assistance.

XI. Reporting and Recordkeeping

Section VII of this announcement establishes reporting requirements which necessitate OMB review and approval. HHS will seek OMB approval of these requirements.

Applications for these grants are to be submitted on Form SSA–96 which has current OMB approval (OMB No. 0960–0184). In completing Form SSA–96, States must address the evaluation criteria listed in Section VIII.

(Catalog of Federal Domestic Assistance No. 13.814, Refugee Assistance State Administered Programs)

Dated: February 25, 1983.

BILLING CODE 4190–11–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Shakopee Mdewakanton Sioux Community Resolution and Ordinance Regulating the Sale and Distribution of Intoxicating Beverages

February 18, 1983.

This Notice is published in accordance with the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8, and in accordance with the Act of August 15, 1953, 67 Stat. 586, 18 U.S.C. 1161. I certify that the following Resolution and Ordinance relating to the application of the Federal Indian Liquor Laws on the Shakopee Mdewakanton Indian Reservation, Minnesota, was duly adopted on December 12, 1982, by the Shakopee Mdewakanton General Council which has jurisdiction over the area of Indian country included in the ordinance, reading as follows:

John W. Fritz,

Assistant Secretary—Indian Affairs.

Liquor Ordinance

WHEREAS, The General Council of the Shakopee Mdewakanton Sioux Community has the power under the Constitution of the Shakopee Mdewakanton Sioux Community to promulgate resolutions governing the conduct of Business in the community; and

WHEREAS, The Shakopee Mdewakanton Sioux Community is desirous of establishing liquor outlets on the reservation; and

WHEREAS, A community liquor ordinance is necessary before such liquor outlets can be established;

NOW THEREFORE BE IT RESOLVED, that the Shakopee Wdewakanton Sioux Community hereby approves of the attached liquor ordinance for the Shakopee Mdewakanton Sioux Community; and

BE IT FURTHER RESOLVED, that this ordinance shall be given to the Minnesota Sioux Area Field Office for forwarding to Washington for publication in the Federal Register at the earliest possible date; and

BE IT FURTHER RESOLVED, that this resolution may be rescinded or amendment only by an affirmative vote of at least two-thirds (⅔) of the eligible voting members of the community.

CERTIFICATION: This resolution was passed by a vote of *twenty-five* (25) yes, *one* (1) no, *two* (2) abstentions, with a quorum present, at a duly called special meeting of the General Council held December 12, 1982 at the Shakopee Sioux Community Center Building.

/s/ Norman M. Crooks, Chairman

/s/ Amy E. Stade, Secretary-Treasurer

Shakopee Mdewakanton Sioux Community Liquor Ordinance

Section I. Definitions

A. "License" shall mean permission to operate an off-sale retail liquor outlet on the Shakopee Mdewakanton Sioux Reservation issued under the provisions of the ordinance.

B. "Vendor" shall mean a person holding a current valid license.

C. "Liquor Commissioner" shall mean a person appointed by the Shakopee Mdewakanton Sioux Community General Council to oversee liquor sales operations on the Reservation.

Section II. Liquor Commissioner

A. The term of the Liquor Commissioner shall be two years from the date of his/her appointment.

B. The liquor Commissioner must be a member of the Shakopee Mdewakanton Sioux Community 21 years of age or older.

C. The liquor Commissioner shall report at least monthly to the General Council on liquor sale operations within the reservation, shall promptly upon receipt remit any excise taxes, application or license fees collected to the Treasurer, and shall perform all other duties as set forth in this ordinance.

Section III. Licenses

There is hereby authorized to be issued a maximum of five annual licenses to operate as off-sale vendors under the terms and conditions of this ordinance.

1. Licenses shall be for the term of one year or less, running from the date of issuance to December 31 of the calendar year of issuance.

2. A fee for issuance of a license shall be $1000.00 payable upon receipt of the license.

3. Application procedure.

a. An applicant for a license must be a member of the Shakopee Mdewakanton Sioux Community 21 years of age or older.

b. The applicant shall complete an application form, as provided by the Liquor Commissioner, and shall submit it to him/her within 20 days after announcement that one or more licenses under this ordinance are available for issuance.

c. The applicant shall accompany his/her application with:

i. A non-refundable application fee of $10.00.

ii. Proof that the applicant's financial assets exceed his/her liabilities by an amount equal to or greater than *$5000.00.*

d. Twenty days after announcement that one or more licenses are available, the Liquor Commissioner shall declare the application period closed, shall promptly reject any incomplete application notifying the applicant at once, and shall proceed to evaluate the balance of the applications for the available licenses, according to the information contained therein and accompanying documents. He/she shall issue the available license(s) to the applicant(s) most qualified to operate as a vendor under the terms and conditions of this ordinance.

4. Upon receipt of a license hereunder, an applicant shall post a bond in an amount, to be established by the Liquor Commissioner annually, sufficient to ensure payment to the Community of the projected annual excise tax.

Section IV. Excise Tax

A. There is hereby imposed an excise tax on the sale of each bottle or other container of liquor sold by a vendor in the amount of *.5 cents a bottle* and case, .10 cents a keg.

B. Each vendor must file, with the Liquor Commissioner, a complete report of sales during a month and remit the excise tax on such sales. Such report and remittance must be made no later than the 15th day of the month following that to which the report applies.

Section V. Operation Under License

A. The license issued hereunder shall authorize the vendor to operate a retail sales outlet for the sale of unopened and sealed liquor or beer only.

B. All vendors must conform their operations to those laws of the State of Minnesota relating to the sale or possession of intoxicating beverages or beer as indicated in Minnesota Statutes Annotated.

C. A vendor must keep complete and accurate records of inventory, sales, payroll, taxes paid and withheld, and all other facets of business operations. The books and records maintained by each vendor operating under a license shall be open for inspection by the Liquor Commissioner at all times during normal business hours.

Section VI. Revocation or Suspension of License

A. The Liquor Commissioner may suspend a license issued under this ordinance for violation of any of the terms of this ordinance.

1. For failure to submit the report or remit the excise tax required by Section IV(B), or for refusal to permit inspection of books or records as required by Section V(C), such suspension shall cease upon compliance with the indicated section.

2. No suspension shall continue for more than ninety days, provided, however, that the Liquor Commissioner may make a recommendation at any time to the General Council that a license be revoked.

B. The General Council may revoke a license issued under this ordinance for violation of any of the terms of this ordinance.

1. Upon receiving a request, from the Liquor Commissioner or his/her assistant, to consider revocation of a license, the General Council shall schedule the matter for a hearing at a regular or special meeting of the General Council.

2. The General Council shall provide written notice at least 3 days in advance to the vender that revocation of his/her licenses will be considered.

3. The General Council shall permit statements or testimony by any person wishing to give such at the revocation hearing.

4. The General Council may, by majority vote revoke a license.

C. One prior license revocation shall not prevent a person, otherwise qualified, from applying for a subsequent license under Section III. Two prior license revocations shall render a person ineligible from applying for subsequent licenses.
